## **PREFACE**

Cooch Behar, which means 'the land of the Koches' has great historical traditions. Its history goes back into remote antiquity and references to this region occur in our Great Epics. The history of Cooch Behar, like that of Greece has its origin in mythology, but there is sufficient ground for contending that the earliest mythical narrations of Pragiyotisa or Kamrupa are far more reliable as historical sources than those of classical Greece. There are other important source materials from which it is not very difficult to cull an uniterrupted historical account of the district. Archeological researches into Bengal's antiquity, though not complete are quite significant for the purpose of building a history of this part of the country. There is also no dearth of comparatively modern chronicles, though strictly speaking they are just a little more than glimpses into medieval civilisation of the Koch country.

There have been a series of dynastic history under the patronage of the rulers of Cooch Behar. The first such account to which we find reference is Rajakhanda (original work now lost) by Kaviratna during the time of Maharaja Pran Narayan (middle of the 17th century). A more detailed history was written by Munshi Joynath Ghosh entitled Rajopakhyana under the active encouragement of Maharaja Harendra Narayan. Of course, at a later date in a case (Settlement Case No. 489 and 490 of 1871 A.D.) when an objection was raised against the genealogical table referred to in Rajopakhyana, the then Dewan Mr. C. Dutt wrote: "Joynath Munshi's book is not always quite correct." Under orders of Maharani Kameswari Devi (Danger Aye), consort of Maharaja Shibendra Narayan, Ripunjay Das wrote Maharaj-Vansavali. Durgadas Majumdar completed a book in 1863 A.D. entitled Rajvansavali when Maharaj Nripendra Narayan was only one-year old. These Vansavali manuscripts written largely on hearsay evidence and not free from patent discrepancies, concerned mainly the reigning house and not much with the conditions of the country. The first attempt to make a regional study of Cooch Behar was done by Harendra Narayan Chaudhuri in his 'The Cooch Behar State and its Land Revenue Settlement (1903).'

Travellers visiting this part of the country at a much early period of history left accounts describing geographical features of lands and various aspects of social, political and economic life of the people. The great chroniclers and gazetteer compilers like W. W. Hunter and Buchanan Hamilton also made a close study of this country in all the richness of its life and culture in their various works.

Khan Chaudhuri Amanatulla Ahmed compiled an authoritative history of the district entitled 'Kochbiharer Itihas' in Bengali, a very able English rendering of which was done by S.C. Ghosal in 1942. Ghosal in the beginning of the volume dealt with fairly an exhaustive bibliography on Cooch Behar.

Even after the Independence of India, Cooch Behar still remained a Feudatory State in political relations with the Government of India. In January 1950 Cooch Behar was merged with the State of West Bengal. Against this background of a changing country the whole fabric of the life and culture of the people had undergone a change, which needs careful perusal. This need was very much felt by Shri Asok Mitra, I.C.S., West Bengal's Census Superintendent in 1951, who attempted to present a regular gazetteer-type of account of the district in his celebrated 1951-District Census Handbook.

The District Census Handbooks were the most memorable achievement of the 1951-Census. The West Bengal series surpassed even all others in so far as they included a lengthy introduction and several important appendices in addition to the statistical tables. In 1961 while the tradition has been continued, efforts have been made to enlarge the scope and enrich the contents of the Handbook in several ways. Much of it is, of course, due to able guidance and

inspiration from Shri Asok Mitra, I.C.S., the Registrar General of India, to whom any word of tribute is too small to repay the debt I owe him.

The Handbook has been divided into three broad parts. Part I introduces the district to the readers in all its aspects. A very interesting feature of Cooch Behar's population study is that this district has recorded the maximum growth rate of population during the last Census decade. My main emphasis has, therefore, been on the review of population, its growth and distribution. A gazetteer of important places of this district has been appended.

Another interesting feature of the district of Cooch Behar is the enclaves i.e., island territories of one country inside another. These enclaves or chhitmahals, as they are popularly known, have created confusion all around. Even today they create immense administrative problems to the authorities. So far we did not have any connected historical account of the origin of these enclaves. I am fortunate in being able to present an excellent account of the enclaves of Cooch Behar written by Shri R. Banerjee, I. A. S., Commissioner, Presidency Division and Special Officer, Chief Minister's Secretariat, West Bengal. I am greatly beholden to him for this act of kind co-operation to me. This account being a basic study of the subject will, I believe, be of great use to the students of Indian History.

Part II of the volume deals with the various Census Tables and Official Statistics. As far as possible, an attempt has been made through the various statements presented under the official statistics to give an epitome of progress made by the district in various fields during the inter-censal period of 1951-61.

In Part III of the volume the basic economic data for the smallest administrative unit—the village have been presented indicating in addition the basic amenities available in each village. An alphabetical list of all villages and towns for each police station has been given preceding the village directory to facilitate reference.

Though compiled in the Census Office, District Census Handbooks are actually State Government Publications, the Home (C. & E.) Department looking after the administrative matters. I am deeply obliged to Shri S. Dutt Mazumdar, I. A. S., Secretary, Home (C. & E.) Department, without whose keen interest and many useful suggestions the publication of the handbooks would have been very difficult. Shri H. R. Deb, W. B. C. S., Assistant Secretary of that department also deserves my grateful thanks for his helpful attitude towards Census matters.

A book of this kind could not have been compiled but for the hearty co-operation and good-will extended by the various Government departments, and individual scholars, to whose kindness I am deeply indebted. Prof. A. K. Saha of Presidency College, Calcutta kindly revised the geological account of the district and Shri B. Maitra, Director, River Research Institute, West Bengal wrote a new account of the river Torsa for this handbook.

I am also greatly indebted to Shri N. K. Sengupta, I. A. S., Deputy Commissioner of Cooch Behar who took keen interest in the work all through. In spite of his being variously preoccupied he could give me time in discussing matters on different aspects of the district. Shri A. K. Banerjee, Additional Deputy Commissioner, Shri A. K. Dasgupta, W. B. C. S., Senior Deputy Collector, Shri N. K. Saha, W. B. C. S., Cheif Executive Officer, North Bengal State Transport Corporation, helped me with many useful informations of the district. Fr. Hosten of the Swedish Mission gave me the details of their Mission's activities among the tribals of the district. My grateful thanks are all due to them.

My special obligations are due to Shri A. Chandrasekhar, I. A. S., Officer on Special Duty, office of the Registrar General, India for his active support and encouragement all through, which gave me much inspiration for expiditious publication of the handbooks.

I also express my deep sense of gratitude to Shri J. C. Sengupta, I. A. S. under whose able guidance we took the

Census and tabulated the results. My thanks are also due to my colleagues Shri J. Datta Gupta, W. B. C. S. and Shri S. Sinha, W. B. C. S. for their unstinted help and co-operation. Shri Sinha's scholarly attitude, advice and criticism helped a lot towards betterment of the work. Shri Amalendu Mookerjee, formerly Assistant Editor of the District Gazetteers and now of the Tourism Department, Govt. of West Bengal, deserves my special thanks for many useful suggestions for the improvement of the volume.

Last, but not the least, my thanks are due to the management and staff of M/s. Anu Press, Calcutta for the fine printing and get-up of the Handbook.

Calcutta, The 28th June, 1966.

Bisweswar Ray

#### NOTE ON SPELLING

In the notes and tables the spelling of the police stations follows generally that adopted by the Home (Police) Department, and of towns by the Land & Land Revenue Department, Government of West Bengal.

In the District Map appearing in the frontispiece, which has been prepared in the office of the Director of Land Records and Surveys, Government of West Bengal, the names of the police stations have been spelt as per the records of that office.

## PART I

# INTRODUCING THE DISTRICT

#### INTRODUCTION

#### 1. NAME

Cooch Behar is the north-eastern district of the Jalpaiguri Division. In shape it is an irregular triangle.

The name Cooch Behar is a compound of two words: Cooch and Behar. Cooch is a corrupted form of Coch or Koch, the name of an ethnic group of people inhabiting largely in vast tract of land to the north-east of Bengal. Behar or more properly Vihāra denotes abode or sport. Cooch Behar means, therefore, the abode or land of the Koches.

The name Cooch Behar is rather of recent origin. It was spelt as such by an order published in the Cooch Behar Gazette, Part-I, 1896 (page 28) as—'His Highness, the Maharaja Bhup Bahadur having signified his approval of the use of the spelling, 'Cooch Behar', all other spelling of the word should be dropped'. Formerly the tract of land pertaining to the present district of Cooch Behar was a part of a much bigger kingdom which included in its dominion a large tract of Assam. In ancient times the country was called Kamrupa. Even during the reign of the last but one line of kings, the Khens, about more than four and a half centuries ago, this part of the country went by that name. In the works of Ain-i-Akbari and Baharistan-i-Ghaibi references are found to the 'Koch' country within which there were two kingdoms 'Kāmatā' and 'Kāmrupa'. Prannārāyan and Modnarayan, rulers of Cooch Behar in the 17th century, declared themselves as rulers of 'Kamata'. 'Comotay' was the appellation on Blaev's Map (1650 A. D.). In the Badsahnama and Sahajahannama, dated about the middle of the 17th century, the western portion of the country has been called Kochbihar in place of Kamata and the eastern portion Koch-Hajo in place of Kamrupa. In a sanad granted by a Ruler of Cooch Behar in the 18th century, 'Bihar' only occurs. In Renell's map (18th century) also the capital of the kingdom was styled as 'Bihar'. In the treaty between the East India Company and the Ruler of Cooch Behar in 1773, however, the kingdom was referred to as 'Koch bihar' and the capital 'Behar fort'. Dr. Buchanan Hamilton in his narrative written in the beginning of the last century mentioned the name of only 'Bihar'. Sir William Hunter was of opinion that 'Nijbihar' was the form recognised by the Durbar of Cooch Behar. In his Statistical Account of Cooch Behar (1876), Hunter made an attempt to derive the name from the Sanskrit 'Vihara', meaning recreation, especially applied to Buddhist monastery. According to him the appellation at the case of the Raja 'who repudiates the theory of a Koch descent is Nij Behar, the word nij 'own' (peculiar) being applied to distinguish the country from Behar proper'.

The district Cooch Behar was so called only after the Koch kings had come into power in the beginning of the 16th century, long after the Buddhist influence had died out in Bengal.

#### 2. POPULATION

Extending over an area of 1,289 sq. miles or 3,339 sq. kilometres the district is inhabited by 1,019,806 persons of which 539,694 are males and 480,112 females as per Census-1961. In the rural area of the district there are 948,360 persons (males 499,414 and females 448,946). In the urban area as many as 71,446 persons live (males 40,289 and females 31,166). These figures do not include those for the enclaves in Pakistan territory. In terms of population the district occupies the fifteenth place amongst the sixteen districts including Calcutta of the State of West Bengal. The district of Darjeeling is only below it. The position of the district among others may be seen in the diagram given at page IV.

#### 3. AREA

The present area of the district is 1,289 sq. miles according to the Surveyor General of India. Area figures according to the State Survey Department were not available because revisional survey operations and the consequent revision of the Jurisdiction Lists had not been finalised. According to the computation made in the Census office from the latest available Jurisdiction Lists the total area of the district is 1313.9 sq. miles of which 1307.0 sq. miles are rural and only 6.9 sq. miles urban. In terms of size this district occupies the twelfth place. The position of the district amongst others in terms of area may also be seen in the diagram given at page IV. The districts of Darjeeling, Hooghly, Howrah and Calcutta are smaller in size than the district of Cooch Behar. The changes in area between 1901 and 1961 are indicated below:

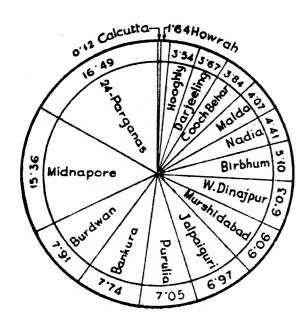

| Year | Area in Sq. Miles    |  |
|------|----------------------|--|
| 1901 | 1307                 |  |
| 1911 | 1307                 |  |
| 1921 | 1318<br>1318<br>1318 |  |
| 1931 |                      |  |
| 1941 |                      |  |
| 1951 | 1322.6               |  |
| 1961 | 1313.9               |  |

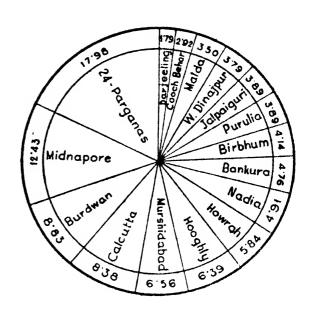

#### 4. ADMINISTRATIVE DIVISIONS

The district comprises five subdivisions namely, Sadar or Cooch Behar, Tufanganj, Dinhata, Mathabhanga and Mckliganj with their headquarters at the towns of their respective names. Cooch Behar town

#### COOCH BEHAR

PERCENTAGE OF AREA

#### PERCENTAGE OF POPULATION

Under the above treaty the Raja was bound to refer to the arbitration of the British Government all disputes between his subject and those of neighbouring States. Ten years after it was signed disputes on the Sikkim-Nepal frontiers arose and were referred to the Governor General. Two officers, Captain Lloyd and Mr. Grant, were deputed in 1828 to deal with the disputes and they penetrated into the hills as far north as Rinchinpong (in the Kulhait valley in Sikkim). Lloyd spent six days in February, 1829 in "the old Goorkha Station of Darjeeling" and was attracted by its advantages at a site for a sanitarium. Darjeeling was then deserted although it had been occupied by a large village and the residence of one of principal Kazis.

Mr. Grant reported accordingly to the Governor General Lord William Bentinck the numerous advantages promised by a Sanitarium at Darjeeling and also recommended its occupation for military purposes as the key of a pass into Nepal. The Governor General then deputed Captain Herbert, the Deputy Surveyor-General, to examine the country with Mr. Grant and in due course, the Court of Directors approved the project. General Lloyd (formerly Captain Lloyd) was directed to open negotiations with the Raja on the first convenient occasion and this occurred when General Lloyd was deputed to enquire into the causes of an incursion from Nepal of Lepchas who had taken refuge there from Sikkim. He succeeded in obtaining the execution of a deed of grant by the Raja of Sikkim on the 1st February 1835. The deed was worded as follows:

The Governor General, having expressed his desire for the possession of the hill of Darjeeling on account of its cooled climate for the purpose of enabling the servants of his Government, suffering from sickness, to avail themselves of its advantages, I, the Sikkimputtee Raja, out of friendship for the said Governor General, hereby present Darjeeling to the East India Company, that is, all the land south of the Great Rangit river, east of the Balasun, Kahail and Little Rangit rivers and west of Rungno and Mahanadi rivers.

This was an unconditional cession of what was then an uninhabited mountain. But in 1841 the Government granted the Raja an allowance of Rs. 3,000 per annum as compensation and this was raised in 1846 to Rs. 6,000 per annum.

After the cession, General Lloyd and a Dr. Chapman were sent in 1836 to explore and investigate the climate and the capabilities of the place. They spent the winter of 1836 and part of 1837 doing this and when it was finally decided to develop the site as a Sanitarium, General Lloyd was appointed a Local Agent to deal with applications for land which began to pour in from residents of Calcutta. Progress was rapid: whereas in 1836 General Lloyd and Dr. Chapman found only a few huts erected by the Raja of Sikkim, by 1840, a road had been made from Pankhabari; there was a staging bungalow there and at Mahaldiram; a hotel had been started at Kurseong and another at Darjeeling; and at Darjeeling 30 private houses had been erected

and nearly as many 'locations' or building sites had been taken up at Lebong.

The rest of the ceded area was however under forest and practically uninhabited. According to Captain Herbert, this was because about ten years previously 1,200 able-bodied Lepchas forming two-thirds of the population of Sikkim, had been forced by the oppression of the Raja to fly from Darjeeling and its neighbourhood and take refuge in Nepal. What little cultivation there had been was abandoned and the Raja prohibited his subjects from going to Darjeeling and helping in the establishment of new settlements.

In 1839 Dr. Campbell of the Indian Medical Service. British Resident in Nepal, was transferred to Darjeeling as Superintendent. In this capacity he was in charge not only of the civil, oriminal and fiscal administration of the district but also of political relations with Sikkim. Dr. Campbell gave much encouragement to immigrant cultivators and population rose from about 100 in 1839 to about 10,000 in 1849. "Whatever has been done here", wrote W. B. Jackson, an Inspecting Officer in 1852, "has been done by Dr. Campbell alone. He found Darjeeling an inaccessible tract of forest, with a very scanty population; by his exertions an excellent sanitarium has been established for troops and others: a Hill Crops has been established for the maintenance of order and improvement of communicatons; no less than 70 European houses have been built, with a bazar, jail and buildings for the accommodation of the sick in the depot; a revenue of Rs. 50,000 has been raised and is collected punctually and without balance; a simple system of administration of justice has been introduced. well adapted to the character of the tribes with whom he had to deal; the system of forced labour formerly in use has been abolished and labour with all other valuables has been left to find its own price in an open market; roads have been made; experimental cultivation of tea and coffee has been introduced and various European fruits and grapes; and this has been effected at the same time that the various tribes of inhabitants have been conciliated and their habits and prejudices treated with a caution and forbearance which will render further progress in the same direction an easy task."

In the meantime relations with Sikkim deteriorated. The increasing importance of Darjeeling under free institutions was a source of loss and frustration to the Lamas and leading men to Sikkim, headed by the Dewan Namguay, who were sharers in a monopoly of all trade in Sikkim and lost their rights over those slaves who settled as free men and British subjects in the Darjeeling territory. Frequent kidnappings and demands for return of slaves took place and the climax was reached when in November 1849 Sir Joseph Hooker and Dr. Campbell were made prisoners, while travelling in Sikkim with the permission of the Raja and the British Government. Various demands were made as conditions of release but the Sikkimese eventually released both prisoners unconditionally on the 24th December 1849. In February 1850 a

small punitive force entered Sikkim and remained on the north bank of the Great Bangit river for a few weeks. But the serious punitive action taken was the withdrawal of the grants of Bs. 6,000 from the Baja and the annexation of the Terai and the portion of the Sikkim hills bounded by the Bammam and the Great Bangit on the north, by the Tista on the east and by the Nepal frontier on the west. The area annexed was 640 square miles in extent.

Immediately after annexation of the Terai in 1850 the southern portion was placed under the Purnea district, but in consequence of the dislike of the inhabitants to this transfer it was cancelled and the whole area was attached to Darjeeling. At the time of annexation there were Bengali officers in the Terai called Chaudhuris who exercised civil and criminal powers.

The Terai and the hill territory annexed from Sikkim were managed by the Superintendent who from the 8th May 1850 was called the Deputy Commissioner. The change was welcomed by the inhabitants who now had to pay only small fixed sums into the treasury in Darjeeling instead of having to meet uncertain and fluctuating demands in kind and for personal service made by the Raja and Dawan.

The annexations brought about a significant change in the relations between Sikkim and the British. Previously the Darjeeling district had been an enclave in Sikkim territory and, to reach it the British had to pass through a country acknowledging the rule of a foreign, though dependent, Raja. After the annexation British territory in Darjeeling was continuous with the British districts of Purnea and Rangpur in the plains and the sikkim Raja was cut off from access to the plains except through British territory.

For some years after the annexations, relations with Sikkim were not disturbed but raids on British territory later recommenced and British subjects were carried off and sold as slaves or detained in Sikkim. The Raja was now an old man of nearly 80 and had retired to Chumbi in Tibet leaving the Government to Dewan Nonguay who had arrested Dr. Campbell and Dr. Hooker in 1849. Six months of negotiation proved fruitless and it was decided to take possession of the portion of Sikkim north of the Ramman and west of the Great Rangit until British subjects were released, offenders handed over and security obtained against a recurrence of similar offences.

With this object Dr. Campbell, with a small force of 160 rank and file, crossed the Ramman in November 1860 and advanced as far as Rinchinpong. He was however attacked and forced to fall back on Darjeeling. Later Colonel Gawler with Sir Ashley Eden as Envoy and Special Commissioner moved with artillery and a force of 2,600 men and entered Tumlong, the capital of Sikkim, in March 1861. The Dewan fied and the Raja abdicated in favour of his son with whom, on the 28th March, a treaty was made; which was of

particular importance to Darjeeling because it finally put an end to frontier troubles with Sikkim and secured full freedom for commerce across the Sikkim border.

But frontier trouble elsewhere was not over. Along their long frontier with India, the Bhutanese were responsible for a series of incursions in which property was plundered, lives taken and many innocent persons carried off into captivity. In 1862 news came that the Bhutanese were preparing to make an attack on Darjeeling and troops were hurried up from Dinapore to restore confidence. This was followed in 1868 by the despatch of a special mission to Bhutan under Sir Ashley Eden to settle differences and obtain the restoration of plundered property. The Mission failed as the British Envoy was compelled by threats to sign a document giving up all claims to the Bhutan Duars on the Assam frontier. He was treated with indignity and only with difficulty in April 1864 succeeded in leaving Punakha by night and returning to Darjeeling.

Negotiations continued fruitlessly and the Government of India decided to annex the Bengal Duars and such hill territory as might be necessary o prevent Bhutanese incursions into Darjeeling district or the plains south of Bhutan. Small expeditions were sent into Bhutan in the w nter of 1864. These met with very little opposition and the operations terminated when, in November 1865, the treaty extorted from Sir Ashley Eden was replaced by a fresh one by which what is now the Kalimpong sublivision as well as the Bhutan hills were ceded to the British in return for an annual subsidy. The Kalimpong area was first notified as a subdivision under the Deputy Commissioner of the Western Duars District but in 1866 it was transferred to the district of Darjeeling. This was the last addition to the district which then reached its dimensions.

The year 1866 thus marks an epoch in the history of the district, peace was then established within and on its borders and development, which had been considerable in spite of pioneering difficulties and interruptions due to political disturbances, now proceeded with more certainty and momentum.

After Kalimpong had been brought under British Administration the district was divided into two subdivisions: the headquarters subdivision with an area of 960 square miles including all the hills on both sides of the Tista and the Terai subdivision with an area of 274 square miles which included the whole of the country, at the foot of the hills. The headquarters of the Terai subdivision were at Hanskhawa near Phansidewa from 1864 to 1880 when they were transferred to Siliguri. Then the metre gauge railway of the North Bengal State Railway had been extended to Siliguri and Siliguri, at that time in the Jalpaiguri district, was transferred to Darjeeling district with a small surrounding area and made the headquarters of the Terai subdivision.

In the meantime Kurseong had begun to develop and in 1891 it was made the headquarters of a new subdivi-

sion which included both the Terai and the lower hills west of the Tista.

Later in 1907 Siliguri was made a subdivision, thus re-establishing the Terai subdivision which had in 1891 been absorbed into the Kurseong subdivision. Up to 1907 there had been a Deputy Magistrate at Siliguri working under the Subdivisional Officer, Kurseong, and managing the Terai Government Estate under the Deputy Commissioner.

Kalimpong in the meantime had been in the Sadar subdivision with a manager of the Khas Mahals working at Kalimpong under the Deputy Commissioner, police work being controlled by an Inspector. In 1916 the Kalimpong subdivision was created as a preliminary to working out development schemes in Kalimpong.

The district was included in the Rajshahi Division until October 1905 when, it was transferred to the Bhagalpur Division. With the re-arrangement of the provinces it was re-transferred to the Rajshahi Division in March, 1912.

The Partition of Bengal in August, 1947 left the boundaries of the district in tact and in the share of West Bengal. The district was placed thereafter in the Presidency Division.

The district is at present under the newly created Jalpaiguri Division. The Government of West Bengal Home (General Administration) Department Notification No. 998 G. A. dated the 4th March, 1963 created the Jalpaiguri Division. The Notification runs thus:

"It is hereby notified for general information that the Governor is pleased to direct that there shall be a new Division in West Bengal, namely, the Jalpaiguri Division, with headquarters at Jalpaiguri, and that the said Division shall comprise the following districts, namely:

(1) Darjeeling, (2) Jalpaiguri, (3) Cooch Behar, (4) Malda, and (5) West Dinajpur".

Under the Bihar and West Bengal (Transfer of Territories) Act, 1956, territories were transferred to West Bengal from two districts of Bihar, viz., the district of Purnea and Manbhum. Section 3(1) (a) of the Act reads as follows:

- 8(1) As from the appointed day, there shall be added to the State of West Bengal the territories which on the 1st day of March, 1956, were comprised in:
- (a) that portion of Kishanganj Sub-division of Purnea District which lies to the east of the boundary line demarcated in accordance with the provisions of sub-section (2) by an authority appointed in this behalf by the Central Government and that portion of Gopalpur Thana of the said district which lies to the east or north, as the case may be, of the said boundary line,

Shri V. Viswanathan, I.C.S., was appointed by the Central Government as the authority to demarcate the boundary line between the States of Bihar and West Bengal in the Purnea District in pursuance of the provisions of this section. His report was published under Government of India, Ministry of Home Affairs Notification No. S.R.O. 2478, dated the 25th October, 1956 (Gamette of India, Extra Ordinary, Part II—Section 8 of the 25th October, 1956). This Notification was subsequently amended by Notification No. S.O. 1728, dated the 11th July, 1960 (Gamette of India, Part II—Section 8 of the 16th July, 1960).

Under sub-section (3) of Section 3 of the Act, the territory specified in clause (a) of sub-section (1), (i.s., the territory transferred from the Purnes District) was to be included in the Darjeeling District of West Bengal.

On 1st November 1956, the day on which the transfer of territories came into effect, the Government of West Bengal issued a series of Notifications to being the gained territories into the fold of its existing administrative set-up. The notifications are listed below:

#### No. 3858 G.A.

Refixing the jurisdiction of the existing district of Darjeeling so as to include within it the territory transferred from the Purnea District of Bihar.

#### No. 3859 G.A.

Forming a new police station under the name of Chopra Police Station comprising those portions of Thakurganj and Chopra Police Stations of the Purnea District of Bihar which were transferred to the Darjeeling District of West Bengal.

#### No. 3860 G.A.

Forming a new police station under the name of Islampur Police Station comprising that portion of Islampur Police Station of the Purnea District of Bihar which was transferred to the Darjeeling District of West Bengal.

#### No. 3861 G.A.

Forming a new police station under the name of Goalpokhar Police Station comprising the Goalpokhar Police Station and that portion of Kishanganj Police Station of the Purnea District of Bihar which was transferred to the Darjeeling District of West Bengal.

#### No. 8862 G.A.

Forming a new police station under the name of Karandighi Police Station comprising that portion of Karandighi Police Station of the Purnea District of Bibar which was transferred to the Darjeeling District of West Bengal.

#### No. 8868 G.A.

Befixing the jurisdiction of the Siliguri Subdivision of the Darjeeling District so as to include within it the new police stations of Chopra, Islampur, Goalpokhar and Karandighi.

As already stated, it was provided for by the Parliament that the territory transferred from the district of Purnea to the State of West Bengal should be annexed to the district of Darjeeling. The Notifications issued on the 1st. November, 1956 only followed up this provision. On the 2nd November, 1956, however, the Government of West Bengal issued another series of notifications transferring this territory from the district of Darjeeling to the district of West Dinajpur. The notifications were:

#### No. 3875 G.A.

Including the new police stations of Chopra, Karandighi, Islampur and Goalpokhar in the district of West Dinajpur.

#### No. 3877 G.A.

Refixing the jurisdiction of the Siliguri Subdivision of the Darjeeling District so as to exclude from it the new police stations of Chopra, Karandighi, Islampur and Goalpokhar.

The administrative arrangement in this part of the transferred territory underwent another reshuffling on the 21st March, 1959, when further changes came into effect under a series of notifications issued on the 20th March, 1959:

#### No. 1176 G.A.

Redefining the limits of the districts of West Dinajpur and Darjeeling by transferring that portion of the Chopra Police Station which lies to the north of the river Mahananda from the West Dinajpur District to the Darjeeling District.

#### No. 1177 G.A.

Redefining the limits of the Phansidewa Police Station of Darjeeling District and Chopra Police Station of West Dinajpur District by transferring that portion of the Chopra Police Station which lies to the north of the river Mahananda from the Chopra Police Station to the Phansidewa Police Station.

The Notification No. 1177 G. A., dated the 20th March, 1959 created some confusion regarding the area figures of the Darjeeling district. The notification did not describe the villages which were involved in the jurisdictional change and the river Mahananda, the northern bank of which now constituted the boundary between two police stations and, for that matter, between two districts, was found to cut through one or two revenue mausas. It was observed, however, that this portion of the transferred territory roughly coincided

with the 12 villages of the old Thakurganj Police Station of Purnea District which were transferred to West Bengal. The area figure of 56.96 sq. miles, furnished for these villages by the Superintendent of Census Operations, Bihar, was therefore taken to be the area of this tract.

A new police station designated as Naxalbari was carved out of the two police stations of Kharibari and Siliguri in 1960. The notifications are given below:

Notification No. 414 Pl, dated 3rd February, 1960 reconstituting the area of Kharibari Police Station with J.L. Nos. 1 to 54, 86 to 96, 98 to 103 of Kharibari Police Station.

Notification No. 415 Pl, dated the 3rd February. 1960 reconstituting the area of Siliguri Police Station with J.L. Nos. 1 to 16, 19 to 63, 73 to 79, 93 to 115 of Siliguri Police Station.

Notification No. 416 Pl, dated the 3rd February, 1960 creating a new police station styled as Naxalbari Police Station with J. L. Nos. 55 to 85 and 97 of Kharibari Police Station and J. L. Nos. 17, 18, 64 to 72, 80 to 92 and 116 to 166 of Siliguri Police Station.

The district was formerly a non-regulation district, that is to say. Acts and Regulations did come into force unless they were specially extended to the district. Darjeeling had no representative in the Legislative Council constituted under the Government of India Act, 1919. It was excluded and declared a backward The administration of the district was then tract. vested in the Governor in Council and expenditure of the internal administration of the district was not subject to the vote of the Legislature. The effect of exclusion was that any Act passed by the legislature which extended to the whole of Bengal automatically applied to the Darjeeling district, unless the Governor in Council directed that the Act in question should not apply or that it should apply sudject to such modifications as the Governor thought proper.

Under the Government of India Act, 1935, the district was made a partially excluded area under section 92 of the Government of India Act, 1935, no Act of the Provincial or the Central Legislature applying to it unless the Governor by public notification so directed and the Governor in giving such a direction with respect to any Act might direct that the Act would, in its application to this district, or to any specified part of it, have effect subject to such exceptions or modifications as he thought fit.

According to the Constitution of India the district no longer enjoys special privileges and all statutes except the Bengal Tenancy Act in certain of its particulars apply. The Deputy Commissioner of Darjeeling is now the same as a District Magistrate and has to be notified as such in the Official Gasette when a new Deputy Commissioner is appointed. The authority of the Deputy Commissioner is greater in Darjeeling than that of the District Officer in other West Bengal districts by

reason of his powers of control over a very considerable Khas Mahai and over most of the bazars in the district.

The revenue, police and judicial jurisdiction of the district are conterminous with the geographical boundsries of the district. The Deputy Commissioner of Darjeeling is also the District Magistrate and he is in overall charge of the district administration. He is assisted by an Additional Deputy Commissioner, who is also in immediate charge of the revenue administration of the district. The Additional Daputy Commissioner is also the Director of Siliguri Planning Organisation. There is a subdivisional Officer in Charge of each of the subdivisions of Sadar, Kalimpong, Kurseong and Siliguri. The Sublivisional Officer of Sadar has his headquarters at Darjeeling, which is also the headquarters town of the Darjeeling district. The sanctioned strength of the State Civil Service officers is two officers belonging to West Bengal Civil Service and one officer belonging to West Bengal Junior Civil Service at Sadar sublivision, two officers of the West Bengal Civil Service and one officer of the Junior Civil Service at each of Kalimpong and Kurseong subdivisions, and three officers

of the West Bengal Civil Service and four officers of the West Bengal Junior Civil Service at Siliguri. But in August 1965, there were three officers of each cadre at Sadar subdivision, two West Bengal Civil Service and one West Bengal Junior Civil Service officers at Kalimpong, two West Bengal Civil Service officers at Kurseong and three Deputy Magistrates and three Sub-Deputy Magistrates at Siliguri. There are 10 Davelopment Blocks covering the 13 police stations of the district. The Block Davelopment Officers work under the supervision of the Special Officer, Planning and Development. who himself works under the control of the Deputy Commissioner. There is a Superintendent of Police and one Additional Superintendent of Police and three Deputy Superintendents of Police at Sadar. There is also a Subdivisional Police Officer each at Siliguri and Kalimpong. The Daputy Commissioner is in overall charge of the excise administration There is a Superintendent of Excise belonging to the West Bengal Excise Service who helps the Deputy Commissioner in smooth running of the excise administration. There is a District and Sessions Judge with his headquarters at Darjeeling who is also the Judge of the Darjeeling Special Court.

#### PHYSICAL ASPECTS

#### 1. LOCATION AND BOUNDARIES

The district of Darjeeling lies between 26°31′ and 27°18′ north latitude and between 87°59′ and 88°53′ east longitude and its total area is about 1,200 square miles. The principal town and administrative head-quarters of the district is Darjeeling town at 27°3′ North latitude and 88°16′ East longitude.

In shape, the district is an irregular triangle. The northern boundary commences on the west at the peak of Phalut nearly 12,000 feet high, the trijunction of the boundaries of Nepal, Sikkim and India. This boundary runs east from Phalut along a ridge descending to the Rammam river. From there the boundary follows the course of that river until it joins the Rangit and then follows the great Rangit until it reaches the Tista. Proceeding east of that junction the boundary follows the Tista upstream until its junction with the Rangpo Chu, thence it proceeds first up the Rangpo Chu and then up the Rushett Chu, thence the Rushett Chu and the Sikkim and Bhutan boundary as marked by pillars to the Ne Chu: then the Ne Chu to its junction with the De Chu or Jaldhakar; thence it follows that river southward until the Jalpaiguri district is reached in the Khumani forest.

On the west the district is bounded by Nepal. From Phalut the western boundary follows the southward ridge until it joins the Mechi river which continues as the boundary right upto the plains, thence by the boundary of Nepal up to the southwestern corner of the district. On the south lies the district of Purnea and West Dinajpur intercepted by the Mahananda river and on the east the district is bounded by E. Pakistan and the Jalpaiguri district.

#### 2. NATURAL DIVISIONS

The area of the district is not marked by any natural features as a region complete in itself. It consists of a portion of the outlying hills of the lower Himalayas and a stretch of territory lying along the base of the hills known as the Terai. The range of altitude is considerable. The Terai is only 800 ft. above sea-level but there are parts of the district in the hills which are nearly 12,000 feet high. Geographically, the Terai belongs to the plains of India but geologically it is a sort of neutral country; the greater part of it being composed neither of the alluvium of the plains nor of the rocks of the hills, but of alternating beds of sand, gravel and boulders brought down from the mountains. It is traversed by numerous rivers and streams flowing out of the hills; it is unhealthy and in places marshy.

North of the Terai, the Himalayas stand out in a succession of bold spurs, the appearance of which has been compared with that of the weather-beaten front of mountainous coast. The change from hills to plains is very abrupt and can be appreciated more vividly by observation on a clear day from above. From Kurseong or other view-point, the observer looking southwards will see the hills descending steeply below him and suddenly ending and from their foot the plains stretching away without any undulation to the southern horizon.

The hill portion of the district is a confused labyrinth of ridges and narrow valleys. There are no open valleys, no plains, no lakes and no precipices of consequence. Most of the ridges are forest clad though on lower slopes the forests have often been cleared for tea and other cultivation. The main ridges wind and zigzag in all directions, giving off a number of long spurs on either flank. For the most part the ridges stretch from north to south while the courses of the principal rivers are in the same direction; but many of the spurs and of the torrents flowing between them run east and west and even in some areas from south to north. The valleys have a great range of altitude, climate and aspect and some are thousands of feet deep. Hills and valleys are covered in many places with a dense mass of forest, festooned with moss and lichens and dripping with isture.

In spite of the confused nature of the mountain masses, certain clearly defined features can be observed. The highest ground is in the north-west where the Singalila ridge enters the district at Phalut. The ridge is nearly 12,000 feet high at Phalut and further south at Sandakphu; from there it descends to Manibhanjan (6,000 feet) as the boundary between Nepal and the district. The ridge continues southward to the level of the plains first as the boundary and then as the top of slopes on the left bank of the Mechi river.

From Manibhanjan eastward, there is a ridge which undulates up to the pass at Ghum and then rises more steeply to the heights of Senchal and Tiger Hill (8,600 feet). It then turns southward, gradually descending to Mahaldiram and Dow Hill above Kurseong and then still further southwards down to the plains. From this main ridge spurs branch down on either side, the more prominent on the east side being the Takdah-Peshok ridge descending to the junction of the Rangit with the Tista and the Sittong spur further south. Darjeeling town is on a spug running north from the Manibhanjan-Senchal ridge which divides below the town into the Tukvar and the Lebong spurs before they descend to the Rangit river.

East of the Tista, the highest ground is at the Rishi La (10,800 feet), the trijunction of Bhutan, Sikkim and India. From here one of the more prominent ridges runs south-east and cuts off the

Jaldhaka valley from the rest of the district. Another ridge descends to Labha just under 7,000 feet above the sea. From here an important spur leads south-west ward down to the plains and another north-west to Rissisum where it joins a ridge running north-east to south-west. The Pedong and the south-western spur passes through Kalimpong and descends abruptly into the Tista valley.

#### 3. RIVER SYSTEM

The rivers of the district drain ultimately to the south, though the west to east ridge across it causes a series of Tista tributaries rising on its northern face to flow northwards and others flow east or west before joining the main river.

Dominating all the other rivers in the district is the Tista which rises in a glacier in north Sikkim 21.000 feet above sea-level and drains the whole of Sikkim. It forms the boundary of the district from the point where it is joined by the Rangpo down to its junction with the Great Rangit flowing in from the west. From that point it lies entirely in the Darjeeling district until it leaves it at Sivok. ultimately entering the Brahmaputra in Rangpur district (East Pakistan). In Darjeeling district, its principal tributaries are the Rangpo and the Rilli on its left bank and the Great Rangit, the Riyang and the Sivok on the right bank. The river is bridged by a suspension bridge near Melli. In the gorge, where both banks are in the district. there are three bridges two of reinforced concrete carrying heavy road traffic and one suspension bridge carrying only animals and pedestrians.

The Tista is a broad mountain torrent with numerous shallows and rapids. Its current is swift and dangerous, running in places at 14 miles an hour and it is liable to sudden rises in level due to its flow being constricted in a gorge.

In the dry season its waters are sea green. It begins its annual rise when the north Sikkim snows melt. The advent of the rains brings a bigger rise and the water than acquires a milky hue from detritus in suspension. Below its junction with the Rangit the river traverses the district in a deep gorge where it is not 100 yards broad; but as soon as it debouches into the plains it widens and becomes two or three hundred yards from bank to bank. It is not navigable by boats in the districts, although for bridge building boats have been used and for other purposes rafts are operated on cocasions.

The scenery along the banks of the Tista is extremely beautiful. The gorge is narrow and winding and the steep sides are clothed in dense forest broken at intervals by side valleys. Up the gorge and the side valleys can occasionally be obtained glimpses of high mountain masses; near at hand the vegetation and insect life is gorgeous in its tropical splendour. In June 1950 very heavy rainfall in the course of 72 hours burst one of the catchment lakes of the Tista in Sikkim as a

result of which the river has become more destructive than ever before.

Of the tributaries of the Tista, the Great Rangit is the most important. It enters the district from Sikkim at the point on the northern boundary where it receives the Rammam on its right bank. Below that junction, it flows eastwards, receiving the Little Rangit and the Rangnu as tributaries from the Darjeeling side. The Ramman rises under Phalut mountain, the Little Rangit under Tanglu and the Rangau tears down from Senchal in a valley several thousand feet deep; though its roar is heard and its valley is visible from end to end, the stream itself cannot be seen from above, so deep has its channel been cut.

The Great Rangit is a graceful mountain torrent with a stony or sandy bed. Its banks are usually clothed in forests but here and there can be found patches of cultivation. Its meeting with the Tista provides one of the most picturesque scenes along its course. Here, there is a great difference in the colour of the waters of the two rivers, that of the Tista being cloudy while the water of the Rangit is dark green and very clear. There is no less marked a difference in the temperature of the two rivers, the water of the Rangit being appreciably warmer than that of the Tista. The colour and the coldness of the latter are no doubt due to the number of glaciers drained by it; while the Rangit is chiefly supplied by the rainfall of the outer ranges of the Senchal and Singalila hills and hence its water is warmer and clearer, except in the height of the rains.

East of the Tista, are rivers debouching from the foothills which, like it, flow into the Brahmaputra. All are torrents subject to violent changes in volume, for the hills here intercept very heavy rainfall and the catchment areas of the rivers are small. The most important of these eastern rivers is the Jaldhaka whose catchment area is cut off from the rest of the district and reaches up to Gnatong in Sikkim. From points on the Tibetan trade route near Gnatong 12.000 feet above sea leavel one can look down and see, in a deep valley, the course of this river like a silver shaft pointing southward in a straight line. The banks are steep and clothed in jungle right down to the plains.

The Jaldhaka carries the largest volume of water of all this group of eastern foothill rivers. Those nearest the Tista, the Lish, the Gish and the Chel emerge from the hills carrying great volumes of stones, mud and sand torn from their catchment areas by erosion and landslides. The Lish and the Gish fill up their beds higher and higher with detritus and engineers find it difficult to make additions to bridges fast enough to keep pace with the rise in the level of the river beds.

The rivers to the west of the Tista, the Mahanadi, the Balasan and the Mechi all flow into the Ganges. The Mahanadi has its source near the mountain of Mahaldiram to the east of Kurseong. Its catchment area is small but receives a high rainfall in the monsoon.

After leaving the hill, the Mahanadi flows south as far as Siliguri, where it changes its direction more to the south-west and forms the boundary between the Terai and the Jalpaiguri district as far as Phansidewa.

The Balasan rises near Lepchajagat on the Ghum-Simana ridge and its valley west of Kurseong is larger than that of the Mahanadi although it does not receive so heavy a rainfall. After entering the Terai it divides into two streams. One, called the New Balasan, joins the Mahanadi just below Siliguri; the other branch, the Old Balasan, continues southward and passes out of the district to join the Mahanadi lower down in the Purnea district. The new channel is said to have been caused more than 100 years ago by Meches damming up the stream for fishing. However that may be, it is a fact that, at the present time the volume of water flowing in the Old Balasan is considerable and fluctuations in its volume occur which are dangerous to roads and bridges crossing it.

On the extreme west is the Mechi river, part of the district boundary with Nepal, whose chief tributary comes from beyond the frontier. Landslips in Nepal bring down much detritus into the Mechi, the bed of which near the mouth of its gorge is, in the dry season, characteristic of the rivers of the hill face—a stretch of loose and water-worn stones intersected with water channels. The spread of stones surges down southward and where the river emerges from the hills, attacks fields and forests, being at one point pushed further into the attack by another stone stream of delta formation, the mouth of a second tributary from the Nepal side of the main river.

#### 4. GROLOGY

The geological formations of the Darjeeling district consist of unaltered sedimentary rocks, confined to the hills on the south, and different grades of metamorphic rocks over the rest of the area. The outcrops of the various rocks from a series of bands more or less parallel to the general line of the Himalaya and dipping one beneath the other into the hills. A characteristic feature of the southern area is that the older formations rest on the younger, showing a complete reversal of the original order of superposition.

The great range was elevated during the Tertiary period, on the site of an ancient sea that had accumulated sediments of different geological ages. The mountains are made of folded rocks piled one over another by a series of north-south horizontal compression movements and tangential thrusts which also folded the strata on the sea-floor and caused their upheaval by stages. At many places the formation have been intruded by granites. The mountains have incorporated some of the rocks of Peninsular India, which seem to have extended northwards as far as the Himalayan sea. Frequently the strata within the range are inverted due to the overturning of the

folds and their dislocation. Features of such inversion, bringing the older beds above the younger, characterise, the whole length of the outer Himalays.

The present relief of high peaks and deep valleys has been carved by wind, water and snow, three principal agents of denulation. The products of the disintegration of the mountains have been swept over the submontane tract as the rivers debouch into the plains. The Terai and the plains at the foot of the Himalaya were given their present form after the final upheaval of the range and consist of almost horizontal layers of unconsolidated sand, silt, pebbles and gravel.

The foothills, north of the Terai, are made of similar but well-cemented and more compact alluvial detritus consisting of soft, grey massive sandstones, mudstones, shales, mottled clays, conglomerates and subordinate bands of earthy limestone and lignite. The rocks are of Tertiary age and have been included in the Nahan stage of the Siwalik system of the outer Himalaya. The Himalaya, by an old river system draining the young mountains, and was incorporated in the foothills during the later stages of uplift.

Resting over the Siwalik beds is a group of still older rocks consisting of coarse, hard sandstone, sometimes silicified into quartzites, of carbonaceous and splintery slates, of shales and of impersistent seams of powdered coal. The beds have been invaded in places by minor intrusions of lamprophyre. The shales have yielded plant fossils similar to those found in Damuda stage of the great coalbearing Lower Gondwana system of Peninsular India, ranging from Permo-Carboniferous to Permian in age.

North of the Gondwana outcrops the hills are occupied by a group of low grade metamphosed sediments represented by quartzites, slates, phyllites and foliated rocks composed of flaky minerals such as graphite, chlorite and sericite. Occasional minor bands of altered basic igneous rocks also occur. The group overlies the Gondwanas and is known as the Daling series.

The Daling series rests under a variety of foliated and banded metamorphic rocks, partly sedimentary and partly igneous in origin. These rocks are known under the general name of Darjeeling gneiss. They are composed of micaschists and gneisses; some of the gneisses have been formed by injections of granitic fluid along the micaceous layers of the schists. Where so king has been thorough, the gneisses approach granites in composition and are made of biotise muscovite, quarte and felspars. The sedimentary varieties of the Darjeeling gneiss contain such minerals as garnet, sillimanite, kainite and staurolite, the presence of which Indicates that the rocks were subjected to higher temperature and pressure than the Daling rocks. The Darjeeling gueiss also carries subordinate bands of quartrite.

The formations of the southern area, with minor exceptions, are inclined at high angles towards the north and north-west. The Tertiaries fringe the older rocks on the south, almost continuously from close to the Mechi river eastward to the Jaldhaka. The Gondwanas constitute a narrow band between the Dalings and the Tertiaries running from Pankhabari to the Jaldhaka. A thrust relations is clear between the Gondwanas and the Siwaliks; a thrust plane is also found between the Gondwanss and the Dalings. The Buxas, overlying the Gondwanas, occur only at the extreme eastern end of the District. The Dalings occupy the entire length of the District following more or less the same trend and inclination as the younger rocks. The Darjeeling gneiss occupies the greater part of the district; it occupies the higher reaches of the hills. On the journey between the plains and Darjeeling, the Tertiary beds crop out between Sukna and Chunabhati, the coalbearing Gondwanas below Tindharia, the Daling rocks between Tindharia and north of Gayabari, and the Darjeeling gneiss over the rest of the distance.

The Daling series appears in the Tista valley between Kalijhora and Tangpo, and extends into Sikkim. It is present in the Rangit valley below Darjeeling and the Ghum Range where it has southerly dips. where in both the valleys it occurs below the Darjeeling gneiss. From the disposition of low grade metamorphic rocks underlying highly metamorphosed ones, some geologists consider the Dalings and the Darjeeling gneiss are two distinct series and maintain that the latter has been pushed over the former and separated from them by a thrust plane. Others, however, regard the Darjling gneiss as the granite-injected and highly metamorphosed upper part of a great sedimentary succession, of which the Dalings represent the lower part. No final decision has yet been reached in the matter and the age and relations of the Darjeeling gneiss are uncertain.

#### 5. MINERALS, MINES AND QUARRIES

The minerals of the district include coal, graphite, iron, copper ores, lime, etc. But none except coal has so far been exploited with profit. The Gondwana beds contain coal which has a variable ash content. The beds are contorted, faulted and inclined at high angles. The coal is badly crushed and has been rendered powdery, friable and flaky; it does not seem usable for commercial purposes except when coked or converted into briquettes. The high inclination of the coal seams, their impersistence due to faulting and their inaccessibility are the obstacles to their economical development, Mining operations are being carried out at the Daling-kot coalfield below Nimbong in the Kalimpong subdivision.

Graphite of an inferior quality occurs in the semigraphitic schists of the Rakti river. As far as is known it is of no economic value.

Iron-ore, varying from a strong ferruginous clay to an impure brown hematite, is found at Lohargarh to the south-west of the district below Pankhabari and, according to old reports, was formerly worked. High grade magnetite and micaceous hematite, free from sulphur and phosphorous, form a band about 20 feet thick at Samalbong about a mile east-south-east of Sikbar to the east of the Tista. The ore is said to have produced iron of the best quality in the past.

Copper-ores, chiefly chalcopyrite, occur in the rocks of the Daling series near Ranihat, on the western side of Mahanadi, near the mouth of the Balfupani: at Peshok: at a place 2 miles north-east of Kalimpong: on the left bank of the Tista river, east of Mangpu: in a ravine near Sampther: and in the neighbourhood of the Chel river. No attempt has yet been made to exploit the deposits by modern methods. Concessions were taken out in the past but working was unsuccessful. The number of mines and old workings deserted by the local people shows that even they did not find copper smelting in the Darjeeling hills lucrative.

An occurrence of arsenical Pyrites has been reported from the western side of Sampther hill, at about a mile and a half north-east of Yongti mine. The ore occurs in quartzschist as a seam one foot in thickness.

There are three possible sources of lime in the district, viz., the dolomite of the Buxa series, the limestone bands in the Tertiary rocks and the calcareous tufa deposited by water at numerous localities, chiefly at the junction of the Gondwana and the Tertiary rocks. The tufa is fairly pure and contains over 90 per cent of carbonate of lime.

The district does not possess high class building or ornamental stone but practically all formations yield stone that can be used for building purposes. Stone is procurable everywhere in the hills from rocks near at hand such as the Daling beds, which yield coarse slate and quartzite, or the harder Tertiary and Gondwana sandstones near the foot of the hills to the common Darjeeling gneiss, which can easily be split and dressed into conveniently sized blocks for use in buildings, revetments and protection walls. The Works and Buildings and the Forest Departments of the West Bengal Government maintain several quarries for road metal for which quartzite and gneiss are commonly used.

The Darjeeling gneiss decomposes superficially into a light brown plastic clay. The Dalings too decompose into a similar clay and both the varieties are used for making bricks. Some varieties of Dalings decompose into a white clay which is suitable for pottery and white painting.

#### 6. Som

The soil in the Terai is composed of alluvium, a light sandy loam being the most common. There are also considerable tracts of sandy or gravelly soils, unsuitable for cultivation. In the hills, cultivators recognise only three kinds of soil, white, red and black. Of these, the black soil is the richest, the white the

poorest, the red soil occupying an intermediate position, requiring heavy manuring to give as good an outturn as the black. This last is often found among large rocks and is suitable for dry crops (sukhakhet) such as maize and marwa (kodo) owing to the rich vegetable mould it contains. The fertility of the soil depends much on the geological formation of the underlying rocks from which the soil is derived. The greater portion of the hill area lies on Darjeeling gneiss which most commonly gives a stiff reddish loam but may also produce almost pure sand or a stiff red clay. Generally soils throughout the district are deficient in time.

#### 7. FLOBA

The richness and variety of the vegetation of this district are the result of a number of physiographic, climatic, edaphic and biotic factors.

The configuration of the mountains and hills of the district and the impact upon them of strong moisture-laden monsoon winds from the south greatly influence the character of the vegetation from place to place. The outer spurs have a heavy rainfall and are densely clad with moist forest of tropical and sub-temperate genera. But the valleys and gorges further inside the district have a lower rainfall and tend to bear drier type of forest. The higher ridges of the interior, however, intercept the moisture of the upper layers of the atmosphere which have passed over the outer spurs and thus develop and exceptionally moist temperate climate in which moss-clad, lichen-draped trees and moist temperate flora thrive.

It is estimated that the plant communities in the district consist of about 4,000 species of flowering plants under 160 families. There are also 800 ferns, including their allies, chiefly Selaginellas, Lycopodiums and Equisitums. Of these about eight species are Tree Ferns. The most common species met with between 2,000 and 5,000 feet is Cyathea spinulosa. In addition there are many other non-flowering plants-Liverworts, Mosses, Algae, Fungi and Lichens. Of 180 species of thallose and folioce Liverw rts reported from India, about 140 species are recorded from this area of which 72 per cent are endemic. Abundant green and blue green algae are met with in lakes, water courses, pools and swampy places. A beautiful epiphytic brickred alga that covers wall, rocks and tree trunks everywhere is the subserial Alga-Trentspohlia aurea. Iron bacteria of brick-red colour are seen in lumps by the side of watercourses and where water cozes from the hills. Seventyfive species of the hard fungi which attack timber trees have been recorded are occurring in this district.

The following account has been taken from an article on the forests of Darjeeling district published in the Centenary Commemoration Volume of the West Bengal Forests (1964).

Few places in India command range of variation an forest types as found in such a small area as Darjeeling district. It is perhaps, in fitness of things that forest conservancy and scientific forest management was initiated in this district first among all the districts of Bengal, a hundred years ago.

Altitude, aspect and climatic factors have influenced the forest types. The altitude varies from 200' in the Terai and valley to 12,000' on the Singalila ridge, springing from the southern face of Kanchenjangha massif.

The forests can be classified into two broad groups:

(i) Plain Forests and (ii) Hill Forests.

#### (i) Plain Forests

The soil near the river is mainly sandy. It turns to deep loam as one proceeds to the interior. Depending on this, various types of forests are noted. The riverain forests are found in sandy soils near river beds. Most important among this type are Acacia cateches and Dalbergia Sissoo forests found along the beds of Tista, Sevoke, Mahanadi, Rokti, Balason and Mechi, Rongdonding, Lish, Ghis and Chel rivers.

Most important among the plain forests are the excellent Sal (Shorea robusta) forests of the foot hills. Sal is gregarious but it is found in mixture of a varying proportion of the following:

Schima Wallichii, Terminalia, Chukrasia tabularis, Lagerstroemia parviflora, Amoora rohituka, Careya arborea etc. There is another type of forest (wet mixed) which contain evergreen species like Artocarpus chaplasha, Machilus sp., Amoora walichii, Michelia, and Eugenia.

#### (ii) Hill Forests

The Hill Forests of the District can be divided into three classes:

- (1) Lower Hill Forests upto 3,000' altitude.
- (2) The Middle Hill Forests from 3,000' to 6,000' altitude.
- (3) The Upper Hill Forests from 6,000' to 9,000' altitude.

The Lower Hill Forests-In the Darjeeling Division, Sal occurs on ridges and slopes other than those with northerly aspects. In many parts it is gregarious but usually it is stunted and of poor growth with trees of all age classes present. Sal is found also in mixtures elsewhere with a large number of miscellaneous species of which Paccasaj, (Terminalia tomentosa) Chilauni, (Schima wallichti), Toon (Cedrela toona) and Chikrassi (Chukrasia tabularis) are the more valuable. In packets or in northerly aspects the forest crop is varied in character, the chief species being Champ (Michelia spp.) Panisaj (Terminalia myriocarpa), Gokul (Ailanthus grandis), Simul (Salmalia malbarica), Mainakath (Duabanga sonneratioides), Lampati (Tetrameles nudiflora) Gamari (Gmelina arborea), Mandani (Acrocarpus frazinifolius) and Kadam (Anthocephalus cadamba) as well as the species mentioned above as in mixture with Sal.

In Badamtam in the Rangit valley, Pine (Pinus longifolia) is found in fair quantity. This is the only locality in Bengal were pine occurs naturally.

The undergrowth consists of numerous herbaceous annuals and shrubs. Tama bamboo (Dendrocalamus

hamiltonii) grows extensively except on the driest slopes and forms almost pure bamboo forest in the moister areas. The area abounds in climbers which do considerable damage to trees. The more common ones are Gurjo lahors (Tinospora cordifolia), Debre lahare (Spatholobus romburghii), Bhorla (Bauhinia vahlii), Kurkus (Milistia pachycarpa) and Caochu (Mucuna prurins), Plantations of Sal, Toon Panisaj, Chikrassi, Lumpati and recently Teak (Tectona grandis) have been formed in this zone.

In the Kurseong Division Sal grows pure or mixed with other deciduous species on ridges and on southern and eastern slopes of moderate gradient. Steep slopes are occupied by its deciduous associates, the chief of which are Paccasaj, Chilauni, Maina, Simul, Karam (Adina cordifolia), Gamari, Harra (Terminalia chebula), Barrah (Terminalia belerica), Kimbu (Morus laevigata) and Amla (Phyllanthus emblica). Sal is rare, over 2,500' altitude. Moist land is occupied mainly by Lampati, Mandani, Toon (Cedrela micro carpa), Champ, Panisaj, Malagiri (Cinnamomum cocidodaphne), Gokul, Katua, (Castanopsis species), Angare (Phoebe hainesiana) and Tejpat (Cinnamomum tamala).

In the Kalimpong Division Sal is generally gregarious and occurs on well drained slopes and ridges in the western and southern forests but owing to geological causes it does not occur east of the Chel river. Common and important species of this zone include Paccasaj (Terminalia tomentosa), Panisaj, Barrah, Dabdabe (Garuga pinnata) Gamari, Oodal. (Sterculia villosa), Chilauni, Hatipaila (Pterospernum acerifolium), Kimbu, Toon, Lampati, Tanki, (Bauhinia purpurea), Kadam, Lali (Amoora wallichii) and Ambake (Eugenia kurzii). Considerable areas are covered with the Tama bamboo. Common species in the undergrowth are Phlogacanthus thyrisflorus, Doedalacanthus nervosus, Holmskioldia sanguinea, Tabernaemontana coronaria, Jasminum sp. and various kinds of thorny climbers. The weeds Eupatorium odoratum and Croton caudatus invade waste places and where there is a break in the canopy.

In the damper localities towards the eastern boundary of the district, Panisaj, Angare, Champ and Nageswar (Mesua ferrea) are common while in the riverain forests, i.e., in the sandy beds of the Lish, Chel and their tributaries, Siris (Albizzia drocera and odoratissima), Khair (Acacia catechu) and Sissoo (Dalbergia sissoo) grow among the Kushila grass (Saccharum imperatum).

The Middle Hill Forests—Forests of this zone are limited in extent in the Darjeeling Division. The chief species which occur here are the Alder or Utis (Alaus nepalensis), Walnut (Juglans regia), Birch or Saur (Betula alnoides), Pipli (Bucklandia populnea), Angare (phoebe sp.), Mahwa (Engelhardtia sp.) Lekh toon (Cedrelafebrifuga), species of Oaks (Querous) the Spanish Chestnut (Castanopeis) and Chilauni (Schima Wallichii). Undergrowth is not heavy in this zone and consists of numerous herbs and shrubs. In certain areas the smell Pheling bamboo (Pseudostachyum polymorphum) is found. Plantations consist mainly of Panisaj, Toon, Pipli and Walnut.

In the Kurseong Division the main species are Lekh toon, Panisaj. Chilauni. Lampati, Saur (Betula Species), Kimbu. Angare (Phoebe atteunata), Sinkoli (Cinnamomum sp.), Malagiri, Mandani, Siris, (Albissia sp.). Mahwa (Engelhardtia spicata) and Champ (Michelia sp.).

In the Kalimpong Division the upper limit of Sal is at 3,000' to 3,500' altitude. The number of species is fewer than at the lower altitudes, the principal being Chilauni, Katus (Castanopsis tribuloides and hystris), Mahwa, Panisaj and often in gregarious patches, Utis and Saur (Betula cylindrostachys).

Large climbers festooning the forests occur naturally in this and zones below and above.

Upper Hill Forests-The greater part of the Darjeeling Division falls in this zone which here is characterised by a rather overmature stand of oaks, magnolias, and laurels. The numerous but the following occur in quantity:-Oaks, Buk (Querous lamellosa), Phalat (Querous lineata) and Sungrekatus (Querous pachylla), the cliestnut, Katus (Castanopsis hystriw), Kawlas (Machilus sp.), Ohrmps (Michelia sp.), Ghoge Champ (Magnolia campbellii), Sinkoli (Cinnamonum sp.) and Maple, Kapasi (Acer sp.). Of the lesser species, Khankpa (Evodia sp.), Jhingani (Eurya japonica) and Kharani (Symplocos sp.) are worth mention. The trees are stag-headed and covered with moss and lichens: the general appearance of the crop is poor. Undergrowth is dense and contains many nettles, raspberries ferns and bamboos. Plantations in this zone are extensive and consist mainly of Dhupt (Oryptomeria japonica) introduced from Japan in the late 19th century, Usis, Pipli, Champ and the Oaks.

In the Kurseong Division, Saur (Betula sp.) is the only valuable indigenous species growing in the lower part of the zone. Toon (Cedrela sp.), Panisaj and Kimbu are found in small quantities. Certain parts of the zone suit Walnut and Pipli. In the Upper part, the principal valuable species are Buk, Phalat. Champ (Michelia excelsa), Lalikawala (Machilus odoratissima), Pipli and Lekh toon. Undergrowth is mainly Rubus, Strobilanthes, bamboos and ferns. Lichens cover the boles and branches of trees.

In the Kalimpong Division Katus (Castanopsis sp.) becomes more common as one rises through the zones. Other species such as Tite Champ (Michelia cathcartii), Malata (Macaranga pustulata), Tarsing (Beilschmiedia sikkimensis) appear and gradually give place to Kawla (Machilus gammicana), Pahale (Litsea clongata and latifolia), the Oaks (querous lamellosa, lineata and pachyphylla), Champ (Michelia ezcelsa) Kapasi (Acercampbellii) and Kharani (Symplocos theifolia). A few walnut trees are found. The commonest undergrowth are the small bomboo (Arundinaria racemosa), wild raspberries and Various species of Strobilanthes.

#### The Conifer and Rhododendron Forests

This zone does not exist in the Kurseong Division. In the Darjeeting Division it contains bamboos, chiefly Maling (Arundinaria racemosa). They occur either as

a pure crop or as an understory to the high forest. The greater part of this zone in the Darjeeling Division suffered badly from serious fires in 1876, 1879, 1882, 1908, 1909 and 1989. Charred and blackened stems of trees towering above pure bamboo areas still indicate how well stocked the tree species were in the past and how invasive is the growth of bamboos as the trees forest is destroyed. The present forests contain chiefly dwarf bamboos rhododendrons or conifers with patches of high elevation Oak (Querous pachyphylla), Maple (Acer sp.) and Ghoge Champ (Magnolia Campbellii) mostly towards the lower limits. Of the conifers Tamus. Dhengra salia (Tamus baccata) occurs at the higher elevations in the Tongle Range; but further towards the Phalut-Ramam ridge, Taxus is replaced to a great extent by Hemlock, Tengra salla (Tsuga brunoniana) between 8,000' and 9,500' elevations and these merge into Silver Fir, Gobra salla (Abies densa) higher up with rhododendrons and high elevation Birch, Saur (Betula utilis). Rhododendrons form pure forest at the upper limits. Pasture land is found on the Nepal-Bengal boundary.

There is a small area of the Kalimpong Division over 8,500' altitude. In it occur patches of conifers, the principal species being Tengre salla (Tsuga brunoniana) and Dhongresalla (Taxus baccata). Above 9,000' the ground is almost entirely covered with the Maling bamboo: but there are occasional patches of rhododendron forest (R. arboreum, grande and falconeri).

#### 8. FAUNA

Due to the diversity of elevation, climate and vegetation the Fauna of this district is varied and interesting. There is still much to be learnt specially in regard to local migration, which depends greatly on climatic conditions and food supply.

Mammals—The mammals consist of between 80 and 90 species, some of which are dealt with below. There are two monkeys, the common Rhesus (Macaca m. mulatta) and the Nepal seen on Birch Hill in Darjeeling. Cats are well represented. The Indian Tiger (Panthera t. tigris) is common in the plains and has been known to ascend as high as 10,000 feet in hills: Leopards (Panthera pardus sp.) are likewise common and may be found at high elevations. Among the rarer cats are the Nepal Clouded Leopard (Neofelis the East Himalayan nebulosa macrososloides), Marbled Cat (Pardofelis marmorata charltoni) and the Golden Cat (Profelis t. temminokii). Other cats are the pretty Horsfield's Leopard-Cat (Prionailurus bengalensis horsfieldi), fishing cat (Prionatlurus viverrinus) and the Himalayan Jungle-Cat (Felis chaus affinis): the last is the commonest of these. There are five Civets: the Tiger-Civet (Prionodon pardicolor) and the Naga Hills Palm-Civet (Pagunalarvata neglecta) occur above 2,000 feet: the others, the Large Indian Civet (Viverra z. sibetha), the Bhutan Duars Little Civet (Viverrioula indica baptistae) and the Northern Palm Civet (Paradogurus hermaphroditus pallasii) are found in the hills and the plains.

The Crab-eating (Herpestes urva), the largest of three mengooses, is also found both in the hills and

plans. There are three species of Canidos, the Himalayan Jackal (Canis aureus indious), the Hill-Fox (Vulpes bengalensis) and the Nepal Wild Dog (Quon alpinus primosvus): the last is seldom met with. Two Bears occur, the Indian Sloth Bear (Melursus u. ursinus), and the Himalayan Black Bear (Selenarotos t. thibetanus). The former lives in the plains and foothills the latter is common up to 7,500 feet and occasionally comes down to plains level. It does considerable damage to the maize crop in the hills, destroying more than it can eat: it also feeds on roots, fruit, carrion and sometimes kills cattle. All bears are short-seighted and, if stumbled upon, are likely to attack. An interesting animal is the Panda (Ailurus f. fulgens) found in the hill forests about 7,000 feet. Many of its chestnut-red skins may be seen in Darjeeling furriers shops.

Space will not permit the mention of all the otters, martens and weasels. The Northern India Yellowbellied Marten (Charronia f. flavigula) is detested by all who preserve game or keep poultry on account of its predatory habits. Squirrels, rats, mice and bats are far too numerous for details of all to be given here but two squirrels deserve mention, the Himalayan Flying-Squirrel (Petaurista nobilis) found in the hills and the Assam Giant Squirrel (Ratufa g. gigantea) found both in the plains and the hills. The former may some-times be seen in the heart of Darjeeling and it is interesting to watch it "flying" from one tree to another: this it does by spreading out the membrane which connects the limbs and springing from a height in one tree, landing lower down on a neighbouring one. Three porcupines and one hare occur in the district.

The Gaur (Bibos s. gaurus), usually called "Bison", is found in the forests of the foothills and the Terai and is strictly preserved. One unfortunate individual strayed far from its normal haunts and visited Darjeeling on the 8th May 1922. It was first seen below St. Paul's School and gradually worked its way down the hill to the Chowrasta where it quenched its thirst at the fountain. It wandered about and then took a road down to Lebong, killing two persons on its way: it was ultimately shot in the hubsering forest. These animals go about in herds but bulls are sometimes solitary and can be very dangerous.

Two species of the goat tribe are found in the (Capricornis sumatremis hills, Jamrach's Serow Himalayan Goral the Brown jamrachi) and (Nemorhaedus hodasoni), at elevations between 2,000 and 9,000 feet. The serow loves wooded gorges and the goral precipitous slopes. They give fine sport if stalked on foot. There are four or five species of deer: the two commonest are the Bengal Barking-Deer (Munticacus vaginalis) and Sambhur (Rusa u. unicolor). The former is found all over the district and its barking call is frequently heard: the latter is the largest of our deer inhabiting the plains and hills up to 3,000 feet. The Chital (Axis a. axis) is the most beautiful of them. It is not common and loves glades and forests near streams. It is gregarious and is strictly preserved.

There is one pig in the district, the Indian Wild Boar (Sus c. cristatus) found in the plains and ascending the hills as high as 8,000 feet.

The Indian elephant (Elephas m. maximus) is now rather rare in the district. It has been reputed to ascend as high as the Rishi La (10,300 feet). It is usually found in herds but old males live alone and are apt to be vicious. Elephants are destructive to crops, especially paddy, but there is a bearded variety of paddy which up to the present elephants will not touch. Kheddas were held in the Terai many years ago.

The last thirty years have wrought great changes in the distribution and numbers of animals in the district. due to the reduction in the area under forest, the extension of motor roads and a huge increase in the number of gun licences. From the dense forests of the Terai, through the valleys of the Tista, Rangit and Balasan rivers to the high forests of the Singalila ridge there could formerly be found elephant, tiger, sambhur, large herds of spotted deer and pig. leopard, bear goral and serow. Nowadays the elephant is only a casual visitor and the few tigers that still roam the foothills are forced to supplement their natural diet of sambhur, spotted deer and pig with cattle from the jungle villages. The leopard still flourishes in the plains jungle and the lower hills and sloth bear too many be quite often met; but in the mountains, the serow and goral are rapidly disappearing as their rocky fastnesses are invaded by man. The Himalayan black bear, once such a menace to the cultivator is sharing the same fate. The barking deer alone appears to be holding its own in spite of everything.

Of the rarer animals especial mention must be made of the Clouded Leopard, with its beautiful tortoiseshell markings, very seldom seen but commoner than is usually supposed; and of the Bay or Golden Cat about which very little is known. The latter grows up to \$1 lbs. in weight at least and has been known to kill goats, visiting the village pens at night. Its colour is a bright foxy red, with curious yellow markings about the face: tabby and melanistic skins with the same facial marking are said to be those of varieties of this species.

The rarest and undoubtedly the most curious animal is the Pangolin (Manis pentadactyla) which is about 2½ feet long and has thick svales like an armadillo. It is a nocturnal animal, lives in deep and secluded burrows and is very seldom seen. It is found both in the hills and the plains.

Among the smaller mammals, the Himalayan wild cat, leopard cat, large Indian civet palm-civet, pinemarten and porcupine are still found in large numbers all over the district and do great damage to game and poultry.

Birds—The district is very rich in bird life, there being nearly 550 species within its limits. Of these more than half are passerine birds, the largest families being the *Timalisdae* (Laughing-Thrushes, Babblers, etc.) with 61 species; and *Turdidae* (Chats, Thrushes, etc.) with 56; the *Sylvidae* (Warblers) with 60; the

Muscicapidae (Flycatchers) with 27; and the Fringillidae (Finches) with 22. The Passeres found in the district include some of the most beautiful birds, especially the Flycatchers, Minivets, the Darjeeling Fairy Bluebird (Irena puella sikkimensis), Orioles, Finches, Sunbirds and the Long-tailed Broadbill (Psarisomus dalhousiae). The ubiquitous Indian House-Sparrow (Passer domesticus indicus) has not yet penetrated into the station of Darjeeling, the more pleasing Malay Tree-Sparrow (Passer montanus malaccensis) reigning supreme.

The best represented families in the Coraciforms are the Picidas (Woodpeckers) with 15 species: the Cuculada (Cuckoos) with 16 and the Asionidas (owls) with 14. Amongst the Woodpeckers the handsomest are the Large Yellow-naped Woodpecker (Chrysophlegma f. flavinucha) and Tickell's Golden-backed Woodpecker (Chrusocolaptes g. quitacristatus): the tiny Indian Rufous Piculet (Sasis o. ochracea) is also found. Amongst the cuckoos there is the beautiful Emerals Cuckoo (Chalcits m. magulatus).

Female hornbills have the peculiar habit of plastering up the entrance of the hole in which they will be incarcerated during the rearing of the young with their own ordure leaving only a vertical slit through which they are fed by the males. There are five species of hornbills found in the district including the Indian Great Hornbill (Dichocheros b. bicornis). Eight species of king-fisher, some of the most beautiful birds of the order, occur in the district specially noteworthy being the tiny Indian three-toed king-fisher (Ceyw e. crithaca) a forest species which, when it flashes ahead, resembles a gem of vivid lilac or gleaming blue.

Fifteen owls are found, but one belongs to a separate family. They vary in size from the largest Forest Eagle-Owl (Huhua nipalensis), which is powerful enough to kill peafowl and take cats from villages, to the tiny Eastern Collared Pigmy owlet (Glaucidium brodiei tubiger).

Accipitrine birds number about 40 and include the fine Himalayan Lammergeyer (Gypaetus barbatus hemachalanus), Hodgson's Feather-toed Hawk-Eagle (Spizaetus n. nipalensis), the Himalyan Rufousbellied Hawk-Eagle (Lophotriorchis k. kienerl) and the handsome, bold miniature Falcon, the Himalayan Red-legged Falconet (Microphierax c. coerulescens). One of these was found once with its claws so fast embedded in a Tibetan Ruby-Throat (Oyanossylvia pectoralies tschebaiewi), a bird not much smaller than itself, that it could not rise and was captured by hand; another in the plains was seen to dash into a varandah in an attempt to capture a canary in cage.

There are about a dozen species of pigeon and dove, some being only found at high elevations. One found in the plains is the Bengal Green-Pigeon (Crocopus p. phoenicopterus). In the hills, the Kokla tailed Green-Pigeon (Sphenocerous s. spenurus) and the Himalayan Pintailed Green-Pigeon (Sphenocerous a. apicaudus) are common. The melodious call of the

tormer may be heard even in Darjeeling. The latter can be easily recognized by the lon pointed central tail feathers Both descend to the foothills. A very find pigeon, Hodgson's Imperial Pigeon (Ducula Badia insignis), is found in the hills up to 6,000' and though is has not been found in the plains area of the district, it has been noticed in the plains forests of the Jalpaiguri district. The Ashy Wood-Pigeon (Columba pulchricollis) is found between 6,000' and 8,000'; it is to be seen on Birch Hill (6,874') in Darjeeling and, although a bird of high elevations, it does occur in the foothills during the winter. The Speekled Wood-Pigeon (Dendrotreron hodgsonii) is generally found at higher elevations but it has been noticed as low as 5,500'. The beautiful Emerald Dove (Chalcophaps i. indica) occurs from plains level up to 6,000'. It is often seen rising from forest roads and flying away at great speed, its metallic green colours glinting when the sun shines on it. The Indian Bar-tailed Cuckoo-Dove (Macropygia unchall tusalia) is a forest bird occuring from plains level up to 7,400'. The male has the head and neck beautifully glossed and the back barred black and obestnut: the hen has the same coloured back and its lower plumage is barred buff and dark brown: these birds have long tails.

The game-birds are of eight species. The Indian Red Jungle-Fowl (Gallus bankiva murghi) the ancestor of our domestic fowls, is common in the forests of the plains and ascends the hills to over 4,500'. Black-backed Kalij Pheasant (Gennœus melanotus) ranges from the foothills upto about 8,000'; these birds live in forest but often come into tea. The Monal (Lophorus impsjanus) formerly occured on the Singalila ridge at altitude between 10,000' and 12,000', but it is doubtful if any survive there now or on Senchal (8,600') where it had been reintroduced by the fishing and Shooting Club. The cook is resplendent in metallic bronze, green and purple and has a metallic green crest. The Crimson Horned-Pheasant or Tragopan (Tragopan satyra) is the 'Monal' of the hill folk and is found between 8,000' and 12,000'. It coours on the Singalila Ridge: specimens are frequently brought to Darjeeling. The lower plumage of the cock is crimson spotted with white, and blue fleshy horns are present above each eye. The Blood Pheasant (Ithaginis cruentus) is found on the same ridge between 10,000' and 12,000'. The cook is green below with splashes of crimson on the breast varying in extent. These are tupid birds and so tame that a so-called sportsman once wiped out a whole covey. In the hills there are two patridges, the Assam Common Hill-Parridge (Arborophila t. torqueola) and Blyth's Rufous-throated Hill-Partidge (Arborophila r. rufogularis): the latter is found in forest from 2,000 to 8,000 feet and the former from 7,000 to 10,000 feet. They do not rise radily, preferring their legs to their wings. The Common Grey Quail (Coturnia c. coturnia) is sparingly found in the hills during winter at elevations between 5,000 and 6,000 feet. There are two three-toed quail; the Burmese Bustard-Quail (Turnic suscitator plumbipes), and, more rare, the Indian Large Button Quail (Turnin t. tanki). The males are fought for by the females and to them is

given the task of incubating the eggs and bringing up the young.

The remaining Orders are briefly mentioned. The Woodcock (Seolopax r. rusticola) is found in the hills where it is regularly shot. A nest with eggs was taken at Sandakphu (11,929 feet) in July 1904. Woodcock are found of cardamom patches. In the hills are found the Wood-snipe (Nemoricola n. nemoricola) and the Eastern Solitary Snipe (Neospilura solitaria). The former is a dark coloured bird found above 8,200 feet and is much commoner than the latter. The Solitary Snipe is somewhat similar to a large sized common snipe. It is rare and found up to 10,000 feet or even higher but does descent to the foothills. One was obtained near Sukna in the month of December. The Fantail Snipe (Capella stenura) are both regularly shot in the district. Amongst the ployers the Eastern Golden Plover (Pluvialis dominious fulvus) is found in the Terai: the Ibis-Bill (Ibidorhyncha struthersii) is a bird of high elevations but during the winter can be found in the beds of the Great Rangit and Tista rivers. It moves in small parties and is not shy.

A fine heron, the Great White-bellied Heron (Ardea imperialis) is occasionally seen on the Tista and in the forests of the foothills on the Gulma river. Ducks are poorly represented in the district. The Eastern Goosander (Mergus merganser orientalis) is a handsome duck often seen in parties on the Tista. The Bar-headed Goose (Anser indicus) has been shot on the Rammam River during the winter and unidentified geese have often been seen going north.

Darjeeling district contains nearly one-quarter of the species of birds found in India. Burma and Ceylon. In spite of this, the visitor's first impression is that there are very few birds about. The frequent mists and clouds and the many patches of fir trees with dark interiors and lack of undergrowth are not conducive to successful bird-watching. Birds react to sunny days like human beings and it is on such days and especially in the early mornings and evenings that they are most easily observed.

Although a great number of species, Crows, Laughing-thrushes, Babblers, Bush-Warblers, Mynas, Sunbirds, Woodpeckers, most of the Owls and about half the Hawks and Eagles and strictly resident, large number of birds are local migrants, moving up and down the hills according to season. Others are passage-migrants, merely using the district as a port of call on their way from their breeding haunts in Siberia, Tibet or China to the Plains of India.

The tendency among all birds in India is to go north to breed and south for the winter. Thrushes, Flycatchers, Willow-Warblers, Shrikes, Swallows, Cuckoos, Pigeons and Woodcocks all breed on the higher mountains and work their way down to the foothills and sometimes well out into the plains in the autumn, returning in March and April. This is a most interesting time for the bird watcher, as these local migrants often appear on the same date and, over a number of

years, dates of appearance will not be found to vary by more than two or three days.

Great numbers of migrating Finches, Larks, Pipits, Wagtails, Swifts, Redstarts, a few species of Eagle and Hen-Harriers, Snipe, Quail and Duck will stop for a short time in the district on their way to swell the winter bird population of the Plains. Huge flocks of Geese and Cranes fly over the district without coming to earth.

During the last thirty years Darjeeling district has altered considerably owing to rapid deforestation and to an increase of cultivated areas. Birds from the Plains such as the House-Crow, the White-breasted Kingfisher, the Blue Jay or Roller are infiltrating up the valleys and changing the character of the Fauna, while Hornbills, Imperial Pigeon and green Pigeon have almost disappeared from large areas owing to the lack of suitable trees for nesting and feeding.

There is however plenty for the bird lover to study and observe and much still remains to be discoverd and recorded to complete a satisfactory account of the birds of the district.

Snakes - Fifty-one species of snakes are found in the district : of these eleven are more or less poisonous, namely 4 Kraits, 2 Cobras, 1 Coral snake Vipers. The largest is the King Cobra, or Hamardyad (Naia hannah), with a record length of 15 feet 5 inches; but specimens over 10 feet are rare. This snake is sometimes ferocious and its poison is deadly. The Cobra (Naia naia) is found : it measures up to 6 feet 7 inches and its poison is also deadly. The Lesser Black Krait (Bungarus lividus) and the Greater Black Krait (Bungarus niger) are the commonest of the Kraits: little is known about their poison. Either one, or two Green Pit Vipers (Trimeresurus gramineus) occur and the repulsive looking Large Spotted Viper (Trimeresurus monticola) is common. None of these last are deadly but the painful swelling produced by their venom may last several days.

Fish—Over 125 species of fish have so far been recorded from this area. Some of them are found in torrential streams and are remarkably well adapted for clinging to rocks in swift currents. From a zoogeographical point of view, the fishfauna is of special Interest as the area is a meeting place of the Chinese, Malayan and Indian elements of the fishes of the Oriental Region. Certain specialised hill-stream Chinese and Malayan fishes of this region are not found in the Western Himalays, but it is remarkable that allied froms, sometimes idential, are found in the Western Ghats and the connected hill ranges of Peninsular India. There is considerable faunistic evidence to show that at some, not very remote, geological period the Eastern Himalayas or the hills of Assam had a connection with the Western Ghats through the intermediation of the Satpura trend of mountains which served as a highway for the migration of torrential fishes from this area westwards and south wards.

The chief interest of a visiter to this area, however, lies in the sport that is provided by certain well-known Indian game fishes. All the hill sections of the larger streams and especially the Tista river abound in Mahseer. Katli, Indian Trout and Goonch, generally fished for in clear running streams by means of rod and line. The junctions of smaller streams with the main rivers are usually the most suitable places for angling.

The premier place among Indian game fishes is deservedly occupied by the Mahseer—a popular name for varieties of largescaled Barbel. In this area there are three varieties: (i) The Golden Himalayan Mahseer [Barbus (Tor) putitora] of which the length of the head is considerably greater than the depth of the body, (ii) The Red-finned Mahseer [Barbus (Tor) tor] of which the head is shorter than the depth of the body, and (iii) The Copper Mahseer [Barbus (tor) mosal], of which the head is more or less equal to the depth of the body. The first two species attain a notable size. The heaviest fish caught in the Tista scaled 54 and 52 lbs. and were caught by Messrs. Ritchie and Meiklejohn at the junction of the Riyang with the Tista.

The Katli [Barbus (Lissochilus) Hexagonolepsis] possesses large scales and in general facies is similar to the Copper Mahseer. As a sporting fish, size for size, there is little to choose hetween it and the Mahseer. It is, however, a much smaller fish, rarely exceeding 10 lbs. in weight or 2 feet in length. This species is suitable for culture in pondlike depressions or small lakes in the hills and the channels feeding the fish ponds can be so adjusted as to enable the fish to run into them for breeding.

Like the Mahseer and the Katli, the Indian Trout (Barilius Opearius bola) also belongs to the carp family. Though it runs to 5 lbs. in weight it is usually under 2 lbs. The Indian Trout resembles the true Trout not only in possessing scattered black and occasional red spots on the body, a wide oblique mouth and a graceful form, but also because of its sporting qualities. Several attempts have been made to introduce true Trout in this area but so far it has not been possible to acclimatise them on account of the precipitous courses of the streams and the large amount of silt they carry during the rains. Trout have however, been successfully established in Bhutan and are known to breed there.

The Goonch is not a sporting fish of any value; it lives in Mahseer waters and is often caught on rod and line. It grows to about 6 feet in length and to a weight of about 250 lbs.

Some study has been given to the effect of the effluent from the Mangpu Cinchona factory on fish life in the Rangbee (Rambi) tributary of the Tista. Pollution is most noticeable in March and April when the mouth of the tributary is too shallow for the entry of Mahseer from the Tista. As soon as floods occur pollution is reduced and fry are found in the side of

pools. No serious harm to fish therefore results from such pollution as occurs. The following list gives the common edible fishes of the district.

Local name Latin name Bhelda Brdis badis Chedra Barilius sp. Khalisa Chuna Trichogaster Chuna Khalisa (Lal) Trichogaster fasciatus Panga Acanthophthalmus pangia Raj Bham Anguille bengalensis Telchita Glyptothorax talchitta Dani Kona Rasbora daniconus Darangi Esomus danrious

The leeches in the district number 6. They are Dinobdella ferox, a dark green cattle leech: Hirudinaria manillensis a very large species: Haemadipsa zeylanica montivindicis the commonest leech: Haemadipsa montana found from 5,000 to 9,000 feet: Haemadipsa: sylvestris and Haemadipsa ornata the stinging land leech, a handsome black and yellow striped species.

The insect fauna is vast. The district is exceedingly rich in lepidoptera, the Tista Valley being famous for the variety found there. Amongst the Swallow-tails there are such beautiful species as Troides helena carberus, Papilio p. Paris, Papilio p. Krishna, Teinopalyus i. imperialis is considered a prize and is found in Darjeeling: females of this species are rare. Among the moths, the Atlas maths (Attacus atlas and edwardsi) attain a span of ten inches or more: two species of Actias are also very beautiful. Dragonflies are well represented and many new species have been discovered of late years, some at very high elevations. Allogaster latifrons has been found as high as Tonglu (10,000 feet). There are some very beautiful species with iridescent wings (Rhinocypha species and Neurobasis chinensis).

Beetles are very numerous: some of the finest are Euchirus macleaii, Chrysochoa bicolor and Chrysochoa chinensis, the last two being brilliantly coloured. Among the Orthoptera is the curious Leaf Insect (Phyllium soythe) which even with the legs and the veins of the wings resembles a green leaf.

Amongst the Rhynchota are Eurostus grossipes and Belostoma indicum: the last is a huge water bug: and the cicadas, the song of whose males is known so well while the females are vioceless. Two very fine species are Cryptotympana corvus and Tosena melanoptera.

Hymonoptera are well represented: one of the finest of these is the very large Hornet (Vespamagnifica) which will certainly attack if its nest is disturbed: it has a sting that may prove fatal to man.

#### 9. OLIMATE

Darjeeling consists of two distinct tracts-the ridges and the deep valleys of the lower Himalays and the level country at their base. The elevation

of the latter is only about 800 metres above sea-level and the mountains tower abruptly from the plains in spurs in reaching about 8600 metres, many of them densely closetted with forests up to their summits. In a country of such varying topography the climate also varies from place to place. The climate of the Terai and the lower valleys resemble very much that of the adjoining districts in West Bengal and Bihar. The hilly tracts in the north show a cool and bracing climate. March to May roughly constitute the summer in this district. Monsoon lasts till about the beginning of October, then with a short gap of a month and a half as the post-monsoon season, the winter appearsand lasts till the end of February.

The rainfall and temperature data have been given in series I of the official statistics in Part II B of this volume. On account of the hilly nature of the terrain there are sharp contrasts in the amount of rainfall even between nearby stations. The rainfall is in general heavier in the southern Terain region and the ridges and slopes near the plains. Kurseong on the southern slopes of the lower Himalayas gets an annual rainfall of 4,052 5 mm (159.55") while Kalimpong near the northern border of the district gets 2,254.0 mm (88.74"). The rainfall during the south-west monsoon season constitutes about 80 per cent of the annual rainfall, July being the month with the heaviest rainfall. Thunderstorms occur in summer and in October. The variation in the rainfall from year to year is not large.

On an average there are about 120 rainy days (i.e. days with rainfall of 2.5 mm - 10 cents—or more) in a year. This number varies from 105 at Kalimpong to 137 at Pedong.

The heaviest rainfall in 24 hours record at any station in the district was 546.1 mm (21.50") at Mongpoo on 1950 June 12.

This district has there meteorological observatories at Darjeeling, Kalimpong and Bagdogra. Bagdogra observatory has been started only a few years back. Darjeeling and Kalimpong furnish the data for the northern hilly tracts while Bagdogra represents the conditions in the terain and lower valleys. The heat in summer in later tract is as oppressive as in other neighbouring districts. But at higher elevations summer seems to be very pleasant. The highest temperature in the plains, occurs in May, when the thermometer reads about 33.5°C (92.3°F). The night temperatures are higher in the South-west moonsoon season than in the summer. In the hilly portion of the district both day and night temperatures are higher in the monsoon. January is the coldest month when the mean daily maximum temperature in the plains is 24.2°C (75.6°F) and the means daily minimum is 8'6°C (47'5°F'). At higher elevations say at a station like Darieeling the mean daily maximum temperature is 8.6°C (47.5°F) and the mean daily minimum 1.9°C (35'4°F). Frosts are a common feature in the cold season in the hills. In association with the passage of western disturbances cold waves affect the district during the period November to early March and the minimum temperatures may go down to a degree or two below

 the freezing point of water at places like Darjeeling and Kallimpong.

The highest maximum temperature was 26.7°C(80.1°F) recorded once in April, June, August and September at Darjeeling, while at Kalimpong it was 31.1°C (88.0°F) on 1957 August 23. The lowest minimum temperatures were—5.0°C (23.0°F) recorded on 1905 February 11 at Darjeeling and –0.6°C (30.9°F) on 1922 December 27 at Kalimpong.

In the hilly tracts of the district the atmosphere is highly humid throughout the year, and relative humidities are between 90 and 95 per cent in the south-west monsoon. In the southern low lying tracts relative humidities are slightly less. In these parts March and April are the driest months, with relative humidities between 45 and 60 per cent.

During the south-west monsoon season the skies are heavily clouded or overcast. In the rest of the year skies are lightly to moderately clouded. Cloudiness increases in May. In the winter season skies get obscured in the mornings on many days due to lifted fog in the hilly region.

In the northern hilly parts of the district orography influences the speed and directions of surface winds to a large extent. At Darjeeling winds are light and variable in direction. But at Kalimpong wind speeds are slightly more than at Darjeeling and the directions are mostly northwesterly in the mornings and southeasterly or southerly in the afternoons. In the lower plains winds are light and variable in the post monsoon and cold seasons. In the summer and south-west monsoon seasons winds are mostly from directions between north-east and south.

# THE PEOPLE

#### 1. POPULATION AND ITS GROWTH

In the Census of 1961, 624,640 persons have been counted in the district of Darjeeling, of which \$35,056 are males and 259,604 females. Table A-I in Part IIA of this volume gives the distribution of population for all the administrative divisions of the district for total, rural and urban areas separately.

Ten years back the district was inhabited by 459,617 number of people. During these last ten years, therefore, the population of the district have increased by 165,028 i.e., 35.90 per cent over its population of 1951, the highest rate of growth observed in the district in any one of the past census decades. The rural population of the district have increased by 31'46 per cent during the last decade while the urban population have gone up by 53.09 per cent.

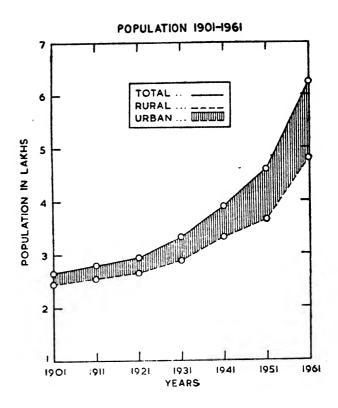

In the State of West Bengal as a whole the population have increased by \$2.80 per cent during the decade of 1951-61. The rural population have gone up only by \$1.81 per cent in the State while the urban population have shown an increase of \$5.97 per cent during the last decade.

The statement 1.1 given below shows the growth of population in Darjeeling district since 1901 separately for its total, rural and urban sectors:

The population of the district in each of the last seven censuses has been shown graphically below for total, rural and urban areas.

In comparison with the growth rate of the State the district of Darjeeling has been showing a higher growth rate, except of course in decades of 1901-11 and 1981-41. In the great influenza epidemic decade 1911-21 while the State suffered from a depletion by 2'91 per cent, Darjeeling could register a positive growth to the extent of 5.12 per cent to its population of 1911. During this decade rural Bengal suffered from depopulation to the extent of 4.43 per cent, but rural Darjeeling registered a growth of population to the extent of 4 per cent. During the next decade the State of West Bengal as a whole showed a good sign of recovery by registering an increase of population to the tune of 8.14 per cent. Darjeeling's population growth in this period was all the more. It registered the growth rate of 12.85 per cent But in the next decade is, 1931-41 while the State of West Bengal grew by 22.93 per cent. Darjeeling's growth rate was not so much pronounced it being only 17.72 per cent over its population of 1931. Since then the district has been growing faster than the In 1951-61 while the entire State taken as a whole. State's average growth rate has been found to be 32.80 per cent Darjeeling has grown by a higher percentage of 35.90. In the rural areas the growth has been less pronounced. The Rural Bengal has grown during the last decade by \$1.81 per cent while this growth rate for rural Darjeeling has been only 31.46 per cent.

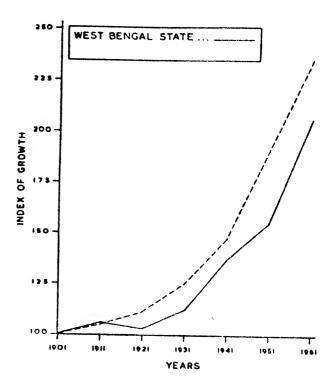

The urban areas of this district have always grown at a much higher rate than that observed in the urban West Bengal as a whole. In the influenza epidemic decade of 1911-21 urban West Bengal registered an increase of 7.16 per cent despite a general loss of population considering the entire area. The urban population of Darjeeling grew at a much higher rate of 16.87 per cent over the population in 1911. During 1931-41 urban West Bengal registered a growth rate of population of 63.69 per cent but urban growth of Darjeeling during this decade was much less, only 83'77 per cent. In the last decade of 1951-61 urban population in this State have increased by \$5.37 per cent. In the district of Darjeeling the urban growth rate during this period has been much higher, 53'09 per cent.

During the first twenty years of the present century Darjeeling showed a better growth rate of population than the State of West Bengal as a whole. In the district an increase of population by 10.71 per cent was registered against the State's growth of 3.15 per cent. The rural population grew during this twenty-year period by 8.65 per cent in the district. But on the other hand a profuse urban growth was observed, it being to the tune of 34.17 per cent.

During the next forty-year period i.e., 1921-61 Darjeeling's population growth was also above the State's growth rate. During this period the population in the State of West Bengal increased by nearly cent per cent, while the population growth rate of Darjeeling was only to the extent of 112.29 per cent over the population of 1921. The rural population had not grown as fast as its urban counterpart. The rural population during this period increased only by 80.77 per cent, while in the urban areas the population had been more than four-fold of what it was in 1901.

Since the turning of the present century i.e., during the last sixty-year period of 1901-61, the State of West Bengal registered an increase of its population by 106.18 per cent. The district of Darjeeling during this period showed an increase of 135.02 per cent over its population of 190!. In the rural sector the growth was even less pronounced, it being 96.41 per cent. But the growth of urban population in the district during these sixty years have been phenomenal, as is evident from 576.09 per cent increase of population in the urban sector, against the State's growth of urban population by 313.29 per cent.

The index of growth of population since 1901 has been shown in the diagram below for the State and the district of Darjeeling for all the seven census decades. The year 1901 has been taken as the base year and the population in that year has been taken as 100. From the diagram and the statement 1.2 given here it is indicated that Darjeeling was always much above the State, except in 1911 when the district was a little below the State in respect of index of growth of population.

STATEMENT 1.2

|       | _  |        |      |        |
|-------|----|--------|------|--------|
| Index | of | popula | tion | growth |

|             | 1901 | 1911 | 1991 | 1931 | 1941 | 1951 | 1961 |
|-------------|------|------|------|------|------|------|------|
| West Bengal | 100  | 106  | 108  | 112  | 187  | 155  | 206  |
| Darjeeling  | 100  | 105  | 111  | 125  | 147  | 178  | 285  |

Writing in 1854 in his *Himalayan Journals* Joseph Hooker said that there were not a hundred inhabitants under British protection when Darjeeling was first transferred, but that, during the two years in which he witnessed its development, its progress resembled that of an Australian colony not only in the amount of building, but also in the accession of native families from the surrounding countries. He was referring to the hills portion of the district excluding Kalimpons, which was then part of Bhutan.

When the East India Company in 1835 first acquired the nucleus of the Darjeeling district from the Raja of Sikkim, it was almost entirely under forest and practically uninhabited. Although it was stated to have been uninhabited probably a more accurate estimate was that this hill tract of 138 square miles contained a population of 100. The heavy forest and poor communications must have kept down numbers to those who could make a precarious living from rough cultivation of forest lands and the collection of forest fruits. A primitive system of Government which countenanced slavery did nothing to encourage development and an increase of population.

The decision of the Company to develop Darjeeling as a hill resort gave an opportunity to neighbouring people to immigrate and take part in the development.

The original inhabitants, probably Lepchas, were rapidly outnumbered by settlers from Nepal and Sikkim. By the year 1850, Dr. Campbell, the first Superintendent, reported that the number of inhabitants had risen to 10,000. The rapid influx was noted by Sir Joseph Hooker when he visited Darjeeling about that time. When in 1869 a rough census was taken of the inhabitants of this tract, the total was found to be over 22,000.

Previous to 1860 there had been some fighting with the Sikkim Raja, which was followed by annexations of territory. In the hills an area was added to the Darjeeling tract mentioned above which brought the boundaries to the Nepal frontier on the west and the Tista river on the East. The Terai was also added. It is not clear what was then the population of the Terai but it can be assumed that it was considerable from the fact that, in 1874, it was reported that at the time of annexation there were 544 jotes which brought in a revenue of Rs. 19,000. The census of 1872 showed the total population of the Terai to be 47,985.

The Kalimpong subdivision of the district was annexed after the Bhutan War of 1865. The population of this area then was estimated to be 3,536. As the area was treated as part of the headquarters subdivision of the district, early census records gave no figures for this area but an estimate of the population of the Kalimpong area in the year 1881 was 12,683. Immigration was considerable between annexation and 1881.

Astonishingly enough as early as 1794 H. T. Colebrooke had pleaded for tea and coffee plantations in Bengal predicting their success. The first trial of the tea plant at Darjeeling was made in 1841, according to a A. Campbell, with a few seeds grown in Kumaon from China stock. It was quite successful, and the quality was approved by the Assam tea planter who visited Darjeeling in 1846, and made the first tea here. Although experiments continued to be made on the growth of the tea plant, and seed from Assam and Kumaon was distributed gratuitously by Government, it was not till 1856 that the first plantation was started at Kurseong, and another near Darjeeling, by Captain Samler, who was also the first to try coffee. The success in both cases was complete and others followed in the same path. By 1861 on the eve of the International Exhibition in London of 1862, 22 tea estates had sprung up. They had received a total grant of 21,865 acres, of which 3,251 were under of tea, and already, 4,303,000 tea plants had been planted, 42,600 lbs. of tea and 20,000 lbs. of coffee manufactured and 2,534 labourers employed. In 1871 the number of tea estates, public and private, was 62, with an area of 12,305 acres planted with tea. In 1881, the number of these estates had risen to 155, and the acreage under tea had advanced to 28,867 acres. In 1891 there were 177 registered gardens with 45,585 acres under tea and 242 square miles comprised in tea estates. From this

time onwards tea estates were more and more organised under big limited concerns so that although the area under tea expanded the number of separate gardens decreased.

To return from this digression, Kalimpong was annexed from Bhutan in 1865 and in 1891 was a vast Government estate, consisting mainly of forests. In that year it contained only two tea gardens and two cinchona plantations, the remainder being divided in agricultural plots among settlers from Nepal, Sikkim and Bhutan, as well as amongst the original Lepcha inhabitants. While tea flourished in the hills, in the teras or plain at the foot of the hills ordinary cultivation was carried on by Rajbansis with an admixture of Muslims and other castes. Reclamation of land went on steadily but even in 1891 about 45 per cent of the land was uncultivated.

The Census of 1872 was considered defective. There was an immense concealment of females in 1881. Many of them fled on the census night over the frontier into Nepal. Labourers absconded from tea gardens from panic and other causes. It was believed that the census of 1891 for the first time took a satisfactory count. During 1891-1901 the hills were very healthy. On the other hand, the terai was notoriously malarious and mortality was very heavy. The Siliguri-Darjeeling railway line was opened in 1880-81. The tea industry on which the growth of the district mainly depended, passed through a serious crisis. Prices fell greatly between 1896 and 1901 and many gardens were no longer able to work at a profit. A few gardens closed and others reduced their labour force, so that the increase due to extension of cultivation during the earlier years of the decade was to a great extent discounted by subsequent reduction of establishment. The increase of population was greatest in Kalimpong, where the waste land was rapidly brought under cultivation by new settlers, chiefly from Nepal. Already during 1901-11 the population showed a decline in the rate of increase. L. S. S. O' Malley in his Census Report of 1911 observed:

The explanation is that there is only a limited area in which there is room for an increase in population. Over one-third of the district is covered by reserved. forests, while the tea gardens extend over about oneseventh of its area. While they were being opened out and developed, labour poured in and a phenomenal growth of population resulted. Now all the land suitable for tea cultivation, within the area reserved for it, has been taken up. On the tea gardens therefore no considerable increase of population can be expected. As it is, tea occupies a third of cropped area, and the tea gardens employ a labour force of 58,000, or onefifth of the total population of the district. As regards ordinary cultivation only one-third of the district is cultivable, and it cannot therefore hope to support a teeming agricultural population. Even in Kalimpong, where nearly half the land is reserved for native cultivation, it is recognised that it has reached the limit of safety in some parts, and in such localities it has been found necessary to prohibit further extension.

The net result in 1901-11 was a progressive decrease in the rate of increase and a shrinkage of the volume o immigration. A scrutiny of the percentage changes in the growth of population of Darjeeling shows a decrease almost everywhere except in Kalimpong sub-Between 1872 and 1921 the district experienced phenomenal growth, but between 1901-51 the happy period of expansion and carefree production in an expanding market was over and the rate of growth during this period 1901-51 was very much less than half of the period 1872-1921. Nevertheless growth between 1921and 1951 has not been disappointing at all, the areas of specially repid growth having been Pulbazar, Kurseong and Siliguri police stations: Pulbazar saw a great increase in agriculture, Kurseong in tea and as a railway and residential town, and Siliguri for its growing importance as the biggest railway and road terminus in Northern Bengal. During 1911-21 the influenza epidemic caused great mortality in the hills and hung about longer than in the plains, probably because the greater distance and the less frequent intercourse between one collection of homesteads and the next caused infection to spread less rapidly. There were also local epidemics of relapsing fever. The teras and Kalimpong were opened up by the Siliguri-Kissenganj and the Siliguri-Giellekhola railways in 1914-5. During 1921-31 there was less immigration from Nepal. Siliguri police station improved as a consequence of the extension of the broad-gauge railway to the town. There was considerable immigration from Bihar in the terai and Kurseong improved because of tea. During 1931-41 there was a severe earthquake in January 1934 when a large number of old buildings in Darjeeling town and Tindharia collapsed. In 1935 there was heavy flood in the Mechi.

From a study of the trend of in and out-migration to and from the district of Darjeeling between 1891 and 1951, Mitra in his 1951 report commented on the growth of population in this district as, "The figure for 1951 includes 15,738 Displaced persons. The statement is interesting in as much as it shows how the immigrant population is being gradually substituted by their children born in Darjeeling. Nevertheless, the fact remains that there must be a great deal of intercourse still between Nepal, Sikkim, Tibet and Bhutan on the one hand and Darjeeling on the other. The emigrant population has been fairly constant representing those Indians who were born in the district whose parents were on pleasure tour, business and service. The above statement does not include 3,315 Muslims, who according to the West Bengal Government left the State for Pakistan of whom 1.385 later returned.

"The statement also illustrates what a small proportion migration between Darjeeling and other districts of the State bears to migration from and outside the State. The large immigration figures of 1891 and 1901 were due, as already noted, to the filling up of the agricultural areas in the teras by immigration from Dinajpur, Bangpur and Jalpaiguri. This is perhaps the only district where immigration and emigration from

and to other districts have remained at a low level since 1911 and where the Partition has made little difference in their volumes. The two statements indicate that population in the district is well near saturation point, both in tea and agriculture, that migration has taken place more or less on the basis of the family as the unit, and that the industrial population in tea is fairly settled in their place of work. The comparative paucity of strikes and industrial discontent in the district due in part to lack of labour organisation and very low living standards also bears out the above observation."

In the Census of 1961 the overall increase of population for the district has been 35.90 per cent. The three hill subdivisions have not grown so much as has grown the other subdivisions in the teras. In fact during this present decade 1951-61 the Siliguri subvivision has shown a spectacular increase of population to the tune of 68.04 per cent. This high increase has been shared both by the tracts under command of agriculture and rapidly growing urban areas centering round Siliguri. The police station of Naxalbari has even shown the rate of growth of population as 82,84 per cent which is followed by Siliguri police station with a growth rate of 77.96 per cent. In the whole State of West Bengal the highly industrialised and urbanised police station of Durgapur in Burdwan district and five such police stations of 24-Parganas district have shown a higher growth rate of population than these two police stations of Darjeeling district. The other two police stations Phansidewa and Kharibari have also grown by no less a proportion than 55.47 per cent and 46.24 per cent respectively. In the previous decade these two police stations surpassed all others in the district in respect of population growth and in that decade Naxalbari and Siliguri were just around the average population growth of the district taken as a whole. In all other past census decades the growth of population was equally shared by all the four police stations in this subdivision and strikingly enough they were always below other police stations in the rest of the three hill subdivisions of the district. Siliguri is passing through a process of rapid industrial and urban growth because of the vantage point it enjoys as the nerve centre of trade and other communications between the north-eastern States and the rest of West Bengal and Bihar.

Amongh the hill subdivisions Kalimpong has grown more than the other two subdivisions. Garubathan of this subdivision has grown by 44.18 per cent which is also much above the district average. All other police stations of this district are below the districts average in so far as the population growth is concerned. Headquarters police station of Darjeeling could only add one-fifth more to its population of 1951. The previous decade of 1941-51 saw the falling off of population in two police stations Jore Bangalow and Mirik. Both these police stations have regained considerably in the present decade. Of course, Garubathan's population growth in the decade ending in 1941 was exceptionally high. It added more than half in 1941 to the population it had in 1981.

The statements 1.3 and 1.4 give the growth of

population and intercensal percentage variation during the last sixty years in each of the administrative units of Darjeeling. The map at page (27) also

gives the pictorial representation of intercensal growth, of population during 1951-61 in each administrative unit of the district.

GROWTH OF POPULATION DURING THE LAST SIXTY YEARS IN THE ADMINISTRATIVE DIVISIONS OF THE DISTRICT

Settlement of displaced persons in different parts of the district has had a great bearing on the growth of population. In the Census of 1961 as many as 169,250 persons have returned themselves as being born outside the district, which constitute 27.18 percent of the total population of the district. During the ten-year period of 1951-61, a number of 99,352 persons have immigrated to this district and this comprises 15.91 per cent of the total population of the district. Out of the total migrants cited above as many as 88,162 persons have come from Pakistan, Of them 25,546 persons have come during the last ten-year period of 1951-61 and they comprise 4.09 per cent of the total population of the district. Again, out of the total migrants to the district as many as 41,10 persons have come from Nepal which comprise 6.58 per cent of the total population of the district. During the last ten-year period of 1951-61, 18,384 persons from Nepal have come to this district which constitute 2.94 per cent of the total population of the district. As many as 66,987 persons have retured themselves in 1961 in Darjeeling district as being born in other States in India. Of them 40,287 persons have come from Bihar to the district which comprise 6 58 per cent of the total population of the district. Of them 20,076 persons came from Bihar during the last ten-year period of 1951-61. They comprise 3.85 per cent of the total population of the district.

#### SEX RATIO 8.

Phansidewa

Siliguri

Kharibari

Naxalbari

In the Indian subcontinent males outnumber females. The same is true with the State of West Bengal also. In West Bengal males have always outnumbered females since 1901 when the sex ratio was 945. Up to 1941 it was gradually going down in each Census year and Census 1951 marked a slight improvement over that of 1941. In the present Census it has further gone up. In 1961 there are 878 females for every 1,000 male population in the State of West Bengal.

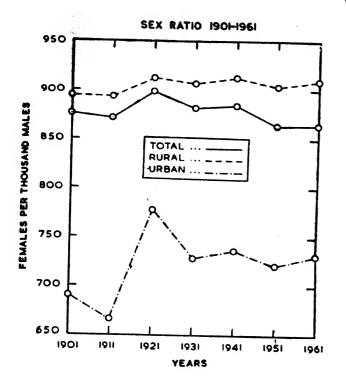

1,880

In the district of Darjeeling, there has been alternate rise and fall in the proportion of sexes since 1901. At the turn of the present century Darjeeling has only 876 females to every 1,000 male population. In 1911 this proportion went further down to 871. The 1921 Census marked an appreciable improvement in the proportion of sexes but in the next decade it again fell down to 881. There was slight rise in 1941. In 1951 again there was considerable fall in the sex ratio which was only 863 females for 1,000 males. In the present Census it has more or less remained stationary, the sex ratio only being 864. Except in 1941 Darjeeling's sex ratio was always lower than that observed in the State of West Bengal taken as a whole. Exactly the same phenomenon is observed in the rural areas of the district but the urban sex ratio of Darjeeling has always been better than the corresponding State ratio. variation of the The statement 3.1 shows the proportion of sexes between last sixty years in the district of Darjeeling as compared to those for the entire State of West Bengal for total, rural and urban areas separately. These variations have also been graphically shown in the diagram given at page (31).

| 1921 | 898   | 912                 | 777   | 905   | 970         | 591   |  |
| 1931 | 881   | 906                 | 728   | 890   | 961         | 578   |  |
| 1941 | 884   | 912                 | 786   | 852   | 945         | 559   |  |
| 1951 | 863   | 908                 | 721   | 865   | 989         | 660   |  |
| 1961 | 864   | 909                 | 781   | 878   | 948         | 701   |  |
|      |       |                     |       |       |             |       |  |

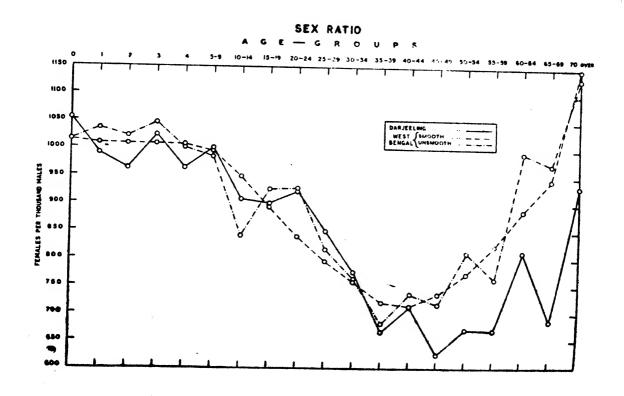

The inaccuracy of the age statistics especially for females is so great that it is difficult for any conscientious demographer to place much reliance on the proportion of female population to males at each age period. The deficiency of female population is more marked at the age-group 15-19 and also beyond age-group 25-29 upto the age period 55-59, where the sex

ratio appears to be lower than even the district average. Preponderence of females over males is observed in the district only in the ages 0 and 8 and also in age-group 5-9, though this preponderence is observed at each of the ages, 0, 1, 2, 3 and 4 in the case of the State of West Bengal as a whole. Low mortality of the female children in this part of the country reasonably explains this state of affairs.

The marked deficiency of females in the age-group 10-14 is a common feature in almost every part of the world. In the age-groups 10-14 and 15-19 there is a sharp fall in the sex ratio but it begins to improve in the next higher age-group and reaches a maximum in the age period 20-24. This marked deficiency seems due to understatement of their age if still unmarried and to the exaggeration of it if they are married and especially if they have become mothers. The overstatement of age in these age-groups seems somehow to be compensated by a sharp rise in the sex ratio in the age-group 20-24. In the next higher age-groups the sex ratio falls by a considerable degree upto the age-group 35-89, after which period sex ratio appears to fluctuate from one age-group to another. It touches the bottom in the age-group 45-49.

The alternative rises and falls in the proportion of females at subsequent age periods beyond 39 illustrate the special predilection of women for multiples of 10 in stating their age. Digital preference acts as particular bias in age returns and specially in the case of the women. The alternative ups and downs in the proportion of sexes may be visualised in the curve is given below.

Beyond 59, i.e., in the age-groups starting from 60-64 the sex ratio begins to rise and this steady increase in the relative number of the females in the higher age-groups might be due to in part their greater longivity.

The single year age returns have been smoothed for the State of West Bengal in the Office of the Registrar General, India. The proportion of sexes for different age periods has also been calculated on the smoothed data for age returns for the State. In the diagram at page (31) a curve has been given showing the proportion of sexes in different age-groups calculated on the smoothed data of ages for the State. The statement 3.2 given below indicates the sex ratio at different age periods based on raw age returns as well as on the smoothed data for the State and that on raw age returns for the district. The sex ratio on the smoothed data for the State has been shown within brackets against each age-group.

| 6064        | 994      | 888         | 813   |  |  |
| 6569        | 978      | 945         | 687   |  |  |
| 70+         | 1,180    | 1,148       | 938   |  |  |

The proportion of sexes for the hill areas seem to be better than that observed in the Terai. The highest proportion is found in Jore Bungalow police station of Sadar subdivision. In fact except the police station of Darjeeling all the other areas under Sadar subdivision have shown quite a fair proportion of sexes. Kalimpong subdivision is marginally below the district average in this respect but the sex ratio in Kurseong is quite above the district average. Siliguri subdivision has shown quite a low proportion of sexes. The Siliguri police station has only 698 females to every 1,000 male population. The statement 3.3 given below shows the number of females per thousand males in each of the administrative units of the district.

#### 4. RURAL POPULATION

A little more than three-fourths of the total population of the district of Darjeeling as in the State of West Bengal taken as a whole live in villages.

A village is conterminous with revenue survey mauza for the purpose of census. The exact definition of village has been very much confusing during the first few census decades. When the Census Commissioner of India observed in the Report for 1931 that "the distribution between a town and a village however arbitrary is easily effected on a numerical basis but the definition of the village as a unit is by no means always so easy", he was speaking for his successors as well as for his predecessors. The way of defining a village was contemplated in the census of 1881 as well as in i891 to be by defining a village community according to Sir Henry Maine, but this did not yield much positive result for by that time revenue village or mauza had already come in the picture, thanks to the great Revenue Survey of India which had commenced in the 18th century. The slow emergence of the revenue mauza as the village is traced in the first three volumes of Phillimore's Historical Records of the Survey of India.

In 1901 and 1921 when cadastral survey had not been completed in most of the districts of West Bengal and when the mauza boundaries laid down in the general revenue survey had not always been clearly traceable, the term village in census parlance was rather indeterminate, because it had different meanings in different areas. Sometimes it meant a survey mauza and sometimes a residential village. In the own words of E.A. Gait, the Census Superintendent of 1901 of Bengal, 'A village may be either a collection of houses bearing a separate name, or else the mauza, i.e., the area treated as a village at the survey. The later has the advantage of being a definite unit regarding which there

can be no manner of doubt so long as the boundaries laid down at the survey are known, but it does not at the present time necessarily correspond to the residential village. One of the latter may spread over two mausas or survey villages, or two may lie in the same mausa or the mausa may be altogether uninhabited. On the other hand, if the survey unit be neglected, it is very difficult to say with any precision what constitutes a village. There are many collections of houses which would by one person be called separate villages, while another would treat them as hamlets of other villages in the neighbourhood. In Bengal the records of the revenue survey have not been kept upto date and in most districts the survey mauza is no longer clearly traceable. Generally, therefore, a village was taken for census purposes to mean a residential village, i.e., as a collection of houses bearing a separate name with its dependent hamlets. Where, however, there has been a recent cadastral survey, as in parts of Bihar and Oriesa, the survey mauza was taken as the census unit'.

O'Malley in 1911 commented on the census village as follows:

'The census village corresponds to the mausa or survey unit of area in the Burdwan and Presidency Divisions and Cooch Behar, and elsewhere to the residential village, or collection of houses bearing a common name with its dependent hamlets. As a rule, the difference between the mausa and the residential village is small; but this is not so in tracts which were uninhabited at the time of revenue survey, and so were not properly subdivided. A striking instance of this is found in the western part of the Midnapore District, known as the Jungle Mahals, where nineteen mausas contain more than 20,000 villages and hamlets. The village is thus a somewhat indeterminate entity'.

It was from 1921 onwards the term village in West Bengal corresponds to a revenue survey mauza. Owing to the peculiar configuration of the country the houses being scattered over the face of the land without any reference to civic unity or corporate life there was practically nothing much which could correspond a village in ordinary sense of the term. The mauza which had been demarcated as a unit for revenue purposes was translated as village for convenience's sake.

It should be borne in mind that what is reckoned for all administrative purposes and consequently also for the census as a village may or may not be the same as what we normally have in mind when we speak of a village. A village in the ordinary sense may mean a cluster of houses whose inhabitants are regarded by themselves as well as by others as distinctive social units with its identities marked by distinctive local name. The village in the administrative sense is the mauza, a settled area with definite boundaries for which records have been prepared. The administrative convenience for taking the survey unit of the area as a village is very great. It enables the census field staff to make absolutely certain that no tract however remote is left out of account. Thus in 1961 a village as a general rule has been taken to mean a revenue survey mansa with

jurisdiction list number. But a departure from the general rule was to be made in certain peculiar circumstances as in the case of Darjeeling tea estates or forest units. Where a tea estate or forest unit comprises two or more revenue survey mauzas, the separate boundries of which could not be demarcated on the ground, the tea estate or forest unit concerned was itself treated as a census village irrespective of the number of mauzas it contained.

In the hills of Darjeeling there are no villages in the proper sense of the word, but only homesteads nestling on the hill sides or in the valleys. Occasionally five or six houses are grouped together, but generally each homestead stands in its own land near the patches of cleared cultivation. Clusters of houses, which can be dignified by the designation of villages, are only found in a few bazars to which the people go for their weekly supplies.

Table A-III in Part II A of this volume gives the number of villages according to the different size classes of population as per 1961 Census for the district and its administrative units. In 1961 as many as 536 villages have been found to be inhabited in the district of Darjeeling. Changes in the number of inhabited villages during the last sixty years period of 1901 to 1961 have already been indicated at page (3). There has been a reduction in the number of villages in this district due to the changes in the number of mauzas by settlement operations and change in the number of uninhabited mauzas. The number of villages was gradually going down upto 1931 and then it began to rise for the next two decades. During the last ten years there has been a decrease in the number by eightyfour. In the State of West Bengal the number of inhabited villages have decreased by nine during the last decade.

The spatial distribution of the inhabited villages has been indicated by a number of 115 villages being located in 100 square miles of the rural areas of the State of West Bengal. Villages in the district of Darjeeling are more sparsely situated. There are only 48 villages to every one hundred square miles of the rural areas of Darjeeling. The maximum congestion is in Kharibari police station where every one hundred square miles of its rural area contain on an average 126 villages. Next to it is Siliguri where as many as 107 villages are located in an area of 100 square miles on an average. Congestion in respect of the situation of villages is quite low in the police stations of the hill subdivisions. The number of villages is least in Pulbazar police station of Sadar subdivision. This is a small police station covering an area of only 53.0 square militared has only 5 inhabited villages in it. Average mber of villages for every one hundred square miles of area, therefore, comes as 9.

In the State of West Bengal 686 persons reside in a village on an average. In the district of Darjeeling more persons live together in a village on an average. As many as 896 persons are found to be living in one

inhabited village on an average. A village of Pulbasar police station supports maximum persons in the district. This is a police station where villages are quite sparsely situated, but each village is inhabited. Mirk police station occupies the next position in the district, where a little less than two thousand persons live in any village on an average. Any village of Darjeeling police station offers shelter to 1,878 persons on the average. In Siliguri subdivision there are more

villages in small areas, but any average village contains only 520 persons. The average smallest sixed villages are in the police station of Kharibari.

The statement 4.1 given below shows the rural areas, rural population, number of inhabited villages, average population per village, and number of villages per 100 square miles of rural area of the district and its different administrative units as also for the State as a whole.

In the district of Darjeeling maximum number of villages have a population of less than 500. They account for nearly 52.42 per cent of the total number of villages but population living in such villages account for only 14.89 per cent of the total population of the district. In 1951 this class of villages accounted for 69.21 per cent of the total number of villages of the district and persons living in such villages accounted for about one-fourth of the total rural population of the district. In 1951 maximum number of the rural population were found to be living in such villages. Maximum number of persons, who account for 27.28 per cent of the rural population in the district of Darjeeling are found to live in villages having a population more than 1,000 but less than 2,000. Quite a significant number of persons, a little less than one-

fourth (23.16 per cent) of the total rural population of the district live in villages having a population range of 2,000 to 4,999. In the next higher class of villages, that is, those having a population between 5,000 and 10,000 about 14 per cent of the population are found to be living. In 1951 this percentage of population was only 11.06. About 5 per cent of the rural population of the district live in villages of population size of above 10,000. The villages in this class account for 0.19 per cent of the total number of villages in the district. The villages of smaller sizes appear, therefore, to be diminishing faster at the cost of rapid growth of villages of higher population sizes. The statement 4'2 below shows the percentage distribution of villages and population by class of villages of the district as compared to that of the State both for 1951 and 1961.

In this district there are only one village inhabited by more than 10,000 people and ten villages having a population between 5,000 and 9,999. The village Chabu Lama's Estate (J. L. No. 2) of Pulbazar police station is inhabited by 22, 511 persons.

# 5. URBAN POPULATION

It is a fond belief to many a student of demography that West Bengal where almost every fourth person is a town-dweller, is one of the highly urbanised State of the country, and that West Bengal has decided to tread the path of trade, industry and commerce leaving agriculture in the shade. But a close scrutiny of the pattern of urbanisation in the State gives us an idea that West Bengal's urban concentration is limited to a few highly industrialised districts around the river Hooghly at its lower reaches, Durgapur-Asansol in the district of Burdwan, and Siliguri in the district of Darjeeling in the north. The hand of nature has divided this small district of Darjeeling into two clear divisions—the hills and the submontane Tarai. This has like all other aspects influenced a great deal in setting up different urban centres in the district. Darjeeling has altogether four towns, three in the hills and one in the Tarai. All these four towns are the headquarters of the respective subdivisions. The three hill towns are wonderful summer resorts of Eastern India and as such the urban populace in these three towns are subject to considerable seasonal variation. They receive large number of visitors in summer from about April to May and also in the post-monsoon autumn from about the middle of September to the middle of November. In Winter many people from the hills go down to the plains. With the

popularisation of tourist trade in this part of the country, seasonal variation in the population of these three towns has assumed a considerable dimension. Certain natural events certainly cause, as they did in the past, a great reduction in the number of visitors. But Siliguri holds up altogether a different view. A remarkable urban expansion has been taking place in this area.

All the four towns of the district are administered by a Board of the Municipal Commissioners. At the turn of the present century the district had only two towns, Darjeeling and Kurseong. Both Siliguri and Kalimpong were treated as a town at the census of 1931. Kalimpong was declared a Municipality only after 1941 and Siliguri was declared a Municipality in 1950. At the censuses of 1931 and 1941 Jalapahar and Labong, now parts of Darjeeling town, were treated as separate urban centres. But since 1951 they have been merged in Darjeeling.

For the first time in 1951 all Census statistics were presented separately for rural and urban areas. This has been continued in 1961 as a basic stratification as fundamental as the presentation of all data separately for males and females. An urban area for the purpose of Census 1961 includes (a) all municipal towns, cantonments and any other areas being administered by local bodies such as town committees, union committees etc., (b) any other place which satisfies the following empirical tests viz., (i) a population of not less than 5,000 persons (ii) a density of at least 1,000 persons per sq. mile and (iss) three-fourths of the occupations of the working population should be cuiside of agriculture and (iv) the place should have a few pronounced urban characteristics and amenities like location of educational, medical or public institutions, offices or trading centres in it.

The people of this district appear to have more predilection for town life, as almost every fourth person of this district is a town dweller. Population in general of the other north-Bengal district seem to be less inclined for town life. It is least in Malda where only four per cent of the population are town dwellers.

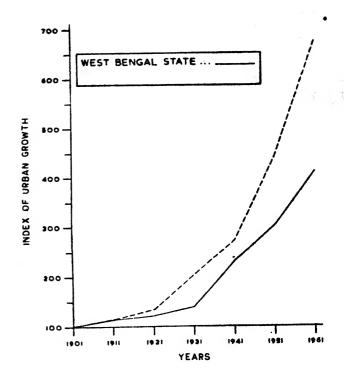

During the last sixty years period Darjeeling's growth of urban population showed a phenomenal increase, as is evident from the statement given at page (22). In 1931 due to the inclusion of more areas under urban command the urban population added more than half the number of what the district had in 1921. During the last two decades also a very rapid increase of urban population is observed and the urban increase have by far surpassed the growth rate of general population of the district. Taking the urban population of 1901 as 100 the index of urban growth has been calculated both for the State and the district of Darjeeling which is given in the statement of 5.1. Graphically also the index of urban growth has been shown in the diagram given at page (36).

STATEMENT 5.1 INDEX OF URBAN GROWTH

| Year | West Bengal | Darjeeling |
|------|-------------|------------|
| 1901 | 100         | 100        |
|      | . 114       | 118        |
| 1911 |             |            |
| 1921 | 122         | 184        |
|      | 140         | 203        |
| 1931 |             | 272        |
| 1941 | 229         |            |
|      | 804         | 442        |
| 1981 |             | 676        |
| 1961 | 418         | 610        |
|      |             |            |

With the passage of thirty years since 1901 the urban population of the district doubled the number as it had in 1901. In 1951 it became nearly 4.5 times more and in the present Census of 1961 it had become almost seven times more the number at 1901.

In the State as a whole the urban growth is less pronounced up to 1981. The progress of urban population was not so spectacular as is evident from the very slowly rising curve shown in the diagram here. West Bengal's population growth in the urban sector has been showing a steadily moving upward trend since 1941. In 1941 it became more than double of what it was in 1901. In 1951 it was more than three times and now it has become more than four times of the urban population of 1901. The following statement gives the growth of urban population in each town of the district during the last sixty years.

STATEMENT 5.2

GROWTH OF POPULATION OF EACH TOWN SINGE 1901

<sup>†</sup> Jalapahar was a separate town in 1981 and 1941 with a population of P. 718 (M 421, F 297) and P. 905 (M 561, F 344) in the respective Census years. In 1951 the town was merged in Darjeeling. The 1931 and 1941 population figures of Darjeeling shown in this table include the figures for Jalapahar.

<sup>†</sup> Lebong was a separate town in 1981 and 1941 with a population of P. 564 (M 852, F 212) and P. 446 (M 801, F 145) in the respective Census years. In 1951 the town was merged in Darjeeling. The 1981 and 1941 population figures of Darjeeling shown in this table include the figures for Lebong.

The growth of Darjeeling and Kurseong has been moderate. Kalimpong in that respect has been growing a bit faster. Its population have increased by a little more than fifty per cent during the last decade. But Siliguri has been having a spectacular growth. After the Partition of 1947, Siliguri's population grew in 1951 by more than 200 per cent, though this rate has substantially fallen in the present decade of 1951-61, when the growth rate has only been found a little more than cent percent.

In the Gazetteer of 1907 Siliguri was described as a swampy malarious village closed to the foot of the hills with a population of only 784. In 1941 it had a population of 10,487 which showed a 78 per cent increase over the figure for 1931. The expansion has taken place inspite of its unhealthy and insanitary conditions and has no doubt been due to Siliguri's increasing importance as a focus of communications between the North-Indian States and other parts of the country. After the Partition of 1947 the town was receiving continuous streams of migrants. Then again the national emergency of 1962 helped the town assume a vital strategic importance. Since then it has been growing all the more as a focal point in the transport and commerce lines in the north-eastern India. This way of excepttional growth of this area has caught the attention of the planners of the country that a haphazard growth in such a vital region may bring with it all evils of unplanned urbanisation. To correct this situation the Government of West Bengal set up in May 1964 the Siliguri Planning Organisation by a Government resolution. The organisation has been given the task of preparing plans which are to provide a foundation of the organized development of the town and to ensure basic civic services and amenities to the people of this area.

According to the census classification of towns based on population sizes. Siliguri is in class II, Darjeeling and Kalimpong in class III and Kurseong in class IV. The statement 5.3 given below shows changes in classification of towns since 1901 in the district of Darjeeling.

#### STATEMENT 5.8

M-Municipality.

In a census report towns are generally classified by population sizes. In 1961 The Registrar General, India attempted a functional classification of towns on the basis of predominant function of a town based on census data on industrial classification of workers adopted in 1961 Census. According to this classification the three

hill towns of the district Darjeeling, Kalimpong and Kurseong have been classified as service towns and Siliguri has been classified as a trade and commerce town.

# 6. AGE DISTRIBUTION

Distribution of population by quinquennial agegroups may be obtained from the Table C-II in Part II A of this volume. The following statement shows the percentage distribution of population in some broad age-groups in the last two Censuses of 1951 and 1961 for the district of Darjeeling as compared to that of the State of West Bengal.

# STATEMENT 6.1

|                | 1951                 |                        |                        | 1961                   |                        |  |
|----------------|----------------------|------------------------|------------------------|------------------------|------------------------|--|
| State/District | Age-group            | Males                  | Females                | Males                  | Females                |  |
| West Bengal    | 0-14<br>15-54        | 89.52<br>59.80         | 87.02<br>55.22         | 39. <b>21</b><br>58.69 | 42.86<br>49.54         |  |
| Darjeeling     | 55+                  | 7.18                   | 7.76                   | 7.10                   | 7.60                   |  |
| District       | 0—14<br>15—54<br>55+ | 85.41<br>58.86<br>6.28 | 39.44<br>54.71<br>5.85 | 89.85<br>54.29<br>6.88 | 44.26<br>50.05<br>5.69 |  |

During the last ten years, the proportion of child population has increased to a considerable degree in the district. This increase, peculiarly enough, has been observed to be almost of the same magnitude both in the cases of male as well as female children. The increase in the proportion of children of the age-group 0-14 has almost been compensated by a decrease of almost the same extent in the population of middle aged men and women between the ages 15 and 54. An appreciable increase in the age-group 0-4 has apparently been brought about by a fall of infantile mortality rate and a rise in birth rate. In the higher age-group 55 and over the proportion has almost remained the same. Almost the same trend is observed in the pattern of distribution of males and fen ales in different broad age-groups while viewed in respect of the State of West Bengal as a whole. In the State too the proportion of child population in the age-group 0-14 has considerably increased apparently at the cost of a decrease by almost of the equal extent in the agegroup 15-54. In the higher age-groups of 55 and over, the proportion almost remains the same in the State.

The children both male and female in the school-going age (5-14) constitute about one-fourth of the total male and female population of the district. In other words every fourth male or female in Darjeeling is a boy or a girl in the school-going age. The Children of this group are growing in number. Their proportion has slightly increased over the decade in this district.

In the district the proportion of female children of the age-group 0-4 is bigher than the corresponding proportion of male children amongst total male population. In the age-period 0-4 females comprise about 16.18 per cent amongst their total number while

this percenage for males is 18.98. In the next higher age-group 5.14, the proportion amongst males is 25.87 against the female proportion of 28.12. In working age-group 15.54 the male proportion is higher than the corresponding female proportion. In the district the aged women are more in number than the aged men-folk.

In West Bengal, male children of the age-group 0-14 only constitute 39.21 per cent of total male population of the State, whereas in the district of Darjeeling they are about 39.35 per cent of the total male population. Amongst females this proportion in the case of the State of West Bengal is about 42.86, while in the district this is nearly 44.26. But in the age-group 15-54 in case of males, the State proportion is higher than the district proportion.

During the decade a significant change is observed in the number of young and aged persons i.e., persons in the age-group 0-14 and 55 and over taken together per hundred of supporting population i.e., persons in the age-group 15-54. This may be seen from the following statement of dependency ratio (i.e., ratio between persons in the age-group 0-14 and 55 and those in the age-group 15-54).

#### STATEMENT 6.2

|      |                         | Dependency Ratio       |                 |  |  |
|------|-------------------------|------------------------|-----------------|--|--|
| Year | Total<br>Rural<br>Urban | Darjeeling<br>District | West<br>Bengal  |  |  |
| 1951 | Total                   | 76                     | 75              |  |  |
| 1961 | Total<br>Rural<br>Urban | 91<br>96<br>76         | 98<br>109<br>71 |  |  |

The 1961 population of the district as well as in the State bear a larger load of dependency than in 1951. This is possibly due to the high fertility and low mortality in the State. This load is, however, greater in rural areas than in urban areas. Darjeeling's population have to bear a load larger than the State average. In 1951 also the dependency ratio of Darjeeling was just a little higher than the State average.

## 7. MARITAL STATUS

Civil condition of the people by age-groups has been shown in Table C-II in Part II A of this volume. The following is a statement of percentage of population by age-groups classified by different marital status for the Censuses of 1951 and 1961.

# STATEMENT 7.1

|      |   | Never<br>Married                        |   | Married                                  |  | Widowed                               |  | Divorced or Separated<br>and Unspecified Status |                                      |
|------|---|---|---|--|--|---------------------------------------|--|---|--------------------------------------|
| Year | Age-<br>group                             | Malos                                   | Females                                 | Males                                    | Females                                  | Males                                 | Females                                | Males   | Females                              |
| 1951 | All ages<br>0-14<br>15-34<br>85-54<br>55+ | 54.56<br>99.52<br>47.82<br>6.42<br>1.83 | 49.91<br>98.86<br>97.19<br>9.61<br>1.28 | 40.95<br>0.47<br>50.08<br>84.02<br>73.81 | 42.84<br>1.11<br>69.75<br>79.97<br>48.74 | 4.49<br>0.01<br>2.60<br>9.56<br>24.86 | 7.25<br>0.03<br>8.06<br>17.42<br>54.98 | •:•<br>• •<br>• •                               | ••                                   |
| 1961 | All ages 0-14 15-84 85-54 55+             | 57.81<br>99.62<br>48.27<br>5.07<br>3.18 | 58.87<br>99.08<br>26.48<br>8.18<br>4.56 | 88.19<br>0.94<br>49 07<br>85.57<br>69.89 | 88.80<br>0.85<br>70.16<br>77.88<br>89.80 | 8.79<br>0.02<br>1.65<br>8.11<br>25.89 | 6.44<br>0.01<br>2.01<br>17.68<br>64.43 | 0.71<br>0.12<br>1.01<br>1.25<br>1.09            | 0.89<br>0.06<br>1.40<br>1.86<br>1.71 |

In 1961 Census during sorting and tabulation all children below 10 years of age were treated as never married irrespective of their actual marital status returned in the enumeration slips. Thus, there may be some scope for doubt about the observation on civil conditions of persons in the age-group 0-14. It is interesting to note that in the district of Darjeeling 200 persons (85 males and 115 females) in the age-group 0-9 returned themselves as married in 1961 Census.

It is a striking feature with this district that child marriage is quite uncommon with its people. In 1961 even less than one per cent of the population of the district in the age-groups 0-14 are married. In 1951 this percentage was only 1.11 for females and only 0.47 for males.

Another remarkable feature of the civil condition prevailing in this district revealed in the 1961 Census is that the proportion of married persons has fallen down in comparison with that at the 1951 census.

While about 40.95 per cent of the total male population and about 42.84 per cent of the female population returned as married in the 1951 census, in 1961 this figure has come down to 38.19 per cent in case of males and 38.80 per cent in case of females. The proportion of those widowed or divorced has also decreased in 1961 as compared to that of 1951.

About 80 per cent of women in the age-group 15-34 have remained unmarried in 1961. But in the next higher age-group i.e., 85-54 a little above three-fourths of the women population have been returned as married and about 17.63 per cent of them are widowed. Nearly half of the men-folk of age-group 35-54 are married. In the age-group 55 and above about 54.43 per cent of the women are widowed. In case of males only one-fourth are widowed in this age-group. The numbers of divorced or separated men and women in the district are 2,009 and 2,269 respectively.

The statement below gives an account of the childwomen ratio in the district as compared to that in 1951,

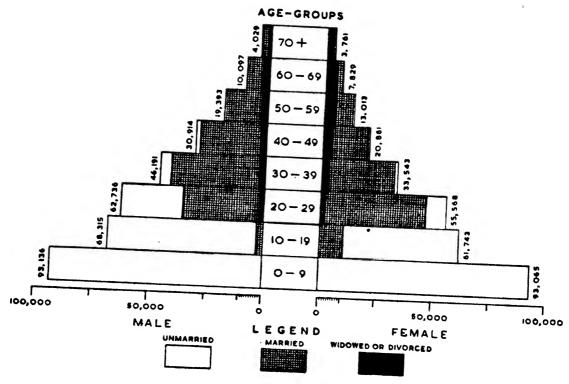

STATEMENT 7.2 CHILD-WOMEN RATIO

| Year | Total<br>Bural<br>Urban | No. of<br>Children<br>0-4 years<br>per 1,000<br>Females of<br>15-44 | No. of<br>Children<br>0-4 years<br>per 1,000<br>Married<br>Women of<br>15-44 | No. of<br>Total Widow<br>females<br>per 1,000<br>Married<br>Women of<br>15-44 |
|------|-------------------------|---|--|---|
| 1951 | Total                   | 544   | 740  | 202   |
| 1961 | Total<br>Rural<br>Urban | 780<br>740<br>695   | 1,001<br>1,004<br>991  | 54<br>51<br>67  |

The child-women ratio has considerably increased during the last ten years apparently suggesting a fall in infantile mortality rate in the district. The child-women ratio when standardised for married women of the age-group 15-44 illustrates how high the specific fertility of adult women of the district is. The ratio

is higher in the rural areas indicating thereby higher fertility in the rural area than in urban areas of the district. The incidence of widowhood has decreased since 1951. This is lower in rural areas than in the urban areas.

The diagram below is the age-pyramid shewing the different civil condition in each decennial age-group in the district as returned in 1961 Census. The left horizontal bars stand for the male population and the right horizontal ones stand for the female population. White portion signify the population of unmarried males and females, checks signify the extent of married males and females and blacks signify that of divorced or widowed males and females. The number inserted sideways to each horizontal bar signifies the total male and female population in that particular age-group. The vertical legends in the middle between the two sets of horizontal bars indicate the age-groups to which the bars relate.

#### 8. LANGUAGE

Nepali is the principal language of the district. It is spoken by 59.09 per cent of the district's total population. But it is the language of more than ninety per cent of the people of the three hill subdivisions, Sadar, Kalimpong and Kurseong. It has been declared the official language of these three subdivisions of the district in addition to its Bengali language under West Bengal Act XXIV of 1961. There has been a phenomenal growth of the Nepali speakers during the last decade of

1951-61. They have become more than three-fold in number of what they were in 1951.

Bengali speakers of Darjeeling constitute about 18.64 per cent of the district's population. Bengali is mostly spoken in Siliguri subdivision. Hindi speakers of this district account for about 7.67 per cent of the district's population.

The statement below indicates the intercensal growth of the population under the three major language group of the district.

# STATEMENT 8.1

SHOWING PERCENTAGE CHANGE IN EACH DECADE (1911-1961) OF POPULATION OF THREE NUMERICALLY MOST IMPORTANT LANGUAGES (INCLUDING MOTHER TONG-UES GROUPED UNDER THEM) AS OF 1961

Note: (a) Absolute figures.

(b) Percentage variation.(c) Percentage to total population.

Nepali (Khas-Kura) of 1931 and 1911 and Eastern Paharia (Khas) of 1921 have been taken as Nepali.

With Bengali-Barik (P. 72), Malpaharia (P. 1,216) and Rajbangsi (P. 2) have been grouped in 1981, Malpaharia (P. 874) has been grouped in 1951, and Malpaharia (P. 1,812) has been grouped in 1931

With Hindi-Devanagari (P. 8) and Nagari-Hindi (P. 48) have been grouped in 1961, Tharu Awadhi (P. 50) has been grouped in 1931 and Tharu Awadhi (P. 10) has been grouped in 1911.

Kurukh/Oraon is the next major mother tongue, having 2.82 per cent of the total population of the district.

As many as one hundred and nineteen mother tongue names have been returned by the people of Darjeeling. Of them twenty belong to countries outside the Indian Subcontinent and sixteen mother tongues have been found unclassifiable by the Linguist for want of any dependable information. Those twenty mother tongues belonging to countries outside the Indian Subcontinent have been treated as foreign languages in the Census of 1961.

The remaining eightythree classified mother tongues have been divided into four families, viz. (i) Austric Family, (ii) Tibeto-Chinese Family, (iii) Dravidian Family and (iv) Indo-European Family following the method of Grierson's classification of languages.

Fourteen mother tongues belong to the Austro-Asiatic Sub-family of the Austric Family. Of them thirteen are attested by Grierson and the one nonattested by him, has been tentatively classified by the linguist to the Registrar General. These fourteen mother tongues are Khasi of Khasi group in Mon-khmer Branch and Kherwari, Koda/Kora, Birjia/Brijia/Binjhia. Munda-unspecified, Santali, Kharia, Kol, Turi, Mahili, Lohari-Munda, Paharia, Savara and Asuri of Munda, Branch. Lohari-Munda has been tentatively classified with Munda Branch. On examination of the actual

returns in the enumeration slips, it transpired that one speaker of that mother tongue is found to be in the Munda Branch. One speaker of Lohari-Munda is returned in the 1961 Census, but in 1951 census there was no return of the mother tongue Lohari-Munda from Darjeeling district.

There are twentytwo mother tongues in the Tibeto-Burman Sub-family of the Tibeto-chinese family. Of them twentyone mother tongues are attested by Grierson and the one (i.s. Adibhasha-Bhotia) non-attested by him, has been tentatively classified with Bhotia-Unspecified speakers by the Linguist to the Registrar General. Among these twenty two mother tongues-Sherpa, Bhotia-Unspecified, Adibhasha-Bhotia, Dukpa, Tibetan, Sikkim Bhotia, Ladakhi, Kagate and Lama of Tibetan Group, Limbu, Khambu and Rai of Eastern Sub-Group under Pronominatized Himalayan Group, Gurung, Sunwar, Mangari, Newari, Lepcha and Tamang of Non-Pronominatized Himalayan Group are found in Tibeto-Himalayan Branch. Mech and Garo of Bara or Bodo Group, Angami of Western Naga Sub-group under Naga Group and Lushai/Mizo of Central Chin Sub-Group under Kuki-chin Group are found in Assam-Burmese Branch.

In the Dravidian Family thirteen mother tongues, viz., Madrasi, Tamil, Malayalam and Kannada have been classified in the Dravida Group, Kurukh/Oraon, Kisan-Kurukh/Oraon, Koya, Khond/Kondh, Lohari-Kurukh/Oraon, Adibhasha-Kurukh/Oraon, Gondi and Nagesia in the Intermediate Group and Telugu in Andhra Language. Of these thirteen mother tongues eight have been classified by Grierson, three (viz., Lohari-Kurukh/Oraon, Adibhasha-Kurukh/Oraon and Nagesia) have been non-attested by him, but tentatively classified by the Linguist to the Registrar General and two (viz., Koya and Khond/Kondh) though classified in Linguistic Survey of India are tentatively reclassified by the Linguist.

In the Aryan Sub-family of the Indo-European family as many as thirtyfour mother tongue returns are found. Persian of Persian Group and Kashmiri of Dard Group are under Eranian Branch. Sindhi in North-Western Group, Marathi and Konkani in Southern Group and Oriya, Magahi/Magadhi, Bihari, Utkali, Maithili, Bhojpuri, Sadan/Sadri, Madhesi, Khortha/ Khotta, Barik, Bengali, Malpaharia, Rajbangsi and Assamese in Eastern Group under Outer Sub-Branch and Urdu, Hindi, Devanagari, Punjabi, Gujarati, Kangri, Gurmukhi, Sikhi, Nagari-Hindi, Rajasthani and Marwari in Central Group, Nepali, Garhwali and Gorkhali in Pahari Group under Inner Sub-Branch and Sanskrit are found in the Indo-Aryan Branch. Of these thirtyfour mother tongues, thirtytwo are attested by Grierson, one (i.e., Konkani) though classified in Linguistic Survey of India, is tentatively reclassified by the Linguist and the other (i.e., Barik) mother tongue is unclassified by Grierson but is tentatively classified by the Linguist.

The people of Darjeeling have not given an encouraging account regarding the extent of bilingualism in the district. Only 13.46 per cent of the total population of Darjeeling have claimed to have known a second language

in addition to their mother tongue. It is seen that Nepali is the first major mother tongue in the Darjeeling district, but the Nepali speaking population have little inclination in knowing a subsidiary language. Only 7.80 per cent of the total Nepali speakers of this district know a second language in addition to their mother tongue Nepali. Very few of the Nepali speaking women have claimed to have known another language. Only five among every one hundred Nepali speaking women, know a second language, while every tenth man amongst the Nepali male speakers have claimed to have known another language. The number of Nepali speakers knowing a second language is shown for each of the subsidiary language as: Hindi (M-12,923, F-6,971); English (M-4,585, F-1,232); Bengali (M-1,853, F-449); Bhotia-Unspecified (M-196, F-3); Tibetan (M-133. F-37); Arabic/Arabi (M-146, F-4); Lepcha (M-47, F 43); Sherpa (M-10, F-68); Sanskrit (M-37); Urdu (M-7, F-4); Limbu (M-7, F-1); Marathi (M-5); Assamese (M-2, F-3); Dukpa (M-2, F-2); Burmese (F-3); Naga-Unspecified (M-1, F-1); Oriya (M-2) and Chinese/Chini (F-1).

The speakers of tribal languages are generally bilingual. Amongst Sherpa speakers, 64 persons out of every hundred, know a second language, while among Lepcha speakers, 62 persons in every hundred, know a second language. About 59 per cent of the Bhotia-Unspecified speakers know a second language. More than four Kurukh/Oraon speakers and more than nine Santali speakers in every hundred persons, know Bengali as a secondary language.

More than thirtyone per cent of the Tibetan speakers have claimed to know a subsidiary language, most of them having known Nepali (M—1,019, F—1,059); English (M—158, F—51); Hindi (M—54, F—27). Seventeen Tibetan speakers also know Bengali as a second language.

Amongst the people belonging to different language groups hailing from other States outside West Bengal, more than fiftyone per cent of the total 2,008 Marwari speakers, know a second language. Amongst their women folk also, bilingualism is quite common. More than 62 per cent of the Marwari speaking women know a second language. Majority of such women know Nepali and some know Hindi or Bengali as a second language. More than 27 per cent of Oriya speakers and more than 21 per cent of Hindi speakers in Darjeeling district know a second language.

More than 15 per cent of the Bengali speakers in Darjeeling district know a second language. The number of Bengali speakers knowing a second language is shown for each of the subsidiary language as: English (M—8,074, F—2,838); Hindi (M—1,886, F—1,928); Nepali (M—1,923, F—543); Sadan/Sadri (F—122); Assamese (M—46, F—67); Urdu (M—52, F—1), Arabic/Arabi (M—18, F—1); Paharia (M—2); Santali (M—2) and German (M—1).

#### 9. RELIGION

Majority of the population of Darjeeling, a little more than 80 per cent, profess Hinduism. Over the decade of 1951-61 there has been a slight decrease in the proportion of Hindu population in the district. In 1951 about 81.71 per cent of the population returned their religion as Hinduism.

The second major religion in the district is Budhism. About 13.13 per cent of the population of Darjeeling are Buddhists. In 1951 also their proportion remained almost the same.

The Christians and Muslims comprise a little more than 3 per cent each of the district's total population. The proportion of both this communities have considerably increased over the decade of 1951-61. Ten years bask in 1951 only 2.76 per cent of the population of Darjeeling were follower of Jesus Christ and only 1.44 per cent of the district's population professed Islam as their religion.

Table C-VII in Part II A of this volume gives the distribution of different religions in the district. The statement below gives the percentage distribution of the four major religions in the district and all its administrative units.

STATEMENT 9.1

| Siliguri                                | 0.06          | 1.00      | 95.27         | 8.65   |  |  |  |
| Kharibari<br>Naxalbari                  | 1.14          | 4.68      | 91.91         | 2.87   |  |  |  |

The Hindu population are almost evenly distributed all over the district though in the Siliguri, Kharibari and Naxalbari group of thanas more than 90 per cent of the population are Hindus. The Buddhists are mostly found in the hill tracts, their proportion in the Siliguri subdivision being negligible (0.87 per cent only). In the Bangli Englick police station their proportion is even

as high as 28.9 per cent. The maximum concentration of the Christians are found in Kalimpong subdivision. In Phansidewa of the Siliguri subdivision also Christians constitute 8 per cent of the thana's total population. The followers of Islamare mostly found in Siliguri subdivision. In Phansidewa police station their proportion is as high as 17.52 per cent of its total population.

The Hindus of Darjeeling have not shown any spectacular growth rate during the last decade, they have increased during the last ten years by only \$5.19 per cent over their number in 1951. In the State of West Bengal Hindus have grown only by \$2.68 per cent

during 1951-61 which is quite close to the general rate of growth in the State. On the other hand the Muslims of this district have registered the growth rate of 40.19 per cent during the last census decade against the State's average growth rate of the Muslim population of 86.48 per cent. The growth rate has been high (25.93) in Siliguri, Kharibari and Phansidewa thanas but the population was small in 1951 having been 11,888 only. Similarly the total population of 464 Muslims in 1951, in Kalimpong and Garubathan showed an increase of 195.26 per cent. The other thanas of Darjeeling need not hold our attention in this respect. The Christians of Darjeeling have added two-third more to their number in 1951.

# **ECONOMIC ASPECTS**

#### 1. WORKING POPULATION

A significant deviation in presenting the data relating to economic activity of the people has been made in 1961 Census. In earlier Censuses, the element of income or the criterion of economic independence was adopted for measuring the economy of the country. But in the present Census emphasis has been laid on the work done or the economic activity pursued by an individual. Thus the persons, engaged in productive work irrespective of their deriving any income or not, have been treated as workers in 1961 Census. Persons such as family workers and children who work but do not earn enough to maintain themselves have also been considered as workers. Any person who generally spends more than one hour per day on any particular productive occupation has been included amongst working population. In respect of seasonal work like cultivation, livestock, household industy etc., persons having regular work for more than an hour a day throughout the greater part of the working season have been treated as workers. Undertrial prisoners or persons temporarily incapacitated if they were previously engaged in any productive work have also been recorded as workers.

The economic data have been presented according to nine industrial categories of workers and non-workers instead of eight livelihood classes classified by self-supporting persons and their dependants in 1951. The economic activity of the people residing in villages has been shown by the different industrial categories in the Village Directory. The Primary Census Abstract and the B Series Tables in Part II A of this volume also present the different facets of the economy of the district.

In the industrial classification of workers, industries have been classified as household and non-household. A household industry is defined as an industry which is not run on the scale of a registered factory and is participated in by the head of the household himself or any member of the household either at home or within the village in rural areas and in the same census house in urban areas.

#### 1.1 Labour participation ratio

Inspite of a very liberal definition of a worker in this Census only 426 per mills have returned themselves in 1961 Census as workers in the district of Darjeeling, though the labour participation ratio (i.e., the percentage of workers to total population) in this district is much better than the State average. In the entire State of West Bengal for every one thousand of its population only 332 persons have been classed as workers, and the

rest of 668 persons have been recorded as non-workers who are believed to be dependent on the working population for their sustenance. In Darjeeling 574 persons per mills are non-workers as per Census 1961.

This district shows the highest labour participation in the State, except the westernmost district of Purulia in the Burdwan division.

The above observation also holds good in case of labour participation amongst the rural population of Darjeeling district. The labour participation ratio in the rural areas of the district is also much above the State average.

In the State of West Bengal as a whole 327 out of every 1,000 rural population are workers. But in the district of Darjeeling only 450 per mills of its rural population have returned themselves in the Census 1961 as workers.

In the urban sector labour participation is even worse than that in the rural sector of the district. Only \$47 out of every 1,000 urban population of Darjeeling district are workers. In the State also \$47 out of every 1,000 urban population are workers. Labour participation amongst the urban population of Darjeeling is higher than that in the urban sector of any of the districts of Jalpaiguri division. Amongst the remaining districts of two other divisions, labour participation in the urban sector of the industrialised districts of Calcutta, Howrah and Burdwan is higher than that of Darjeeling. Thus Darjeeling's urban labour participation ranks fourth in the entire State.

The male component amongst the working force of Darjeeling is higher than the female component. The labour participation ratio amongst the male population of Darjeeling has been found to be 53.42 per cent while this ratio for the females is only of the extent 30.09 per cent. The participation by female in the district of Darjeeling has been found higher than the corresponding State figure. In the State of West Bengal 53.98 per cent of the total male population are workers and amongst the females 9.43 per cent have been treated as workers in 1961 Census.

In rural sector, 53.47 per cent amongst males and 10.62 per cent amongst females in the State of West Bengal are workers, but in the district of Darjeeling 53.45 per cent amongst males and 35.70 per cent amongst females have been classed as workers. In the Urban areas also participation by males in Darjeeling district has been found lower, while by females in that district has been found higher than the corresponding State figures. Darjeeling's women labour force in the urban sector are mostly engaged in other services.

# 1.2 Labour participation in different administrative units

The labour participation per mills is the highest in Pulbasar police station of the district of Darjeeling, being closely followed by Garubathan police station In Pulbasar 539 persons per mille are workers whereas, 587 persons for one thousand of the total population of Garubathan police station belong to the working class. In Mirik, Kalimpong, Sukhiapokri, Kharibari, Jore Bungalow and Rangli Rangliot police stations 475, 460, 451, 450, 440, 427 persons per mille are worker respectively. The labour participation in all these police stations is higher than that of the district as a whole, where only 426 persons Phansidewa. Naxalbari, per mille are workers. Siliguri, Kurseong and Darjeeling police stations are below the district average in respect of the labour participation.

The labour participation is higher in Kalimpong and Siliguri police stations and also in rural police stations of Pulbazar, Sukhiapokri, Garubathan and Mirik, than that of the rural areas of the district as a whole. 450 persons per mille are workers in the rural areas of the district, whereas in rural areas of Kalimpong and Siliguri police stations 498 and 454 persons per mills are workers respectively and in the rural police stations of Pulbazar, Garubathan, Mirik and Sukhiapokri-589, 587, 475 and 451 persons per mills are workers respectively. In the rural police station of Kharibari the labour participation is just below the district average. The labour participation in the rural areas of the police stations of Darjeeling, Jore Bungalow, Rangli Rangliot, Kurseong, Phansidewa and Naxalbari is also below the district average for the rural sector.

Amongst the four towns of the Darjeeling district, Siliguri town has shown the highest labour participation where 36.24 per cent of its population are workers. In Kalimpong town 35.28 per cent of its population are workers. Darjeeling and Kurseong towns are below the district average in this respect.

The labour participation by males is found to be highest in Kharibari police station followed by Garubathan and Pulbazar police stations. In the first two of these three police stations, every six out of any ten men are workers. In other police stations the ratio varies between 46.90 per cent in Kurseong police station to 58.39 per cent in Phansidewa police station. Amongst males in the district the percentage of workers in rural and urban areas is almost the same.

The female labour participation in this district is much higher than that of the State average. In the State of West Bengal 94 females per thousand females are workers, while in Darjeeling district 301 persons per thousand females are workers. Female participation is highest in Pulbazar police station, where 48.66 per cent of the total female population of the than are workers. Female labour participation is lowest in Siliguri police station where only 11.57 per cent of them are workers, but in Siliguri town only 2.99 per cent females are workers.

The statement below gives the percentage of workers amongst total population, males and females for the district as well as for all the police stations of Darjeeling by rural and urban areas separately.

# 1.8 Participation by different industrial classes

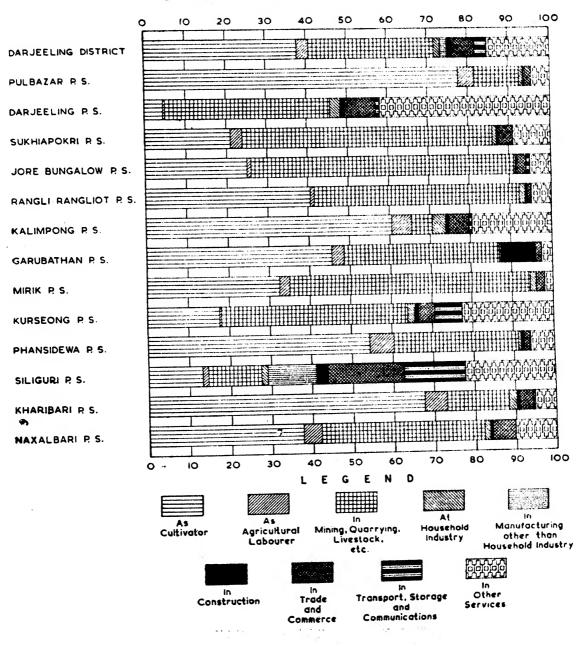

Out of every thousand workers in Darjeeling district 375 are engaged in cultivation and 309 in mining, quarrying, plantations, forestry etc. Every four out

of ten workers of all categories seem to be in the agricultural sector, either as cultivators or as agricultural labourers. In the State of West Bengal as a whole only 54 per cent of the total working population are engaged in agriculture against 40 per cent in the district of Darjeeling. The proportion between cultivators and agricultural labourers in this district is very wide. The cultivators form about 13 times more in number than the agricultural labourers. But in the State of West Bengal the proportion between cultivators and agricultural labourers is about 2.5: 1.

In mining, quarrying, plantation, forestry, etc., and in other services also the proportion of workers

are greater in Darjeeling district than that of West Bengal State. But in all other spheres of activity Darjeeling's participation is in lower proportion than that of the State. Only 3.5 per cent of the total workers of this district are engaged in any industrial or non-household. Household household industries have absorbed 1.7 per cent and other manufacturing industries absorbed 1.8 per cent of the total workers of this district. Every 67 workers per mille are absorbed in household industries against the State's participation of 42 workers per mills and in any other manufacturing industries 18 workers per mills are absorbed here against the corresponding State's figure of 114 persons per thousand working population.

#### PERCENTAGE DISTRIBUTION OF WORKERS

Plantation is a major industrial pursuit for the workers of the district of Darjeeling. 809 persons per one thousand of the total working population of this district are seen to be absorbed in mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities. In the State of West Bengal as a whole the corresponding proportion of the workers in this category is 50 in every one thousand of working population. Trading and commercial activities have engaged about 5.9 per cent of the total workers of the district while in the State they form about 7.5 per cent of the total working population. In other services 15.2 per cent of Darjeeling's workers are engaged against the State's corresponding percentage of 13.4

The female labour participation in agricultural pursuits in the district of Darjeeling is quite marked, of course, in the role of cultivators, but not as agricultural labourers. 458 women workers for every one thousand of their total number are found in this district to be working as cultivators, while the corresponding proportion of the female cultivators in the State of West Bengal as a whole, is only 368 per mille. Participation as agricultural labourers is very low in the district. Only 2.8 per cent of the total working women of Darjeeling are labourers in the agricultural fields, where as in the State this percentage is as high as 21.1. Another remarkable feature of the working women of this district is that a larger proportion of them are gainfully employed in the mining, quarrying, plantation, forestry, orchards etc., industries than that observed in the State of West Bengal. In Darjeeling 413 for every one thousand working women are engaged in these industries, while in the State the corresponding number is 90.

The statement 10.2 indicates the distribution of 1,000 workers, by persons, males and females and by industrial categories of workers for the district of Darjeeling as compared to that of the State.

In most of the rural police stations of this district, labour participation has been found to be in good proportion in the agricultural sector. In the police stations of Pulbazar, Kharibari and Phansidewa 77.25 per cent, 67.73 per cent and 54.14 per cent workers respectively are engaged as cultivators. In all the police stations of Darjeeling district the proportion of agricultural labourers is quite low. In Phansidewa than at he agricultural labourers are in highest proportion forming about 6.07 per cent of its total working population.

Manufacturing employment amongst workers of Darjeeling is more marked in Siliguri police station in comparison to other areas of the district. 12.08 per cent of the total workers of Siliguri police station are engaged in manufacturing industries. Employment in household industries is maximum in Kalimpong police station, 3.37 per cent of the workers of this police station are engaged in household industries.

A comparatively larger proportion of workers of Siliguri and Darjeeling thanas are engaged in trade and commerce. Their percentage in Siliguri is 18.81 and

in Darjeeling 7. 94. In Siliguri police station 14.76 per cent of workers are engaged in transport, storage and communications.

Persons singaged in other services are more pronounced in the police stations containing the district or subdivisional headquarters. In Darjeeling thans 42.08 per cent of the workers are engaged in other services. A plotorial representation of the percentage distribution of workers for all the police stations of the district may be seen at page (45).

The statement 10.3 shows the sector-wise distribution of thousand persons, by sex among primary, secondary and tertiary sectors of industry and non-workers for the district of Darjeeling as compared to that of the State.

#### 1.4 Sew ratio of workers

It appears from the above discussions that the working women in this district are in good proportion when compared to the working women of the State as a whole. It has been seen earlier that against, 53.42 per cent of the males, \$0.09 per cent of the females of this district are workers. But in the State of West Bengal against 53.98 per cent of the males, 9.43 per cent of the females are workers. Darjeeling's sex ratio amongst general population is a little less than that of West Bengal. For every one thousand males there are 864 females in Darjeeling and amongst the working population, for every one thousand male workers the number of female workers is 487. In the State of West Bengal the proportion of sexes amongst general population is 878, but this proportion amongst the working population is 153. It appears, therefore, that the women of Darjeeling have been engaged in any sort of productive occupation by an appreciably higher proportion than the women living in other parts of the State as a whole. Women here find favourable employment as agricultural labourers, and in plantation their proportion is still higher. But their participation in manufacturing industries, in construction, in trade and commerce, in transport, storage and communication and also in other services per thousand males, is not at all satisfactory. In these five categories the sex ratio has been found to be 16, 74, 88, 9 and 187 respectively. The statement given below shows the sex ratio (females per thousand males) among the total population, total workers, each category of workers and non-workers in rural and urban areas of the district as compared to that of the State.

#### 1.5 Workers in industries

In Darjeeling district 1.69 per cent of the workers are engaged in household industry. The total number of persons being primarily engaged in any household industry in the district is 4,501. In household industries workers are mostly employed in making of textile garments, repair of shoes and other leather footwear, manufacture of materials from cork, bamboo, cane etc., and in production of other food products. In making of textile garments as many as 937 males and 126 females of this district are engaged. 830 females of this district are engaged in different household industries. Of them 170 females are engaged in production of rice, atta, flour etc., by milling, dehusking and processing of crops and food-grains.

Of those engaged in various non-household industries excluding plantation industries, majority are employed in different types of services. 72,484 persons of Darjeeling are employed in tea plantation, of them 38,608 are males and 33,876 are females.

In Darjeeling district 3,426 males and 327 females are engaged in retail trading in cereals, pulses, vegetables, fruits etc., 3,304 males and 428 females in retail trading in goods unspecified, 2,264 males and 82 females in construction and maintenance of building etc., and 2,252 males in transport by motor Vehicles. A large number of workers are also engaged in different public services, educational services, medical and health services, religious and welfare services and personal services.

There are 2,744 persons whose services could not be classified elsewhere and there are 21,326 persons in this district whose activities were not adequately described in the census returns. Table B-IV in Part II A of this Volume gives a detailed distribution of workers according to different industries as classified in the Standard Industrial Classification adopted by the Government of India in the Ministry of Labour and Employment.

#### 1.6 Workers by occupation

The Table B-V in Part II A of this Volume presents a detailed picture about the various occupations of, and services rendered by the working population of the district. These occupations have been classified and coded according to the National Classification of Occupations. From a study of these, the different types of services available to the people of Darjeeling

are easily obtained. So far as medical facilities are concerned, it is observed from Table B-V of 1961 Census that there are 311 physicians, surgeons and dentists, of whom only 28 are women. But there are only 178 qualified allopathic physicians and surgeons of whom 27 are women. This means that there is one qualified allopathic doctor for a population of 3,611. There are 84 homeopathic physicians in this district. 55 persons have returned themselves to be practising ayurvedic system of medicine. 20 persons have been returned as physicians, surgeons and dentists who could not be classified otherwise. They are possibly not qualified persons who due to experience have created some confidence in the minds of the people in their medical or supernatural abilities to oure their diseases. There are 394 nurses in the district of whom 386 are women.

On the educational side, the total number of teachers is 2,018 as per 1961 Census, of whom 429 are women. There are 144 University teachers who generally teach in colleges. There is four such teachers amongst the women of Darjeeling. There are 652 teachers of secondary schools of whom 136 are women. There are as many as 1,051 middle and primary school teachers in this district, 263 of them being females. 170 persons have returned their occupation as teaching, but they could not be classified in any one of the above categories.

In the district there are 264 architects and surveyors, 113 of them are Civil Engineers including overseers. 46 persons have returned their occupation as belonging to this group, but they could not be classified in any one of the above classes.

There are 54 jurists in the district. There are 42 legal practitioners and advisers in the district. 11 others have not been classified elsewhere.

A total number of 76,789 persons have returned themselves as farmers, fishermen, hunters, loggers and related workers. Of them 315 are farmers and farm managers, 74,349 are farm workers. There are 95 fishermen (inland and coastal waters) in this district. 2,029 persons are returned as loggers and other forestry workers.

5,898 persons have returned their occupation as belonging to transport and communication services. There are 2,555 drivers engaged in road transport, of whom 599 are cycle rickshaw pullers and 177 are animal drawn vehicle drivers. Motor vehicle drivers are 1,753 in number.

In the Divisions 7-8, i.e., craftsmen, production process workers and labourers not elsewhere classified total number of persons returned are 29,229. There are 425 spinners, weavers, knitters, dyers and related workers, 1,909 tailors, cutters, furriers and related workers, 871 jewellers, gold-smiths and silver-smiths and 1,852 carpenters, joiners, cabinet makers (wood), coopers and related workers.

There are 871 persons of whom 16 are women employed as tobacco preparers and products makers. There are also 440 workers whose occupations are unidentifiable or unclassifiable. 304 persons have not reported their occupation in the 1961 Census.

# 1.7 Workers by age-group

On an analysis of the age structure of the workers of Darjeeling district, it is observed that a larger proportion of workers of this district belong to age-group below 35 years in comparison to those of the State as a whole. Table B-I in Part II A of this volume gives a distribution of working population by different industrial categories of workers and by broad age-groups. More than 56 per cent of workers of this district belong to the age-group 15-34. The proportion of workers in this age-group is about 52 per cent in the entire State of West Bengal.

The proportion of child workers in this district is much above the State average. While amongst every 1,000 of the State's working population only 39 are child workers, in the district of Darjeeling their proportion is as high as 50 per mille. Generally speaking, this age-group represents the school-going age and as such a few of them are expected to come in the working force. With the advancement of primary education this age-group will automatically go out from the working population. Amongst the child workers in the district majority are engaged in agricultural pursuits, in plantation and in other services. Darjeeling's employment of child labour is markedly above the State average which indicates that Darjeeling's children are more on the look out for jobs than being engaged in pursuit of knowledge. In the urban areas participation by child workers has been in this district sixteen for every 1,000 of the total child population. In the State the corresponding percentage of child workers in the urban areas is 1.23. The statement below gives the age-group-wise distribution of workers in the district as well as in the State.

# 1.8 Literacy amongst workers

Table B-III in Part II A of this Volume shows industrial classification of workers by different educational levels both in rural and urban areas separately. Amongst the rural workers of Darjeeling 28 out of every one hundred are literate. In the State of

West Bengal as a whole the extent of literacy amongst the working population in rural areas, is seen to be limited within 34 persons for every one hundred of their total number. Amongst the male workers living in the villages of Darjeeling 41 per cent are literate, but amongst the female workers of the rural Darjeeling illiteracy is very much marked, where about 95 per cent of the total female workers are illiterate. Only 33 out of every one hundred working men in the rural areas of the district are literate without having attained any educational level, 7 have passed Primary or Junior basic examination and only 2 have passed the Matriculation examination. Majority of the literate working women living in the villages are just literate. More of the illiterate workers, as is expected, are generally engaged in the agricultural sector. A good number of them are also engaged in plantation.

In the urban areas of Darjeeling district 62.6 per cent of the workers are literate while in the State of West Bengal the literacy in the working force of urban areas is 63.3 per cent. Amongst the male urban workers 33.7 per cent are illiterate against the State percentage of 35. Amongst the females 66.3 per cent of the urban workers are illiterate in this district, where as in the State, for every 10 females at work 7 are illiterate. Majority of the literate working men and women are without any educational level and also a fair proportion of them have passed the Primary or Junior Basic examination and Matriculation or Higher Secondary examination.

#### 1.9 Secondary occupation

In 1961 Census the entire population were classified by nine broad industrial categories of workers, according to a person's principal work. In case of a person engaged in more than one activity the work in which he spent most of his time was considered to be his principal work and what occupied his second most time was considered the secondary work of that person. Table B-VII in part II A of this volume gives information on such secondary work.

Amongst the cultivators of Darjeeling every twentyfirst person has a secondary occupation. Most of them are secondarily engaged in the agricultural fields as labourers. Only about 569 (0.57 per cent) cultivators of Darjeeling are engaged in household industries in addition to their principal occupation. About 16 per cent of the total agricultural labourers of this district have some secondary occupation, mostly being engaged as cultivators and a few (only 72) at household industry. Of those primarily engaged in household industry, about 6.02 per cent have a secondary occupation, mostly as cultivators and a few (only 75) as agricultural labourers. The persons who are primarily engaged in various nonagricultural and non-household industries like electricity, gas, water and sanitary services and other services, have by a negligible proportion some secondary occupation in the household industry.

#### 2. NON-WORKING POPULATION

In 1961 Census as many as 57.40 per cent of the total population of the Darjeeling district have reported themselves as non-workers. The corresponding figure for the State of West Bengal as a whole is 66.84 per cent. The male non-workers and the female non-workers separately account for 46.58 per cent amongst males and 69.91 per cent amongst females respectively in the district of Darjeeling as against 46.0 per cent and 90.6 per cent in the State. The variation between the percentage ratio of male non-workers and female non-workers both in rural and in urban areas is striking. The statement below gives the percentage distribution of total male and female non-workers to total persons, total males and total females respectively for the district and the State for total, rural and urban areas separately.

#### STATEMENT 10.6

|                        | Total                   | Percentage of Non-workers to Total |                         |                         |  |  |
|------------------------|-------------------------|------------------------------------|-------------------------|-------------------------|--|--|
| State/District         | Rural<br>Urban          | Persons                            | Males                   | Females                 |  |  |
| 1                      | 2                       | 8                                  | 4                       | 5                       |  |  |
| West Bengal            | Total<br>Rural<br>Urban | 66.84<br>67.88<br>65,84            | 46.03<br>46.58<br>44.62 | 90 57<br>89.88<br>94.88 |  |  |
| Darjeeling<br>District | Total<br>Bural<br>Urban | 57.40<br>55.00<br>65.35            | 46.58<br>46.55<br>46.67 | 69.91<br>64.80<br>90.89 |  |  |

In the working age-group 15-59 amongst males those who are not engaged in any productive activity and thus have been shown as non-workers in the Census 1961 form about 12.25 per cent only of total male population of the same age-group in the rural areas of the district. Amongst females about 87.7 per cent of the total female population in the working age-group 15-59 are not in the working force. The corresponding percentage figures for male and female non-workers in the same age-group are 18.78 and 84.21 respectively in the urban areas of the district. It shows that the percentage of female non-workers of the workable age is much higher than that of the male non-workers both in rural and urban areas. The unusually high percentage of the female nonworkers, specially in urban areas, is mainly due to the fact that most of the female non-workers of the workable age are engaged in household duties. The female non-workers of workable age engaged in household duties form 70.84 per cent and 65.49 per cent of the total female non-workers in the agegroup 15-59 in rural and urban areas respectively. The percentage of male non-workers in the workable age seeking employment for the first time and of those employed before but now out of employment and seeking work together accounts for only 28.02 per cent and 19.65 per cent of the total male non-workers of the same age in rural and urban areas respectively as compared to 6.90 per cent and 7.79 per cent for the corresponding female non-workers.

In the age-group 0-14 the participation in the working force should be least. This is more so in the urban areas, where 97.68 per cent of the boys and 99.18 per

cent of the girls between the age 0-14 are non-workers. The following statement shows the percentage of non-workers in different age-groups to total males and females separately for the different age-groups.

STATEMENT 10.7

Percentage of Non-workers to Total

| Age-group | 1     | Rural   | Urban |         |  |
|-----------|-------|---------|-------|---------|--|
|           | Malos | Females | Males | Females |  |
|           | 2     | 8       | 4     | 8       |  |
| Total     | 46.55 | 64.80   | 48.67 | 90.89   |  |
| 0-14      | 98.64 | 94.81   | 97.68 | 99.18   |  |
| 15 -84    | 15.56 | 87.48   | 28.69 | 85.65   |  |
| 8569      | 6.98  | 88.72   | 9.81  | 80.97   |  |
| 60+       | 81.55 | 71.14   | 48.51 | 88.88   |  |

In the urban areas of the district the unemployed persons having educational attainment of Matriculation or Higher Secondary and above constitute only 11.86 per cent of the total unemployed in the urban areas as compared to 2.04 per cent formed by the unemployed persons in rural areas having the educational level of Matriculation or Higher Secondary and above. The maximum number among the unemployed is found to be literate (without educational level). The category alone forms 21.00 per cent

in the urban areas. If literate unemployed persons constitute 49.12 per cent in the urban areas. The rest of the unemployed persons 18.51 per cent have passed the Primary or Junior Basic Level.

In rural areas male unemployed persons having educational level of Primary or Junior Basic account for 15.06 per cent as against 47.84 per cent illiterate unemployed males. Unemployed males with educational standard of Matriculation and above constitute only 2.77 per cent. 82.64 per cent of the total unemployed females in rural areas are illiterate.

The distribution of one thousand non-workers according to the 8 types of activities of the nonworkers show that the largest number of male nonworkers are found to be dependants, infants or disabled. More number of female non-workers are found as engaged as dependant, infant or disabled and next in household duties. The number of female nonworkers who are full time students or children attending school both in rural and urban areas are far less than such male non-workers. Again, the number of full time students or children attending school both for males and females in urban areas is, as it should be, higher than that in rural areas. The number of unemployed persons are also not very significant. The following statement showing distribution per thousand of non-workers according to different types of activities will give a clear idea about the non-workers.

# LITERACY AND EDUCATION

#### 1. PROGRESS OF EDUCATION

The pioneers in the spread of education in the district were Christian missionaries and particularly those of the Church of Scotland Mission. When the British took over the district, popular education was practically unknown. A few of the better classes had private tutors for their boys; a few who could read tried to hand on this accomplishment to their families: and in Buddhist monasteries novitiate monks were taught to chaut libetan texts. But of real general education there was none and no schools worthy of the name were in existence.

The first attempt to reach the hill people by education was made about 1850 by the Rev. W. Start, a private missionary, who added to his record of good work in Darjeeling by opening a school for Lepchas. After him came a band of German missionaries, one for whom, Mr. Niebel, devoted himself to school work, prepared some Lepcha primers and gathered boys together into schools. It was not however until the advent of the Rev. William MacFarlane in 1869 that any broad scheme of vernacular education was introduced into the district. He realised that it would be essential to train teachers and with this object he collected a band of hill boys, to teach whom he devoted the first years of his missionary life in the hills. This group of boys was the nucleus of a training school at Kalimpong. Mr. MacFarlane found he could use Hindi text-books as a means of instruction and induced Government to give scholarships for students attending his courses of instruction. He himself taught in the face of many discouragements and the frequent disappearance of his most promising pupils. he persevered and, overcoming all obstacles, was able, with the help of Government, to start primary schools in many parts of the district.

The progress of education in the district can be viewed more rationally from a study of the Census figures in respect of attainment of literacy by the people of the district. In Census 1961, the enumerator was instructed to record a person as illiterate if that person could neither read nor write or could merely read but was unable to write in any language. A person who could both read and write with understanding was treated as literate. The test for reading was ability to read any simple letter in print or in manuscript. The test for writing was ability to write a simple letter. If a person could both read and write and also had passed a written examination or examinations as proof of an educational standard attained, the highest examination passed by the person was recorded in the enumeration slip.

In the district of Darjeeling only 287 persons for every one thousand of its population have passed the

literacy test in the Census of 1961. Compared to other parts of the State the standard of literacy as prevalent in this district is not so unencouraging. On the results of 1961 Census Darjeeling occupies the seventh place amongst the districts of West Bengal in terms of literacy. In the State of West Bengal as a whole only 293 persons out of every thousand have the rudiments of learning. Thus the standard of literacy in this district is not much below the State average. As regards individual districts, Calcutta is facile princeps, 593 out of every thousand persons having sufficient knowledge to pass the Census test. Then comes the districts of 24-Parganas, Howrah, Hooghly and Burdwan.

In the rural areas of the district 218 per mills are literate, whereas in the State every 216 villagers have returned themselves as literate in 1961 Census. In the rural sector Darjeeling occupies the sixth place amongst the districts of West Bengal in terms of literacy. Only the districts of Hooghly, Burdwan and Midnapore in the Burdwan division, and 24-Parganas and Howrah in the Presidency division have shown a higher literacy rate in the rural sector than the district of Darjeeling. But all other districts of Jalpaiguri division have their standard of literacy below that of Darjeeling.

Persons living in the towns of Darjeeling, on the other hand, have shown lower literary rate as compared to the entire urban areas of the State taken as a whole. This district occupies the fourth place amongst all the districts in terms of urban literacy. Only the district of Calcutta, Cooch Behar and Nadia are above Darjeeling in this respect. 517 town dwellers of the district for every one thousand of their total number know how to read and write against the State urban literacy figure of 529 persons per mills. The percentage of urban literates in Calcutta, Cooch Behar and Nadia is 59.29, 56.98 and 52.10.

In the last census of 1951 the percentage of literates in Darjeeling was only 18.63 against the State percentage figure of 21.5. At the turn of the present century only sixty six persons per mills of this district knew the rudiments of learning. At that time literacy was mainly concentrated among the menfolk. Eleven out of every hundred men of Darjeeling in 1901 knew how to read and write. Women's education was a far cry at that time. Only 13 out of every one thousand women population of the district in 1901 were literate. There was only little progress in respect of literacy in course of the next few census dacades. During the decade 1911-1921 a little more advancement was noticed. In 1931 there was a little fall in the literacy rate in this district.

In course of next twenty years Darjeeling's population showed a remarkable progress in the attainment of liberacy. From 10.34 per cent in 1981 the percentage

1.81

1.88

of literates became 18.68 per cent in 1951. Commendable advancement was particularly noticed amongst the females of this district to take up education. In 1951, 7.92 per cent of the women became literate against only 2.21 per cent twenty years back. In the present Census of 1961 both males and females of this district have shown an appreciable progress in taking up education and attainment of literacy. The statement below gives the percentage of literates amongst total population and separately for males and females in the district for each of the Census decades during the last sixty years except 1941.

16.07

11.18

In the rural areas of the district, as has already been seen, 218 persons are literate for every 1,000 of population. But in 1951 this proportion was only 147 persons to 1,000 of total population. Amongst menfolk literacy has gone up from 24 per cent in 1951 to 33.8 per cent in 1961. In the entire State of West Bengal literates amongst the rural males form 32.86 per cent. In 1951 only 4.4 per cent of the women living in the villages of Darjeeling were literate. One decade passed by this percentage has almost doubled itself. In the State, female literacy is seen to be limited only to 97 women for every thousand of their total number.

Education is, as might be expected, far more widely disseminated amongst the urban than rural population. 51.72 per cent of the total population living in the towns of Darjeeling district are literate. Urban literacy has been rapidly increasing from decade to decade. In the last census of 1951 it was only 41.44 per cent. Amongst the males living in the urban areas of Darjeeling the percentage of literates is 59.21. Ten years back their percentage was 51.27. For every one thousand of total women living in the towns of Darjeeling 415 have returned themselves as literate in 1961. A decade before, their proportion was only 276 for every one thousand of their number. The statement below will show the percentage of literates amongst persons, males and females in the rural and urban areas separately for the district as well as for the State.

#### STATEMENT 11.2

# 2. LITERACY FOR DIFFERENT ADMINISTRATIVE UNITS

Of the four subdivisions in the district, Kurseong subdivision has given the best account in respect of attainment of literacy by its people. As per Census 1961 about 31.7 per cent of the population of this subdivision are found literate. Darjeeling subdivision comes next with the literacy figure of 30 per cent followed by Kalimpong with 28.5 per cent literates. The Siliguri subdivision in the Tarai has shown lowest literacy figure with the percentage of literates of 27.4 only.

Though the people in the hill tracts have come off with a better literacy standard, the persons in the Siliguri police station, if the police stations are taken as units, have shown the numerical majority in the matter of taking up of education. The growing urban influence around Siliguri has obviously played an important role in showing such a high figure of literate and educated persons in this police station. The police station of Darjeeling follows Siliguri very closely. Here also the location of the district administrative headquarters has greatly influenced in taking up education among its people. The women living in Siliguri seem to be much more advanced than those in other areas of the district, as is evident from the percentage of female literates of 34 in this police station. The women of Darjeeling thans have only 26 per cent literates. Spread of education is least observed in group of thanas Phansidewa, Kharibari and Naxalbari in the Siliguri subdivision.

Darjeeling town shows the highest percentage of literates. Siliguri and Kurseong towns seem to be equal in the attainment of literacy by their people. Kalimpong town lags much behind other three towns in this respect. The statement given below will show the percentage of literates for each of the administrative units in the district seperately for males, females for rural and urban areas.

#### STATEMENT 11.3

#### 3. LITERACY BY AGE-GROUP

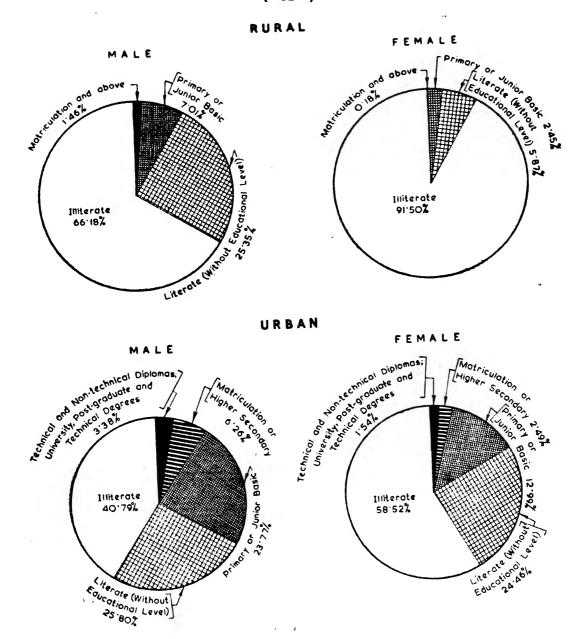

In 1951 only 18.26 per cent of the children in the age-group 5 to 14 were literate. In 1961 the corresponding percentage is 40.89. In the rural sector 343 out of every 1,000 young persons of the age-group 5 to 14 are literate against the corresponding State figure of 289 in 1961 Census. Amongst the girls for every 1,000 of those within the age-group 5 to 14 only 443 are literate. Amongst the girls of rural areas maximum incidence of literacy is observed in this particular age-group unlike the male population in which case steady rise in relative strength of male literates is observed as they advance in years. The explanation of this apparent anomally is that the education among women being a development of comparatively recent times, the number of those who have received instructions is naturally greater among the younger generation. A secondary cause is that the education of a girl is rarely continued after she has left her home for her husband's house and undertaken the duties of a housewife. The same phenomenon is also observed if the entire State is taken into the consideration. Amongst the menfolk, majority of the literate males are found in the age-group 15 to 34 in the rural areas, their percentage being as high as 42.3. In the urban areas their percentage is even higher being of the order of 71.1 per cent. In the urban areas also literacy amongst womenfolk is more pronounced in the schoolgoing group i.e., 5-14 like that observed in the rural areas of the district. Both in the rural and urban areas persons belonging to the age-group 60 and above have given the poorest account in respect of literacy. But in the State of West Bengal as a whole persons belonging to the age-group 35 to 59 have given a fairer account in respect of literacy that those above 60 years of age in the rural areas, whereas in the urban areas of the State the reverse is the case. The statement below gives the distribution of the number of literate males and females per 1,000 of total male and female population of the district of Darjeeling in different age-groups above 5 years of age in the rural and urban areas separately as compared to that of the State.

#### 4. DIFFERENT EDUCATIONAL LEVELS

The table C-III in Part II A of this volume gives a distribution by different levels of education amongst the population of Darjeeling in rural and urban areas separately. It is seen that amongst the rural male population of Darjeeling, those having just passed the test of literacy in Census 1961 and not having come through any recognised written examination account for only 35.35 per cent of their total number. Among the females in the rural areas literates without any educational level account for 5.87 per cent only. 70 men per mille living in different villages of Darjeeling have passed the primary or junior basic examination. Majority of such men are in the age-group of 10 to 19. Amongst the rural female population of Darjeeling three out of every hundred have passed the primary or junior basic examination mostly being in the age-group 10-14. This evidently indicates that advancement of education amongst the females living in rural interiors has been more pronounced in recent years. Higher education has not very much dissemented amongst the villagers. Only 15 out of 1,000 menfolk living in different villages of the district have passed the Matriculation or Higher examinations. Amongst the females in the rural areas higher education is still a far cry. Only two amongst every 1,000 of female population living in the villages of Darjeeling have claimed to have passed the Matriculation examination.

Amongst the persons living in the different towns of Darjeeling one in every four of the male population is literate but without having any educational standard. He can only read and write but has not passed any recognised written examination. Amongst the female population living in the urban areas of the district, it is seen that about 24.46 per cent of them have been classed as literate without any educational level. Among the town dwellers 238 men and 130 women per mills have passed the primary or junior basic examination. 63 men and 25 women per 1,000 of total males and females living in the urban areas of the district have passed the Matriculation or Higher Secondary examination. Among those having taken post-Matriculation higher studies, there are 34 men and 15 women for every 1,000 of total males and females living in the urban areas of the district. Quite a number of persons in this district are found to have

taken different technical and non-technical diplomas not equal to degree. Nearly one thousand and a half of persons living in the different towns of Darjeeling have taken University degree or post-graduate degree other than technical degree. Amongst the technical degree holders a number of persons have taken degrees in engineering, medicine or in teaching. The diagrams given above illustrate the position of different educational levels amongst the people of Darjeeling in its rural and urban areas separately.

#### 5. PRIMARY EDUCATION

In 1873 there were 25 primary schools with 650 boys and girls receiving instruction. Under Mac Farlane's successors in the Church of Scotland Mission, progress was steady. Others interested in the spread of education were not slow to follow the lead given but the Scots

Mission had been the most important influence in the spread of editection in the district.

By 1967 there had been expansion to 70 primary schools with a roll strength of 2,420 boys and 300 girls, average attendance being 1,880. The corresponding figures for 1944 were 299 primary schools for boys with a roll strength of boys 10,166 and girls 1,424 and 19 primary schools for girls with a roll strength of boys 215 and girls 1,167.

In 1944 one hundred and twenty of these schools were run by the Scots Mission, 10 by the Roman Catholic Mission, 3 by the Ramkrishna Vedanta Asram and 4 by the Buldhist Mission (Young Men's Buddhist Mission). Darjeeling Municipality had under its direct management two Biss' Scheme Free Primary Schools—one for boys and the other for girls.

Primary Education being the primary responsibility of the State Government, Compulsory Free Primary Education Scheme has been introduced with effect from 1961-62. In the first and second phases compulsion has been introduced in six thanasis. Siliguri, Phansidewa, Kurseong, Kalimpong, Pulbazar and Sukhiapokri. Attempts are being made to cover the entire rural areas of the district in the third and final phase.

The Official Statistics presented in Series 12 in Part II B of this volume give a full account of the present position of various educational institutions in the district. Within ten years after the first Census was taken in the post Independence period, the number of primary schools in this district has considerably increased. In 1951-52 the district had a total number of 345 primary schools with the student enrolment of 21.816. In 1960-61 the number of schools has become 467 and the number of students attending these schools has become 47,913. These figures include those for the junior basic schools. In 1960-61, there were 63 junior basic schools with a student enrolment of 6,717. Thus the primary schools in this district in 1961 are 404 with a number of 41,196 pupils. The number of schools directly managed by the Government is 14 with 3.133 on the rolls. The District School Board and the different Municipalities of this district have been managing 237 number of primary schools having a strength of 18,019 students. 153 schools are under private management which have been receiving aids from the Government or from the District or Municipal Boards. This district has no unaided school.

In the Census year 1961 the number of students attending various primary and junior basic schools in the district have accounted for about 30.95 per cent of the total persons in the age-group 5 to 14. The male students have accounted for 38 89 per cent and the girl students for 22.67 per cent amongst the total male and female population of the district in the age group 5-14 respectively. There are 1,277 primary school teachers of which 925 are male teachers and 352 female teachers in this district. Of them only 675 male and 193 female teachers are trained.

#### 6. SECONDARY EDUCATION

The progress of secondary education in the district has been quite appreciable during the last decade. In 1951-52 this district had a total number of only 19 high schools with a number of scholars 8,027 only. At the passage of one decade in 1961 the total number of high and higher secondary institutions in the district has risen to 31. The student enrolment has gone upto 11,782. In the whole State of West Bengal the total number of high and higher secondary schools is only 1,957. The district 24-Parganas has the largest number of such schools (338).

Out of the total number of 31 schools, 19 are high schools and the rest 12 are higher secondary institutions. More number of students have preferred the School Final examination to the higher secondary course. The students for higher secondary institutions are 5,606 in number against the student enrolment of 6176 in the high schools. Of the higher secondary schools two institutions are entirely under the management of the Government with a number of scholars 746 in these schools. The rest 10 of the higher secondary institutions are under the private management but nine of them receive aids from the Government and one is unaided. Sixteen high schools of this district are aided and the other three unaided being under the private management.

There are 98 junior high schools in the district, of them 36 are boys' junior high schools and the rest 7 are meant for the girls. Of the boys' junior high schools 44 are 2-class schools (that is teaching is given upto Class VI) and 42 junior high schools for boys are 4-class schools where teaching is imparted upto Class VIII. Of the girls' schools 4 are 2-class schools and the remaining 3 are 4-class schools. The total number of the scholars reading in all these 93 junior high schools of the district is 2,536.

There are 5 senior basic schools with a number of scholars 337 in this district. The district has 63 number of junior basic schools with 1,717 students on their roll.

There are 562 teachers in high and higher secondary schools, of whom 263 are trained.

#### 7. COLLEGIATE EDUCATION

The district has 7 colleges with a number of scholars 1,697, as per register of 1960-61. Of these 7 colleges 5 are meant for imparting general education in Arts and Science and 2 colleges are professional colleges, one offering training course to the teachers for high schools at the under-praduate level and the other one imparting teachers' training course at the post-graduate level. In 1950-51 the district had only 5 colleges with a student enrolment of 539 only.

Of these 7 colleges one is a first grade Government college being located at Darjeeling with a student enrolment of 529 in 1960-61. This college was started in 1948. All the other 6 colleges are under private management 8 of which are aided by Government

and the rest 3 are unaided. Recently a university with post-graduate teaching faculties has been started at Siliguri. With the establishment of the North Bengal University the spread of education in the district has gained a greater momentum.

# 8. EUROPEAN EDUCATION

Darjeeling has a speciality in what is called European education. The following account of the so called European schools in the district is reproduced for the District Gazetteer of 1947.

Darjeeling owes its original development to its suitability as a health resort for Government servants. It is not therefore surprising that schools were needed there for the children of those European Government servants who used it as a sanitarium and who could not afford to send their children to be educated in their native land. Schools were attracted to the District or were opened in it to meet these needs. At first the schools which were started were on a small scale and had a precarious esistence. They gradually gained stability. Their aim was to provide for European and Anglo-Indian children that type of education and upbringing to which the parents had been accustomed in their native country. Though the schools were designed and maintained for European and Anglo-Indian children, the type of education they provided has proved attractive to a number of Indian parents who could afford the fees and practically all the so-called European schools now accept children of Indian parents up to 15 to 25 per cent of the total number of their pupils.

The earliest of the European schools in the district was the Loreto Convent for girls founded in 1846 and managed by the Loreto nuns who have their mother house in Rathfarnham; Dublin. The original building was at Snowy View where teaching continued until a more spacious building on the present site could be completed. That building was replaced in 1892 by the main building now in use. A concret hall was later added and in 1925 a class room building, a hospital and a large skating rink were constructed. There is now a separate building for the staff and Higher School Certificate pupils.

Though most of the teaching is given by the Sisters of the Institute, they are aided by a secular teachers and matrons most of whom are resident. The courses of study are those laid down by the Code of Education for European Schools and include preparation for the Cambridge Junior Schools and Higher School Certificate Examinations, for the Trinity College of Music and Royal Drawing Society art examinations and for elecution examinations. Religious instruction is given to Catholic pupils in Catholic doctrine and to non-Catholic Students in moral philosophy. Lessons are also given to those whose parents so desire, in plane, violin and cello playing, in art, dancing and physical culture and in needlework, domestic science, shorthand and typing. The school has several playing fields, and excellent library and is well equipped with modern apparatus. In normal times, pupils number about 250 of whom 160 are boarders, Numbers increased considerably in war time.

St. Paul's School for boys was opened in Darjeeling 1864 with 30 pupils on the rolls. Part of the funds used to finance the opening was derived from the sale-proceeds of a St. Paul's School which had been located in a building in Chowringhee, Calcutta, from 1848. For a time this school had flourished but as it was unendowed and failed to meet competition, it had to be closed and the building sold. The St. Paul's School of Calcutta had its origin in earlier schools there, one replacing another as various difficulties arose. Such schools were the Parental Academic Institution founded in 1823 and a High School for Europeans in Calcutta established by Archdescon Corrie in 1830.

When it opened in Darjeeling in 1864; the Numbers gradually inschool had one building. creased until 1895 but from that date the prosperity of the school declined until, in 1907, the average number of pupils was a little over 100. Later recovery took place and since 1936 the school has been full. In 1944 there were 257 pupils on the rolls, all of whom were boarders. Boys of all races are admitted on equal terms but in order to preserve the European tone of the school Indian entrants do not normally exceed 25 per cent of the total roll strength. In 1944, the School had a teaching staff of 13 masters and 5 mistresses, about half of whom held degrees of English Universities and the remainder degrees of Indian Universities. There is an experienced steward, an English trained hospital sister and four house matrons. The school prepares boys for the Cambridge Junior and the School Certificate examinations and boys in the top form are prepared for the Intermediate Arts and Science examinations of Calcutta University. Every attempt is made to give as wide an education as possible by encouraging out of school activities. There is a debating society, a carpenter's shop and excellent arrangements for organised games, the playing grounds and tennis courts being some of the best in Darjeeling.

The school occupies a magnificent site about 500 feet above Darjeeling with an unrivalled view of snow mountains. There are four blocks of buildings, enclosing a dignified quadrangle which contains dormitories, class rooms and physics and chemistry laboratories. The Chapel stands apart from the main buildings and below them. It was dedicated in 1935. Excellently designed in the modern style and sited prominently on a ridge, it is one of the features of Darjeeling, visible from almost every part of the town.

St. Michael's School, Darjeeling, is a school for girls under the management of the Sisters of the Order of St. John Baptist. It was handed over to them in 1895, after it had been founded in 1886 as the Darjeeling Girls' School by Bishop Milman of Calcutta. In 1895 it was made a Diocesan School with the Metropolitan as were destroyed. Ne lives were lost and the Lieutenant Governor placed the Darbar Hall at the disposal of the Sisters for temporary use. In 1900 the school was housed in Rivers-Hill and Richmond service of dedication took place in 1901 when the first sod was cut. In September

1904 a new school building and a Chapel dedicated to the Good Shapherd and St. Michael were bleased by the Metropolitan. In 1929 the name of the school was changed from Diocesan Girls' school to St. Michael's School.

The sisters managing the school are aided by a large staff of resident mistresses. Pupils are prepared for the Cambridge school Certificate and Junior School Certificate examinations and for those of the Royal Drawing Society, London, of the Associated Board of the Royal College and the Royal Academy of Music, London, and of the London Institute of Needle work.

St. Joseph's College, North Point, Darjeeling, is conducted by the Jesuit Fathers under whom the Rector of the College is in charge. It was founded in 1898 when Father Henry Depelchin was placed in charge of the small school of St. Joseph at Sunny Bank. In order to provide for expansion, Government gave excellent plot of ground on the crest of the spur running north from Birch Hill and in 1891 the school was removed to the new site after a building had been erected on it. The College now possesses fine buildings to which Government had made grants-in-aid, good laboratories for physics and chemistry, a cinema hall and excellent play-grounds. Teaching is carried out by Jesuit Fathers assisted by a few lay masters. There are nine standards in the school (excluding the infant department) where boys are prepared for the Senior Cambridge examination. The College Department prepares students for the Intermediate Arts and Intermediate Science examinations of Calcutta University. Boys are admitted between the ages of 7 and 12 in the school department; for admission to the college department students must have passed the Matriculation in the first or second divisions. The majority of pupils are Catholics but boys of other religious denominations are admitted: in 1944 there were 31 Indian boys in the school in addition to boys for Sikkim, Nepal and Tibet. In all there were 390 boys on the rolls of whom 317 were boarders and 73 day boys. In the college department there were 30 day students most of them hillmen. Fees vary but in 1944 for day scholars the tuition fee was Rs. 200/per annum and the inclusive charge for boarders Rs. 950/- per annum.

Mount Hermon, an institution of the Methodist Episcopal Church of America, is a co-educational school. Its Board of Governors is made up of missionary representatives of many different missionary societies.

The school was founded in 1895 in order to provide Christian school in a favourable climate, where missionaries' and other English speaking children might be trained physically, mentally and spiritually under Christian influence, guidance and education. The school buildings and play-ground are situated in the centre of the 100-acre Mount Hermon Estate at North Point, Darjeeling.

The school is on the approved list of the Cambridge Syndicate and it receives maintenance and teachers' mlary grants from the Government of Bengal. Mount Hermon is a secondary school and follows the courses prescribed by the Education Department for European Schools, Bengal, with additional courses in music (including preparation for Trinity College Music examinations), handwork and domestic science. All pupils take part in organised games and physical training.

On 31st March 1944 the enrolment was 248 of which number 132 were boys and the remainder girls. One hundred and ninetyone were classed as Europeans and Anglo-Indians and the remainder were Jews, Parsis and Indians. Two hundred and one were boarders and the rest day scholars.

The main school building, known as Queen's Hill, is one of the finest educational buildings in India. Three additional hostels accommodate the boys.

At present there are 38 members on the staff, American, English, Scotch and Anglo-Indians. The Principal is the Manager of the Mount Hermon Estate and his wife is the Vice-Principal of the School.

During the Second World War of 1939-45, a need arose for education for the children of British residents in India who normally sent their children to Europe to be educated and who desired for them conditions comparable with those which they expected to find in Europe. Various schools were started in India to supply the needs of such parents. Two of those which opened in Darjeeling were the New School and Singamari School. The New School was founded in Calcutta in 1940 and first moved to Jalapahar for the summer in 1941 later the main school was transferred to Jalapahar where it continued until December 1944. It provided education from the Kindergarten to the Higher Certificate stages and numbers were limited to 170 European boys and girls. Singamari School was opened in 1941 and was not closed at the termination of the European War. The Principal, Miss S. A. Webb, and a staff of graduates and trained teachers instruct in the subjects of the ordinary secondary school curriculum and prepare students for the Cambridge School Certificate and Junior examination: also for those of the Royal Drawing Society and of the Associated Board of Music. The School is for girls and smaller boys and in 1944 the number of pupils was 74 of whom 84 were boarders.

The oldest of the schools for Europeans in Kurseong is the Victoria Boys' School. It was founded in 1879 by Sir Ashley Eden for boys and girls and was housed in Constantia, at present the residence of the Subdivisional Officer. The School was moved to Dow Hill in 1880. In 1897 the present Victoria School was opened for boys and the Dow Hill School for girls was separated. The Victoria School is a Government school, established originally for the children of Railway employees, later opened to the sons of Government servants and now also to European or Anglo-Indian boys of parents of any occupation. The capacity of the school is about 200, most of whom are boarders. Classes are taught from Standards II to IX and for the Cambridge School Certificate. There are also classes

preparing for the Intermediate Arts examination of Calcutta University. The school is situated on a commanding site near the top of the Dow Hill above Kurseong and has excellent buildings including an assembly hall, gymnasium and class rooms with well equipped laboratories. It has also fine play-grounds. The staff consists of a headmaster, nine assistant masters, two lady teachers, a physical training and games master, an Indian language teacher, a steward, a lady housekeeper, 3 matrons and 4 clerks.

The Dow Hill Girls' School was separated from the Victoria School in 1897 and in 1898 opened as a Middle School with 80 children and a staff of a headmistress, 5 junior mistresses and a matron. It can now accommodate about 200 children as boarders. The accommodation includes a dormitory for little boys up to the age of 81. In 1944 there were also about 10 day scholars. This school is a Government School originally intended to provide education for children of Government servants of the Anglo Indian and Domiciled European community. The majority of pupils continue to come from these communities but in 1944 there were in the school 14 Indian children of various communities. The school prepares pupils for the Senior and Junior Cambridge Local examinations : all the main subjects are taught. Music, domestic science, games and art are all part of the curriculum and Bengali is taught as a second language. The school occupies a site near that of the Victoria School and has excellent buildings and playing grounds which include tennis and badminton courts. There is a hospital serving both schools which has fully qualified staff of three trained nurses.

St. Helen's College, Kurseong, is conducted by the Daughters of the Cross of Liege and was opened in a small rented house in 1890 by Mother Marie then Provincial. Expansion made it necessary to move into larger premises in 1891 and when the earthquake of 1897 had made the latter unsafe a second move followed. The foundation stone of the present building was laid in 1899 and the unfinished building was occupied in 1900. At the present time the school can accommodate 180 boarders and has generally 200 on the rolls. The staff consists of the Sister Superior who is headmistress, twelve Sisters and ten lay Mistresses. The course of studies is that laid down in the Code and preparation for the Cambridge Local includes examinations. Particular attention is given to musical education and elocution and pupils are prepared for the usual music examinations. There are commercial classes and the curriculum includes physical culture and games; the school has good grounds for tennis, hockey, netball and badminton.

The Goethals Memorial School was founded in memory of the Most Rev. Dr. Paul Count Goethals, S. J., Archbishop of Calcutta, and was formally opened in 1907 by Sir Andrew Fraser, Lieutenant-Governor of Bengal. The school is under the management of the Christian Brothers of Ireland and occupies an estate of over 140 acres two miles from Kurseong. It was founded to impart a sound literary, moral and religious education to Catholic boys of the European and Anglo-Indian

communities but Christian boys of other denominations as well as non-Christians are received as boarders. In 1944 there were 225 boarders and 19 day scholars. Studies are those laid down in the code for European schools and pupils are prepared for the Cambridge School Certificate and Junior School Certificate Examinations.

The most important establishment for European education in Kalimpong is that founded in 1500 by the late the Very Rev. Dr. J. A. Graham, C. I. E., D. D., Guild Missionary of the Church of Scotland. He was, until his death on the 15th of May 1942, the Honorary Superintendent of the St. Andrew's Colonial Homes which had been founded by him. The object for which these Homes were established was "to provide for children wholly or partly of British or other European descent such an education and training based upon Protestant principles, as may fit them for emigration to British Colonies or for suitable work elsewhere". The Homes are situated on an estate of about 611 acres on the hill-side above the Kalimpong Bazar at heights ranging from 4,500 to 5,000 feet above sea-level. There is accommodation for 600 children in cottages scattered over the hill-side, each cottage holding 24 to 34 children and being in charge of two ladies from Britain or the Colonies. There are no servants in the cottages and all work is done by the children themselves. This gives them excellent practical training in domestic work which proves of great use in after-life. The Homes have excellent buildings including 18 cottages, a hospital and isolation block, 8 school buildings, 11 staff houses, a Chapel built in memory of Mrs. Graham, wife of the founder, administration buildings (stores, bakery, farm, dairy, hostel, clothing depot, workshops and office), a swimming bath, a workers' club house, Scouts' and Girl Guides, dens and a holiday home for old pupils. The homes had a Higher Grade school with a Secondary section. On the Higher Grade side, pupils are taken up to the Board of Apprenticeship Training Examination and on the Secondary side are prepared for the Cambridge Examination and the Calcutta University Matriculation. There is a teaching staff of 26 teachers most of whom come from Britain and half of whom are University graduates. Three thousand one hundred and ten children have been received into the Homes and old pupils are to be found in all parts of the world, many occupying responsible posts and acquitting themselves with credit. The Homes are managed by a Superintendent controlled by a Board of Management meeting three times a year in Darjeeling, Kalimpong and Calcutta.

St. Joseph's Convent, Kalimpong, was founded in 1922 as a sanatorium for Sisters teaching in plains schools and in 1926 was opened as a boarding school for Anglo-Indian and European girls by the Sisters of the Congregation of Saint Joseph de Cluny. In 1914, there were on the rolls 140 boarders and 50 day scholars including 25 hill children. Boys up to the age of 8 are admitted. Children are prepared for the Cambridge Senior Certificate Examinations and the Trinity College Music Examinations. The Catholic religion is taught but children of other denominations are admitted, Particular

attention is given to health and physical development which are supervised by a doctor and a games mistress. The school has two large playing fields.

## 9. PHYSICAL EDUCATION AND YOUTH WELFARE

After the attainment of Independence in 1947, the Government both at the Centre and the State realised that education is not complete without harmonious development of body and mind and they recognised the importance of physical education in the country. With this end in view, the Government made sincere efforts to improve the existing activities of the school curriculum in physical education and to introduce some new schemes.

A Pilot Project Scheme was introduced to collect some important data for the introduction of compulsory physical education in schools and to improve the physical fitness of the youths of the State.

An Orientation Course for the North Zone was organised at Siliguri in 1962 in order to train up personnel to conduct physical efficiency tests. The object of the scheme was to popularise the cult of physical fitness throughout the country and to arouse enthusiasm of the people, specially of the students and of the young folk for attaining higher standard of physical efficiency. About 500 participants successfully completed the 'Tests' in the district during the third five year plan period.

Every effort has also been made to increase the number of trained personnel in this line by deputing teachers to different colleges and centres in physical education and a number of teachers were trained during the third plan period.

Under the auspices of the Physical Education department a short training course for one month was conducted in 1963-64 for the teachers, at Takdah, to provide trained teachers in the junior and primary schools of the district. A Short training course for 15 days was also conducted in 1964-65 for club members to provide trained leadership to youth organisations of the district.

The Education Department, Govt of West Bengal has been regularly sanctioning grants all through to schools and clubs of the district for promotion of games, sports and other allied activities. During the Third five year plan period the amounts of grants were as follows:

- (a) Grant to A.C.C. Troops of the District Rs. 68,955.00
- (b) Grant to Educational Institution Rs. 2,600.00
- (c) Grant to Youth Clubs Rs. 5,400.00

A sum of Rs. 1.84,548.29 paise has been spent for the construction of the Stadium at Lebong Site. The first phase of the work has been complete. But due to some un-foreseen circumstances the work of construction is suspended at present. The construction of Stadium at Kalimpong at the cost of Rs. 1,10,000.00 only is going to be complete very soon.

To promote travel and to infuse a sense of courage and essentially to educate trekkers, eight youth hostels of the district are being utilised by interested parties throughout the year. In fact, the youth hostels, as an outdoor programme, has cought the imagination of the youths both from within and outside specially for natural beauty and solemn environment of the district.

A Sport Festival was organised in this district for the first time on the 15th August, 1965 in accordance with the recommendations of the West Bengal State Council of Sports. Rs. 1,000/-was sanctioned by the Government, for the festival with the object of creating interest and enthusiasm among the students, youths and general public. About one thousand students both boys and girls participated in the festival. An exhibition foot-ball match was also organised in this connection.

### 10. SOCIAL EDUCATION

With a view to wipe out the nadir of ignorance from the vast illiterate masses, the Social Education Department has launched certain commendable programmes.

#### 10.1 Adult Education Centre

There are 23 male and 1 female Govt. Sponsored Adult Education Centres and 64 Social Education Centres in the block areas functioning at present. These centres are giving educational facilities to illiterate persons and educationally backward classes of the rural areas. In these centres quarterly examinations are held to test the knowledge and progress of the adult students. The teachers of each adult education centres get remuneration of Rs. 20/- per month and Rs. 10/- as contingency expenditure from the Govt. through the District Social Education Officer, Darjeeling. Regarding the Social Education Centres aided from the block, the teachers get remuneration of Rs. 10/- per month and Rs. 10/- as contingency expenditure per month.

#### 10.2 Voluntary Night Schools

Besides these Govt. Sponsored Centres, there are 41 Voluntary Night Schools for adults in different places in the district. Of the total number of such night schools, a sum of Rs. 60/- per year are being paid to 20 voluntary night schools every year.

#### 10.3 Library Centres

In order to give more facilities to the neo-literates and also to provide for follow up studies to those persons who have already gained primary knowledge of reading and writing, library centres are being opened. There are 19 such libraries and out of the total number, five library centres get a sum of Rs. 800/- each every year for the purchase of books and furniture. There are 35 such libraries attached to Social Education Centres in various blocks which get financial help from Govt. from time to time.

# 10.4 Community Centres

There are five Community Centres in the district of Darjeeling under Social Education Scheme. All the centres have been set up in the rural areas of Kalimpong subdivision. The following are the activities of these centres.

There are one Supervisor and one Literacy Teacher attached with every centre, getting remuneration of Rs. 100/- and Rs. 10/- respectively per month and contingent expenditure of Rs. 500/- for the whole year. The literacy classes are being conducted by the literacy teacher. There are facilities for all sorts of indoor and outdoor games, music, sewing and knitting classes, small library etc. Debate, study circles, lectures, social and cultural functions are being arranged from time to time for the rural people. The supervisor of the centre is the incharge of all these activities. Maintenance of the centres are being borne by the Government through the District Social Education Officer, Darjeeling.

# 10.5 Adult High School

One High School for adults, has been organised for the first time in the district at Kalimpong. The school is located at Kumudini Home, Kalimpong. It provides education to the adults including those who work in day time and attend the school in the evening.

# 10.6 Folk Recreational Institutions

Dance, Drama, Kirtan, Yatra, Social and Cultural Activities, Exhibitions etc. come under this head. Yearly grants are being granted to different institutions to promote the development and progress of Social and Cultural activities in the district.

An exhibition-cum-social education mela was organised by the Social Education Department with the help of the publicity Department at Soureni Bazar in March 1964, where more than 8,000 people participated.

# 11. LIBRARIES

# 11.1 Area Libraries

There are 6 area libraries in the district. Each area library has 6 feeder library centres under each of them, through which books are supplied to the remote corners of the district for the benefit of the public. These area libraries get books on loan from Deshbandhu District Library and Central Library at

Kalimpong. The pay of the Librarian and peon and the monthly contingent expenditure are being borne by the Govt. through the Dist. Social Education Officer, Darjeeling, at the rate of Rs. 60/-, Rs. 50/- and Rs. 40/- respectively per month. Each of the feeder library centres get Rs. 10/- as contingent expenditure per month.

# 11.2 Public Libraries

There are 67 Public Libraries in the district out of which 20 such libraries get Govt. grants for the purchase of new books from time to time.

# 11.8 Rural Libraries

There are 19 Rural Libraries functioning in the district. The salary of the librarian and peon at the rate of Rs. 75/- and Rs. 40/- respectively per month along with the contingent expenditure of Rs. 50/- per month are entirely borne by the Govt. through the District Social Education Officer, Darjeeling. 50 per cent of contingent expenditure are being spent on the purchase of new books every month.

# 11.4 Subdivisional Libraries

There are two Subdivisional Libraries one at Siliguri and the other at Kurseong. These libraries cater to the needs of the people of remote villages through mobile service, and feed the small libraries in rural areas by giving books on loan.

# 11.5 Deshbandhu District Library

Deshbandhu District Library, Darjeeling is the parent organisation of all the libraries in the district. It provides library facilities to all fibraries, i.e., public libraries, rural libraries, area libraries, library centres which are affiliated to Deshbandhu District Library, Darjeeling. At present there are 46 institutional members under it. It has several departments e.g. reading room, issue section, reference section, juvenile section and lending section. There are 16,529 number of books in stock in various languages i.e., English, Bengali, Nepali, Hindi, Tibetan and Urdu etc.

Deshbandhu District Library regularly holds cultural and educational functions, study circles, debates, film shows etc. The magazine "Bartika" in manuscript is being published in every two months, both in Bengali and Nepali languages. The magazine deals with Social Education and Library services.

# NATIONALITY AND MIGRATION

### 1. Non-Indian Nationals

Most of the inhabitants of Darjeeling are Indian nationals. Only a total number of 4,601 persons enumerated in the district are non-Indian nationals. In 1951 the non-Indian nationals numbered about 7,457 in the district.

Majority of the non-Indian nationals of Darjeeling are Tibetans. Their number as per 1961 Census is 2,108. Next are the Nepalese nationals, their numerical strength being 1,200. Bhutanese nationals are 172 in number. There are 438 (M-21, F-417) Pakistani nationals. There are only 197 Chinese nationals in this district. Darjeeling being a charming hill resort, has also attracted people of many different nationalities of the world. Thus a number of persons are found to have come here from all different corners of the world.

#### 2. MIGRATION

The fact that strikes most about the distribution of population over any region is its unevenness, its variation in density from place to place. Changes in the pattern of population distribution in a country are the product of two forces, (a) migratory movements and (b) variations in the rate of natural increase. The latter factor above as has already been discussed in earlier chapters, in a country or in a region marked by rural-urban differentials in fertility and mortality would produce a considerable change in the pattern of population distribution. But where economic opportunities exist, migratory movements have a vital role in fixing the population distribution of the region.

As already stated, apart from natural increase, migration plays a predominant role in the growth of population in a region where urbanisation is taking place. People usually migrate from one place to another for higher wage rate, good economic opportunities and good land to settle.

The Census definition of migration must be clarified first. People in a particular region have been enumerated according to their place of birth and duration of stay in that particular region. The place of birth statistics regarding migrants will naturally be a crude measure of inflow and outflow of migrants. But in absence of any other reliable data, they will provide a good picture of the flowpattern of the migrants and its impact on population growth.

The data on migration as processed in 1961 Census have been fully presented in Census of India 1961, Part II-C (ii), Vol.XVI, West Bengal and Sikkim. For want of space any such data could not be presented in this volume.

The data on migration have been broadly divided under two classes, (a) all time immigrants into

Darjeeling district by place of birth (both rural and urban) and (b) inmigrants to and outmigrants from Darjeeling district from and to other districts of West Bengal.

An extract Table D-II is given below showing all time inmigrants into the Darjeeling district by place of birth (rural and urban),

# STATEMENT 12.1 EXTRACT TABLE D-II—PLACE OF BIRTH

| Country/State        | Total<br>Rural | Enumerated in Darjeeling District |          |                 |  |  |  |  |  |
|----------------------|----------------|-----------------------------------|----------|-----------------|--|--|--|--|--|
| where born           | Urban          | Persons                           | Males    | Females         |  |  |  |  |  |
| 1                    | 2              | 8                                 | 4        | 5               |  |  |  |  |  |

If the number of persons born anywhere in the district of Darjeeling as given in items I (a) and (b) in the statement above are excluded, it is revealed that the total number of immigrants into Darjeeling district is about 169 thousand of which 101 thousand are males and 68 thousand females.

Of those total inmigrants to the district of Darjeeling a little less than 67 thousand persons have come from other States of India. Bihar's contribution is the maximum. This State alone has sent a little more than 40 thousand people to Darjeeling Next to Bihar is Assam. About 4,780 persons born in Assam have been enumerated in this district. U.P. follows Assam very closely. This State's contribution towards the population of Derjeeling is 4,698. Punjab, Bajasthan, Orissa and Madhya Pradesh rank next in terms of inmigration into the district of Darjeeling.

Each of them has sent more than two thousand persons to this district. Other State's contribution is nominal.

The inmigrants coming from other districts of West Bengal are about 13,521 in number. Most of them (5,077) have come from the centiguous district of Jalpaiguri. Maximum number of persons born in Darjeeling have also gone to Jalpaiguri evidently in search of food and employment. They are about 6,758 in number. A bulk of Darjeeling's population also have moved to Calcutta and its adjacent industrial districts of 24-Parganas, Howrah, Hooghly and Burdwan.

The statements below give a clear picture of the trend of inmigrants and outmigrants into and from the district of Darjeeling to other districts of the State of West Bengal.

# SCHEDULED CASTES AND TRIBES

## 1. SCHEDULED CARTES

From the first Indian regular Census of 1872 caste and tribe denominations of the population have been regularly recorded till 1941, though variations exist in the extent of detailed tabulation. Beverley's Report of 1872 is a pioneer and painstaking study of the castes. In 1881 the statistics relating to 66 castes having a population of not less than one hundred thousand were tabulated for every district of Bengal. In the Census of 1891 every caste having a population of more than one thousand in any district was tabulated down to the thans.

In 1901 Risley, then Census Commissioner of India, attempted for the first time to classify the Hindu castes according to their social standing. This according to Mitra ( Preface to the Tribes and Castes of West Bengal, 1951) resulted in "incidentally sowing the dragon's tooth of 'depressed' and 'scheduled' tribes and castes." Risley's monumental 'Tribes and Castes of Bengal' was published in 1891 which, in fact, determined the fate of the next three Censuses. apparently limitless and ever widening horizon was, however, circumscribed in 1911 with the confining of tabulation only to those castes which subscribed 50,000 or more to the population of the province, or 25,000 to the population of a district, and to those others of special local importance or ethnological interest.' The census of 1921 seems to have paused for breath. In 1931, 141 castes and tribes were tabulated districtwise. In 1941, the scheduled castes were defined by the Government of India Orders of 1936 based on the Government of India Act, 1985. This list contained the names of 62 scheduled castes and 14 scheduled tribes, but in the Census a total of 118 castes and 17 tribes, scheduled as well as non-scheduled were tabulated down to the district. For the first time castes, as such, were not recorded in the census of 1951. The caste or tribe of a person was entered if he belonged to the scheduled castes or scheduled tribes or backward classes.

The recording of castes for the general population was dispensed with in the 1961 Census also. The caste or tribe of a person was only entered in the individual slip, if a person belonged to any scheduled caste or scheduled tribe, the names of which have been listed by the President of India as belonging to the scheduled castes and scheduled tribes in the appropriate order passed by him. The list of the scheduled castes and scheduled tribes for the State of West Bengal has been given in the Pretace to Part II-A. General population Tables, Census 1961, Volume XVI, West Bengal and Sikkim. In better fulfilment of the Constitutional responsibilities a more detailed tabulation of the data relating to the scheduled castes and scheduled tribes have been undertaken in this Census. The collective population of the scheduled castes and

scheduled tribes for individual villages in any police station of the district have been shown in the Village Directory in Part III of this volume; other tables of significance have been given in the SCT Series in Part IIA of this volume. The Census of India 1961, Volume XVI. Part V-A(i) and (ii)—Tables for Scheduled Castes and Scheduled Tribes for West Bengal will give a more elaborate picture of the different aspects of the people belonging to the scheduled castes and scheduled tribes in the different districts of West Bengal.

# 1.1 Concentration of Scheduled Castes

The scheduled caste population inhabiting the district of Darjeeling comprise 13.19 per cent of its population. This percentage is lower than the State average. In the State of West Bengal almost every fifth person belongs to a scheduled caste. In the rural sector of the district, 13.85 per cent of its people are scheduled castes as against the State rural average of 23.6 per cent. In the urban sector the proportion of scheduled caste population in the district is higher than that in the State. In the State only 7.9 per cent of the urban population are scheduled castes, whereas they make 11.00 per cent of the urban population of the district of Darjeeling Of the total scheduled castes in the State as a whole, those living in this district account for only 1.20 per cent. This percentage is 1.07 in respect of rural areas, and 2.36 in respect of urban areas.

Amongst the male population of the district 12.91 per cent are scheduled castes and amongst the females their percentage is 13.52. In the rural sector 13.56 per cent of the male population have returned themselves to be belonging to the scheduled castes and amongst the females their percentage is 14.16. In the urban areas 10.94 per cent of the male population are scheduled castes, whereas amongst the females their percentage is 11.10. The male population amongst the scheduled castes of this district account for 1.20 per cent of the total male scheduled castes in the entire State of West Bengal. In case of females this percentage is 1.19. In the rural and urban sectors the male population amongst the scheduled castes of this district account for 1.06 per cent and 2.35 per cent respectively of the total male scheduled castes of the State. In the case of females in the rural areas they comprise 1.08 per cent and in the urban areas 2.38 per cent.

Scheduled caste population of this district mostly live in Siliguri subdivision where they account for nearly 58.79 per cent of the district's total scheduled caste population. 21.13 per cent, 11.63 per cent and 8.45 per cent of the total scheduled castes of this district live in Sadar subdivision, Kalimpong subdivision and Kurseong subdivision respectively. Thus a little less than three-

fifth of the total scheduled castes of the district are found in Siligari subdivision and the rest, a little more than two-fifth are distributed among the other three subdivisions of this district.

Amongst the police stations of the district of Darjeeling maximum concentration of the scheduled castes is found in Phansidewa police station. 18.95 per cent of the total scheduled castes of the district are found in Phansidewa police station. Siliguri police station in Siliguri subdivision ranks second accounting for 14.20 per cent and the third position goes to Kharibari police station of the same subdivision, where this percentage is 13.02. Naxalbari police station ranks fourth accounting for 12.62 per cent of the total sobduled castes of the A little less than three-fifth of the total district. scheduled castes of the district are accounted for by these four police stations. Kalimpong police station in Kalimpong subdivision and Darjeeling police station in Sadar subdivision each accounts for nearly 10 per cent of the total scheduled castes of the district. Next in order comes Kurseong police station of the Kurseong subdivision where this percentage is 6.50. In Jore Bungalow and Rangli Rangliot police stations of the Sadar subdivision they comprise 3.41 per cent and 3.15 per cent respectively of the district's scheduled caste population. In Sukhiapokri and Pulbasar police stations of the Sadar subdivision this percentage is 2.75 and 2.30 respectively.

A little less than 2 per cent of scheduled caste population of the district reside in each of Mirik police station of the Kurseong subdivision and Garubathan police station of the Kalimpong subdivision.

The following statement gives the percentage of scheduled caste population to total population of the police stations and other administrative units of the district of Darjeeling.

#### STATEMENT 13.1

| District/Subdivision/<br>Police Station | Percentage of<br>Scheduled Caste |
|---|----------------------------------|

|   |                                  |

### 1.2 Strength of Individual Scheduled Castes

Rajbanshis form the major scheduled caste in the district. This caste alone forms 38.20 per cent of the total scheduled castes of the district of Darjeeling. Inthe rural areas this caste accounts for 46.91 per cent of the total rural scheduled caste population of the district. Numerically Kamis (Nepali) come next to Rajbanshis. In the villages of Darjeeling 22,95 per cent of the total rural scheduled castes of the district belong to the Kami community. Next to the Kamis (Nepali), Damais (Nepali) have the largest share among the rural scheduled castes of the district. Almost every tenth person belonging to the scheduled castes living in the villages of the district is a Damai (Nepali). Bagdi or Duley and Sarki (Nepali) are next in order in the rural sector in terms of numerical predominance. They form 8 48 per cent and 3.28 per cent respectively of the total rural scheduled castes of the district. Next place goes to the Namasudras and they account for about 8.09 per cent of the total rural scheduled castes. Numerically Lohar and Jalia Kaibartta are next in order in the rural sector. They form 1.75 per cent and 1.41 per cent respectively of the total rural scheduled castes of the district. Chamars and Mehtors account for nearly one per cent each of the total rural scheduled caste population. All other castes account for even less than one per cent of their total number in rural Dariceling.

In the urban sector Kamis (Nepali) form the major scheduled caste community. They account for 28.87 per cent of the total urban scheduled castes of the district of Darjeeling. Damais (Nepali) occupy the next position. They account for 18.75 per cent. Sarkis (Nepali) form 7.01 per cent. In the towns of Darjeeling Chamars have the next position (6,31 per cent). Mehtors come next in position, accounting for 4.96 per cent. 8.61 per cent and 3.54 per cent each of the total scheduled castes living in the towns of Darjeeling are Dhobas or Dhobisand Namasudras respectively. Dosadh or Dusadh including Dhari or Dharhi and Bagdi or Duley account for more than 2 per cent each of the total urban scheduled caste population. Rajbanshi, Jalia Kaibartta and Paliya account for more than one per cent each of their total number in urban Darjeeling. Only Lohar scheduled castes account for even less than one per cent of the total urban scheduled caste population of the district.

The statement below shows some selected individual scheduled castes as percentage of the total scheduled castes in the rural and urban areas of the district.

#### STATEMENT 13.2

|   | Percentage of Scheduled Caster |       |  |  |  |  |  |

#### STATEMENT 18.2-contd.

| •                       | Percentage of Scheduled Castes |       |  |  |  |  |  |
|-------------------------|--------------------------------|-------|--|--|--|--|--|
| Name of Scheduled Caste | Rural                          | Urban |  |  |  |  |  |
| Kami (Nepali)           | 22.95                          | 28.87 |  |  |  |  |  |
| Lohar                   | 1.75                           | 0.28  |  |  |  |  |  |
| Mehtor                  | 0.51                           | 4.96  |  |  |  |  |  |
| Namasudra               | 8.09                           | 8.54  |  |  |  |  |  |
| Paliya                  | 0.08                           | 1.10  |  |  |  |  |  |
| Rajbanshi               | 46.91                          | 1.87  |  |  |  |  |  |
| Sarki (Nepali)          | 8.98                           | 7.01  |  |  |  |  |  |
| Unclassified            | 0.92                           | 12.08 |  |  |  |  |  |

In the rural sector maximum number of Bagdis live in Kharibari police station of Siliguri subdivision, where they account for 69.64 per cent of their total number living in the rural areas of the district.

Majority of Rajbanshis live in Phansidewa, Siliguri, Kharibari and Naxalbari police stations of Siliguri subdivision, where they account for 42.13 per cent, 15.18 per cent, 23.84 per cent and 18.89 per cent respectively of their total number living in the rural areas of the district.

Majority of Kamis (Nepali) live in Pulbagar, Darjeeling, Sukhiapokri, Jore Bungalow and Rangli Rangliot police stations of Sadar subdivision, in Kalimpong police station of Kalimpong subdivision and in Kurseong police station of Kurseong subdivision. In Kalimpong and Kurseong police stations they account for 18.56 per cent and 14.03 per cent respectively of their total number living in the rural areas of the district.

Most of the Damais (Nepali) are living in the rural parts of all the police stations of Sadar, Kalimpong and Kurseong subdivision of Darjeeling district. In Kalimpong police station 1,145 and in Darjeeling police station 829 Damais (Nepali) are living in villages. In Nazalbari police station 81.64 per cent of the Namasudras of rural parts of Darjeeling district are living.

In the urban sector majority of Kamis (Nepali) live in Darjeeling and Kalimpong towns. 41 28 per cent of the total urban Kami (Nepali) population of Darjeeling district live in Darjeeling town and, 39.12 per cent in Kalimpong town. Majority of Damais (Nepali) live in Darjeeling town, where they account for 57.57 per cent of the total urban Damai (Nepali) population of the District. Next to it Kalimpong town accounts for 29.89 per cent of them.

## 1.8 See Ratio

Amongst the scheduled caste population of Darjeeling for every one thousand males there are 905 females. But amongst the general population the sex ratio is 864. In the rural sector the proportion of sexes amongst the

scheduled caste population is higher than that amongst general population of the district. While it is 949 amongst the scheduled caste population in the rural areas, it is 909 amongst the general population. For every one thousand scheduled caste males residing in different towns of Darjeeling, there are 742 females, whereas amongst the general urban population there are 781 females to one thousand males. Most of the scheduled caste population are engaged in the agricultural sector. Inmigration and outmigration of the scheduled caste males have not been able to effect this ratio to any considerable extent.

The proportion of sexes, while studied for the individual scheduled castes in the district shows that the Rajbanshis have lesser number of women even than the total district average for the scheduled castes. In the rural areas, for every one thousand of their male population they have 801 femsles. In the urban areas the proportion of sexes among them is much higher than that of the district average, 1,750 females to one thousand males.

Kamis (Nepali) show a higher proportion of sexes than the district average. In this community there are 983 females for one thousand males against the district average of 905. In the rural areas this proportion is 1,108 and in the urban areas it is 656.

Damais (Nepali) have more women than men. They have, 1,174 females for every one thousand of their male population. In the rural areas this caste also has more women than men. In the rural sector there are 1,088 females of this caste for every one thousand of their male population. Female Damais (Nepali) outnumber their male counterparts in the towns of Darjeeling, their proportion being 1,383 females to one thousand males.

Sarkis (Nepali) also show a higher proportion of sexes than the district average. In the rural areas this caste has more women than men. Sarkis (Nepali) have 1,010 females for every one thousand of their male population in the rural sector. In the urban sector they have 770 females for every one thousand of their male population.

#### 1.4 Literacy

As per 1961 Census there are 287 persons for every 1,000 of its population who have passed the test for literacy in the district. There are 222 persons out of 1,000 belonging to the scheduled castes who could come out successfully in the literacy test laid down in 1961 Census. Amongst the male population 40.15 per cent have been shown as literate in the district. Amongst the male scheduled castes the percentage of literates is 33.11. 102 scheduled caste females amongst 1,000 of their womenfolk have been enumerated in the Census of 1961 as literate, against 155 amongst the general womenfolk of the district.

In the rural sector 211 out of 1,000 persons of the scheduled castes are literate. Amongst the scheduled caste males of rural areas the percentage of literates

is \$3.61, while for general population it is \$3.82. Amongst the women belonging to the scheduled castes and living in the rural areas of the district, literacy is seen to be confined within only 78 out of every thousand of their total number.

In the urban areas of the district about 51.72 per cent of the population are literate, while this percentage for scheduled castes in the urban areas is only 27.17. The percentage of male literates among scheduled castes living in the urban areas is 31.26, whereas for general population it is 59.21. Amongst the womenfolk 21.67 per cent of the scheduled castes living in the towns of Darjeeling district are seen to be literate, while: their percentage for general women is 41.48 for the urban Darjeeling.

The statement given below shows the comparative statement of percentage of literates amongst the general population and the scheduled caste population in the total, rural and urban areas separately.

#### STATEMENT 13.3

|                  |       | Percentage of Literates |       |         |  |  |  |  |  |
|------------------|-------|-------------------------|-------|---------|--|--|--|--|--|
|                  |       | Persons                 | Males | Females |  |  |  |  |  |
| Total Population | Total | 98.70                   | 40.15 | 15.46   |  |  |  |  |  |
|                  | Rural | 91.77                   | 88.82 | 8.50    |  |  |  |  |  |
|                  | Urban | 51.79                   | 59.21 | 41.48   |  |  |  |  |  |
| Scheduled Castes | Total | 22.24                   | 83.11 | 10.28   |  |  |  |  |  |
|                  | Rural | 21.06                   | 83.61 | 7.83    |  |  |  |  |  |
|                  | Urban | 27.17                   | 31.26 | 21.67   |  |  |  |  |  |

Rajbanshis are the most literate community in the district. In the rural areas their percentage of literates is 24.68, while in the urban areas it is 22.56. In the rural sector Kamis (Nepali) hold the next position in attainment of literacy and education. 17.35 per cent of Kamis (Nepali) are literates. Among Rajbanshi males in the rural areas the percentage of literates is 40.11 and for their females it is 5.42. Among Kami (Nepali) males the percentage of literates is 28.74 and among their females it is 7.06 in the rural areas of the district of Darjeeling. Damais (Nepali) come next in order of literacy in the rural areas. The percentage of literates for this caste is 17.85. Their men are more advanced in this respect, 28.44 per cent of them being literate. The percentage of literates among the female Damais (Nepali) is 8.12. A little more than every fifth Namasudra living in the villages of the district is literate. Their men are more advanced in this respect, 32.34 per cent of them being literate. For their females the percentage of literates is 8.98. In the rural sector the percentage of literates among the Sarki (Nepali) caste is only 13.20. For their males it is 21 01 per cent and for the females it is only 5.47 per cent.

Among the Bajbanshis in the rural sector \$1.67 per cent of their males are literate without educational level, about one-thirteenth of them have passed the Primary or Junior Basic standard and only 0.57 per cent are Matriculates.

In the urban sector maximum implience of literacy found amongst the Namasudra caste. Damais (Nepall) follow them. The percentage of literates for Damais (Nepali) is 36.68. Males of this caste ara quite advanced in this respect, 44.97 per cent of them being literate; while their literate womerfolk are \$0.60 per cent. Amongst male Damais (Nepali) in the urban sector 26.12 per cent are literate without educational level and 17.41 per cent have passed the Primary or Junior Basic standard. Extent of Literacy among the Kamis (Nepali) are also quite good. Nearly every 3 dut of 10 persons living in the towns and belonging to this caste are literate. The male percentage of literates among Kamis (Nepali) is \$1.84'. Females literacy among Kamis (Nepali) is lower then that of Damais (Nepali), being only of the extent of 25.27. Amongst male Kamis (Nepali) in the urban sector, 16.50 per cent are literate without educational level. 1300 per cent of them have passed the Primary or Junior Basic standard. In the urban sector 26.19 per cent of Sarki (Nepali) community are literate. Amoria their males 35.24 per cent are literates and for their females the percentage is only 14.48.

#### 1.5 Economic Activities

Labour participation is proportionately higher amongst the general population than the scheduled castes of the district. While for every one thousand of general population of Darjeeling 426 are workers, this proportion for scheduled castes is 407 persons per mills. In the rural areas participation by scheduled castes at work is seen to be lower than the general population. Male component of the scheduled caste participants is much higher than the corresponding female component. Amongst every one thousand male scheduled castes in the district 585 are actively engaged in any short of productive occupation and among their womenfolk only 210 per mills are engaged as workers. The proportion of male workers amongst scheduled castes in the district is higher than that amongst general population, while the proportion of female workers amongst scheduled castes is lower than that amongst general population. Participation by scheduled caste females at work is more pronounced in the rural areas than in the urban areas. Amongst the scheduled caste females living in different towns of Darjeeling the percentage of workers is only 9.8, while amongst the scheduled caste females living in the villages of the district the percentage of workers is 28.4. In the urban Darjeeling amongst general female population, the proportion of female workers is 9.1 per cent. In the urban areas as a whole labour participation is also lesser among the general population than that among scheduled caste population. In case of general population percentage of workers in the urban areas is 84.7, while for the scheduled castes this percentage is 40.6. Participation by male scheduled castes is also higher than that of general population. In case of general male population percentage of workers is 58.8, while for the scheduled castes this percentage is 68.9.

It has already been observed that more workers of Darjeeling are engaged in the primary sector. This is more so in case of the scheduled caste workers. For every one thousand of general workers 375 are engaged as cultivators and 29 as agricultural labourers. Among the scheduled castes 467 for every one thousand of their working population are engaged as cultivators. But the scheduled caste workers are engaged as agricultural labourers by a higher proportion than the general workers. 47 scheduled caste workers for every one thousand of their working population are agricultural labourers. In the rural sector 577 to every 1,000 of their working population are engaged as cultivators and 54 per mille as agricultural labourers.

In household industries participation is more pronounced amongst the scheduled castes than the general population. 5.62 per cent of the scheduled caste workers are engaged in household industry, while this percentage among general population in the district is 1.7.

In plantation, livestock etc. participation is more pronounced amongst the general population than the scheduled caste population. 80.9 per cent of the general workers are engaged in this category while the percentage among scheduled castes in the district is 17.62. Manufacturing industries do not play any significant role in the economic life of this district. Only 4.77 per cent of the scheduled caste workers of this district are engaged in manufacturing industries, though in the urban sector this percentage is as high as 23.65. In trade and commerce 4.85 per cent of the scheduled caste population of this district are engaged, while in transport, storage and communication this percentage is only 2.07.

In other services participation by scheduled caste workers is less than the general workers of the district. While 15.2 per cent of the total workers are engaged in other services, among the scheduled caste workers this percentage is 13.21.

Amongst the individual scheduled castes of the district it is seen that those belonging to Bagdi, Kami (Nepali), Rajbanshi and Sarki (Nepali) communities are primarily engaged in agriculture. In the rural areas 78.37 per cent of Bagdi workers, 88.06 per cent of Bajbanshi workers, 31.34 per cent of Kami (Nepali) workers and 30.28 per cent of Sarki (Nepali) workers are engaged in agriculture. 40.78 per cent of Damai (Nepali) workers are engaged in plantation, livestock etc. Amongst the Chamars 22.22 per cent workers are engaged in household industries and 27.51 per cent in other services. 48.10 per cent of the Kami (Nepali) and 39.89 per cent of the Sarki (Nepali) workers are engaged in plantation, livestock etc.

In urban areas of this district 98.39 per cent of Bagdi workers are engaged in manufacturing other than household industries. 22.12 per cent of the Chamar workers are engaged in household industries, while 51.79 per cent in manufacturing other than household industries. 45.71 per cent of Damai (Nepali) workers are engaged in household industries, while 41.21 per cent in other services, 50.52 per cent

of the Kami (Nepali) workers and the same proportion of the Sarki (Nepali) workers are engaged in other services.

#### 2. SCHEDULED TRIBES

In the district of Darjeeling 96.444 persons have returned themselves as belonging to 18 different types scheduled tribes. Of them 8,887 persons have been recorded as belonging to the scheduled tribes, but they could not be classified in any particular category. The scheduled tribes of this district thus make only a small fraction of the total population of the district, accounting for only 15.44 per cent of the total inhabitants of Darjeeling. In the rural sector scheduled tribes are more predominant. 17.76 per cent of the villagers of Darjeeling belong to the scheduled tribes. In the urban sector the scheduled tribes form only 7.75 per cent of the total urban population of the district. their absolute number being 11,212. The scheduled tribes of the State of West Bengal make only 5.88 per cent of the total population of the State. In the rural areas of the State the proportion of scheduled tribes is 7.60, while in the urban sector it is as low as 0.56. Thus the proportion of scheduled tribes to total population of Darjeeling is higher than that in the State as a whole. Scheduled tribes of Darjeeling account for 4.70 per cent of the total scheduled tribes in the State of West Bengal. In the rural areas they account for 4.25 per cent and in the urban areas 23.30 per cent.

Amongst the male population of the district 15.18 per cent belong to scheduled tribes and amongst the females the percentage of scheduled tribes is 15,80. In the rural sector scheduled tribe males account for 17.75 per cent of the total male population living in the rural areas of the district. The proportion of rural female scheduled tribes is 17.77 per cent of the total rural females of Darjeeling In the urban areas of the district 7.24 per cent of the male population belong to the scheduled tribes and amongst the females the percentage of scheduled tribes is 8.45, The male scheduled tribes of this district account for 4.86 per cent of the total scheduled tribe males of the State and the female scheduled tribes living in Darjeeling form 4.58 per cent of the total tribal women in the State of West Bengal.

Preponderance of scheduled tribe population is observed in the Siliguri subdivision where they account for 58.59 per cent of the total tribal population of the district. The rest of the tribes (i.e. 41.41 per cent) are distributed between Kalimpong subdivision (21.67 per cent), Sadar subdivision (15.41 per cent) and Kurseong subdivision (4.33 per cent). Phansidewa police station of Siliguri subdivision alone accounts for 23.03 per cent of the total tribal population of the district. Next comes Kalimpong police station of Kalimpong subdivision which accounts for 18.67 per cent of the total scheduled tribes of the district. Naxalbari and Siliguri police stations of Siliguri subdivision account for 14.51 per cent and 12.72 per cent respectively of the total scheduled tribes of the district, Kharibari police station of Siliguri subdivision.

and Darjeeling police station of Sadar subdivision account for 8.83 per cent and 5.93 per cent respectively of the total tribal population of the district. Kurseong and Pulbazar police stations account for more than three per cent each of the total scheduled tribes of the district. The rest are distributed over other five police stations.

# 2.1 Strength of Individual Scheduled Tribes

Oraons are the maximum in number in this district. In the rural areas they account for \$3.18 per cent of the total scheduled tribes of the district. Next are the Lepchas who account for 15.78 per cent of the total tribal population living in villages of Darjeeling district. Bhutias account for 15.12 per cent of the total rural tribal population of the district. Mundas and Santals account for 9.95 per cent and 8.55 per cent respectively of the total rural scheduled tribes of the district.

In the urban sector Bhutias account for 82.04 per cent of the total urban scheduled tribes of the district, while Lepchas account for 13.06 per cent.

Oraons are mainly distributed in Phansidewa, Naxalbari, Siliguri and Kharibari police stations of Siliguri subdivision. In Phansidewa police station Oraons account for 46.47 per cent, in Naxalbari police station 21.80 per cent, in Siliguri police station 18.80 per cent and in Kharibari police station 10.25 per cent of their total number in the district.

Numerically Bhutias form the second largest tribe in this district. Nearly 40 per cent of them are found in Kalimpong police station. Darjeeling and Pulbazar police stations of Sadar subdivision account for 22.34 per cent and 9.54 per cent respectively of their total number in the district.

Amongst the Lepohas of the district maximum number of them are found in Kalimpong police station, where they account for 61.25 per cent of their total number in the district.

The statement below shows the percentage of certain scheduled tribes to total tribal population in rural and urban areas separately.

## 2.2 Sea Batio

The proportion of sexes amongst the scheduled tribes of this district is seen to be fairly good. For every one thousand of male scheduled tribe population in the district there are 903 scheduled tribe females. In the rural areas the sex ratio is 910. The tribal sex ratio in the urban areas is only 853 females for every one thousand male population.

The sex ratio for the Bhutia tribe is 951 in this district. Amongst the Lepchas, females outnumber males; there are 1,019 females to every one thousand male Lepchas. In the rural areas the sex ratio of Lepchas is 989. Amongst the Lepchas, females outnumber males in the urban areas; there are 1,346 females to every one thousand male Lepchas.

#### 2.8 Literacy

The scheduled tribes of Darjeeling district are advanced in lesser degree in respect of attainment of literacy and education in comparison to the literate and educated persons amongst the general population of the district. Only 15.32 per cent scheduled tribes in the district have been able to pass the Census enumeration test laid down for literacy. The position of female literacy among the scheduled tribes is lower than the general female literates. Only 64 amongst every one thousand of the tribal women in this district have been recorded in the 1961 Census as literates. In the rural areas only 45 amongst every one thousand of the tribal women have passed the literacy test. In the urban sector literacy has disseminated a little more where 354 persons are found to be literate for every one thousand of the total tribal population living in the towns of Darjeeling. But amongst the male population living in the urban areas, the percentage of literates is found to be 47.26. Female literacy also in the urban sector is, as expected, better than that in the rural areas of the district. The statement given below shows the comparative statement of the percentage of literates amongst the general population and the tribal population in the total, rural and urban areas of the district.

## STATEMENT 13.5

|                  | OLULIUM                 |                         |                         |                        |  |  |  |  |
|------------------|-------------------------|-------------------------|-------------------------|------------------------|--|--|--|--|
|                  |                         | Percentage of Literates |                         |                        |  |  |  |  |
|                  |                         | Persons                 | Males                   | Females                |  |  |  |  |
| Total Population | Total<br>Rural<br>Urban | 28.70<br>21.77<br>51.72 | 40.15<br>89.82<br>59.21 | 15.46<br>8.50<br>41.48 |  |  |  |  |
| Scheduled Tribes | Total<br>Rural<br>Urban | 15.82<br>12.68<br>35.48 | 28.40<br>20.17<br>47.26 | 6.88<br>4.45<br>21.55  |  |  |  |  |

In the rural areas Lepchas seem to be the most literate community in the district. 22.91 per cent Lepchas living in the villages of the district are literate. In respect of literacy Lepcha males are more advanced than their womenfolk. 35.81 per cent of the Lepcha males are literates, while among their women population percentage of literates is 9.87. Next to them

are the Bhutias, 20.56 per cent of the Bhutias are literate in the rural sector of the district. 9.33 per cent of Orson population are found to be literate in the rural areas. Among their male population 15.20 per cent are literates. In the urban areas also Lepohas are the most literate tribe in the district, where 43.92 per cent of them are literate. 34.51 per cent of Bhutias are literate in the urban areas. Among their male population 46.74 per cent are literate, while this percentage among their females is 18.93 in the urban areas of the district,

#### 2.4 Economic Activities

Labour participation may be said to be fair amongst the tribal population of the district. 47.86 per cent of the tribal population are workers as per 1961 Census. Amongst their males, the percentage of workers is 56.99 and for females 37.74. In the rural areas 50.12 per cent of the tribal population are workers. Amongst their males this percentage of workers is 59.17 and for females 40.17. In the urban sector 30.66 per cent of the scheduled tribes are workers. 40.98 per cent male tribes living in the towns of the district are workers, while females show 19.68 per cent workers amongst them.

Majority of the tribal workers are engaged in agricultural sector. 51.05 per cent of the tribal workers are so engaged. Of them 48.58 per cent workers are engaged as cultivators and 2.49 per cent as agricultural labourers. Nearly 55 per cent of the female tribal workers of the district are engaged in the agricultural sector. 35.38 per cent of the tribal workers are engaged in plantation and 8.96 per cent in other services. In the rural sector nearly 55 per cent of the tribal workers are engaged in agricultural pursuits.

Of them 52.32 per cent are engaged as cultivators and 2.66 per cent as agricultural labourers in rural areas of the district. 38.21 per cent are engaged in plantation and 4.78 per cent in other services amongst the rural tribal workers of the district. In the urban areas the proportion of agricultural pursuits is very low. 60.91 per cent of the urban tribal workers are engaged in other services.

Majority of the Lepcha workers are also engaged in the agricultural sector. 85 per cent of the Lepcha workers are so engaged. Of them 83.40 per cent are engaged as cultivators and 1.76 per cent as agricultural labourers. 9.26 per cent Lepcha workers are found in other services. More than 46 per cent of the Oraon workers are engaged in agricultural sector. Of them 44.17 per cent are engaged as cultivators and 2.29 per cent as agricultural labourers. 48.32 per cent Oraon workers are engaged in plantation. More than 48 per cent of the Bhutia workers of Darjeeling are engaged in agricultural pursuit. Of them 45.62 per cent are engaged as cultivators and 2.76 per cent as agricultural labourers. 26.91 per cent of Bhutia workers are engaged in other services.

#### 3. TRIBAL WELFARE

The Constitution of India envisages the ushering in

of an egalitarian society ultimately in which the entire body of citizens would have equal opportunities for economic and political development, irrespective of barriers of casts or tribe. Yet, the pernicious casts system has produced vast inequalities of cultural, social and economic development among the various sections of the population. So it is imperative to provide adequate stimulus in the initial stages during which period the less fortunate citizens can be expected to level up to the standard of the general population. Thus, one of the directive principles of State policy embodied in Article 46 of the Constitution provides:

'The State shall promote with special care the educational and economic interests of the weaker sections of the people, and in particular, of the scheduled castes and the scheduled tribss, and shall protect them from social injustice and all forms of exploitation'.

In fact with the attainment of Independence the entire approach to tackling of tribal problems was rationalised. Various welfare activities were spensored by the Government with a view to ameliorating the econmic conditions of the backward classes in all walks of life and effecting their social upliftment.

To raise the standard of literacy amongst the members of the scheduled castes and tribes in the district free tuition facilities have been extended to the students reading in the secondary schools.

Book grants, boarding charges, special stipends, examination fees have also been liberally granted to deserving students from the backward communities.

During the First Five Year Plan period as many as 1,866 tribal students were helped with free studentship at a cost of Rs. 66,771/-. A sum of Rs. 9,603/- was distributed to quite a number of tribal students all over the district during the first plan period as book grants and other grants to deserving students as well as to meet the boarding charges of some of the tribal hostelers. Capital grants have also been given for construction, improvement, renovation or expansion of school buildings and boarding houses. A school was constructed at Ghum in 1951-52 at a cost of Rs. 10,000/-. In the same year Sigrimtam Primary School of Lepches and Bhutias and the Primary School at Pulbasar improved at a cost of Rs. 2,000/-. Some vocational training centres were opened for the tribal students. In the field of social education several institutions including Bhutia and Lepcha monasteries were liberally helped with financial grants for encouragement of recreational activities, Lama dance, organisation of sports etc. Many voluntary agencies were also given special grants with a view to encourage their activities for the welfare of the tribal communities in the district.

To improve the health and sanitary condition of the people belonging to scheduled and tribes various welfare measures have also been taken by the Government. Many schemes have been executed to ensure better water supply to the areas mostly inhabited by scheduled castes and tribes. In other spheres like agriculture, dairy development, animal husbandry various schemes have also been undertaken during the First Five Year Plan. Some minor irrigation schemes have also been executed at Government cost providing irrigation facility to the tribal agriculturists. A number of village roads have also been improved in tribal areas. Several tribal villagers' huts were also constructed by

the tribal welfare department. Rs. 500/- was also spent for giving free legal advice to the tribal people during the first plan. Tribal headmen have also been periodically rewarded by the Government. A statement given below will indicate the nature of different steps taken by the Government for the improvement of the lot of tribal people during the period 1957-58 to 1963-64.

### STATEMENT 18.6

## **AGRICULTURE**

#### 1. INTRODUCTION

Agriculture and plantation form the principal industrial pursuits of the people of the district of Darjeeling. Agriculture engages a better proportion of workers than does any other sector of industries in this district. Every four out of any group of ten workers are seen to be engaged in the agricultural sector either as a cultivator or as an agricultural labourer. In the State of West Bengal as a whole only 54 per cent of the total working population are engaged in agriculture against 40 per cent in the district of Darjeeling The proportion between cultivators and agricultural labourers in this district is very wide. The cultivators form about 18 times more in number than the agricultural labourers. But in the State of West Bengal the proportion between cultivators and agricultural labourers is about 2.5:1.

The soils and other characteristics like rainfall, weather conditions etc., which generally govern the agriculture of any tract to a considerable degree have been described earlier in the chapter on Physical Aspects. This district generally experiences very favourable rainfall.

The physical geography of the district makes conditions for agriculture extremely diverse. The Terai, from the foot of the hills to the southern boundary of the district, is in the plains and contains many level stretches of alluvial soil admirably suited for rice cultivation. There are however in it considerable areas of poor sandy ground and the river beds are large and generally unfertile or unsuitable for cultivation. In the hills, many of the slopes are so stony and precipitous that nothing can thrive on them except scrub jungle or an occasional tree in the crevices of the rocks. Much of the hill land is unsuitable for cultivation of any kind, but on the gentler slopes the soil is often of wonderful fertility. Altitude and aspect, as might be expected, have important effects on agriculture. No part of the district lies above tree level but no crops are grown above 9,500 feet above sea level owing to the cold. Potatoes can be grown up to that height but the upper limits for rice, maize and millet are much lower. Tea does not grow above 7,000 feet. Below about 2,500 feet much of the ground is steep and unsuitable for cultivation: the temperatures here are too high to suit many of the crops growing in the colder altitudes and the result is that between 1,000 and 2,500 feet there is comparatively little cultivation and most of the area is under forest. Rainfall varies considerably from 60 inches per annum in some parts of the Tista Valley in the north of the district to over 200 inches on the outer slopes of the hills. Further south in the Terai the annual fall goes down to about 120 inches: nowhere in the district is rainfall in such defect or so irregular that outturn of crops is seriously

affected. Landslips and river erosion do harm local to cultivated areas. So also does hail. In the sout of the Terai a hot parching wind from the we sometimes blows for a day or two in the hot weath and causes some damage to tea and other crops. Bon the whole weather conditions are, with few excetions, favourable to agriculture throughout the district

#### 2. LAND UTILISATION

The pattern of land use in this district is qui interesting. A brief resume is given here about the land utilisation pattern since 1871 i.e. about the tin when the first census was taken in the country.

The total area of the Darjeeling district in 187 was 1,234 square miles. The terrain or plais subdivision occupied an area of 173,856 acres 271.65 square miles; of which 62,115 acres or 97.6 square miles was returned as under cultivation: 100.8 acres or 157.62 square miles as cultivable but n actually under cultivation; and 10,866 acres or 16.1 square miles as barren and uncultivable waste. The emmated area under different crops in the terrain in 186 was returned by the Deputy Commissioner as follows:

#### Area in Acres

| Total area            | 173,856 (or 271.65 square mil |
|-----------------------|-------------------------------|
| Total cultivated area | 62,115 (or 97.06 square mil   |
| Rise                  | 47,787                        |
| Cotton                | 8,818                         |
| Pulses                | 1,909                         |
| Jute                  | 8,818                         |
| Oilseeds              | 1,894                         |
| Sugarcane             | 1,409                         |
| Tee                   | 1,900                         |
| Vegetables            | 50                            |
| Fruit trees           | 50                            |
| Other crops           | 100                           |

The Hills subdivision occupied an area of 615.8: acres or 961.44 square miles. The statement of lar employment in the Hills subdivision at that time w as follows:

#### Ares in Acres

| Total area                     | 615,891 | (01 | 961.44  | equare  | mil  |
|--------------------------------|---------|-----|---------|---------|------|
| Area under cultivation         |         |     |         | square  |      |

Irrigation is not a great problem in this area. The Government waste lands consist mainly of beds of rivers, ravines and steep tree-clad slopes. The total of this unoccupied area including grasing reserves (7.761) is 47.587 areas in Kalimpong and 4.300 acres in Darjeeling and Kurseeng subdivisions.

Cultivation of mulberry has become almost non-existent.

Average land per agricultural family: The size of an average holding in the district is 6.50 acres and the average size of a family in the hills works out at 5.5 persons being slightly higher than that in the plains.

Eighty per cent of the agriculturists are adhiars, cultivating lands of jotedars on adhi system. The position of these adhiars is very unsatisfactory, as the shares the adhiars get is hardly sufficient to maintain themselves. The system keeps the adhiars, forming so large a proportion of the population, in perpetual poverty.

The following is a statement of land employment in the district:

| Hill Sub-<br>divisions<br>of Darjeeling | Siliguri<br>Subdivision  | Total                             |

More area has been brought under tillage since then by reducing other uncultivated lands through the process of land reclamation. How the cropped area has been gradually increasing proportionately is evident from the following statement. Cropped area, of course, does not remain constant all through. Similar is also the case with the areas remaining current fallows. It depends on various geographical factors and fluctuates with the prevailing weather and natural conditions and the agro-economic situation of the country.

Because of the peculiar geo-physical conditions of the district a little less than 40 per cent of the district's total area only are available for cultivation. The statement below shows that even for about a decade after the Independence the extent of net cropped area remained unaltered. Only in 1958-59 it rose to about 32 per cent from 28.5 per cent in 1947-48.

| Percentage | distribution   | of kinds of |
|------------|----------------|-------------|
| are        | a to total are | 4.5         |

|  | 1947-48 | 1950-51 | 1954-55 | 1956-57 | 1958-59 |
|--|---------|---------|---------|---------|---------|
| Area not available for cultivation                 | 60.98   | 60.81   | 61.55   | 61.93   | 61.47   |
| Other uncultivated lands excluding current fallows | 8.71    | 6.49    | 6.56    | 6.87    | 5.78    |
| Current fallows                                    | 1.82    | 4.28    | 8.48    | 8.88    | 0.87    |
| Net area sown                                      | 28.54   | 28.42   | 28.41   | 28.82   | 81.98   |

A fairly large proportion of the net area sown is being used in this district to raise more than one crop. In 1947-48 only 17.66 per cent of net area sown was subjected for yielding more than one crop. This percentage was 10 in 1950-51, 7.89 in 1954-55, 18.41 in 1956-57 and 12.60 in 1958-59.

Thus it appears that there being not much of land left as margin in the district, the produce of the land will have to be increased by growing more crops per acre than is grown at present and also by getting two

or more crops out of lands which bear a single crop now.

#### 8. CROFFING PATTERN

The present cropping pattern of the district may be stated as follows:

#### A. Altitude upto 4000' Height:

|     | 1st crop | 2nd crop        | 3rd crop  |
|-----|----------|-----------------|---|
| (n) | Maize    | Paddy           | Potato and other vegetables where irrigation facilities are available |
| (b) | Maize    | Millet, barley, |   |

(b) Maize Millet, barley, wheat, mustard and buck-wheat, etc.

(c) Summer Vegetable

Winter vegetable

(d) Potato
and maize Mixed cropping
in some places

(e) Ginger

Vegetable

#### B. Altitude above 4000' to 8000' ft.

- (a) Potato and Maize—Mixed Cropping. They grow in the month of December & January. When potato grows 6" to 8", they sow maize in the same field (Mixed), potato is harvested in the month of June & July, maize stand in the field which is harvested in the month of September & October.
  - (b) Potato and Millet -- Mixed cropping.
  - (c) Vegetable Vegetable...Vegetable

In the areas like Sonada, Takdah, Rungbull along the main road they grow vegetable throughout the year.

#### C. Above 8000' ft. Altitude

Major portion of the hill areas is under forest. In some places they cultivate potato in patches.

Generally farmers use to cultivate cardamom within altitude of 3000' to 6000' along the jhoras where there is moisture and shade. The whole cardamom plantation of Darjeeling District is already affected by Forkee Disease.

Orange grows best between 2000' to 4000' altitude. There is some areas e.g. Takdah, Mirik, Garubathan, Kalimpong & Bijanbari where there is regular cultivation. Pineaplie & Guava grow upto 4000' altitude.

Other fruits, like pears, apple, plum & peach etc. grow above 3000' altitude.

The statistics relating to crops in the district have been given in Table 3.1 in the Official Statistics in Part II-B of this volume. The distribution of the general crops in the district in 1960-61 is given below. AREA IN ACRES UNDER CROPS (1960-61) IN DABJEELING

| Total Rice                                   | 89,780 |
|--|--------|
| (a) Aus                                      | 1,977  |
| (b) Aman                                     | 80,803 |
| Wheat  | 1,286  |
| Barley                                       | 494    |
| Maine  | 66,718 |
| Other food grains                            | 28,170 |
| Sugarcane                                    | 494    |
| Rape and mustard                             | 9,718  |
| Condiments and spices                        | 1,286  |
| Jute   | 5,981  |
| Other fibres                                 | 947    |
| Tea  | 68,448 |
| Oinchons                                     | 8 707  |
| Fruits and vegetables (including root crops) | 18.844 |
| Miscellaneous non-food crops                 | 5,931  |

About 30 per cent of the cropped area of the district covers rice (mainly aman). About one-fourth of the cropped area is covered by maise and tea each and one-tenth by other food-grains. Fruits and vegetables cover 5 per cent of the total area under crops and 2 per cent of it is covered by jute. There has been some changes in the cropping pattern during the last decade, as will be seen from following statement. In 1951-52 rice covered more area.

PERCENTAGE OF AREA UNDER CERTAIN IMPORTANT CROPS TO TOTAL CROPPED AREA FOR CERTAIN YEARS

|   |         | Years   |         |
|---|---------|---------|---------|
|   | 1951-59 | 1956-57 | 1960-61 |

Agricultural methods in the Terai follow closely the practice in the plains of Bengal. Fields are manured with cowdung, farmyard manure and sometimes silt from the beds of tanks. Irrigation is perhaps more common as the slope of the land offers many opportunities for utilising the water of the numerous small streams. Sixty per cent of the low land on which the winter or haimantik rice is grown thus gets the benefit of irrigation. The aman or winter rice is first sown broadcast

in nurseries in May or early June after the first rainfall. The fields to which the seedlings are transplanted in July or August have in the meantime been heavily ploughed and surrounded by ails to keep in the rain and later irrigation water is led to them by channels (called pairis). The aus or bhadoi rice is grown on higher land called furingati. For this crop, ploughing begins in February and is repeated five or six times. The field is then levelled, weeds and clods burnt and the ashes used for manure. Seed is sown broadcast and after germination of the seed the field is carefully weeded. This rice crop is reaped in August. Small areas are also cultivated with Boro and long stemmed rice.

Methods of cultivation in the hills vary with the crops to be grown. The chief food crops in dry cultivation (sukhakhet) are maize (bhutta or makai), millet ( marwa or kodo ) and buck-wheat ( phaphar ) and in wet cultivation rice. Money crops are cardamoms ( for which irrigation is needed), potatoes, oranges and vegetables land which is not too steep is ploughed; otherwise hoes (kodalis) are used. Weeding and harvesting are generally done by the cultivator and his family and with the assistance of neighbours for which help is given in turn to them. This labour exchange system is called parma. Hired labourers are only employed when absolutely necessary. Daily rates for day-labourers pre-war were about four annas but war times rates rose to one rupee. A recent Government notification has fixed the minimum wages for agricultural labour in the district for men, women and nonadults. Irrigation is essential for rice growing in the hills and water has to be conducted from nearby streams (jhoras) by flumes or pipes of bamboo or galvanised iron. Terracing is a distinctive and important feature of Himalayan cultivation. There is no such thing as a large level field to be found in the hills : and to allow of the irrigation which is essential for rice, terraces have to be out with great labour in the hillsides. Some of these are so narrow that a plough cannot be used and the hoe is the only instrument by which the soil can be broken up. Usually an attempt is made to give an inward slope to the terrace but that is not always possible. It is however required where rice is cultivated, as irrigation water has to stand on the field.

Aman paddy in the hills does not need manure as washings from higher land are brought to the rice field in the irrigation water. For dry cultivation manuring is almost essential. Cowdung is being ordinarily used for wheat, mustard, marwa, potatoes and more rarely for maise or buck-wheat. For vegetable culture leaf mould when procurable is employed.

The chief implements used are the plough, the hose or spade (kodali, farms or chapra), the form (kata), the sickle (haswa), the mallet (martol) and the crowbar (jhampel). A wooden harrow and a thick heavy beam are used in paddy fields and sometimes in dry cultivation to break up clods. There are also various chisels, kukris and Bhutanese and Lepcha

knives or chuppes: and baskets, mats, sieves and winnowing trays made locally from bamboo or cane. The thunsi and namlo is for winnowing grains. For storing grain in large quantities closely woven mats (called bakhari) are made in rounded form from bamboos covered with a paste made from cowdung and earth.

More intensive and efficient methods of cultivation are becoming popular. While formerly a single ploughing was thought sufficient and no manuring. now most cultivators plough twice, manure more freely and sow better seeds more efficiently: weeding, hoeing and earthing are often repeated. Men, women and children all use the hoe: where ploughing cannot be done, seeds are sometimes sown broadcast or dibbled in with a long stick either pointed or with an iron spike fixed at the end. Lepches are ineffective users of the plough and are sometimes seen turning over the soil with a rude wooden stick and are ready to cultivate with a small spade and a spike. They cultivate mostly at the lower levels and are particularly fond of orange growing and cardamom cultivation in the lower valleys, being accustomed to a low elevetion: the comparative seclusion of fields surrounded by jungle is congenial to their habits. The Nepali is the most assiduous cultivator leaving practically no part of his holding uncultivated, using his plough cattle to the full and terracing skilfully where it is feasible. Bhutiss and Nepali Gurungs are more casual cultivators, perhaps because they are descendants of pastoral races more accustomed to grazing: they are for the same reason fonder of oultivating at the higher level.

The following are brief accounts of the cultivation of the more important crops in the hills as described by Dash in his Gazetteer Published in 1947.

Maize (bhutta or makai)—This crop grows on almost any soil at altitudes between 1,000 to 7,000 feet above sea level. Black soil suits it best as hill cultivators do not usually manure this crop. It does best at low elevations in sunny aspects and grows quite well in places where rocks retain moleture. It is the staple food crop for cultivators and is grown on dry land (sukhakhet). After the ground has been prepared, the seeds are sown from February to April either by broadcasting, by sowing in rows (phalis) or by individual planting in holes. It is harvested in August or September. The crop is liable to damage by bears and elephants when near forests and to dangers from landslips when slopes. Outturns vary from 4 to 10 maunds per acre and higher with heavy manuring. Soyabean (bhotmas) or millet is sometimes grown with maise, and buck-wheat (or more rarely wheat and mustard) follows it on first and second class lands. It is found difficult to keep strains of better maize pure owing to cross fertilisation.

Millst (marwa or kodo)—This crop is grown at heights between 1,000 and 5,000 feet above sea-level and in dry cultivation (sukhakhet). Seeds are sown in April and May in a nursery which is manured.

Transplantation takes place in June or July and the crop is harvested in October or November. The transplanted crop is not usually manured. Outturn varies from 5 to 8 maunds per acre (average perhaps 6 maunds) when the crop is grown alone and less (say 5 maunds per acre) when it is grown together with mains.

Soyabeans and pulses are similarly cultivated.

Buck-wheat (phaphar)—This is grown up to 7,000 feet in dry cultivation. It is sown in August and September and harvested in December and January. The average yield per acre is about 6 maunds. No weeding is required. This crop is quick growing but rather unpopular because it is considered to exhaust the soil rapidly.

Wheat, barley and mustard—These crops are not extensively grown in the hills. They are grown up to 5,000 feet in dry cultivation, are sown in September and October and harvested in the later winter.

Rice-Paddy is grown from plains level up to elevation of 5,000 feet. In the hills it is transplanted into irrigated land (panikhet) and no manuring is needed. Seeds are sown in seed beds (1/6th of area to be planted out) in April or May: transplantation takes place in July or August and harvesting in November or the beginning of December. Outturns vary from 8 to 12 maunds per acre and 10 maunds may be taken as the average in the hills although in the Terai double this figure may be attained. The yield of straw is heavy (25 to 35 maunds per acre). A small quantity of bhadoi rice called (ghiya) is grown in the hills. Seed is either sown broadcast or dibbled in rows at the rate of 20 to 35 seers per acre. Manure is required and good rain. The crop is hervested at the end of August or beginning of September. Outturn is less than that of the transplated rice.

Potatoes—This crop is in many parts of the district even as high as 8,500 or 9,000 feet above sea level. It is grown in dry cultivation but requires heavy manuring. In some places two crops are harvested, one planted in October and harvested in January and February and the second planted in January or February and harvested in July. The success of potato cultivation depends a great deal on the weather: yields vary from 30 to 120 maunds per acre, even reaching 150 maunds per acre in very favourable conditions. The district produces seed potatoes for export as well as potatoes for consumption as food.

Cardamom (claincht)—This crop is a valuable one, doing best at altitudes from 1,000 to 5,000 feet above sea level. The stop requires a rich soil, shade, some warmth and a good supply of irrigation water. Fields are usually in the beds, or on the sides, of streams and are liable to destruction by floods and landslips. The crop is harvested usually from September onwards. For a new plantation seed is sown in special seed beds and then transplanted in May and June two to four feet apart. It

can also be propagated by separating roots from old standing clusters. New cardamom fields have to be thoroughly weeded and for the first two years they yield no crop. In the third year a half crop is obtained and thereafter for about 8 years a full crop can be expected which amounts to about 6 maunds or more per acre. After the tenth year the plants weaken and become liable to blight or damage by insects (pherkety). Cardamoms flower from the middle of April to the end of May and after September when the crop is harvested the seedpods are dried in the kiln (bhati) and thereby are much reduced in weight. The dried seeds are bagged and sold.

Other field erops—Only small quantities of sugarcane are grown in the hills: a soft thick variety is grown in small quantities for chewing. Mustard is grown near towns by Brahmans and Chettris in small quantity for oil and cake.

Fruit cultivation—Orange-growing is extremely profitable and has for this reason expanded very considerably in recent years. About 90 per cent the output is exported. Two varieties of the local Sikkim orange are grown—one a small tight skinned variety and the other a loose skinned, larger and softer kind. Rich black soil is required and an elevation of between 2,000 and 4,000 feet above sea level. The crop is harvested from November to January. Seedlings, brought from Sikkim, are transplanted in May and June 14 to 18 feet apart. About 200 are required per sore. About 8 years are required before the trees begin to bear fruit and they continue to give a good crop for 25 years. Trees grow from 15 to 20 feet high and give larger fruit further apart they are. The outturn per tree is from 800 to 1,000 oranges annually which sell at a varying price. The crop is comparatively free from damage by bad weather.

Pine-apple growing is successful in the Terai and the bill areas. There is a considerable export of the fruit and 5 to 6 lakhs of suckers are sold annually to growers in the plains. The Singapore Queen variety grows well up to 4,000 feet and is in good demand. Local markets are well supplied in the appropriate seasons with tree-tomatoes, limes, lemons, bananas, pears, peaches and plums grown in the district at varying altitudes. The heavy rainfall and moisture prevents apples and good quality pears and peaches being grown successfully.

Vegetables—A very profitable vegetable growing business supplies both local and distant markets. Pees, beans and potatoes are well known products of the district but all kinds of foreign vegetables are grown for local and Calcutta markets among which can be mentioned artichokes, asparagus, beet-root, Brussels-sprouts, broad beans, French beans, cabbages, cauliflowers, celery, carrots, turnips, knol-khols, radishes, parsnips, peas, spinach, leeks, tomatoes, rhubarb and onions as well as many herbs. The season for many of the above vegetables is long because it is possible to grow them over a considerable range of altitude. Rainy season vegetables are also grown throughout the district in great variety and profusion.

# MATERIAL PROGRESS OF THE DISTRICT

#### 1. INTRODUCTION

The Official Statistics presented in Part II-B of this volume unfold a clear picture of the progress achieved during the last decade in almost all branches of administration. The Census decade 1951-61 nearly coincides with the first two five year plan periods. It is worth-while, therefore, to present a brief resume about how this district prospered during the first two plan periods, while studying the different aspects of the demographic and socio-economic life of the district in the light of the Census returns of 1961.

With the limited resources of the country it needs a series of inter-linked and integrated five year plans to raise the standard of living of the people and to open to them opportunities for richer and more varied life. Although this should embrace all aspects of human life including better nutrition, medical relief as well as educational and cultural opportunites, such a richer life can only be supported by a material base of economic prosperity. The basic approach is thus bound to be economic development. The First Five Year Plan was intended as a step in that direction. The Second Five Year Plan was drawn up with care to build up an economy which could bring prosperity within the grasp of our people. It emphasised rapid industrialisation with particular emphasis on the development of basic and heavy industries. It launched a programme which would lead to maturity through different phases. Two five year plans were executed thus and the third one has been in operation.

## 2. COMMUNITY DEVELOPMENT

The highlight of the economic efforts of the first plan was amongst many other items, the inclusion of a very important scheme for Community Development Programme. This scheme was really unique in its idea of persuading people to contribute in cash or kind for their own betterment.

Community Development is a technique devised to achieve social change through the utilisation of local resources, human and material which otherwise would remain idle.

Darjeeling district has been by 1963-64 covered by 10 C. D. Blocks. Of these, three—Darjeeling-Pulbazar, Rangli Rangliot and Sukhiapokri are in stage II, five—Kalimpong I & II, Garubathan, Mirik, Siliguri—are in stage I and the rest Kurseong and Kharibari-Phansidewa are in the pre-extension stage. While in the pre-extension Blocks, attempts have been made for conducting village survey and collecting socio-economic data, actual extension work with all its diversity has been initiated and executed in the other Blocks over the last few years.

#### 8. AGRICULTURE

Agriculture is the bed-rock of any planning in India. This is more so in the State of West Bengal. Programmes of agricultural development, therefore, have been given due priority in the plan of the district. There is not much scope for extending the area under cultivation as is apparent from the earlier discussion in the chapter on Agriculture. The emphasis, therefore, has been given on bringing more of the cultivable area under irrigation, to make two or three crops grow in the area where at present a single crop is done and on adoption of improved agricultural practices for the best utilisation of the available land. To grow more food has been the principal target for the agricultural programme followed during the two plans. Improved seed is one of the important factors which can increase food production to a great extent, and with this end in view the seed saturation scheme was taken up.

The district is divided into 10 Blocks where Agricultural Extension Officers are posted to look after the works of agriculture under the guidance of the District Agricultural Officer. Schemes are executed through the Block Development Officers in the Block areas. Funds for some schemes are placed with the D. C. who reallots the same to the blocks.

In respect of allied fields, the Departments like Veterinary, Livestock, Forest, Agricultural Marketing, Co-operative, Panchayat, etc., are working side by side of the Department of Agriculture.

Financial assistance are being given by the Government in the following schemes:

- (a) Plant Protection Scheme—In distribution of Plant Protection materials 50 per cent of the cost of Plant Protection materials is realised from the cultivators and the transport cost is entirely borne by the Government. All sorts of technical helps are rendered by the technical hands of this department to the cultivators. Plant Protection equipments like, sprayers, dusters etc. are also made available to the cultivators for use.
- (b) Fertilizer Distribution Scheme—Under the scheme for distribution of fertilizers to the cultivators, fertilizers are made available at the nearest railway station at the cost of Government. From the Rly. Head fertilizer is to be moved to the sub-depots of the sub-distributors at their own cost for sale to the cultivators. The distributors get the margin of approximately Rs. 30/- per ton out of which the distributors are to meet the transportation upto the sub-depot.
- (c) Irrigation Schemes—For making water available to the cultivated land for irrigating the fields, Small Irrigation Schemes are executed. Government are bearing

66s per sent of the total cost of execution of the schemes and the cultivators of the hills bear 33s per cent of the cost. In the plains of Siliguri subdivision the cultivators are to bear 50 per cent of the total cost of execution of the schemes and the Government bear 50 per cent of the cost. Technical help is given by Government.

- (d) Scheme for Distribution of Improved Seeds—Schemes are running for distribution of improved seeds to the calivators of the district. Wart Immune potato seeds are being distributed to the cultivators. This scheme for distribution of improved seeds is with the idea to cover the entire cultivated areas of the district with improved seeds to get better return from the field.
- (e) Scheme for Demonstration Centres—Scheme has been undertaken to establish demonstration centre in the Blocks with the idea to show the cultivators the improved agricultural practices so that they may be convinced to adopt improved agricultural methods. At present there are 4 such demonstration centres in each pelice station.
- (f) Scheme for Japanese Method of Paddy Cultivation—This scheme has been undertaken with the idea to show the better effect of chemical fertilisers on the crops. Fertilisers under this scheme are given to the cultivators free of cost and every technical help is rendered to the farmers.
- (g) Scheme for Killing of Wild Animals—This scheme is running with a view to encourage the farmers to kill wild animals like, monkeys, bears, etc. for the protection of crops. Government award prizes to the persons who kill the wild animals (Rs. 2/- for each monkey, Rs. 2/- for each bear etc.). The Government hunters engaged for this purpose do not get any such prize.
- (h) Scheme for Distribution of Dhaincha Seeds—Dhaincha seeds are distributed to the cultivators for green manuring the fields. The seeds are given to the cultivators at 50 per cent subsidy for green manuring and at "no loss no profit" basis for multiplication purpose. The transport charges are borne by the Government.
- (i) Scheme for Local Manurial Resources—Under this scheme cash grants are given to the cultivators to give incentive for preparation of compost for using in their lands. Grants are given to the cultivators for preparation of pucca cowshed-floor with pucca channel and pucca manure pits, in connection with preparation of compost.
- (j) Besides the above schemes, loans are being granted to the cultivators under the scheme for Reclamation of Waste Lands, Irrigation Schemes, Productive Scheme for Promotion of Agriculture and other Miscellaneous Agricultural Schemes.

There is another scheme for Seed Saturation. Only paddy is included in this scheme.

At present, communication is a orying problem between the contiguous hill areas and the plain markets. In most of the places of the hills of the Darjeeling district produces are to be transported through ponies or head-loads both of which are vary expensive in the hills. Between the contiguous hill areas, there are no proper motorable roads, nor there are roads for transportation of produces from hill markets to plain markets, as a result the cultivators are to sell their produces in the local markets at a very low rate as they cannot bear the high transport cost for sending their produces in the big markets in the plains.

There is only one Agricultural Research Station at Kalimpong where research works are carried on maize, ginger, cardamom, etc. and another Research Station for potato at Bhanjang. There are three fruit nurseries in the three Thana Seed Farms.

There is one Soil Conservation Officer in the district who is taking up programmes for experimental soil conservation works. There is a programme at the catchment of Teesta, another at the catchment of Lish, Ghesh, Chel and Newra etc.

There are four Thana Seed Farms at Pulbasar, Plungdung, Kharibari and Siliguri (Salbari) wherefrom improved seeds are distributed to the cultivators at reasonable costs.

In Kalimpong there is State Agricultural Farm where also improved seeds are produced and distributed to the cultivators.

Crop commissions are held with the initiatives of the Government to encourage the farmers in forming competitive minds in connection with cultivation and increased yield. Prizes are awarded to the best cultivators who produce highest quantity of crops.

Agricultural Exhibitions are held in different places of the district to encourage the cultivators about the adoption of improved method of cultivation at the cost borne by the Government and other contributions. Prizes are also awarded on the best exhibits.

Publicity is going on regarding various agricultural topics through the Nepali Agricultural Monthly Journal "Khatipati" and leaflets etc. Monthly 3,000 copies of Khatipati are distributed among the cultivators. The monthly journal is published under the Editorship of the District Agricultural Officer, Darjeeling assisted by one Sub-Editor.

The following two statements obtained from the District Agricultural Officer, Darjeeling give an idea about the achievements of the Agriculture Department during the last plan periods.

In the year 1962 64, 614 Result Demonstration centres were started throughout the district. In all these centres improved variety of seeds and manure were used and naturally the yield was higher than that obtained by conventional means. While emphasis was laid on the production of vegetables, crops like paddy, maise, wheat, jute, potato were also grown at these centres.

Apart from these demonstration centres, which are rather small in size, 42-acres demonstration centres were established during this period. As these centres are bigger, there is scope for wider coverage of crops. The beneficiaries derive, what is called, the economy of scale. Government bears 50 per cent of the running expenses much to the advantage of the cultivators.

The members of the local Panchayats and farmers are occasionally shown round such demonstration centres. From all accounts it appears that they are impressed with the performance at these centres and within their limitations, try to adopt the improved practices in their own plots.

The C D. Blocks are mainly dependent on the State Agricultural Farm at Kalimpong for the supply of seedlings, seeds, grafts etc. A glance at the performance of the farm during 1963-64 will convince one of its vital role. During the year 5,617 Kg. of Maize, 4,189 Kg. of Paddy, 1,348 Kg. of Wheat, 1,969 Kg. of Barley, 496 Kg. of Mustard, 480 Kg. of Ginger, 33 Kg. of Cauliflower, 24 Kg. of Bean, 28 Kg. of Palki, 121 Kg. of Pea, 14 Kg. of Radish, 4 Kg. of Garlic and 5 Kg. of Cow pea seeds were distributed to different Blocks in the district. In addition to this, more than 400,000 seedlings of vegetables like Tomato, Cabbage, Cauliflower, Onion, Brinjal etc. and 5,000 seedlings of Orange, Lemon, Plum, Litchi, Guava, Strawberry and Pear were distributed.

The four Thana Farms at Siliguri, Kharibari, Plungdung and Bijanbari were also catering to the needs of the localities. 7 seed golds for storing paddy were set up in Kalimpong II Block. 60 Nos. of agricultural implements, such as, M.B. Plough, Seed Drill, Wheel Hoe, Paddy Weeder etc. were distributed in Siliguri subdivision.

Under the loan scheme, loan was advanced to 36 persons for promotion of horticulture, cultivation of cardamon, areca nut etc. Similarly, 21 cultivators obtained loans for purchase of milch cow, building improved cattle-sheds etc.

One small workshop was set up in each of the three Stage II Blocks of this district for repair and servicing of improved agricultural implements. They were found very useful by the peasantry Two of these workshops—one at Sukhia; okri and the other at Bijanbari were in operation during the year under review. There is a proposal for setting up a small workshop at Siliguri.

Reclamation of culturable waste land provides potential for higher agricultural production. That was

why schemes for reclamation were incorporated in the plans. Uptil now, a total area of 2,119 acres of waste land has been reclaimed in this district.

Work under soil-conservation is going on in Kalimpong subdivision. Conservation is being done mainly through terracing and afforesation. An area of more than 300 acres has been covered by such conservation schemes. In Siliguri subdivision, nearly 200 acres of land was conserved by contour bunding.

Rungbull Seed Potato Multiplication Farm-The State Seed Potato Multiplication Farm was started in the year 1947. The main objective of this farm is to multiply departmentally recommended varieties of pure disease free seed potatoes and the distribution of the same to the cultivators. This is one of the most important farm of its kind in India, devoted to meet the long standing need of the farmers for high yielding and disease free seed potatoes. Due to the incidence of Wart-disease in the Sadar subdivision of Darjeeling district, Wart immune imported varieties of seed potatoes from Holland are being multiplied in this farm and also further multiplied by revistored growers for saturation and replacement by Wart immune varieties. In the farm the potato crop is grown under scientific treatment to certify disease free varieties. The produce is stored after sorting and distributed to the cultivators.

The farm is situated at an altitude of 7,000 ft. and 8 miles from Darjeeling, on the Darjeeling-Siliguri Hill Cart Road.

The farm is equipped with modern agricultural implements necessary for the smooth running of farm operations in the hills. It has got a Museum-cum-Research Laboratory furnished with necessary scientific instruments for carrying out the research work.

The production of disease free seed potatoes were as follows:

| Year    | Acreage     | Yield     |  |
|---------|-------------|-----------|--|
|         |             | Qlt. Kg.  |  |
| 1968-64 | 68.60 acres | 1,046.875 |  |
| 1964-65 | 84 00 acres | 952.68    |  |
| 1965 66 | 88.14 acres | 1,707.86  |  |

The Maize and Paddy Research Station, Kalimpong did some good work towards the improvement of the agricultural conditions of the district. During the First Five Year Plan period preliminary research was done on both maize and paddy to prepare the ground for further work on improvement of these two most important crops in the hills.

During the second plan this Research Station released the following improved varieties as winter paddy suitable for growing in the hills.

| Name  | Yield      | Increese over local (on basis of yield of local 18 5 md./acre) |
|-------|------------|--|
| MPR-1 | 26 Md/Aere | 40 Per cent  |
| MPR-2 | 24 Md/     | 80 ,,  |
| MPB-8 | 22 Md/ ,,  | 19   |

No. 1 is a Chinese variety with medium grain, the other two are selections from local varieties with short-fine quality grain.

As a result of preliminary work done with maize, some hybrids were produced from local materials but were not found so promising. Similar results obtained in other parts of India confirmed the belief that local materials were not suitable for developing hybrid maize. American hybrid maize were also tried during this period. Hybrids like NC 27, Texas 26 and Dixie 11 were found very high in yield but the seed could not be reproduced in India. Moreover the highly dented or rough quality of their grain made them less popular. Since 1958 this station has been conducting large scale testing programme with various seurces of world material particularly with inbred lines, various hybrids and varieties. Some of the materials collected from South America and the Caribbean Islands were found exceedingly suitable for growing in the hills and would be useful in developing good hybrids and improved varieties of maize. During investigation one newly introduced Cuban variety (Amarillo-de-Cuba) was found highly promising. The variety was recommended for release as an improved variety.

Name of Variety

Max. yield/acre

Amarillo-de-Cuba (at cultivaters plots)
(Cubbean variety)

Average Increase over local

88 Per cent
80 to 40 Mds.

This variety was found highly adaptable to the hill condition, highly responsive to fertiliser application and unlike the local varieties less suspectible to lodging. Its grain quality and high yield have already made it popular.

During the third plan period the following Paddy variety was released.

Name of Variety Yield Increase over local (yield of 18.5 Mds./Acre)

Pedong 82 28 Mds./Acre 51 Per cent

The variety is fine long grained and suitable for lower to medium high altitude (1,000 ft. to 3,500 ft.).

Some promising Formosan and Japanese varieties with high yield (35 to 45 mds./acre) and early maturity are also under way of release. The grains are, however of coarse type.

Mention must be made here, of some Formosan varieties of paddy, which are being used in this station. They have been found exceedingly suitable to the hills, particularly in Kalimpong subdivision.

Particular attention, so far, is to be paid to the varieties, which have been tentatively designated as Kalimpong I and Kalimpong II.

They are early maturing, about 135 days being essential from seed-bed showing to harvest. They are coarse grained, but taste like any fine varieties.

The yield, both under experimental and farmer's field conditions, was exceptional. An average of 40 mds. to 60 mds. per acre was obtained. The varieties have been released for general multiplication.

The Variety Amarillo-de-Cuba of maize was released and maintained its popularity all over the hills except at high altitude and in areas of excess rainfall. More than 200 mds. of seed of this variety were distributed during the lst half of the Third Five-Year Plan period.

During this plan period tremendous progress has been made in developing hybrid maize of outstanding yield and good grain quality. The following maize hybrids were released by the centre.

Average yield per Increase over acre at Expt. Area of adaptation Name of local Station Kalimpong Hybrid 85 Per cent Particularly sui-88 Mds. table for the hills 1 Him 128 Particularly sui-2 Ganga table for the plains Hybrid 101 of West Bengal. 80 to 85 75 to 80 ,, Also do well in 3 Decan Hybrid the hills 4 Banjit Hybrid

All these hybrids are yellow to orange in colour, particularly Him 123 and Ganga 101 are liked very much by the cultivators. These hybrids have good grain type and are highly responsive to fertiliser application. They are more or less resistant to lodging, disease and insect. Him 123 particularly produces 2-8 good ears per plant. They have good husk protection.

In 1963 cropping season 10 maunds of seed of Ganga hybrid 101 were distributed among the growers of Darjeeling district to observe its performance at cultivators' plots. The hybrid yielded very satisfactorilly and the popularity of hybrid malze is growing fast.

Hybrid maize seed production is highly technical job. After the hybrids are released by the Experimental Station, the seed production will be the responsility of the National Seed Corporation set up ander the Seed Laws of the Government of India. It is expected that within the third plan period some seed production Farms will be established in West Bengal to produce commercially hybrid maize seed from the recommended hybrids. The third plan target is to saturate 25 per cent of existing maize area with hybrid maize.

Besides the 4 hybrids mentioned before, there are some more promising hybrids which are under way trial giving still higher yield (80 to 100 mds. per acre).

Scheme to study the response of various germplast sources of maize, to variegated agronomic practices:

The scheme is financed under the American side P. L. 480 Programme. This scheme was taken up ver recently and no positive results can be adduced immediatly. Date of Planting Trials, Fertiliser Requirement Trials and Requirement of Micronutrients for maise, are being studied.

## 4. Animal Husbandary and Veterinary Services

Work in this respect is to be viewed as an integrated whole rather than in a peicemeal way. Achievements under C. D. programme coupled with those of the controlling department give a realistic picture.

During the year 1962-64 new construction of 'B' Type Hospital at Kalimpong is almost completed, at Kurseong the work is in progress, at Siliguri the construction work to be started very soon and at Darjeeling negotiation for handing and taking over of plot for the construction of 'A' Type Hospital was in active progress. All the Hospitals and Dispensaries of the district were fully equipped with uptodate medicine, instruments and appliances.

Hospitals carry on modern scientific treatment of both in and out patients as well as examination of pathological specimen. The Veterinary Assistant Surgeons carry on mass vaccination against Rinderpest, Rankhet disease, South African Horse sickness and treat cases both at headquarters and mofussil, besides the prompt control of outbreaks of any epidemic disease.

The Quarantine stations earry on vaccination of incoming and out going animals and at cattle markets and keep strict vigilance over the incidence of contagious disease entering into the district from outside.

### Mass Vaccination

Rinderpest Eradication Scheme was launched by the Government of India on 1954 on all India basis and the work actually started in this district during 1958-59 as the cattle population of billy area of the district having had to be vaccinated with special lapinised vaccine. The vaccination of entire bovine population except few thousands due to inadequate transport facilities under police station Kalimpong, Garubathan, Mirik, were almost completed. Under this programme vaccination of about 27,000 cattle of the district was completed during the year 1962-64.

The target was to almost complete the vaccination work during the year 1964-65.

During the year 1968-64, 60,000 poultry population of the district were vaccinated against Rankhet disease. Vaccination of 400 equine population of the district was completed during the year 1968-64.

#### Epidemic and Control

The district did not have any serious outbreak. A few outbreaks of Foot and Mouth disease,

Haemerrhagic sonticaemia, Black quarter, Manikume disease was reported during the year 1968-64 which were promptly attended to and controlled.

Glanders Inspector with Headquarters at Kalimpong kept strict vigilance for cases of Glanders, Faroy and other allied diseases and carried on Melin test whenever necessary in the district. The Research Assistant, Kurseong carried on examination of pathological specimen as well as stored and supplied various biological products in the district.

Two new Aid centres one at Paryang Tar under Garubathan Development Block and one at Sauraynee Bustee under Mirik Development Block are functioning during the year 1963-64. Third quarantine station at Tistavalley will begin functioning very soon.

Unfortunately the Aid centre Gitcabling, Sinjee, Beshon had to be closed down at present for want of accommodation and difficulty of supervision of work by the Veterinary Assistant in charge.

A scheme had been launched to investigate the Haematuria disease amongst cattle in the district in the year 1963-64 and the work is in great progress.

The Department in the interest of Public Health also carried on activities like Anti-Rabic vaccination, destruction of Rabid and Stray dogs brought to the hospital.

At present there are one 'A' Class hospital in Darjeeling, three 'B' Class hospitals at Kalimpong, Kurseong and Siliguri, five Itinerant Vety. Assistant Surgeon's dispensary at Ghoom. Kurseong, Tistavalley, Gayabari, Naxalbari, eight Block Dispensaries of veterinary Assistant Surgeons at Bijanbari, Sukhiapokri, Rangli Rangliot, Siliguri, Kalimpong-I, Kalimpong-II, Mirik and Kumal (Garubathan), one isolation shed at Pedong, two Quarantine stations at Pulbasar and Naxalbari, one Mobile Van with Headquarters at Kalimpong and one Research Assistant with Headquarters at Kurseong.

# Dairy Development and Animal Husbandry

Closely related with agriculture is the programme for Dairy Development and Animal Husbandry. In the Third Five Year Plan considerable stress has been laid for development of the more important livestock resources of the district, such as, cattle, poultry, pig and sheep etc.

In the past, Cross Breeding of cattle with exotic breeds were introduced in the Hills by the Planters, Missionaries and others. As a result of which high yielding cross breed cows are now found in large number in the hilly regions of the district and the area has gradually developed into an important milk producing sone.

In the present economic pattern in the rural bill areas of Darjeeling, dairy farming and animal husbandry are playing increasingly important roles, more so since

ne paucity of agricultural land makes the hillmen more spendent on these sources of income.

As regards objects of the scheme, the following few oints are taken into consideration:

- (a) The potentialities of Cross-Breeding
- (b) The optimum portion of foreign blood that nables the animals to do their best.
- (c) The effect of packing, storage and transportalon of semen on its mortality and other qualities.

The progress made in different sphers of development ctivities in this district during the three plan periods re stated as follows:

At the beginning of the Scheme, the people of this coality due to prejudice and blind superistition were not responded to the Artificial Insemination Operation. Practically the Scheme came into force during the 2nd lan and 1,647 numbers of cows were inseminated and 176 numbers of calves born by the A.I. were ecorded. A remarkable progress has been noticed luring this plan period. 4,241 cows have been neeminated and 271 calves have been recorded so ar (upto 81.12.65).

First insemination has shown an average success of 16 per cent, an encouraging result. Two pedigreed Jersey rulls are stationed at Kalimpong A. I. Centre under the Hill Cattle Development Scheme to supply seed materials to other centres.

Besides this, the result of cows was followed-up after a lapse of 90 days of insemination. Records of new-born A.I. calves, marking of animals, castration or removal of unwanted ron-descriptive scrab-bulls are being maintained by the trained field staff.

'Siri' originating in Bhutan and Sikkim are the main preed of cattle now prevailing in the three hilly sublivisions of the Darjeeling district. The trained qualiled field staff are taking systematic recording of milk of nows everyday. Here in hill the milk yield of 'Siri' cow is comparatively high than that of the cows of the plains, having a high percentage of butterfat, varying between 5 per cent and 7 per cent. It is recorded that during the actation period of 350 days Siri cow gives 1,750 lbs. of nilk, thus the local people are getting benefit of having nore milk and its bye-products thereform, which are sold at a satisfactory rate causing financial assistance to the local people. From the official data it shows that the progeny from first cross-breeding has increased the nilk yield by 60 per cent. A cow in the Pubong Bustee inder Takdah Development Block gave 42 lbs. of milk aily during the peak lactation period. Two Co-operative ocieties are functioning for disposing of the milk and ts bye-products. In order to collect milk and to reserve for longer period without deteriorating its uality, the Government of West Bengal has established one chilling plant at Jore-Bungalow, 6 miles away from the Darjeeling Town.

Efforts are being made to grade up those cross-bred stock with Jorsey strains through the technique of artificial insemination. A scheme in this direction was introduced during the Second Five Year Plan period covering certain parts of Darjeeling and Kurseong subdivisions. In the year 1963-64 similar work has been taken up at Kalimpong subdivision under the Hill cattle Development scheme. One sub-centre with two subsidiary centres has already been started for the above purpose. The policy of upgrading the local cattle with Hariani and Siri bulls is being followed in Siliguri and part of Kalimpong subdivision with 76 numbers of Pedigree bulls.

To ensure economic return to the primary producers for the milk produced by them, which is, infact, the essential pre-requisite to creat necessary incentive amongst them for betterment of their stock, a Multipurpose Dairy project for production of Cheese Butter and Milk powder is going to be taken up in the district during the current plan period. Efforts are already being made to select suitable sites for the purpose. It is felt that with the implementation of the Dairy project and facilities for improved breeding of their stock, the people of the area will be able to augment their income very considerably taking to Dairy Farming in a more extensive scale.

Efforts have also been made in course of the Second Five Year Plan to popularise cultivation of suitable types of fodder crops and their preservation in the form of silage. The work is being continued under the Third Five Year Plan, with assured better economic return from their stock, in near future the farmers there will gradually go in for increased production of cultivated fodder for their cattle. 52 Silo pits were constructed during the Second Five Year Plan and 6 during the third year of the Third Five Year Plan with subsidy for construction of each such pit. 10 quintal of fodder seeds and cuttings have been distributed in the different places of this district at a subsidised rate during the third year of the Third Five Year Plan.

Under the programme for poultry development 635 and 4,033 poultry birds of exotic strain e.g. R.I.R. and W.L. were distributed in different places of this district at a subsidised rate during the First and Second Five Year Plans respectively. 250 cocks of improved strain were distributed at a subsidised rate in order to ungrade the village poultry until now under the Third Five Year Plan. Similarly 300 and 821 birds of improved strain were distributed free of cost amongst the tribal people of this district during the First and Second Plan period. No Poultry Development Scheme was taken up before the starting of five year plans. During the Second Plan one small poultry Farm at Kalimpong with funds made available by the Tribal Welfare Department has also been started. The exotic birds viz. R.R.R. & W. L F. were found to thrive well under the climatic condition

of the district. Under the Third Five Year Plan particular stress is also being laid to take up intensive poultry development work in selected areas of the district and a poultry farm has already been started at Kurseong. There is a scheme for the distribution of Day old chicks at subsidised rate during the current plan period, 400 Day old chicks as allotted for the district, have already been distributed under the scheme during the year 1963-64. As poultry can be multiplied quickly, with the poultry development schemes proposed to be taken up under the Third Five Year Plan, it would be possible to augment production in this direction very considerably assuring reasonable return to the poultry keepers.

Consumption of pork is commonly practiced by the inhabitants of the district. Under the Third Five Year plan particular stress has also been laid for piggery development work. 49 large white Boars have already been distributed at Kalimpong with a view to upgrade the local stock. The activities in this direction is going to be increased further in near future and a pig breeding farm is going to be established at Dungra under Kalimpong subdivision. In course of the Second Five Year Plan, with the funds made available by the Tribal Welfare Department 6 pig rearing units were set up in the district. Under the scheme 6 boars and 120 sows have been distributed free of cost to the tribal people of the district in different places for multiplication with a programme for redistribution of the progeny born. One pig scheme with two boars and 30 sows has been sanctioned under the Tribal Welfare Scheme during the 3rd year of the Third Five Year Plan.

In the past sheep rearing was a common practice with the farmers of the district. For various reasons, particularly due to intensive cultivation of food and cash crops in all available culturable land, lesser number of people are now found to keep sheep. With a view to revive the industry a sheep Breeding-cum-research substation was set up in course of the second plan period at Kalimpong subdivision under the auspices of the I.C.A.R like the pig rearing units. Distribution programme of sheep was also taken up with financial assistance from the Tribal Welfare Department. Under the scheme 12 rams and 240 ewes were distributed free of cost to the tribal people in different places of the district during the second plan period 2 rams and 30 ewes during the third plan period. To give further impetus to sheep development in this district a scheme for establishment of large sheep farm at Kashone under Kalimpong subdivision is contemplated and 276 acres of land has already been ecquired for the purpose.

A scheme for multiplication of goats in increased

| Year of<br>Execution | No. of Schemes Executed                    | Amount spent for completion of the Schemes |
|----------------------|--|--|
| 1960-61              | 36 Nos.                                    | 189.830 05                                 |

number has also been introduced on the lines of pig and sheep rearing scheme with funds made available by the Tribal Welfare Department. 2 he-goats and 40 she-goats and 2 he-goats and 30 she-goats have been distributed to the tribal people of this district free of cost during second and upto second year of the Third Five Year Plan respectively. 1 goat scheme with 2 he-goats and 30 she-goats under T. W. scheme has been sanctioned during the third year of the Third Five Year Plan.

In order to encourage the cattle rearers and poultry keepers 51 cattle and poultry shows were organised in different places of the district since inception of the Five Year Plans. One such exhibition was held at Pedong in 1963-64.

#### 5. IRRIGATION

Irrigation is the largest single factor which can change the face of the country by revolutionising its agriculture. Not only will it ensure a steady yield from lands which have hitherto been subject to recurrent drought and help bring more lands into cultivation, but it will also change the entire cropping pattern. Flood control and drainage are naturally linked up with the irrigation scheme. These two are also potent factors in pushing up the yield from agriculture. The problem is how to effectively divert the accumulation of too much water at certain places which is definitely injurious to a healthy growth of cultivation to an area having little water.

Large tracts of land in this district are lying fallow for want of proper irrigation facilities. Efforts are, therefore, ceaseless for utilising perennial water-sources as irrigation potential. In January, 1964 an office of the Assistant Engineer, Irrigation under the Agriculture and C.D. Department has been started in Darjeeling to tackle the irrigation problems for the purpose of augmenting food production in the district.

One minor irrigation scheme at Sonada under Jore Bungalow police station has been completed at a cost of about Rs. 90,000 benefitting an area of about 160 acres. Few other schemes are under active consideration of department. Those schemes are Pudung, Bungbusty, Shepkhola, Kopringtar, Nobgaon and Sherpagaon in Kalimpong Block I; Goley Jhora, Sakyang, Chamuzkhola in Kalimpong Block II; Barbotia in Darjeeling Pulbazar; Rangbhanj, Plungdung in Sukhiapokri; Manedanra in Bangli Rangliot; Murmatkhola, MurmaJhora in Mirik; Giddarpahar in Kurseong; ParbalakhaJhora, Dhodrary Jhora, and Dalimplatast in Garubathan.

A statement obtained from the District Agricultural Officer is furnished below showing small irrigation schemes in the district for the period 1960-64

|                        | Additional yield Expected |                        |
|------------------------|---------------------------|------------------------|
| Area benefitted        | Khariff                   | Babi                   |
| 5,155 Ac.<br>8,815 Ac. | 769 Tons<br>884 Tons      | 1,131 Tons<br>868 Tons |
| 8,762 Ac.              | 876 Tons                  | 657 Tons               |
| 6,802 Ac.              | 1,148 Tons                | 971 Tons               |

### 6. CO-OPERATION

Although the Co-operative Movement in this district made its advent as far back as 1906, it was confined mainly to eatering to credit requirements of the agriculturists only before the five year plans. Five year plans ushered in a new era and gave a fillip to the movement in the range.

Darjeeling Range comprises the three Hill subdivisions of the Darjeeling district with an area of 934 sq. miles. More than half of its area is under plantation and forests.

There were 3 Central Co-operative Banks in the district which financed their affiliated primary credit societies. Village Primary credit Co-operatives in the range at the beginning of the 1st Five Year Plan period numbered 223 with a total membership of 5,939. During the First Plan period no appreciable change took place excepting pursuing the policy of short term finance for seasonal agricultural operations. The number of village credit societies rose to 238 with membership of 8,495 in 1956.

During the Second Five Year Plan greater emphasis was given to strengthen the Co-operative Credit structure by formulating a number of schemes. An important step in this regard was to strengthen the financial structure of the village societies by organization of Large Sized Credit Societies. 5 such societies were organised within the Range during the Second Plan period. Marketing Societies were also organised, for the first time, in order to solve the marketing problems of the villagers. During the Second Plan period 14 such societies were organised.

Under the State Govs.'s scheme of re-organisation of Central Co-operative Banks, three Central Co-operative Banks of the Range were amalgamated into one district level Bank under the name of Darjeeling District Central Co-operative Bank Ltd., the Bank issued crop loan during 1964-65 amounting to Rs. 3,56,400.00 as against Rs. 94,000.00 during 1959-60 i.e. immediately after amalgamation. Thus the district bank has been able to relieve a considerable number of farmers from the clutches of exploting money lenders.

During the last year of the Second Plan and the whole Third Five Year Plan, service co-operatives have been organised amongst the farmers to render them services like marketing of their produce, supplying of seeds, manures, agricultural implements and consumers commodities in addition to credit. At the end of 1964-65 there were 111 service Co-operative Societies and 82 Village Credit Societies catering to the needs of the agriculturists of the district.

In the industrial sector also the Range is making steady though slow progress. There are 21 industrial Co-operatives in this range. The name of Kalimpong Arts & Crafts Industrial Co-operative Society Ltd., has become popular not only in India but abroad also. It produces and sells artistic goods of good design and quality. The Kalimpong Fruit Processing Co-operative Society Ltd., is producing different kinds of fruit and

vegelable products. There are two Beekeeping Societies which produce pure honey under the Supervision of Khadi & Village Industries Commission. There are some societies though the number is very small who are engaged in shoe making, blacksmithy, carpentry, tanning, handicraft, motor-transport, dairy business.

To control the prices of commodities Consumer Co-operative Stores have been organised in Urban and Tea Plantation areas. At present there are 17 Consumer Co-operative Stores. It is true that the business of the stores has not yet been able to make any appreciable impact upon the private trade. But with the opening of the Siliguri Wholesale Consumers Co-operative Society Ltd., and prospects of financial assistance from the State Govt. these Consumers Co-operative Stores are expected to handle and supply exercise some restraint on unscrupulous practices of profiteer traders.

To ameliorate the economic condition of the tribal people Co-operative Graingolas have been organised amongst the tribal people of this range. There are 28 such graingola in the 3 hill subdivisions. Each graingola has been provided with an outright grant of Rs. 10,000 for construction of godown and working capital.

Besides the above mentioned spheres where the Co-operatives in this range are working mention may be made of Employees' Co-operative Credit Societies. There are at present 17 such societies. It is happy to note that most of these societies are functioning at profit and helping their members by giving long term and short term loans to them at low rate of interest and encouraging thrift amongst them.

# 7. HEALTH AND SANITATION

The existing Health Care Services operating in this district are as follows:

| 4 Transfel                               |                    | No. of Beds |
|--|--------------------|-------------|
| A. Hospital  1 State Managed (Provincial | ) = 8              | 332         |
| 2 State Hospital (Darjeeling             | T. B. Hospital)    | 80          |
| a. 6: 4. 6:1-1                           | б                  | 95          |
| 3 State Special                          | 3                  | 644         |
| 4 Private sided                          | ĭ                  | 40          |
| 5 Private non-aided                      | 1                  | 24          |
| 6 Local Bodies                           |                    | .1          |

| F. Chest Clinic                          | 4                  |             |

#### 6. CO-OPERATION

Although the Co-operative Movement in this district made its advent as far back as 1906, it was confined mainly to catering to credit requirements of the agriculturists only before the five year plans. Five year plans ushered in a new era and gave a fillip to the movement in the range.

Darjeeling Range comprises the three Hill subdivisions of the Darjeeling district with an area of 934 sq. miles. More than half of its area is under plantation and forests.

There were 3 Central Co-operative Banks in the district which financed their affiliated primary credit societies. Village Primary credit Co-operatives in the range at the beginning of the 1st Five Year Plan period numbered 228 with a total membership of 5,939. During the First Plan period no appreciable change took place excepting pursuing the policy of short term finance for seasonal agricultural operations. The number of village credit societies rose to 288 with membership of 8,495 in 1956.

During the Second Five Year Plan greater emphasis was given to strengthen the Co-operative Credit structure by formulating a number of schemes. An important step in this regard was to strengthen the financial structure of the village societies by organisation of Large Sized Credit Societies. 5 such societies were organised within the Range during the Second Plan period. Marketing Societies were also organised, for the first time, in order to solve the marketing problems of the villagers. During the Second Plan period 14 such societies were organised.

Under the State Govt.'s scheme of re-organisation of Central Co-operative Banks, three Central Co-operative Banks of the Range were amalgamated into one district level Bank under the name of Darjeeling District Central Co-operative Bank Ltd., the Bank issued crop loan during 1964-65 amounting to Rs. 3,56,400.00 as against Rs. 94,000.00 during 1959-60 i.e. immediately after amalgamation. Thus the district bank has been able to relieve a considerable number of farmers from the clutches of exploting money lenders.

During the last year of the Second Plan and the whole Third Five Year Plan, service co-operatives have been organised amongst the farmers to render them services like marketing of their produce, supplying of seeds, manures, agricultural implements and consumers commodities in addition to credit. At the end of 1964-65 there were 111 service Co-operative Societies and 82 Village Credit Societies catering to the needs of the agriculturists of the district.

In the industrial sector also the Range is making steady though slow progress. There are 21 industrial Co-operatives in this range. The name of Kalimpong Arts & Crafts Industrial Co-operative Society Ltd., has become popular not only in 1ndia but abroad also. It produces and sells artistic goods of good design and quality. The Kalimpong Fruit Processing Co-operative Society Ltd., is producing different kinds of fruit and

vegelable products. There are two Beekeeping Societies which produce pure honey under the Supervision of Khadi & Village Industries Commission. There are some societies though the number is very small who are engaged in shoe making, blacksmithy, carpentry, tanning, handicraft, motor-transport, dairy business.

To control the prices of commodities Consumer Co-operative Stores have been organised in Urban and Tea Plantation areas. At present there are 17 Consumer Co-operative Stores. It is true that the business of the stores has not yet been able to make any appreciable impact upon the private trade. But with the opening of the Sliiguri Wholesale Consumers Co-operative Society Ltd., and prospects of financial assistance from the State Govt. these Consumers Co-operative Stores are expected to handle and supply consumer commodities at reasonable prices and thereby exercise some restraint on unscrupulous practices of profiteer traders.

To ameliorate the economic condition of the tribal people Co-operative Graingolas have been organised amongst the tribal people of this range. There are 23 such graingola in the 3 hill subdivisions. Each graingola has been provided with an outright grant of Rs. 10,000 for construction of godown and working capital.

Besides the above mentioned spheres where the Co-operatives in this range are working mention may be made of Employees' Co-operative Credit Societies. There are at present 17 such societies. It is happy to note that most of these societies are functioning at profit and helping their members by giving long term and short term loans to them at low rate of interest and encouraging thrift amongst them.

## 7. HEALTH AND SANITATION

F. Chest Clinic

The existing Health Care Services operating in this district are as follows:

| A. Hospital                   |                    | No. of Beds |
|-------------------------------|--------------------|-------------|
| 2 (7)                         | - B                | 332         |
|                               | T. B. Hospital)    |             |
| 2 State Hospital (Darjeeling  | (one)              | 80          |
| 3 State Special               | 5                  | 95          |
| 4 Private aided               | 3                  | 644         |
| 5 Private non-aided           | 1                  | 40          |
| 6 Local Bodies                | 1                  | 24          |
| (Railway and Military Hosy    | pitals were not in | neluded)    |
| B. Health Centres             | 20                 | 168         |
| C. Dispensaries               |                    |             |
| 1 State managed (Provincial   | ) 9                |             |
| 2 State Special               | 7                  |             |
| 8 Local Bodies                | 2                  |             |
| 4 Railway Health Units        | 8                  |             |
| D. M. C. W. and F. P. Centres |                    |             |
| 1 Government                  | 9                  |             |
| 9 Non-Government              |                    |             |
| (Private and Local)           | 4                  |             |
| E. V. D. Clinic               | 2                  |             |
| Mobile V. D. Unit             | 1                  |             |

Apart from 20 Health Centres in the District there are 13 Bural Health Circles. All of these Circles are carrying on both preventive and curative works. In addition there are separate units for different Public Health Programme. Those are discussed below:

## 1. Small Pox Eradication Programms

Government has already taken several steps for the control of Small Pox. Recently Small Pox Eradication programme has been started. Small Pox Eradication Team has started their works in this district from 1962. The Team at present are working in Siliguri subdivision. After completion of their work in Siliguri, they will take the hill portion of this district.

### 2. Students Health Service

The Students Health Unit has been started in this district since April 1960. The Unit has one Medical Officer and one Public Health Nurse, one clerk-cum-typist. The students health work are done by the Medical Officers of the Health Centres in the Schools of their respective jurisdiction.

Students Health Unit now established is organising and supervising the Students Health Programme throughout the district.

Presently an effort is being made to establish a centre at Darjeeling for Teachers Training in Health Education.

# 3. Malaria Eradication Programms

The eradication programme has been launched in 1958. Having finished the initial stage now the Survellience work has been started. The Malaria has been more or less completely eradicated from this district.

## 4. T. B. Control

- Tubercolosis particularly of lungs is one of the Major Public Health problem in this District. Government has taken several steps to control the disease by early detection and adequate treatment either in Hospital or domicillary.
  - B. C. G. Vaccination programme has been launced in this district during the Second Five Year Plan.
  - Darjeeling T. B. Hospital has been opened in 1963 for the treatment of T. B. patients only.

To open domiciliary T. B. Units in Siliguri and Kalimpong subdivisions are tentative proposals.

#### 5. V. D. Control

| No. of clinics attached | to State | Hospitals |
|-------------------------|----------|-----------|
| Mobile V.D. Unit        |          |           |

2

1

2

Mobile V.D. Unit is functioning at Siligari for the welfare of the Tribal People.

#### 6. Blood Bank

A full fledged Blood Bank has been opened at Darjeeling on 15.1.63. District Diagonistics and Public Health has been completed and is ready for functioning.

# 7. Family Planning & Maternity and Child Welfare

There are 13 Centres attached to different Medical Institutions for Maternity & Child Health. Welfare-oum-Family Planning works. Out of which 9 Centres are attached to Govt. Medical Institutions.

- (a) M.C.W. & F.P. Centres attached to State Hospital (three)—3
- (b) M.C.W. & F.P. Centres attached to Health Centres (six)—6
- 8. M.C.W. & F.P. Centres attached to different Health Centres opened in 1st, 2nd and 3rd Five Year Plan.

| lst, Five Year Plan | 2 |
|---------------------|---|
| 2nd. Five Year Plan | 2 |
| 3rd, Five Year Plan | 2 |

### 9. Nursing Training

- (a) Nursing Training Centres (Govt.)
- (b) Nursing Training Centre (Non-Govt.)

The District Hospital has been training the girls in Senior and Auxiliary Course.

- 10). Tentative Proposals for further Expansion and Development of Health Services in Darjesling District.
- (a) Establishments of the following Health Centres at:
  - (1) Sonada.
  - (2) Kalimpong Block 1.
  - (3) Phansidewa-Kharibari Block.
- (b) Domicillary T.B. Unit at Siliguri and Kalimpong with expansion of existing Chest Olinios.
- (c) Establishment of Public Health Laboratory which is ready for functioning.

Before the First Five Year Plan there were only 198 beds in the Sadar and Subdivisional Hospitals. At present the number of beds in these hospitals is 882.

#### First Five Year Plan

- 1 Sukhiapokhri Primary Health Centre
- 2 Naxalbari Primary Health Centre
- Pedong Primary Health Centre
  - 4 Takdah Primary Health Centre
- 5 Sukna Primary Health Centre
- 6 Rangli Subsidiary Health Centre
- 7 Bagdigra Subsidiary Health Centre
- 8 Khoribari Subsidiary Health Centre
- 9 Matigara Subsidiary Health Centre
- 10 Siliguri Subdivisional Hospital Addition of 42 beds more to Siliguri Subdivisional Hospital
- 11 Family Planning and Maternity Child Welfare Centres opened at Nazalbari Primary Health Centre

#### Second Five Year Plan

- 1 Garubathan Primary Health Centre
- 2 Mirik Primary Health Centre
- 3 Lokhama Subsidiary Health Centre
- 4 Gitdubling Subsidiary Health Centre
- 5 Takling Subsidiary Health Centre
- 6 Bagora Subsidiary Health Centre
- 7 Sittong Subsidiary Health Centre
- 8 Family Planning & Maternity Child Welfare Centres opened at:
  - (i) Siliguri Hospital
  - (ii) Kurseong Hospital
  - (iii) Pedong Primary Health Centre
  - (iv) Sukhiapokhri Primary Health Centre
- 9 V. D. Clinics opened at:
  - (i) Kurseong Hospital
  - (ii) Victoria Hospital
- 10 Provincialisation of District Board
  Public Health Services including
  8 Dispensaries, and creation of
  the post of District Health Officer
  and subdivisional Health Officer

#### Third Five Year Plan

- 1 Samthar Samalbong Sub-Health
- 2 Bijanbari Primary Health Centre
- 3 Jaldhaka Sub-Health Centre
- 4 Singrimtam Sub-Health Centre
- 5 Family Planning & Maternity Child Welfare Centres opened at:
  - (i) Garubathan
  - (ii) Mirik Primary Health Centre
- 6 Chest Clinics opened at :
  - (i) Siliguri
  - (ii) Kalimpong
- 7 Darjeeling T. B. Hospital
- 8 Blood Bank
- 9 Introduction of Food Licensing
- 10 Additional Construction of :
  - (i) Victoria Hospital
  - (ii) Kurseong Hospital
  - (iii) Siliguri Hospital
- 11 Nursing Training Centre at Basanti Annexe
- 12 Installation of X-Ray Plant at Siliguri Hospital
- 13 Family Planning Facilities extended to all Health Centres and opened new Sub-Health Centre

#### 8. INDUSTRY

#### Introduction

Directorate of industries, Govt. of West Bengal launched a few schemes with a view to augmenting the industrial production end infusing a fresh approach towards the promotion of Cottage & Small Scale Industries in this district. The entire scheme of industrialisation is getting its shape through the agencies of Block Development Officer, Khadi and Village Industries Board, Rural Industries Project, Tribal Welfare Department etc.

#### Schemes

- (1) Cutlery Servicing Station at Kurseong—This scheme under Small Scale Industries was started to provide a service for repairing and manufacturing the Standard and quality type of the Cutlery implements. Tea garden implements and Agricultural implements. A factory is being run at Kurseong with 25 workers. The average yearly production is to the tune of Rs. 70,000/. This station generally supplies its implements to the different Tea-gardens of this District, Jalpaiguri and Assam also.
- (2) Model Servicing for Foot-Wear Centre at Kurseong—This scheme is being run with a view to rendering servicing for scouring, stitching and high finishing on the shoes of the local Cobblers at a very nominal charges to help the Cobblers to manufacture standard and quality type of shoes which is not possible for an individual Cobbler.
  - (8) Wood Industries Centre at Siliguri—It is

- a machanised Carpentry Unit for making quality and fashionable type of furniture out of the seasoned timbers. Generally, this unit meets up the big contract to the Railways, Commercial firms and other concerns. The average yearly production is valued at Rs. 50,003. Sixty workers are working daily at this Unit.
- (4) Siliguri Industrial Estate at Siliguri—This Estate comprising with nine separate big worksheds has already been constructed near Sevoke Road at the cost of Rs. 7 lakhs approx. with a view to providing factory sheds to the industrial entrepreneurs on rental system to start different industries in one composite area. The Govt. will provide power, water and other facilities for procuring raw materials and exploring the markets for the products manufactured. But due to the emergency in 1962 the sheds have been occupied by the Military. As soon as it will be vacated the sheds will be allotted to the interested Industrialists to start their industries.
- (5) Sericulture at Kalimpong and Matigarah (Siltguri)—There are two hill-nurseries at Kalimpong and one nursery in larger scale and grainage are being run at Matigarah, Siliguri for rearing the silk-worms of foreign race. The scheme has made a grand success as the mulberry plantation in hills and foot-hills are found quite good due to the congenial climatic conditions. The foreign race of silk-worms of Japanese and French varieties thrive well in the hills and the filament of cocoons is more than 1200 yards of yarn per cocoon in such varieties; whereas, the indigenous variety is very poor, only of 300 yards on average. With a view to producing more filament with healthy foreign silk-worms by cross breed the scheme was started and the result is satisfactory.

Side by side a Central Sericulture Research Station at Kalimpong has been started under the Central Silk Board, Govt. of India to carry on the research extensively on this scheme.

A detailed report on sericulture oftained from the Superintendent of Sericulture, Kalimpong is given below.

Sericulture in West Bengal is an important cottage industry which enables persons employed in this industry to earn about rupees 3 crores in a year and gives employment to about 2 lakhs people of this State. This industry is in vogue in the districts of Malda. Murshidabad, Birbhum and Bankura in a fairly wide scale while in the districts of Nadia, Midnapore, West Dinajpur and Darjeeling to a limited extent. The greatest drawback of Bengal Sericulture (as in the case of other silk producting States in India except Kashmir), is that the yield of raw silk obtained per unit of cocoons is very poor. Inferiority of breed coupled with other factors like unfavourable climatic conditions for rearing high-yielding silk-worm races during greater part of the year in the plains pushed back Bengal Silk Industry which was once the biggest supplier of silk in European market. In India, Silk industry is facing a critical situation at present. Production is less than demand. Imports cannot be encouraged for obvious reasons. Production should therefore be increased, quality improved and cost brought down. In Japan, 1 kg. of raw silk (yarn) can be had out of 6 kg. of coccons while in India it requires about 16 kg. or even more in case of our indigenous breed.

#### Second Five Year Plan

The recognition of the fact that the basic problems of the iudustry is the poor quality of cocoons, led the State Government to start during Second Five Year Plan one Basic Seed Station (Foreign Race Seed Station) and a number of Seed Multiplication stations in the Darjeeling district which has a favourable climate except in winter for rearing high-yielding, hybrid—and exotic races. New strains of s!lk-worm races were imported mainly from Japan and experiments on breeding improve hybrid races were started in the Basic Seed Station at Kalimpong. A number of experimental lots were tried in the farmers' houses in order to study their suitability under condition prevailing in the State and ultimately two new strains were selected for commercial multiplication. The results were quite encouraging, and the farmers raised cocoons of superior quality yielding 1 kg. of standard raw silk out of 10 kg. cocoons, and this was capable of substituting imported yarn. During this plan period, about one lakh grams of silk-worm eggs of improved races were supplied to different districts of West Bengal for rearing by the commercial rearers of these districts. About 2.5 lakhs of mulberry saplings were also distributed during the plan period among the villagers of hills and plains and also to the forest department for plantation. The State Government and the Central Silk Board spent about rupees 12 lakhs during the Second Five Year Plan for development of sericulture in Darjeeling district. Japanese sericultural experts, Dr. Harada and Mr. Takahashi stayed at Kalimpong for some time and helped the staff of sericulture section

in the application of methods found commercially advantageous in Japan.

#### Third Five Year Plan

The activities of sericultural section of the Directorate of Industries have further been directed towards the line of activities as stated above in the 3rd plan schemes. During this plan period, two new strains of silk-worm, yielding 17 to 18 per cent Silk contents and filament length between 600 to 700 meters have been evolved in the Basic Seed Station at Kalimpons. Facilities for production of increased number of F 1 eggs were expanded in order to meet the increasing demand from the villagers of the silk producing districts of this State. Seed Multiplication Stations at Kalimpong, Kurseong and Matigara (Siliguri) and the Hybridisation Station (Grainage) at Matigara worked at maximum capacity and supplied about 4 lakhs grams of hybrid and F 1 silk-worm eggs to the villagers for production of good quality coccons capable of yielding raw silk of internationally accepted standard. During this period about 85 lakhs of mulberry saplings have been supplied to the villagers and the forest department for plantation. Government have taken up a scheme for introduction of sericulture as a subsidiary occupation in the rural areas of the hilly region mainly Kalimpong subdivision, where the villagers are generally very poor and having no avenue for earning money except during the agricultural season. Serioulture was considered to be an ideal subsidiary occupation for utilizing their idle hours which otherwise go waste. So a village near Kalimpong town, namely, Bhalukhop which was severely ravaged by vagaries of nature in the form of landslide a few years back was selected for the purpose, but major difficulty in the introduction of serioulture in this area was the absence of past tradition. Future success of any project depends to a great measure on the initial success achieved. With this end in view some sericulture training centres were started one under the auspicious of the Rural Industrial Project, Darjeeling at Tirvai and other under the Tribal Welfare Department at 8th Mile Village (Mongpur). About 60 girls were already trained up in these centres and another batch of 25 girls are now undergoing training in sericulture in order to enable them to take up this industry in their own houses. Instructions are imparted on mulberry cultivation and silk-worm rearing and the trainees are supplied with mulberry sapling iree of cost and silk-worm eggs at a subsidized rate. A Co-operative Society was organised as part of their after-training programme in order to render financial assistance and technical guidance for growing mulberry in their fields and rearing silk-worm in their houses. Of late, the Agriculture and C. D. Department have also taken up this Agro-Industry as a part of their programme of work and started three Training-oum-Production Centres, one each in Kurseong, Mirik and Garubathan N.E.S. Blocks. where there are considerable scopes for introduction of this cottage industry among the villagers. 45 trainees are now undergoing training in these centres. Very recently another Sericultural Training Centre has been established under B. I. P. Darjeeling, in the village of Beilling in Darjeeling-Pulbagar N. E. S. Block. 10 girls are undergoing training in that centre.

The Sericulture Co-operative Society mentioned above was registered on 28.4.68 as Bhalukhop Resham Silpi Co-operative Society. This Society has 59 members including some sympathisers and a working capital of about Rs. 2,600.00. During 1964, seventeen members of the Society raised about 188 kahans of occoons valued at Rs. 1,981/- and during 1965, the members numbering 37 raised 477 kahans of cocoons valued at Bs. 6,757,00 in two crops by working for a period of about three months. At least 4 members earned more than five hundred rupees each. In Kalimpong subdivision, sericulture as a cottage industry is now being practised in Bhalukhop, Sangsey, Dalapchan, Tirpai, Chibbo, Suruk, Echhay, Dungra and Tanek villages. The cocoons produced by the villagers were utilized partly for production of raw silk at Kalimpong and partly as seeds for commercial multiplication. Besides these, some villagers of Ambotia Village near Kurseong also raised coccons valued at about Rs. 600/during the same period. It may be stated in this connection that the mulberry saplings planted by the villagers in their field during last 2 to 3 years are yet to mature and these will require another couple of years in order to yield the optimum quantity of leaves when the average income from production of cocoons will be enhanced by about 100 per cent or more.

The Rural Demonstration staff of the sericulture section of the Industries Directorate are frequently visiting the houses of these villagers in order to give them necessary technical guidance and help in connection with disposal of their produce. Along with sericulture, the villagers were also being encouraged to develop ancillary industry like making bamboo-trays for rearing silk-worms.

The Government Sericulture Nurseries are also being utilized as Demonstration Centres and for popularisation of technical know-how. The State Government have spent about rupees 10 lakh during the Plan period for development of sericulture and silk industry in Darjeeling district. It is an encouraging fact that the villagers who were very much sceptical about the success of this scheme during the initial stages have started taking increasing interest in this direction and the demands for supply of mulberry saplings and imparting technical guidance have been increasing steadily.

- (6) Handmade Paper Industry under the Khadi and Village Industries Board at Kalimpong—To manufacture handmade paper out of the bark of local Argeli Plant (Daphne Canabina) a scheme was taken at Kalimpong. A suitable house, plant and machineries were purchased to start the industry providing an employment to the 100 workers but ultimately the scheme was dropped by the Khadi and Village Industries Board.
- (7) Schemes under Community Development Project and Bural Industries Project (Darjeeling)—A few schemes under the style of "Training oum-Production Centre" was started in different Blocks of the district with a view to imparting training to the local boys and girls on a monthly stipend basis and thereby

carry on the industry after the completion of the training. Some of these shemes have been converted under Co-operative fold and the Co-operative Societies have been formed with the ex-trainees of the Training Centres and the Govt. has given the tools and implements furniture etc. of the Training Centres to the Co-operative Societies as a gift to carry on the industries. The schemes are furnished below in area-wise:

# (i) KALIMPONG BLOCK\_I

- 1 Fruit Processing and Preservation
- 2 Block Printing on Textiles
- 3 Decorated Wood-oum-Metal Craft
- 4 Sericulture Training
- 5 Floriculture Training
- 6 Leather Training
- 7 Bee-Keeping
- 8 Wool-Knitting Training

# (ii) KALIMPONG BLOCK—II (ALGARAH)

- 1 Cheese-making
- 2 Carpentry

# (iii) SILIGURI-NAXALBARI BLOCK

- 1 Weaving
- 2 Carpentry

# (iv) PHANSIDEWA-KHARIBARI BLOCK

1 Tile-making

# (v) GARUBATHAN BLOCK

- 1 Sericulture Training
- 2 Weaving

## (vi) MIRIK BLOCK

- 1 Tailoring
- 2 Carpentry
- 3 Sericulture

# (vii) SUKHEAPOKHRI BLOCK

- 1 Tailoring
- 2 Carpentry

# (viii) KURSEONG BLOCK

1 Sericulture Training

# (ix) DARJEELING-PULBAZAR BLOCK

- 1 Bristle Dressing Training
- 2 Carpentry
- 2 Dairy
- 4 Bee-Keeping

# (x) DARJEELING

1 Wool-Knitting

A detailed report on the progress of the Rural Industries Project is furnished below.

The Darjeeling Rural Industries Project consists of the following 5 Development Blocks:

|                                     |   | Area  | Population                           |
|-------------------------------------|---|---|--------------------------------------|
|                                     |   | Sq. Mile                                      | 66.314                               |
| (i)<br>(ii)<br>(iii)<br>(iv)<br>(v) | Darjeeling-Pulbazar<br>Kalimpong 1<br>Kalimpong II<br>Siliguri-Phaneidewa<br>Phaneidewa-Kharibari | 93:40<br>194:00<br>111:40<br>194:40<br>185:88 | 83,689<br>27,689<br>69,847<br>84,587 |

The Project was started on 1.5.1965, with Headquarters at Darjeeling.

The following programme was adopted to meet the objects of industrialisation.

- Training of local people in different crafts for utilising the local raw material resources.
- Helping the rural artisans with financial help and organisation of Co-operatives amongst them.
- Development of agro-industry like Dairy Farming, Poultry and Piggery.
- 4. Training of local people in crafts to meet local demand.
- Marketing of products of artisans, Co-operative societies and other industrial units.

The progress of the training schemes are as follows:

(1) Training in Grading, Dressing and Treatment of bristle for brushware at Bijanbari-Bijanbari and Pulbazar being the main collection centres for hogs' raw bristle, the local merchants including outsiders collect raw bristle and export them outside the districtmainly to Kanpur and Calcutta. As raw bristle is available in abundance locally, a scheme for grading, dressing and treatment of bristle for brushware was felt imperative. Hence a Training Centre on resourcebased scheme on grading, dressing and treatment of bristle for brushware was started on 14.2.64 in the pattern of training-cum-production centre. 15 local girls were selected as trainees. The period of training is one year and each trainee is entitled to a stipend of Rs. 30/- per month. The first batch of trainees completed their training on 13.2.65. and the 2nd session of training started on 15.2.65.

The following figure shows the Production and Sale of the dressed bristle of the training centre:

| Particulars | Year    | ]   | Production       |     | Sale     |
|-------------|---------|-----|------------------|-----|----------|
|             | 1963-64 | Rs. | 2,697.42         | Rs. | 2,327.95 |
|             | 1964-65 | Rs. | 13,966.25        | Rs. | 9,982.68 |
|             | 1965-66 | Rs. | <b>7,3</b> 99.46 | Rs. | 5,934,68 |

A Co-operative Society of the extrainees has been formed under the name of Bijanbari Bristle and Brushware Industrial Co-operative Society Ltd. The society has been registered and it will start functioning from February 1966.

Expenditure incurred for the training-cum-production centre during the year under review is as follows:

| Year                    |       |     | Amount |
|-------------------------|-------|-----|--------|
| 1963-64                 |       | Bs. | 6,920  |
| 1964-65                 |       | Rs. | 28,574 |
| 1965-66 (upto 31.12.65) |       | Re. | 15,455 |
| 2000 00 (0)             | Total | Rs. | 45,949 |

(2) Training in Carpentry at Bijanbari—The training in the pattern of training-cum-production centre was previously sponsored by the Darjeeling-Pulbasar Development Block. The Centre was later taken over by the Darjeeling Rural Industries Project with effect from 1.11.1963. The shed in which the centre is situated is a departmental one. Uptil now two batches of trainees numbering 30 have been trained in Carpentry and Masonary works. The passed out trainees have found gainful employment as carpenters and masons. Earning of each trainee varies from Rs. 3 to Rs. 5. The demand for skilled carpenters being great, there is no difficulty in finding employment for these trained hands. The third batch of trainees of 15 persons are at present undergoing training with effect from 4.12.65.

The training has thus provided a valuable service in providing local skilled carpenters for various works of construction within the block and even outside the blocks.

The following figures show the production and cale of the training-cum-production centre during the year under review.

| Year    | Production | Sale     |
|---------|------------|----------|
| 1963-64 | 466.99     | 251,00   |
| 1984-65 | 1.916.99   | 1,488.78 |
| 1965-66 | 2,081.62   | 1,887.68 |
| Total   | 4 465 60   | 8.577.86 |

A Co-operative Society of the passed out trainess has been formed under the name of Bijanbari Carpenters' Industrial Co-operative Society. The members of the society is at present engaged in constructing a shed for Bristle Dressing Training Centre at Bijanbari.

Expenditure incurred for the training-oum-production during the year under review is as follows:

| Year                    |       | Amount |
|-------------------------|-------|--------|
|                         |       | Rs.    |
| 1963-64                 |       | 8,488  |
| 1964-65                 |       | 11,985 |
| 1965-66 (upto 31.12.65) |       | 7,528  |
|                         | Total | 22,991 |

(3) Training in Hide Tanning at Pulbazar—Next to bristle, raw hides are collected in abundance at Bijanbari and Pulbazar. Pulbazar is one of the biggest livestock markets of the district. Bijanbari and Pulbazar thus serve as a good collection centres for raw buffalo and cow hides. The local marchants collect these raw hides and export them to Calcutta.

In view of the availability of raw materials in abundance, a resource-based scheme training in hide tanning was started on 2.3.1964 with 15 local boys as trainees. The training centre is being run in the pattern of training-cum-production centre. The centre is at present producing sole leathers. The following figure shows the production and sale of the training centre:

| Year Production         |          | Sale             |
|-------------------------|----------|------------------|
| 1968-64                 | Nil      | Nil              |
| 1964-65                 | 4.711.67 | <b>8,802.5</b> 8 |
| 1965-66 (upto 81.19.65) | 2,672.16 | 3,018.28         |
| Total                   | 7,888.88 | 6,815.86         |

Though raw hides are available locally, tanning materials like Babul bark, Goran bark and myrobalan nuts are to be brought from Calcutta which make the cost of production high. Efforts and experiments are being made to find out local substitutes for these Imported bark. Myrobalan nuts have been found grown at Goke and Tindharia. Experiment was carried on with the local variety of myrobalan nuts and the result found was quite satisfactory. The availability of myrobalan nuts in aboundance within the district is yet to be ascertained. Efforts are being made to ascertain the availability of myrobalan nuts.

Besides meeting the local demand for sole leather, the centre supplies sole leathers to the Kurseong Cobblers' Industrial Co-operative Society.

Expenditure incurred for this centre during the year under review is as follows:

| Year    |                 |       | 1   | mount  |
|---------|-----------------|-------|-----|--------|
| 1968-64 |                 |       | Rs. | 18,296 |
| 1964-65 |                 |       | Rs. | 16,780 |
| 1965-66 | (upto 81,12.65) |       | Rs. | 15,508 |
|         |                 | Total | Rs. | 45,584 |

A Co-operative Society of the ex-trainees has been formed under the name of Pulbazar Tanning Industrial Co-operative Society Ltd. The Society has been registered. It has started functioning from 1.4.65. The paid-up share capital of the society is Rs. 410/-.

(4) Training in Bee-Keeping at Relling—Apiary is a typical agro-industry which can be followed successfully with little capital outlay. A demonstration type training centre on rearing of bees has been set up at Relling on 26.2.65. There are at present 91 villagers as trainees. The training scheme covers the villages Relling, Lower Relling, Upper Relling, Dangia and Samsu. The villagers have been supplied with modern bee hives at subsidised rate of Rs. 24/- per box.

Prior to the setting up of this centre, the villagers used to rear bees in primitive ways and used to apply crude method in extracting honey. Since the inception of the training centre the villagers have switched over to scientific ways of rearing of bees. The progress of the scheme is as follows:

| No. of hives distributed upto 81,12.65 at subsidised rate | 155                            |
|---|--------------------------------|
| Quantity of honey extracted upto 81.12.65                 | 54.600 valued<br>at Re. 827.60 |
| No. of trained villagers                                  | 70                             |

(5) Training in Sericulture at Relling—The climate and the soil of Relling is found to be congenial for the growth of mulberry, which is a pre-requisite for rearing of silk-worm. Mulberry plants of good variety have been found grown locally. The setting up of a Demonstration type training centre for rearing of improved varieties of silk-worm was felt imperative as this would provide employment to women in their homes as well as on a more organised basis. Hence a Demonstration type of training centre has been set up

with 10 local women as trainees. The training started from 1.59.65.

The trained women will be encouraged to follow sericulture by providing them with a subsidy of Rs. 150/each for cultivation of mulberry and for curchase of requisite equipment like 'Chandraki' bamboo-trays etc.

(6) Training in Wool Knitting Works with machine at Darjeeling—Darjeeling being a cold place the demand for woollen knitted garments is ever increasing. To meet this demend of both the local people and the seasonal visitors the local merchants import bulk of woollen knitted garments every year from Ludhiana and other places. Hand knitting is also done by local girls but the cost is comparatively high due to time taken by knitters.

Considering the heavy demand for these woollen knitted garments and in view of good prospect of the industry a training-cum-production centre has been set up on 16.2.64 with 15 girl trainees. Semi-automatic hand operated machines are being used. The time taken by such process of knitting is comparatively less. The training centre is at present equipped with 12 knitting machines. The training centre is housed in the Red Cross Building.

The first batch of trainees numbering 15 completed their training on 15.8.65. The second batch of trainees consisting of 15 women are now undergoing training from 1.4.65.

The following figures show the production and sale of the centre:

| Year    |                 | Production | Sale      |
|---------|-----------------|------------|-----------|
| 1963-64 |                 | Nil        | Nil       |
| 1964-65 |                 | 11,664.01  | 8,793.74  |
| 1965-66 | (upto 81.12.65) | 2,759.75   | 2,098 49  |
|         | Total           | 14.483.76  | 10,887.23 |

The passed out trainees have formed a Co-operative Society with paid-up share capital of Rs. 1,374/-. The society has been registered.

Expenditure incurred for the Training Centre during the year under review is as follows:

| Year                    | Amount |
|-------------------------|--------|
|                         | Rs.    |
| 1969-64                 | 8,223  |
| 1964-65                 | 18,584 |
| 1965-66 (upto 81.12.65) | 16,162 |
| Total                   | 48 969 |

(7) Training in Tile Making at Kantivita—The demand for tile in the district of North Bengal is ever increasing in view of scarcity of C. I. Sheet. The right type of clay for tile making industry is very essential. Kantivita has been found rich in deposit of such clay. A training-cum-production centre for tile making was set up at Kantivitta on 1.4.1964 with 30 trainees. The first batch of trainees completed their training on

\$1.3.65. 24 persons were trained in making Mangalor tiles. The following figures show the production and sale of the training centre.

| Year                    | Production  | Sale     |
|-------------------------|-------------|----------|
| 1969-64                 | Nil         | Nil      |
| 1964-65                 | 6,813.95    | 4,996.99 |
| 1965-66 (upto 31.12.65) | 1,665.75    | • •      |
| Total                   | al 8,479.70 | 4,996.99 |

The scheme has a bright future as no raw material has to be imported. Besides this, it has a local market.

A Co-operative Society of the ex-trainees has been formed. The work of the training centre has created a lot of interest in tile making in this area. At present 30 persons are undergoing training from 10.5.65.

Expenditure incurred for the training centre during the year under review is as follows:

| Year                     |       | Amount |
|--------------------------|-------|--------|
|                          |       | Rs.    |
| 1968-64                  |       | 10,705 |
| 1964-65                  |       | 18,133 |
| 1965-66 (up to 13.12.65) |       | 8,875  |
|                          | Total | 37,713 |

(8) Training in Brick Making at Bidhan Nagar—In view of the great demand for bricks a scheme on brick making training was felt imperative. The scheme was sanctioned earlier, but acquisition of land and recruitment of staff could not be made in time. As such a scheme could not be implemented during 1964-65. Now with the appointment of staff the scheme has been put into operation with effect from 1.4.65. The chimney and the kiln have been set up. The production is expected to begin from February, 1966. Uptil now 82,285 green bricks have been made.

Expenditure incurred during the year under review is as follows:

| Year             |                 |       | Amount |
|------------------|-----------------|-------|--------|
|                  |                 |       | Rs.    |
| 1963-64          |                 |       | 19     |
| 1964-65          |                 |       |        |
| 1965 <b>-6</b> 6 | (upto 31,12,65) |       | 13,467 |
|                  |                 | Total | 13,486 |

(9) Training in Carpentry at Gini Jote—
The carpentry training centre was first started at
Naxalbari on 16.1.64 but was later shifted to Gini Jote
at Hatighisa as the requisite number of trainees were
not available. The shifting of the centre showed some
improvement. The following figures show the production
and sale of the centre:

| Year                    | Production   | Sale     |
|-------------------------|--------------|----------|
| 1968-64                 | Re. 238.06   | Nil      |
| 1964-65                 | Re. 1,122,00 | 1,219.89 |
| 1965-66 (upto 81.12.65) | Ba. 907.73   | 848 16   |

Since the training centre did not show sign of much improvement it has been decided to abolish the centre with effect from 28.2.66.

Expenditure incurred during the year under review is as follows:

| Year    |       | Amount |
|---------|-------|--------|
|         |       | Re.    |
| 1968-64 |       | 6,046  |
| 1964-65 |       | 9,564  |
| 1965-66 |       | 7,688  |
|         | Total | 23,243 |

(10) Training in Sericulture—Kalimpong has been found suitable for rearing of improved varieties of silk work. Mulberry plants also thrive better here. In view of good prospects of silk-worm rearing industry the N. E. S. Development Block, Kalimpong first started a training centre which was later taken over by the Bural Industries Project, Darjeeling on 1.9.63. The first batch consisted of 15 girl trainees completed their training on 30.11.63. Each trainee was entitled to a stipend of Bs. 30/- per month.

The second batch consisting of 10 women are at present undergoing training. This is a Demonstration type of training scheme. Each trainee will get Rs. 150/as subsidy for mulberry plantation and for purchase of requisite equipment after the training is over.

The ex-trainees have formed a Co-operative Society.

The following figure shows the production and sale of the training centre.

| Year                    | Production |     | Sale |
|-------------------------|------------|-----|------|
| 1963-64                 | Ra.        | 110 | 110  |
| 1964-65                 | Rs.        | 96  | 96   |
| 1985-66 (upto 31.12.65) |            | • • |      |
| Total                   | Rs.        | 206 | 206  |

(11) Training in Bee-Keeping at 12th Mile, Kalimpong—This is one of the two schemes in Bee-keeping. A Demonstration type of training centre has been set up on 1.3.1965. The villagers are encouraged to adopt scientific hives by providing them with bee hives at subsidised rate of Rs. 24/-per box. The progress of the scheme is as follows:

| No. of hives distributed at subsidised rate | 120 |     |
|---|-----|-----|
| No. of colonies fixed                       | 80  |     |
| Quantity of honey extracted                 | 80  | kg. |
| No. of trainees                             | Ωe  | -   |

(12) Training in Floriculture at Dr. Graham's Homes—The scheme envisages to train up local people in floriculture which can be profitably adopted as cottage industry. The industry has a bright prospect. The training started with 10 persons as trainees with effect from 1.7.65. At present the scheme is being run in collaboration with Dr. Graham's Homes. Each trainee is entitled to a stipend of Rs. 80/- per month. The trainees are being helped to start their own nursery simultaneously with the training and they are expected

to have satisfactory earning by export of flower bulbs, seeds and cut flower, the demand for which is great both at home and abroad.

Expenditure incurred during the year under review is as follows:

Year Amount 1965-66 Rs. 8,507

(13) Training in Wool Knitting with machine at K-limpong—This is one of the two schemes of Wool Knitting with machine. The training-cum-production centre in Wool Knitting was started with effect from 7.12.65 The centre has 15 trainees at present. Each trainee is entitled to a stipend of Rs. 30/- per month. The period of training is one year. The following figure shows the production of the centre.

 Year
 Production
 Sale

 7.12.65 to 81-12.65
 24.15
 Nil

Expenditure incurred during the year under review is as follows:

Year Amount 1965-66 Rs. 6,700

The centre is at present equipped with 10 knitting machines.

(14) Training in Carpentry at Pedong—In view of the great demand for skilled carpenters a Training Centre in the pattern of training cum-production Centre is being set up at Pedong. The training is expected to go into operation from February, '66.

#### Common Service Facilities:

Under the head comes the following schemes:

- (i) Dairy
- (ii) Establishment of the Sales Depot and the Service-cum-Marketing Co-operative Society.
- (i) The hill areas have been found to be ideal for dairy farming. The villagers cannot go in for maintaining good stock of milch cows as there is marketing difficulties for milk and milk products. To encourage dairy farming three Dairy Co-operative Societies have been formed, viz.
  - (1) Kainjaliya Bhanjyang Dairy Co-operative Society.
  - (2) Rimbick-Sirikhola Dairy Co-operative Society.
  - (8) Himalayan-Dairy Co-operative Society.

The following figures show the financial assistance rendered to the society as grant-in-aid during the year under review for purchase of machineries and putting up dairy shed.

| (1) | Kainialiva Dairy   | Rs. | 6,000  |
|-----|--|-----|--------|
| (2) | Rimbick-Sirikhola Dairy  | Rs. | 6,000  |
| (8) | Kainjaliya Dairy<br>Rimbick-Sirikhola Dairy<br>Himalayan Dairy | Ra. | 6,000  |
| • • | •  | Rs. | 18,000 |

These societies have built the dairy sheds and have purchased the machineries. The societies are producing

butter, ghee, cheese, lollypop etc. The products of the dairies get ready market. The following societies received managerial subsidy during the year under review. The amount is shown below:

|     |                                      | 1   | 964-65 |
|-----|--------------------------------------|-----|--------|
|     |                                      |     | Ra.    |
| (1) | Kainjailya-Dairy Co-operative        |     | 1,500  |
| (2) | Rimbick-Sirikhola Dairy Co-operative |     | 1,500  |
| (3) | Himalayan Dairy Co-operative Society |     | • •    |
| •   | Total                                | Rs. | 3,000  |

(ii) Sale Depot at Dajecting—Provision of marketing facilities is essential for the development of small industries. With a view to helping artisians, artisans' Co-operative and other industrial units in marketing their products a Sale Depot was set up in Darjeeling on 1.1.1964. The Sale Depot was subsequently converted into a Co-operative Sales Emporium from 1.7.1964. The Sales Emporium is at present handling goods of 10 industrial Co-operative Societies, 9 individual artisans and 6 individual units. The articles sold consist of woolen knitted garment, handicrafts footwear, tailored garments, milk and fruit products. The following figures show the value of goods marketed by the Sales Emporium:

| Year                    |        | Amount    |
|-------------------------|--------|-----------|
|                         |        | Rs        |
| 1963-64                 |        | 6,242.17  |
| 1964-65                 |        | 26,949.38 |
| 1965-66 (upto 81.12.65) |        | 24,907.47 |
| <u>-</u>                | 2 otal | 58,098.97 |

Service-cum-Marketing Co-operative Society at Siliguri—Sanction was received for organisation of a Service-cum-Marketing Co-operative Society with the object of storing raw materials required by artisans, Industrial Co-operative Societies and small industrial units, to market their finished products and to arrange them finance for improvement of the Industrial Co-operative Societies. The Society has been registered at Siliguri. The S.D.O., Siliguri is the Chairman of the Society. The S.D.O., Siliguri has been requested to allot a stall at Bidhan Market at Siliguri.

#### Development Programme

1. Government sanction has also been received for Managerial subsidy to the Industrial Co-operative Societies for the year 1965-66. Managerial subsidy will be given to the following Co-operative Societies:

|            | Name of the Society                               | Åmo   | unt per year<br>Ra. |
|------------|---|-------|---------------------|
| (1)        | Kanjaliy Dairy                                    |       | 1,500               |
| (1)<br>(2) | Himalayan Dairy                                   |       | 1,500               |
|            | Rimbick-Sirikhola Dairy                           |       | 1,500               |
| (4)        | Kalimpong Fruit Processing Co-operative Society   |       | 8,600               |
| (5)        | Darjeeling Knitters' Co-<br>operative Society     |       | 1.500               |
| (6)        | Phansidewa Tile Silpa<br>Samabaya Samity          |       | 1,200               |
| (7)        | Kalimpong Women's Industrial Co-operative Society |       | 1,900               |
|            | •   | Total | 12.000              |

2. The following figures show the disbursement of artisans for purchase of improved tools and equipments during the year under review:

|     | 1964-65                    | No. of ar | tisans benefited | Amount<br>Re. |
|-----|----------------------------|-----------|------------------|---------------|
| (1) | Sericulture                |           | 15               | 1,050         |
| (2) | Wool Knitting              |           | 19               | 1,200         |
| (8) | Blacksmithy                |           | 12               | 1,200         |
| (4) | Tailoring                  |           | 3                | 800           |
| (5) | Carpentry                  |           | 3                | 175           |
| (6) | Metal work                 |           | 1                | 75            |
|     |                            | Total     | 46               | 4,000         |
|     | 1965-66                    |           |                  | Rs,           |
| (1) | Carpentry (Da<br>Pulbasar) | rjeeling, | 13               | 1,300         |
| (2) | Bamboo Crafte<br>making    | and Doll  | 2                | 200           |
|     |                            | Total     | 15               | 1,500         |

Government sanction of Rs. 8,000 has been received for the year 1965-66 for giving 50 per cent subsidy to the artisans for purchase of tools subject to maximum of Rs. 100 to each artisan. Application are being received from the artisans.

3. The Kalimpong Fruit Processing Co-operative Society has a paid up share capital of Rs. 15,160. The Society received financial assistance to the tune of Rs. 6,000 during the year 1964-65 for purchase of equipment and managerial grant. The progress of the society during the year under review is as follows:

| Year                    | Production | Sale      |
|-------------------------|------------|-----------|
| 1963-64                 | 5,882.75   | 4,182.70  |
| 1964-65                 | 11,939.40  | 6,548.05  |
| 1965-66 (upto 31.12.65) | 16,146.55  | 7,709.80  |
| Total                   | 33,968·70  | 18,390.85 |

- 4. A sum of Rs. 1,000 has been received during the year 1965-66 under the scheme of award of prizes to artisans and trainees of the centre in recognition of their meritorious work and also as an incentive to them. Under the scheme it is proposed to award the first prize of Rs. 200. The second prize of Rs. 125 and the third prize of Rs. 75. The prizes will be given preferably in kind in the form of tools and implements.
- 5. Under the scheme of receiving higher training in the institution within the Project or outside the Project, three persons were sent to the following places for acquiring higher training during 1964-65.
  - Smt. Sarala Chettri (Darjeeling)—To Tung for acquiring sock Knitting knowledge
  - (2) Sri Sarad Pradhan (Rimbick)—To Dr. Graham's Homes for learning poultry keeping
  - (8) Sri N.K. Dutta of Siliguri—To Bombay for acquiring cottage Match making knowledge

#### Loans

The following figures show the financial assistance rendered in the shape of loan for expansion of industries during the year under review:

|     | 1965                         |            |        |
|-----|------------------------------|------------|--------|
|     | Industry No.                 | of Loaness | Amount |
| (1) | Shoe Making                  | 1          | 2,000  |
| (2) | Tile Making                  | 1          | 2,000  |
| (3) | Repair of Machines and Watel | h 1        | 8,000  |
| (4) | Tailoring                    | 1          | 700    |
| (5) | Weaving                      | 1          | 400    |
| (6) | Cycle-repairing              | 1          | 200    |
| (7) | Tin Smithy                   | 1          | 100    |
| (8) | Pan Baroj                    | 1          | 800    |
| (9) | Pine apple cultivation       | 6          | 6,000  |
|     | Total                        | 26         | 16,900 |
|     | 1965-66                      |            |        |
| Ind | lustries                     |            |        |
| (1) | Dairy (Darjeeling-Pulbazar)  | 59         | 16,500 |
| (2) | Dairy (Kalimpong I)          | 27         | 6,750  |
| (8) | Dairy (Kalimpong II)         | 18         | 8,780  |
| (4) | Dairy (Siliguri-Naxalbari) 🥡 | 10         | 8,000  |
|     |                              | 109        | 80,000 |
|     | 1965-66                      |            |        |
| (1) | Saw Mill                     | 1          | 10,000 |
| (2) | Wool Knitting                | 7          | 4,600  |
| (8) | Piggery & Poultry            | 19         | 11,400 |
| (4) | Tile making                  | 1          | 2,000  |
| (5) | Bristle Dressing             | 8          | 4,000  |
| (6) | Hide Tanning                 | 9 .        | 1,000  |
|     | Total                        | 38         | 88,000 |

- 6. An amount of Rs. 158,000 has been sanctioned for giving loans to individual units. Out of this amount a sum of Rs. 50,000 is proposed to be issued to the Service-cum-Marketing Society, Siliguri.
- 7. A Co-operative Society under the name of the Siliguri Match Industrial Co-operative Society Ltd. at Siliguri has been organized. The society has been registered. Grant for shed construction of the society has been received from the All India Khadi & Village Industries Commission. The shed is under construction.
- 8. Industrial Loan—An amount of Rs. 150,000 has been disbursed to the artisans of the Blocks as loan under B.S.A.I. Act to develop the Cottage Industries. A loan unto Rs. 10,000 is being advanced by the Deputy Commissioner, Darjeeling and all these loan cases upto Rs. 1 lakh are being processed by the District Industrial Officers, Darjeeling.
- 9. Tribal Welfare Grant—A grant is being given to the poor scheduled castes and scheduled tribe artisans to promote their cottage industries every year by the district Tribal Welfare Officer, Darjeeling.
- 10. Cotton & Wool Weaving Centre, Darjesling— This Unit is a T.C.P.C. nature to impart the training

on Blanket making, Woolen cloth, Lepcha bag making, Towel, etc.

- 11. Scheme of hire-purchase, import & Small scale registration—Machineries are being supplied to the industrialists on hire-purchase system through the West Bengal Small Industries Corporation, West Bengal & National Small Industries Corporation. A Unit can be registered as small-scale industry. Import quota and other scarce raw materials quota is being given, and all these things are being made by the District Industrial Officer, Darjeeling.
- 12. Scheme of Rehabilitation of Goldsmith and Burma Evacuees—After the promulgation of Gold control order 346 Goldsmiths have been issued the certificates and Rs. 1.85,000 approx. have been advanced as loan. Eight cases of the Burma Evacuees have so far been processed.
- 13. Industrial co-operative societies and other big units—The following Industrial Co-operative Societies are running their industries satisfactorily.
  - 1 Kalimpong Arts and Crafts
  - 2 Kalimpong Fruit Processing
  - 8 Algarah Dairy
  - 4 Kurseong Cobblers Co-operative
  - 5 Phansidewa Tile Making
  - 6 Kaijilia Dairy
  - 7 Takdah Handiorafts Society
  - 8 Darjeeling Tibetan Refugee Self-Help Centre etc.

#### 9. PANCHAYAT

Panchayti Raj institutions have been introduced in the district of Darjeeling in a phased programme. In 1958 Gram Panchayats and Anchal Panchayats were introduced in three blocks viz. Darjeeling-Pulbazar, Jore Bungalow-Sukiapokhri and Rangli Rangliot. Then in 1951 two more Blocks viz. Kalimjong I and Kalimpong II were added to it. Finally in early 1964 the remaining five Blocks viz Kurseong, Mirik, Garubathan, Siliguri-Naxalbari and Kharibari-Phansidewa were covered by Gram and Anchal Panchayats. Anchalik Parishads were introduced in all the Blocks during August-September 1964 and Zilla Parishad came into existence in November, 1964.

There are altogether 218 Gram Panchayats in this district with 2,276 members and 54 Anchal Panchayats with 453 members. The ten Anchalik Parishads of the ten Blocks have a total membership of 201 including 10 associate members and the membership of Darjeeling Zilla Parishad is 36 including 5 associate members.

People in this district are very much enthusiastic about Panchayati Raj and take a dynamic interest in the activities of the Panchayat institutions. The

collection of taxes out of assessment of Anchal Panchayats is quite high varying between 80 per cent to 90 per cent. In addition to collection of taxes each Anchal Panchayat receives a grant of Rs. 1,000 per year from the State Govt. The State Government also contributes the full amount of the salary of the Anchal Panchayat Secretary and 50 per cent contribution towards the salary of chowkidars and dafadars.

The activities of Gram and Anchal Panchayats cover a wide field of rural upliftment works such as: Supply of drinking water, lighting arrangements, drainage, sanitation, construction and maintenance of village roads, construction of irrigation canals, cultivation of fallow lands, establishment and maintenance of primary schools, libraries etc. organisation of voluntary labour for community works etc.

The Panchayats in Darjeeling-Pulbazar block have constructed 50 miles of kutcha road and repaired 287 miles of kutcha roads, built 9 bridges and repaired another 12, built 11 schools and repaired 6 and executed 9 water supply schemes. They organised voluntary labour worth Rs. 270,000. They also arranged supply of drinking water, lighting and sanitation.

The Panchayats in Jore Bungalow-Sukiapokhri Block also executed schemes for rural development such as supply of drinking water, supply of electricity, drainage, sanitation and construction of roads.

The Panchayats of Ranli-Rangliot block and Kalimpong I block participated rural development activities by construction and repair of kutcha roads, construction of bridges, arrangements of water supply etc.

The Panchayats of Kalimpong II Block made arrangements for supply of drinking water, took up plant protection schemes, construction and repair of roads and bridges. construction of recreation centres etc. and organised Village Volunteer Force and Defence Labour Bank. The schemes executed through voluntary labour are—compost pit 26, irrigation canal -20, repair of road—24, Kutcha bridge—9, supply of drinking water—1, construction of play ground—3 and control of jhora—2.

The Panchayats in Garubathan Block, though they came into existence only recently has already organised Village Volunteer Force and Defence Labour Bank. Similarly a drinking water supply scheme was executed by the Panchayat through voluntary labour in Kurseong Block.

The Zilla Parishad and the Anchalik Parishads have been introduced only recently and has not done as yet anything of importance. It is hoped that they will also come forward and discharge their share of responsibility in the development process.

#### GAZETTEER

ALGARAH—A basar in Kalimpong subdivision having an improved water supply owing to the Darjeeling Improvement Fund. In the last decade a Rural Health Treatment Centre was located in this place which still continues. It is a principal market for cardamoms and in normal years used to transact business of no less than Rs. 400,000. There is a metalled road from Kalimpong to Algarah fit for light lorries. This forms part of the Kalimpong-Rishi Road and there is a Khasmahal Inspection Bungalow.

BADAMTAM—A bazar under the Darjeeling Improvement Fund in Darjeeling subdivision. There is a tea estate of the same name near the bazar. Badamtam is a Lepcha word, meaning "the bank of the badam bamboo". Situated on the Rangit valley it grows Pine in fair quantity and is believed to be the only locality in West Bengal where pine occurs naturally. There is a road from Badamtam to Barnesbeg which is negotiable by light motor vehicles. There is a Dak Bungalow under the Darjeeling Improvement Fund at Badamtam which is 6 miles from Darjeeling on the Rangit Road.

BAGDOGRA—This place in Siliguri subdivision has acquired great importance as an Airport. There is a Scheduled Passenger service from Calcutta to Bagdogra run by the Indian Airlines. The runway is an all-weather one. There are a Rural Health Unit and a Railway Station and a Forest Range of the same name. There is a saw yard. The National Highway from Kissenganj to Siliguri passes along the Bagdogra Railway Station. The Khasmahal Department maintains a road from Bagdogra to Tirana fit for heavy motor traffic.

BAGORA—This is a small village in Kurseong subdivision on the Dow Hill-Senchal Range on the Old Military Road from Pankhabari to Ghum. There is a Forest Bungalow which is about 4 miles from Ghum Railway Station and on the ridge above it. Recently a Youth Hostel has been opened in this Bungalow.

BIJANBARI—One of the largest market places in Darjeeling subdivision situated west of Darjeeling town in what is called Pulbazar down in the valley at a height of about 2,000 feet. Bijanbari takes its name from the enormous traffic in potato, chirata and honey from Nepal. There is an improved water supply and a Rural Health Unit. It is the terminus of a Ropeway Station connecting Darjeeling. Bijanbari is also a famous market for cardamoms and before the Second World War together with Pulbasar used to transact business worth about one million rupees. It forms part of the Kurmi Estate.

MIRIK—This is a small forest block in the Kalimpong subdivison situated at the junction of the Riyang

Khola with the Tista. Famous for scenic beauty and contains an Inspection Bungalow belonging to the Workers and Buildings Department.

CHUNGTONG—In Lepcha the name is the arrow headed place i.s., a site at the junction of two rivers. Chungtong is a Ropeway Station and is proposed as a hydro-electric station for the Darjeeling Municipality.

CHUNABHATI—A railway station in Kurseong subdivision midway between Tung and Tindharia. In Nepali it means the lime kiln. There is another Chunabhati at Kalimpong which contains a Forest Bungalow.

CINCHONA-The original home of cinchona was in the north-western part of South America, chiefly Bolivia and Peru. The antipyretic properties of its bark were probably known to the Jesuit missionaries in those countries but its introduction into Europe in 1639 is ascribed to the Countess of Chinchon, wife of the Spanish Vicercy of Peru. Quinine, the essential principle of cinchona, was isolated in France in 1820 and the indiscriminate exploitation of the South American forests which followed led to the fear, later justified, of an early exhaustion of the natural sources of supply. Attempts were accordingly made to organise the cultivation of cinchona as the only means of ensuring continuity of supplies. A Dutch expedition to South America in 1853 under Ham Karl resulted in the introduction of plants and seed into Java, while the fruits of a British expedition under Clements Markham in 1859 to South-America formed the basis of Indian plantations. For a long time the Dutch and Indian plantations have provided the only supplies of cinchons, but within the last three decades its cultivation has also been undertaken in a number of other countries the chief of which are East Africa, Central America, Malaya, Australia, New Zealand, French, Indo-China and Korea The Russian experiments with cinchons as an annual crop in the Caucasus region is an interesting development.

The bulk of the material from the Markham expedition was taken to Ootacamund in the Nilgiries, where McIvor with great zeal and energy set about the formation of a cinchona plantation. In Bengal the cultivation of this exotic species was entrusted to Dr. Anderson, then Superintendent of the Royal Botanic Garden, Calcutta, to whose labours, technical ability and judgement the success of the present plantations is largely due. In 1861 he was deputed to Java to study the methods adopted by the Dutch. He returned with a large number of healthy plants, some of which were retained for Bengal, the rest being sent to Ootacamund. In the meantime plants were raised in Oalcutta from seed

supplied by the Royal Botanic Gardens, Kew. The Bengal experiment started with plants from Java, from Ootacamund and a few from the Calcutta gardens. The first nurseries were tried at Senchal where, however, the climate proved too rigorous and the plants had to be transferred to a milder climate at Lebong. There they thrived and a suitable location for a permanent plantation was found at Rungbee on a spur projecting from Senchal in a south-easterly direction. Between 1861 and 1869 the main preoccupation was with scientific and technical problems connected with the propagation and aftercare of the plants. The initial difficulties overcome, the plantation grew and small harvests of bark began to come in from the year 1869-70. The plantation started with five species of cinchona: Succirubra, officinalis, panudiana, micrantha and calisaya. At first succirubra established itself as the most suitable species and this was the variety officially encouraged in Bengal, while it Java the Dutch were rapidly developing as the best yielder of quinine the "calisaya" and more especially a variety of it called the ledgeriana. Subsequent experience established ledgeriana also as a very suitable species for Bengal but succirubra held the field until some time between 1880 and 1890 when more attention was given to quinine as the best of the alkaloid drugs and to ledgeriana as the best source of quinine, in preference to "cinchona febrifuge", a mixture of all the alkaloids of the cinchona bark for which succirubra was considered to be the more profitable source. At present the Bengal plantations concentrate mainly on ledgeriana together with a small proportion of a hybrid of ledgeriana and succirubra which was obtained by the crossing of the two species about the year 1900. In the Nilgiri Hills and other parts of Mairas they have not been so successfully with ledgeriana, the species mainly cultivated being robusta, officinalis and succirubra. Robusta is a good yielder specially adapted to higher elevations and its introduction into a few years ago has given results of good promise.

The plantation at Rungbee was gradually extended on the whole range lying between the Rungbee (or Rongjo) and the Riyang valleys. In 1887 an area at Sittong on an adjoining ridge to the south of the Riyang valley was taken in. In 1883 a plantation of 800 acres was started in the Rangjang valley but the rainfall proved too heavy and the plantation was abandoned in 1896. A plantation of 500 acres at Nimbong in the same tract was purchased in 1893 from the Bhutia Cinchona Association and was given up by 1889 after complete extraction of the standing erop. About the same time another standing crop of 170,000 lbs. just across the Rungbee valley and to its north was purchased from the Darjeeling Tea and Cinchona Association. Records also show purchases of bark from private planters in Sikkim about the same time. The cultivation of cinchona by private estates in the Darjeeling district was made possible through direct State encouragement by way of supply of seed and seedlings at nominal rates. Private enterprises did not however continue for long, having proved uneconomical owing to a temporary slump in bark prices. The District Gazetteer published in 1947 says that the Bungbee and Sittong ridges constituting the

Mangpu plantation had a total area of 12,000 acres and a standing crop of 4,000 acres. The year of these figures is not however mentioned in the Gazetteer. The Eighty-seventh Annual Report of the Cinchona Directorate, however, giving the figures for March 1949 gave the total area under the standing cinchona crop in the Mangpu plantation as only 16,566 acres. In 1955 the area almost remained the same. But on 1.4.67 the area under cinchona plantation in Mongpu was found to be limited to only 670.26 acres.

In 1900 the Government started a second plantation at Munsong, then under Reserve Forest. The District Gazetteer of 1947 states that the plantation occupied a total area of 8,000 acres with about 3,500 acres under cinchona. The Annual Report of 1948-49 gave the total acreage under cinchons in the Munsong plantation to be 1,892 acres. The area increased to 2,500 acres in 1955 which again came down to 1,667.50 acres on 1.4 67. In 1938 a third plantation was opened in the Rongo block of the Kalimpong Forest Division where it was expected that a total area of 1,600 acres would be ultimately under cinchons, 400 acres having already been planted up by the end of 1943-44. In March 1949 the total area under cinchona in the Rongo plantation was 570 acres. On 1st September, 1955 this block was transferred to the Director of Medicinal Plants for cultivation of other medicinal plants.

A fourth plantation was started about 1943 in the Latpanchar group of blocks in the Kurseong Forest Division. On 1.4.67 the area under cultivation in this block was about 664.16 acres. In March 1949 the total area under cinchona in the Latpanchar plantation was 264 acres. The total area under cinchona in the four plantations of Mangpu. Munsong, Rongo and Latpanchar in March 1949 was 4,382 acres. The latest departmental estimate of the total acreage under cinchona in the district is 3,002 acres (1.4.67).

The average yearly harvests of bark in the past have been approximately as follows:

| A | ver | age | an | nual | har | vest |
|---|-----|-----|----|------|-----|------|
|   |     |     |    |      |     |      |

| 1869-70                   | to | 1878-79 | 113,000 lbs. |
|---------------------------|----|---------|--------------|
| 1879-80                   | to | 1888-89 | 321,000 ,,   |
| 1889-90                   | to | 1898-99 | 518,000 ,,   |
| 1899-1900                 | to | 1908-09 | 533,000 ,,   |
| 1909-10                   | to | 1918-19 | 565,000 ,,   |
| 1919-20                   | to | 1928-29 | 646,000 ,,   |
| 1 <b>92</b> 9 <b>-3</b> 0 | to | 1938-39 | 1,200 000 ,, |
| 1948-49                   |    |         | 1,811,016 ,, |
| 1966-6 <b>7</b>           |    |         | 679,162 Kg.  |

The first product to be manufactured in Bengal was a mixture of all the alkaloids of cinchona to which was given the name of cinchona febrifuge. The first year's output of 48 lbs. was obtained in 1874-75. The method of manufacture was simple, consisting of extraction of the active principles of the bark by means of an acid and their subsequent precipitation from the extract by means of an alkali. The factory equipment was not elaborate and production capacity was small. In the 14 years between 1874 and 1887 (the year

quinine was first produced at the factory) the total output of cinchona febrifuge was only 82,023 lbs. giving a yearly average of 5,858 lbs. The credit of developing a process for the manufacture of quinine similar to that used in Europe, without information of the details of the European method, is due to Mr. Wood, former Quinologist, and to Mr. Gammie, Deputy Superintendent of the plantations. In the first year 1887, the production of Quinine was 331 lbs., the next year it rose to 2,000 lbs. The 10,000 lbs. limit was reached by 1895-6, while in another 10 years the capacity rose to 16,000 lbs. Thereafter followed a sudden jump to 27,000 lbs. as a result of the installation, in 1907, of new plant and machinery. There have been no major alterations to the factory or changes in the method of manufacture since. But with the help, from time to time, of small additions to plant and machinery and minor adaptations of process, production capacity rose to 70,000 lbs. per year, an increase which has proved invaluable during the Second World War. In 1966-67, 9,993 Kg. of cinchons febrifuge were produced.

Up to the end of the last century a part of the bark was extracted to give cinchona febrifuge alone and a part to give both that product and quinine: but the entire available supplies of bark are now extracted by a standard alkali process in which quinine supplies obtained as the primary product and cinchona febrifuge as a by-product. Both in the variety of products in their quality the factory at Mangau has made rapid strides in the last decade, the number of different products issued being over 32.

In the early days cinchona was propagated mainly from cuttings but, in the Bengal plantations and in Madras, it is now propagated from seed. In Java grafting is known to be the more common method but has not been adopted in India with any degree of success. The seed is very small and light, 60,000 to 70,000 seeds going to the ounce, and is harvested towards the end of winter. It is sown about March in specially prepared beds suitably covered. The seed bed consists mainly of sifted leaf mould. The nursery lines usually face north and the seed is broadcast and covered up with a thin layer of fine leaf mould. Germination takes 3 or 4 weeks and when half-an-inch high the seedlings are replanted in other beds, prepared as before at a spacing of 1"×1". These are transplanted once again after a few weeks into final nurseries at spacing of 4"×4". In these nurseries the plants are allowed to grow and are hardened by gradually increasing exposure throughout the winter until they are ready to be planted in the field after the early rains. Preparation of the land for planting requires a great deal of labour. Where it is occupied by heavy jungle, the forest is felled a year or two shead and allowed to rot through the rains. In the winter the logs are cut up and removed and the land cleared with the minimum possible burning. Adequate measures have to be taken to prevent soil erosion. The land is then staked out at 4 feet intervals. Tallies or plant holes are dug to a depth of 18" and these are recovered after some exposure of the soil. As soon as the land has absorbed sufficient moisture the young plants are put out into tallies, care being taken to select a slight wet and cloudy day. The after-care of the plantation consists of keeping weeds down by sickling, aerating the soil by cultivation and removing dead and dying branches from the plants from time to time. From the third year, small harvests are obtained from the last process. At the end of the eighth year, all the plants are coppleed to give the first primary harvest. The complete plants throw out fresh shoots and have a fresh period of growth. Vacancies caused by death of plants during the first eight-year period are also now filled up by new seedlings. The block is taken care of for a further period of 8 years after which all the plants are harvested by uprooting. In the course of harvesting, the bark is removed from the root and stem by beating with a wooden mallet and from the branches by scraping with a knife; the green bark is dried in the sun and drying is completed, if necessary. in an artificial drier.

In the factory the dry cinchons bark is first ground to a fine prwder in a series of mechanical disintegrators. It is then mixed with slaked lime and a quantity of water just enough to make the powder moist. The mixture is kept for 24 hours during which the lime has a preliminary physical and che nicel action. It is then tipped into extraction vats containing enough water to provide adequate mixing and enough mineral oil to dissolved the alkaloids liberated by the caustic so is subsequently added. The contents of the extraction vats are heated by passing stream through coils fitted to them and stirred continuously by mechanical stirrers. The mixture is now allowed to settle and the laver of oil floating on the top and containing most of the alkaloi is in solution is drawn Extraction is completed by heating with fresh quantities of oil, after which the bark residue is discarded. The entire oil extract is again treated with a dilute solution of sulphueic said to remove the alkaloids. The oil so treated is returned for use with fresh batches of bark and the soid extrast of alkaloids is neutralised with caustic soda while still hot. The neutral solution, on cooling, deposits crude quinine sulphate which after further cooling for 48 hours is filtered off through a centrifugal machine. The mother liquor from the mixture is treated with excess of alkali to yield the by-product, cinchona febrifuge; this comes down as a buff precipitate, is filtered on canvas, washed, dried and powdered before being parked in tins. The crude quinine sulphate removed by filtration is first washed with cold water and then dissolved in hot water. The solution is clarified by boiling with activated carron and filtered through cloth to give a clear solution. The solution is run into long shallow cooling troughs by night and by next morning the quinine sulphate is obtained in the form of fine white oristals. These are removed by filtering through a centrifugal machine, put on trays into a drying room and, when dry, removed and packed. A part of the quinine is packed as powder, a part is converted into tablets; small quantities are converted into quinine hydrochloride, quinine bihydrochloride or other salts.

The record of bark and quinine production in the

1920's and 1980's disturbed the Local Government and it was felt that work was not proceeding as it should in the cinchons plantations. In 1938 Messrs. C. C. Calder, Superintendent of the Royal Botanic Garden, and Superintendent of Cinchona Cultivation, Bengal, and O. M. Martin, Secretary, Forest and Excise Department, drew up a scheme of reorganisation in 1938 which sought to divide the Cinchona Department and to substitute a divided control for a single control. The plantation branch was to be made independent of the factory and laboratory and placed under the Conservator of Forests, while the factory and laboratory would deal directly with the Government. The distribution work which was being done by the Presidency Jail would also be transferred to the factory side. Dissatisfied with this reorganisation scheme Government appointed a Special Officer to report on the working of the Cinchona Department. In November 1989 B. Das Gupta, Special Officer, produced a comprehensive report on which the Finance Minister, N. B. Sarker recorded in January, 1940, a masterly note rejecting Mesers Calder and Martin's scheme of reorganisation. It was evident that the scheme of 1938 had, as the Finance Minister put it, "had its origin not in inherent requirements of cinchona but in extraneous considerations". The Finance Minister was of the opinion that the Factory and the Plantation were so integrally connected that it was impossible to separate them without doing harm to both. They should therefore be under a unified control and the Plantation, the Factory and Distribution should form three separate branches of one department under a common administrative head. Further, there should be a whole-time Superintendent with headquarters at Mangpu, who should be the Head of the Department and communicate with the Government. Accordingly with effect from the 1st October 1940 there was a Superintendent of Cinchona, Bengal, and the unified scheme was implemented from 1941-42. A new Directorate was established called the Cinchona Directorate, which passed under the control of the Commerce and Industries Department and so it has remained ever since.

The Quinine Factory at Mangpu has a plant capacity for production of 63,000 lbs. of Quinine Sulphate B. P. 1948 and 33,000 of Cinchona Febrifuge annually by consuming two million pounds of cinchona bark. All sulphate of quinine manufactured in the Cinchona Factory strictly conforms to the B. P. 1948 standard. This latest standard enjoins greater purification of quinine. For this purpose the factory has been equipped with some new and modern plants and machinery. The factory has a well-equipped laboratory where technical problems regarding the manufacture are studied and solved. The departmental figures show that in 1966-67 about 29,440 Kg. of quininé sulphate were produced in the factory.

The total labour employed in the Government Cinchona Plantations is 2,622, consisting of 1,587 men, 960 women and 75 chokras. The factory employes 140 men only. The daily rates of wages of labour are Rs. 3.54 for men, Rs. 2.69 for women and Rs. 2-01 per chokra. In the factory 154 men were

employed on 1.4.67. All workers in the cinchons plantations and the factory are provided with free houses, which are repaired at Government cost. With each house a minimum of half acre of land is allotted for growing crops, gardening and poultry rearing. The workers and their families up to a total of 4 members (including self) are supplied with ration at concessional rates. The workers and their families receive free medical aid from the 3 plantation hospitals, each of which has its separate staff of Medical Officer, Compounder. Nurse and Lady Health Visitor. There are a number of primary schools scattered over the 4 plantations and an adult education centre has also been opened. There is a well organised Labour Welfare Centre at Mangpu, and two more centres in two other plantations also. Although the workers are employed on 'no work no pay' basis, they are allowed sick leave with full pay up to a maximum of 20 days in a year, 10 of which can be carried over to the next year, if not availed of during the current year. They are also allowed 10 days' leave with full pay during the Pujas (six days during Durgapuja and four days during Kalipuja). The women workers are allowed maternity benefits in the form of rest with full pay for 3 months (6 weeks prior to and 6 weeks following confinement).

In recent years the high cost of production and the competition of synthetic drugs have hit cinchona plantation all over the world particularly in India. In the pre-war market each pound of quinine was sold at Rs 24.00 which fell down to Rs. 16.00 in the postwar days. At present each kilogram of quinine sells between 50 to 60 dollers in the international market. The position of plantations was reviewed in August 1949 by the Government of India which appointed a Special Cinchona Committee to report on the position of Cinchona Plantations in Darjeeling and Madras. The Special Cinchona Committee consisting of six members submitted their report in March 1953. This committee was of the opinion that although expansion in West Bengal was difficult, the method of recording areas under cinchons was unsatisfactory and should be standardised, there was lack of systematic data on the yield of bark and on the yield of quinine, supervision over labour remained to be improved and the process of accounting might be made more businesslike. But the main "crux of the matter lies in the initiation of a proper sales drive and its success". A second conference on the quinine policy of Government of India was held in 1955. Subsequently two more conferences were held in 1959 and 1961.

The Special Cinchona Committee laid much stress on finding out the optimum condition for the cultivation of cinchona. Experiments on proper scientific lines in this direction was carried on from 1953-4 in the Research section under the Cinchona Directorate. The application of quinine is not limited to fighting out malaria only. In America and Europe quinine is used with cold drinks and wines. It has wide application in many other industrial products. The National Physical Laboratory and another Glass Factory at Durgapur have placed orders for quinine with the Mongpu factory for manufacture of polarised and sunglass respectively.

Quinidine, an alkaloid prepared from quinine is much in demand all the world over. It is a popular ingredient for the manufacture of a medicine for the heart disease. Mongpu factory is presently manufacturing only about 10 Kg. of quinidine against a minimum demand of about 500 Kg.

CONSTANTIA—The top of a hill about 2 miles southwest of Kurseong Railway Station containing the subdivisional Officer's Bungalow which used to be a famous hotel at the time when the Pankhabari-Ghum Old Military Road, which passes below Constantia was in operation. This place gives a very fine view of the mountains of the Darjeeling side and the plains below showing the Mechi, the Balasan and other rivers. At one time the house was the premises of the Victoria Boys' School.

DARJELLING—Darjeeling town is the headquarters of the District and is situated in the Lower Himilayas (27° 3′N. and 88° 16′ E.) at a distance of 369½ miles by the old rail route from Calcutta. The name is a corruption of Dorje-ling and means the place of the Dorje, the mystic thunderbolt of the Lamaist religion; it was the name given to the Buddhist Monastery which stood on the top of Observatory Hill.

The town lies on a long spur projecting northwards from the Ghum-Senchal ridge. The spur rises abruptly from Ghum to the top of Katapahar (7,886 feet) and then gradually descends to 7,520 feet at Jalapahar and to 7,002 feet at the Chaurasta. It rises again to 7,163 feet at Observatory Hill just north of the Chaurasta and then divides into two, the Lebong spur and the Birch Hill (and Takvar) spur. Both these spurs descend steeply into the valley of the Rangit river flowing at a height of less than 3,000 feet above sea level. The ridge is narrow at the top and its eastern slope is very steep; the bazar and nearly all the houses have been built on the more gentle western slope.

Although the town contains a large number of cheaply constructed and unsightly buildings with little in the way of trees to screen them from view, it is located in such a position that from most points in it, views of mountains may be obtained which can scarcely be rivalled in any other part of the world. The visitor cannot only view a mangnificent distant landscape from the town but he will find, within its limits, parks, gardens and a museum which give him a close view of the animal and vegetable life to be found in the surrounding country and some idea of the original appearance of the spur on which the town now lies before the forest was cleared and the area built up.

The Lloyd Botanic Gardens are situated just below the Eden Sanitarium and date back to 1865 when Dr. T. Anderson started a branch of the Royal Botanic Garden, Calcutta, and a cinchona nursery at Rangiron about 6 miles from Darjeeling It was found to be unsuitable for the cultivation of cinchona and too far from Darjeeling for a botanic garden. Sir Ashley Eden, the Lieutenant-Governor, decided to develop a garden close to Darjeeling and Mr. William Lloyd in 1878 presented

a suitable plot of land, accessible and with an excellent aspect. The gardens have been named after him in commemoration of his liberality.

The land was cleared and laid out under the direction of Sir George King, then Superintendent of the Royal Botanic Garden, Calcutta. He was assisted by Mr. A. T. Jeffery of the cinchona plantations who became Curator of the new garden. He was in 1886 succeeded by Mr. Kennedy of the cinchona plantations and in his time experiments were made in the garden with the introduction of potatoes. These were unsuccessful as were Mr. Kennedy's attempts to plant up the town with trees in replacement of those destroyed or damaged by cattle and the local residents.

In 1898 the municipal garden was taken out of the supervision of the Curator and about this time steps were taken to bring together in the garden complete collections of Eastern Himalaya species and to add some Western Himalaya and other temperate species. In 1902 Mr. Cave was appointed Curator in place of Mr. Kennedy. The grounds had contained a museum but this was now transferred to asite outside the garden.

The garden, since 1901, has been used for the collection and distribution of seeds, plants and bulbs and for experiments on the adaptability of exotics. Various investigations of economic importance are conducted on behalf of departments, institutions and individuals and the garden exchanges seeds and plants all over the world and supplies specimens for herbarium museum and class demonstration to Universities and Colleges in India and abroad.

The area of the garden is forty acres and is divided into three main sections: (1) an upper indigenous section, (2) a lower exotic section containing many species from temperate parts of the world, certain of which have been acclimatised in various provinces in India since their introduction to this garden and (8) a miscellaneous section containing the predominating species of plants of the Eastern Himalaya certain species of the hill plants of North-Western India, Eastern India, Burma and the Nilgiris. In the Sir John Anderson Rock Garden are grown alpine and other dwarf Himalayan species of rare beauty. The garden has a permanent stock of just over 1,500 plants under cultivation; these represent the temperate floras of thirteen lifferent countries of the world.

The plants grown in the Lloyd Botanic Garden, Darjeeling have been described in a publication entitled "Plants of the Lloyd Botanic Garden, Darjeeling, written by Dr. K. Biswas, M. A. D. Sc. (Edin). F.R.S.E Superintendent, Royal Botanic Garden, Calcutta.

Botanical and other researches are also carried out at the Mayapuri laboratory of the Bose Institute. The property (Mayapuri and Brookside) is situated on the McIntosh Road and was acquired by the late Sir Jagadish Bose in 1920: a laboratory was later established.

The Natural History Museum is housed in a

building just below the Victoria Park completed in 1915: before that, it was located in a building in the botanic Gardens. The Museum contains wellarranged and comprehensive collections of the mammals, birds, fishes, reptiles, leeches, butterflies and dragon flies found in the district and neighbouring areas as well as some specimens from other parts of India and the world. It has a small library. The Museum building is the property of Government and since 1923 it has been managed by the Darjeeling Natural History Society and the Curator Mr. C. M. Inglis who worked until 1948. The society publishes a journal quarterly. The income of the Museum since 1923 ranged from Rs. 9,000 and Rs. 10,000 per annum, the main items of receipt being grants from Government, the Darjeeling Improvement fund and the Municipality.

In contrast to the trim lawns of the Botanic Gardens is the natural beauty of the woods situated on Birch Hill, the ridge running north of the town. The woods are managed by the Forest Department as a reserved forest and are maintained as a public park. With their wealth of vegetation, shady walks and old moss-covered and creeper-bound trees, they show what Darjeeling was like when it was first discovered. This park and the small areas of forest on Jalapahar and Observatory Hill are the only parts of the town where the fine forests which once covered the hill-sides entirely have not been ruthlessly felled by builders of owners. Most of the few forest trees still surviving in the town have been disfigured by lopping for firewood or fodder. There are a few open spaces in the town maintained by the Municipality as pleasure grounds among which can be mentioned Observatory Hill, the Victoria Park, the Donvan Park and the Brabourne Parkthe last opened in 1938 as a memorial to the late Lord Brabourne' a Governor of Bengal.

From the built-up area the Calcutta road on the east of the Jalapahar ridge and the Auckland road on the west are bridle paths which lead to Ghum and offer to the user delightful views of mountain Beyond Ghum various roads lead up to Senchal (8,163 feet) and Tiger Hill (8,515 feet) 6 miles from Darjeeling through fine forests of oak, mangnolia and rhododendron. The pink flowering mangnolia is only found in this locality. There is a golf course between Senchal and Tiger Hill and from the summits of both, when the weather is clear, can be obtained a fine view of the plains of Bengal, of the mountain spurs sinking to the plains and of the courses of several great rivers the Tista, the Balasan, the Mahanadi and the Mechi. To the north is a panorama probably unsurpassed in the world. In the foreground is the great valley of the Rangnu 4 miles across and 4,000 feet deep formed, on the one side, by the Darjeeling ridge bare of forest and scarred by landships and, on the other, by the forest-clad Takdah ridge. Further away is the Rangit valley and beyond it in the middle distance stands prominent the coneshaped peak of Tendong (8,676 feet ). According to

Lepcha tradition, when Lepchas were the only inhabitants, there was a great flood. The few survivors of the flood used the summit as a point of refuge as Mount Ararat was said to have been used. Behind Tendong is the higher mountain of Mainom over 10,000 feet high with the precipice on the eastern side of its summit clearly visible. Beyond is a line of snow mountains stretching across the entire nothern horizon dominating all in the centre is Kinchinjunga 45 miles away and 28,146 feet above mean sea level: it is flanked on the west by Kabru (24,015 feet) and Janu (25,300 feet) and on the east by the sharp conical peaks of Pandim (22,020 feet ) and Narsingh (18,145 feet ). To the northeast, can be seen most of the high peaks of North-Sikkim, Simvo (22,369 feet , Siniolchu (22,600 feet), Lama Anden (19,250 feet), Chumiomo (22,430 feet ), Kanchenjhau 69 miles away with a flat top capped with ice 22,700 feet high and Pauhunri (28,180 feet). Further still to the east can be seen the ridge over 14,000 feet high, the boundary Sikkin and Tibet, extending to the mountain Gipmochi (14,518 feet) which is the trijunction of the bounderies of Sikkim, Bhutan and Tibet. The two passes, the Jelap La and the Nathu La, over which trade from India is carried to Tibet can be picked out on the sky line and appearing over the ridge and situated in Tibet 40 miles beyond it, can be seen the beautiful mountain of Chomolarhi (23,930 feet). On the other side of Kinchinjunga west of it and at a distance of over 100 miles from where the observer stands, he can see three snowy peaks above the Singalila ridge which runs down from Kinchinjunga and Kabru to form the boundary first between Nepal and Siktim and then between Nepal and Darjeeling district. These three peaks seem small in comparison with nearer Sikkim mountain giants but the middle one, by no means the most impressive of the three in appearance, is Mount Everest (29,002 feet), the highest mountain in the world.

From Darjeeling itself the northward view is almost as impressive but the Everest group and Chomolarhi are hidden by the boundary ridgas on the north-east and north-west horizons. To the south Darjeeling gets no view of the plains owing to the higher ground at Ghum intervening. There is no lack of variety in the views even when the high snows are not visible. The play of light and shade and ever-changing cloud and mist over the valleys and ten gardens in the foreground are almost as attractive as the magnificent panorama that becomes visible when the sky clears.

The walker who cares to leave the town will find many delightful roads and paths in the forests which cover the Senchal mountain, the Takdah and Lebong ridges and that between Ghum and the Nepal frontier. For those who have more time, descends to the valleys below through tea gardens and forests offer delightful day expeditions when the weather is favourable. Those who wish to go further will find Darjeeling a good starting point for trips of a week or more along the Singalila ridge or into Sikkim and a convenient centre for the collection of supplies and transport for

these expeditions. It is from Darjeeling that porters are recruited by the various mountaineering expeditions which have attempted to scale the high peaks of the Himalayas.

In normal times, Darjeeling has two seasons which are popular with visitors, the spring and the autumn. For most visitors the winter is too cold and the monsoon months too wet. The hotel and boarding house business thus tends to be limited to two somewhat short seasons and many establishments have in consequence a precarious and transitory existence. Among the oldest are the Eden Sanitarium, the Lowis Jubilee Sanitarium, the Mount Everest Hotel, the Bellevue Hotel and, until it was more or less destroyed in the 1984 earthquake, the Rockville Hotel. The Darjeeling Planters' Club provides residential and club life for Europeans and the Darjeeling Gymkhana Club indoor and outdoor recreation for members of all communities. The latter has an excellent skating rink, half a dozen tennis courts, two squash rackets courts, a ball room and a billiards room. It also provides golf at Senchal and organises race meetings in the spring and autumn at Lebong.

The town is fairly well provided with means of recreation. A number of open spaces and playing grounds belonging to schools, colleges, the Police and Military are on occasions available for use by the public. The town has two public cinema halls (one in the Town Hall and theatrical performances are occasionally given in them as well as in the Nripendra Narayan Hindu Public Hall. Restaurants, tea shops and eating houses abound and porters, rickshaws and ponies can readily be hired, at rates laid down by the Municipality, by visitors who require them. Motor vehicles can only use a few road in the town but taxies can obtained at the Bazar and the stand near the Town Hall for journeys to Lebong, Ghum and other parts of the district.

Darjeeling has considerable importance as a centre of district. Office and residential accommodation was built for officers of the Secretariat who used to come to Darjeeling when the headquarters of the State Government moved up here. The State Forest Department offices were until recently located in Darjeeling. In addition to the usual offices connected with the administration of a district, the office of the Superintending Engineer of the Northern Circle of the Communications and Workers Department were located in the town. Few of the buildings occupied by the above departments and officers are in way impressive: the most substantially built and imposing in appearance probably being the newly constructed Police Buildings near the market square. The Post and Telegraph Office is also a wellbuilt stone building: close to it is the State Bank building and beyond that the Town Hall where Municipal meetings and office business are conducted and where the public hall is let out for use as a cinema. The building was completed in 1921 at a cost of Rs. 276,000 and has a well-proportioned clock tower, the whole forming perhaps one of the most satisfying of the public buildings in the town. The Victoria Hospital buildings are also well-built of stone and concrete.

Many of the schools in the town have large and well-constructed buildings of architectural merit. And in the cantonments there are a number of strongly constructed but severe looking buildings.

The town contains a number of places of worship for the various communities living in it. Formerly Observatory Hill was crowned by a Buddhist monastery but it had been destroyed by the Gurkhas when they overran the country in the early part of the 19sh century. It was rebuilt on its former site but was then removed to Bhutia Basti lower down the hillside. This was destroyed by the 1934 earthquake and the present fine structure was then built as a gift of His Highness Sir Tashi Namgyal, K. C. S. I., K. C. I. E., the Maharaja of Sikkim. Management vests in the leading Buddhist monastery which is at Ghum where worship is conducted by the Yellow Sect of Lamaism. It is famous for its image of the coming Maitreya Buddha and for the Lama dances that are held there. The monastery buildings at Ghum were damaged in the 1934 earthquake but were restored by the munificence of the late Sadar Bahadur S. W. Laden La. C.B.E. Additions were the gift of Messrs. Sharab Lama and Sons of Darjeeling. The Nepali Tamang Gompa is monastery for Nepali Buddhists. It was built in 1926 and is situated below the Waddell Road in the Judge Bazar.

The most noteworthy Hindu temple in the town is the Dhirdham temple built in the year 1938 by His Highness the Maharaja Sir Joodha Sham-here Jung Bahadur Rana, Prime Minister of Nepal, and opened by his son His Excellency Commanding General Bahadur Shumsher Jung Bahadur in May 1939. It is near the Railway Station and is visited for worship by all sections of Hindus in Darjeeling. It is the only shrine of its kind in India and is unique for the beauty of its architecture in the Nepali style. Contributions from many Hindus including one of Rs. 1,000 from Maharaja Sir Nripendra Narayan of Cooch Behar and a grant of land by the Municipality in 1890 enabled the Bengali Hindus of 1 arjeeling to construct buildings for religious and social purposes. One of these, the Nripendra Narayan Public Hall, is used as a common meeting place for Hindus and for puja celebrations. The Goral Mandir, a temple used exclusively for worship, is located on the premises where there is also a public library. Elsewhere in the town Bai Parasuram Agarwalla Bahadur, the senior partner of Messrs. Mohanlal Shewlal, presented a large dharamsala which is open to all Hindu communities.

Christian places of worship are numerous. There are three Anglican Churches of which St. Andrew's Church, Darjeeling, is the oldest ecclesiastical building in the district. Its foundation stone was laid on St. Andrew's Day, 1843 and the Church was then built at a cost of Rs. 9,000. It has accommodation for 150 persons and the Chaplain of Berhampur used to come to Darjeeling for two periods of six weeks to minister to residents. Later the church was struck by lightning,

was rebuilt in 1870 and was consecrated by Bishop Milman in 1873. A clock was added to the tower at the time of rebuilding and by various subsequent additions the accommodation was increased to 450. The walls have a number of inlaid tablets to the memory of some of the early residents and settlers, chief among them being Lieutenant-General Lloyd, the discoverer of Darjeeling.

St. Luke's Church, Jalapahar, is second church built in that cantonment. The first was built in 1867 but was later dismantled and replaced by the present building in a more central position. St. George's Church, Lebong, was built in 1908 and accommodated 80 people. It was damaged in the 1934 earthquake and had to be abandoned. Worship now takes place in a temporary building loaned from the Military authorities. St. Paul's School has an interesting chapel built in the modern style on a prominent site and St. Michael's School (now Darjeeling Government College) also has a beautiful chapel.

The churches of the Roman Catholic Church had their origin in the communities which grew up around two schools. The Church of St. Francis of Assist was a wooden one erected in 1885 next to the Capuchin seminary and an Indian Chapel was built in 1839 next to the North Point College. As the community in the town increased, a larger church that of the Immaculate Conception, was built in 1893 contiguous to the Loreto Convent and the wooden church was transferred to Jalapahar. In 1908 a church dedicated to St. Michael was erected at Lebong. The Church of Scotland has St. Columba's Church in Darjeeling and took over the Union Church in 1935.

The Muslim community has three mosques in the town maintained by the Anjuman Islamia, Darjeeling. The Juma Masjid on the Botanical Gardens Road was built at a cost of Rs. 15,000 an and accommodates 1,000 worshippers. The Chhotti Masjid in the Butcher Basti was reconstructed at a cost of Rs. 12,000 and accommodates 400. The Anjuman also maintains a two-storied musafurjhana built at a cost of Rs. 15,000 to accommodate visitors to Darjeeling irrespective of creed. It contains 21 rooms out of which 5 are family suites.

The Brahmo community has a mandir near the Victoria Hospital. As far as is know, other religious communities have no special piace of worship of importance. In the outskirts of the town there are burial grounds and burning ghats for the various communities living in it.

One of the features of the town is the market square situated on a levelled and extensive piece of ground in the middle of the town and surrounded by substantial buildings erected by the Municipality. The square presents an animated scene each day and particularly on Sundays, the holiday and bazar day or all tea gardens. The market is crowded with furchasers from the gardens and with sellers and vpisitors of many races. Nepalis predominate but

Tibetans and Bhutias from the hills are conspicuous, in striking contrast to Marwaris and other traders from the plains.

The town is well provided with roads and raths. many surfaced with tar macadam and most well-fenced and kept in good order. A few of the larger roadways are open to motor traffic but many other are unsuitable for various reasons for use by vehicles other than rickshaws or perambulators. Few of the residential buildings deserve mention. The chief is that of the Governor of West Bengal. In 1879 and old cottage on the ridge overlooking Birch Hill was replaced by a house for the summer residence of the Lieutenant. Governor. The estate, which was first called the Shrubbery, was gradually improved and buildings added included a Darbar Hall. In the 1934 earthquake the main building was so seriously damaged that it was found necessary to rebuild completely. The present residence with its blue and white walls is a conspicuous land-mark on the Birch Hill ridge.

His Highness the Maharaja Bhup Bahadur of Cooch Behar has a Darjeeling residence in extensive grounds at Colinton above the Auckland Road and to the south of Darjeeling. He also owns a property consisting of 17 locations within the Municipality and covering an area of about 75 acres.

One of these is leased from Government for a 93-year period. All the other are held on permanent leases, 9 of which are revenue-free.

The property includes about 40 higher class houses in the best residential locality which are let out to tenants. The unbuilt-up portion of the property has been leased on long term for residential building. Part of the property known as the Toong Soong Basti has been leased out for the smaller class of residential building. The average gross annual income of the estate from both houses and sites is about Rs. 71,000.

Darjeeling has greatly benefitted from the interest which has been shown by the Maharaja and members of the rulling family. Not only have they extensive property in Darjeeling but the Rullers of Cooch Behar have made frequent visits, sometimes prolonged, and have often taken a prominent part in the summer life of the town. Their generosity has been notable and among their many benefactions may be mentioned of following:

- (1) Gift of Bryngwyn and houses thereon valued at Rs. 50,000 to the Lowis Jubilee Sanatorium in 1887. A contribution of Rs. 400 annually is made for the maintenance of two free beds in this institution.
- (2) Donation of Rs. 125,000 to the Darjeeling Municipality for the construction of the Town Hall.
- (3) Donation of two plots of land to the Darjeeling Municipality for water reservoirs.
- (4) Donation to the Maharani School to enable it to start and an annual contribution of Rs. 1,200 up to 1932-33, thereafter of Rs. 600.

- (5) Donation to the Gymkhana Club for the building of squash courts and for other purposes; presentation of cups for racing and the Flower Show.
- (6) Grant of land to the Forest Department for replantation in 1898.
- (7) Sale of land to the Municipality at a concession price for the laying out of the Brabourne Park.

Rose Bank below the Cart Road is the Darjeeling bouses of the Maharajadhiraja Bahadur of Burdwan. another distinguished property owner in the town and district. About 1850 the Maharaja acquired properties in the stations of Darjeeling and Kurseong, then comparatively undeveloped. He used to travel up from Burdwan via Oyrnea, Bhagalpur and Titaliya by palanquin and with a large retinue. He built several rest houses on this route to make the journey more comfortable. Additions were made by him to the properties originally purchased and now the estates in Darjeeling and Kurseong are about 1,600 acres in extent and consist of forests, tea garden, residential houses, shops, barars and agricultural lands. Some are revenue-free and on the rest the annual revenue payable to Government is Rs. 2,682 Maharajas of Burdwan have always associated themselves with local social, religious and educational activities and have made regular grants in support of a number of institutions. On occasions they have shown their interest by free gifts of land. The present Maharajadhiraja Bahadur has been the president of the Sree Gorkha Niwarak Sammelan from its inception.

A unique feature of Darjeeling is its Himalayan Mountaineering Institute, Darjeeling.

Shri Tenzing Norgay's ascent of Everest (2,028 ft.), along with Sir Edmund Hillary, in 1953 provided a great impetus and fillip to mountaineering as a sport in India, and it was to commemorate this signal success that the Himalayan Mountaineering Institute (H. M. I.) was founded in Darjeeling in 1954.

The Swiss Foundation for Alpine Research was approached to prepare a scheme for the H. M. I., and Mr. Arnold Glatthard, Principal of the Swiss Mountaineering School Rosenlaui, personally visited Darjeeling for this purpose. In company with the late Maj. N. D. Jayal, who took over as the first Principal of the Institute, and Shri Tenzing, he investigated the possibilities of training ground afforded by Darjeeling and Sikkim mountains. Thereafter, the Swiss Foundation made the following recomendation:

"It is indeed an excellent idea to include mountaineering in the physical fitness programme. A course of preparatory character should include lectures on geography, morphology, geology or physiology and climatology as suitable additions to the curriculum of students".

Mr. Glatthard recomended Dzongri, a place about 15,000 feet above sea level in Sikkim mountains, for field traning in mountaineering and the Birch Hill in Darjeeling as the site for the Institute.

The basic and advance training courses of the Institute are intensive and comprehensive, giving trainines drawn from all walks of life an opportunity to develop their capacity and skill in mountain-climbing of all kinds.

The H. M. I. charge Rs. 420 per candidate for each of the basic and advance courses it runs. This is a highly-subsidised rate and covers all expenses on boarding, lodging, instruction, use of specialised mountaineering equipment and porterage and rations in the field. Candidates spensored by the N. C. C. Directorate are not required to pay any fees, the expenditure in respect of them bieng shared by the Central and State Governments. The University Grants Commission has agreed to give 10 scholarships every year to university students to enable them to attend courses run by the H. M. I.

The minimum age-limit for admission to the Institute is 18 years and the maximum 40 years, the latter being relaxable in the case of candidate who are medically fit and possess previous experience of climbing or trekking in the mountains.

The Institute, which is housed in buildings perched on the western spur of the Birch Hill, about 6,800 feet above sea level, has become an important centre of tourist attraction. It commands a magnificient panoramic view of the snow-covered massif of Kangchenjungs (28,208 ft.), the third highest peak in the world.

The H. M. I. is equipped with a will-stocked library, which has now more than 500 books covering a wide range of subjects, including travels and explorations, astronomy, geology and flora and fauna. Valuable additions have been contributed from time to time by, among others, the Swiss Foundation for Alpine Research, the German Alpine Club, the French Mountaineering Federation, the Ski Club of Great Britain, the Alpine Clubs of Japan and Canada, the Everest Foundation of the U. K., Brig. Sir John Hunt and Gen. Bahadur Shamsher Jung Bahadur Rana of Nepal.

The Institute also a museum which has a relief model of the Himalayas coloured in various shades showing the principal peaks, a life-size model of a Sherpa in mountaineering kit, a case displaying badges and pins of mountaineering clubs all over the world, a Principal's bungalow, with a guest house, which combines to make the Institute a self-contained campus.

Up to the end of 1961, a score of Indian expenditions to the Himalayas had been organised, including one to Everest, and more than 15 of these were successful. Most of the mountaineers, who participated in these expeditions were ex-students of the H. M. I.

An essential adjunct to the Institute, a Zoological Park, extending over an area of about 200 acres of wooded land comprising the Birch Hill and Lebong Parks, is rapidly coming up. The project, which is supported by the Government of West Bengal, is scheduled to be completed by the end of the third Five Year Plan and is estimated to cost Rs. 35 lakhs.

High-altitude animals and birds, mainly of Himalayan origin will be kept in this open-air wild park against a back ground of their appropriate floral associations in conditions corresponding to the natural habitate of its denizens. Those that have already arrived include four Himalayan bears, three Ussuri tigers, two leopards and four barking deers. This will enable students of the H. M. I. to study, at close quarters, the fauna and flora they may expect to come across at various altitudes in the mountains during treks under-taken by them.

Besides Himalayan wild life, the park will acquire animals of the colder regions and construction work is now rapidly in progress to house these rare animals. A wing of this high-altitude park perhaps the first of its kind in the world, will be devoted to higher research.

# Darjeeling Improvement Fund

- 1. In 1838, the Government of India directed that the quit rents paid by the settlers in the ceded portion of Darjeeling should be appropriated to a fund to be called the "Location Fund" and employed for conservancy and for purposes of local improvement. The rent of certain bazars built out of this fund, and of shops erected on public lands, were afterwards added to the fund.
- 2. In 1868 the Government of Bengal ordered (letter No. 137-T, dated 22.7.1868) that the fund assigned to the "Location Fund" for the improvement of Darjeeling should be kept distinct from the Municipal Fund and ordered that a Fund may at once be formed to be styled as "Darjeeling Improvement Fund". To this was credited the amount which then stood at the credit of the Location Fund. The orders also directed that all income from the undernoted items should, in future, be credited to the Darjeeling Improvement Fund.
- (a) Quit rents and rents of old Darjeeling territory.
  - (b) Commutation money.
- (c) Purchase money of waste lands in territory, originally ceded.
  - (d) Ghoompahar Forest receipts.
- 3. In 1877 the Road Cess Act was introduced (Act X B. C. of 1871) in the district of Darjeeling (Resolution dated the 12th. October 1877), and it was decided by the Government that the income from the undernoted items be assigned to the Darjeeling Improvement Fund.
  - (a) Location rent.
  - (b) Rent from farming leases.
  - (c) Leases of ferry.

- (d) Profits from hats and bazars and rent from all Government hats and bazars.
  - (e) Receipts from Rangiroon.
- 4. With the establishment of District Board in Darjeeling in 1922, some of the functions viz. Medical, Education, Veterinary and Sanitation of Darjeeling Improvement Fund were transferred to the body and in return the Darjeeling Improvement Fund was made to contribute Rs. 50,000 to the District Board, Darjeeling for the above heads of expenditure (Government order No. 419 T.R., dated 9.6.1926). Under this order a set of new Administrative Rules for the management of the Darjeeling Improvement Fund was sanction by the Government in consultation with the Accountant General, Bengal. In this rule the scope of the fund has been defined.

## 5. Resources of the Fund :

- (a) The proceeds of all revenues from location and farming leases which have been assigned by the Government to the Fund.
- (b) the income from the hats and bazars under the control of the Funds;
  - (c) bungalow fees; and
- (d) miscellaneous receipts pertaining to the Fund.

# 6. Application of the Fund:

- (a) To the payment of the cess under Cess Act.
- (b) To the payment of salaries of establishment employed by the Fund and of grants made for supplementing contributions by members of the establishment to the provident Fund.
- (c) To the payment of expenses incurreds by the Fund on account of the following:
- (i) For repair and maintenance of any existing work of improvement in the hats and bazars under the control of the Fund.
- (ii) On the sanitation, water-supply and other works of improvement in the hats and bazars under the control of the Fund.
- (d) To the payment of contingent expenditure incurred in the administration of the Fund.
- (e) To the payment to the District Board of such proportion of the cost of the District Engineer's establishment as may be determined by Government from time to time.
- (f) To the payment of such contribution to the District Board as may be determined by Government from year to year.
- (g) To the allotment to the administrator's discretionary grant of such sum as may be determined by the Government from year to year.
  - (h) To the payment of any contribution which

in any year has been included in the budget and has obtained the sanction of Government.

#### 7. Management:

The Management of the Darjeeling Improvement Fund is under the control of the Board of Revenue, West Bengal.

The Deputy Commissioner of Darjeeling who is also the Administrator of the Fund, works under the general supervision of the Commissioner, Jalpaiguri Division.

The Subdivisional Officers of Kalimpong, Kurseong and Siliguri and the Sadar Deputy Collector in charge, D. I. Fund are intrusted with the administration of the different subdivisions under the general supervision of the Deputy Commissioner, Darjeeling.

8. Hats and bazar under the control of the Fund:

There are at present 30 hats and bazars under the control of the Fund and these are grouped into major and minor charges.

- 9. The demands include the fixed demands and the fluctuating demands as follows:
- (a) Fixed demands are the rents of holdings or shops fixed for a term of years which is ordinarily 20 years.
- (b) Fluctuating demands include the undernoted items:
  - (i) Tolls from hats and bazars;
- (ii) Salami on new settlements, extensions and transfers of holdings on sale;
  - (iii) Receipts from slaughter houses;
  - (iv) Receipts from places of amusements; and
  - (v) Other miscellaneous receipts.

Tolls are realised in all the hats and bazars as per scale of tolls sanctioned by the Commissioner of the Division from time to time.

The Deputy Commissioner is the sanctioning authority of all the settlements, extensions etc. of permanent holdings in the district so far the D. I. Fund is concerned. Cases of settlements etc. come through the respective S. D. O. S.

#### 10. Original and Annual Repair Works:

The repair and maintenance of roads, buildings and water supply etc. and the new construction of new works in the hats or bazars of the D. I. Fund are done by the District Engineer, Darjeeling. For this the Fund pays 2/3rd cost of the District Engineers Establishment to the District Board, Darjeeling vide Gevt. Order No. 110 T. B. dated 27. 5. 1922.

#### 11. Contribution:

The Darjeeling Improvement Fund pays contributions to the following institutions annually:

| (a) | District Board, Darjeeling                                    | Rs. | 50,000 |
|-----|---|-----|--------|
| (b) | Darjeeling Natural History<br>Museum                          | Rs. | 8,000  |
| (c) | Kalimpong municipality  | Ra. | 25,000 |
| (d) | Contribution for social education work in Darjeeling district | Rs. | 2,500  |
| (e) | Contribution for rural upliftment                             | Rs. | 15,000 |

#### 12. Administrations Discretionary Grant:

The Administrator has a sum of Rs. 5,000 annually at his disposal as discretionary grant from the Fund which is given to the various institutions of this district.

#### 13. Bungalows:

The following bungalows are under the control of the Fund.

- (a) Senchal (old and new)
- (b) Jorepokhri
- (c) Tonglu
- (d) Sandakphu
- (e) Phalut
- (f) Badamtam
- (g) Pankhabari
- (h) Tigerhill Pavillion

The bungalows are maintained by the Fund.

#### 14. Budget :

The Darjeeling Improvement Fund frames its own Budget. It is sanctioned by the Board of Revenue. It is not included in the Provincial Budget.

#### 15. Employees:

The Employees of the fund are not Government servants, but they are subject to Government Rules. The employees do not get pension but they are entitled to gratuity under the Revised Government Rules for pension and gratuity.

#### 16. Personal Ledger:

The Accountant General, Bengal in letter No. 189 L. A. dated 16. 6. 1926 moved on the subject of D. I. Fund. In that letter it was suggested that either the Fund should be transferred to a local body or it should be incorporated in Government accounts. After a chain of correspondance between the Deputy Commissioner, the Commissioner of the Division and

the Government it was finally decided not to disturb the present arrangements as the income of the Fund goes to the benefit of the district as a whole and so Government of Bengal in their letter No 7595-E. A. dated 18. 7. 1934 to the auditor General of India explained the whole position of the D. I. Fund and requested to accord his sanction to the opening of the personal Ledger in favour of the Deputy Commissioner, Darjeeling on behalf of the D. I. Fund.

Sanction of the Auditor General in India was received in letter No. T-907 Ac/233-34 dated 17.8.1934 to the opening of personal Ledger in respect of the D. I. Fund.

# 17. Income and Expenditure :

A statement showing the income and expenditure of the Darjeeling Improvement Fund for last three years is enclosed.

Income of Darjeeling Improvement Fund for the last three years

|   | 0.0100                                  |                          |                 |                  |

Dow HILL-Dow Hill is a ridge which starts from Manibhanjan in Darjeeling subdivision and undulating eastwards passes through Ghum, Senchal and Tiger Hill, turn southward and gradually descends to Mahaldiram, and Dow Hill above Kurseong town. It contains several springs, which supply water through pipes to Kurseong town. There are a Forest School and a colony of the Forest Department the Victoria Boy's School and the Dow Hill Girl's School and a large T. B. Sanatorium called the S. B. Dey Sanatorium. The Forest School was opened in 1907 and is primary intented for the instruction in practical forest work of Forest Officers below the rank of Forest Ranger. Dow Hill was an important point on the Old Military Road from Pankhabari to Ghum and is served by roads. It contains a Forest Bungalow.

GAYABARI—A Railway Station on the Darjeeling-Himalayan Railway between Tindharia and Kurseong.

GHUM-A Railway Station in Jore Bungalow police station about 7,400 feet above sea level midway between Sonada Railway Station and Darjeeling. It contains a charitable dispensary and receives its water supply from the Darjeeling water supply system. Also contains a veterinary dispensary. There is a recruiting depot for Gurkhas both for the Indian Army and British Army. Ghum is famous for the manufacture of kukris and as a centre of trade for potatoes, oranges cardamoms and cloth and before the war used to transact business worth about a million rulees. On the top of Ghum is Tiger Hill, Keventer's Dairy Farm and the Senchal lake. There is a famous Buddhist Monastery. It forms an important junction for roads leading to Darjeeling, to Kurseong, to Sukhiapokri and to Kalimpong via Peshok.

GIELLEKHOLA—Formerly a Railway Station on the Siliguri Kalimpong Railway line of the Darjeeling-Himalayan Railway. It is an important trade centre and the import and export trade of Kalimpong passes through this bazar. The chief articles of trade are oranges, apples, wool and cardamom and other trade articles from Sikkim, Tibet and Bhutan.

JALALPAHAR—This is a cantonment of the West Bengal Sub-Area Command. It also contains the St. Paul's School. Adjacent to Jalapahar is Katapahar where there is a British Gurkha Recruiting Depot.

Kalimpong—Kalimpong is the headquarters town of the subdivision of the same name, which is the area taken from Bhutan at the conclusion of the war 1864-65. The bazar is 32 miles from Darjeeling by the Peshok Road and twelve miles from Giellekhola, the terminus of the Darjeeling-Himalayan Railway in the Tista valley untill 1950. It is also the terminus of the mule trade route from Tibet into India via the Jalap La which is about 65 miles away. The Sikkim frontier on this route is about 16 miles from Kalimpong. The bazar is situated on a saddle 3,933 feet above sea level flanked on either side by higher ground-on the south by the hill of Durbindara about 4,500 feet high and on the north-west by the Deolo Mountain 5,590 feet above sea level.

The prospect from many parts of the town is a magnificent one, although from no where is it quite so remarkable as the view from Darjeeling. Perhaps the best view-point is the summit of Durbindara. From here the northward expense of snow mountains appears above the top of nearer mountains due north of Kalimpong, Kabru, Pandim and Narshingh are seen more obliquely than from Darjeeling, are more distant and therefore appear smaller. On the other hand peaks to the north-east are closer to Kalimpong and the eye is not distracted by mountains in the middle distance as it is when gazing in a more northerly direction. Simvo, and the other giants of north Sikkim therefore show up prominently. Westward one can look up the Rangit valley winding among mountains and flanked on the south by the Senchal mass. Bellow the hill one is standing on and west of it, runs the Tista in a deep gorge past Senchal and Sittong and, looking south-west, one can see the junction of the Riyang and the Tista and the Riyang Railway and ropeway terminus at the bottom of the valley. Again to the north and north-east, the Tista lies deep in its rorge and to the east lies ridge after ridge covered in forest and cultivation across the Rilli valley. In that direction aan be seen the highest mountain in the subdivision, the Rishila 10,500 feet high.

The town has three distinct parts. First the Mission and the St. Andrew's Homes area on the lower slopes of Deolo down to the Rishi Road and the Bazar proper. This first area consists for the most part of scattered well-constructed buildings some of which lie hidden in well-wooded hillside. The second area is the bazar, closely built up and mostly a strip development on the side of the Rishi Road, the eastern end occupied mainly by accommodation for the wool trade and the mules and muletteers engaged in it. The western end on the saddle serves more the needs of visitors from Bengal and the local administration. The third part of Kalimpong lies on the slopes of the hill culminating in Durbindara and is known as the Dovelopment Area. It is a residential estate developed by Government. Where development has taken place, better class buildings are seen well spaced amid trees and pleasant gardens. The undeveloped portion, more than half the total area at the time of writing, is less pleasing. Some plots are under excavation or are being prepared for building in such a condition that their appearence is unsightly. The majority, bare of trees and under temporary cultivation, create an uniteresting landscape.

Kalkmpong offers to visitors a quieter type of attraction than either Darjeeling or Kurseong. There is no club or golf and little tennis. Walking is pleasant but few paths and roads seem to have been specially designed to be attractive to visitors. For visitors there are hotels in the Development Area where usually also houses can be rented for the season. There is a cinema hall in the town but it is evident to the vistor that the pleasure that he will get from Kalimpong is more than that to be found in a small country town and less than that of town resort.

The town has developed rapidly within the last

thirty years. Its importance as the terminus of the trade route to Tibet has been enhanced by improvement of communications and from the original Mission Settlement has developed the large educational estate of the Homes. These give the town unique features. Visitors find pleasure in visiting the Homes and walking through the bazar to study the Chinese shops, the houses and the hotel accommodation used by Tibetan and Chinese traders and muletteers: and to enjoy the novel spectacle of streets used by many types from Central Asia and by droves of mules wandering in search of grazing or water.

Kalimpong has some importance as the administrative headquarters of the subdivision and in the town is located the office of the District Agricultural Officer.

The town has a number of churches and other impressive buildings. Apart from the residential buildings of the Homes, the Mission and the Development areas, there is the imposing residence of the Tibetan Trade Agent in the Homes area and on the side of the Rishi Road, the residence of the Raja Sonam Tobgye Dorji Deb Zimpan of Bhutan, who is Agent in British India of the Bhutan Government. In this house rested the Dalai Lama when he arrived from Tibet in 1949. There is a Buddhist monastery in the basar as well as large substantially constructed wool godowns. There are also well constructed administration buildings noteworthy among which is the office of the Subdivisional Officer built in 1939 on a prominent site in replacement of a building which had been destroyed by storm and earthquake.

Kalimpong is well provided with places of worship. The Buddhist monastery has been mentioned above. There is also a Hindu temple and a mosque. The Church of Scotland has a fine Gothic Church which was erected in the Mission area above the bazar in memory of the Revd. W. MacFarlane, the pioneer missionary of the Church of Scotland in the district, who died here in 1887. In the Homes estate can be seen the graceful chapel bullt in more recent times in memory of Mrs. Graham, the wife of Dr. Graham, the founder of the Homes.

The three hill towns are all important in varying degree as centres of visitor traffic, of educational activity of trade and communications and or local and provincial administration. Details will be found in the Introductory Essay dealing specifically with those matters. Description in this Appendix has been confined mainly to matters of general interest to the visitor.

The Kalimpong urban or semi-urban area falls into three distinct parts. First there is the Mission and Homes area on the high ground to the north-east of the saddle in the centre of the bazar. Next is the Bazar area, known as the Darjeeling Improvement Fund Bazar extending from the saddle along the Rishi Road for two of three miles. Last is the Development area. The areas have one common water-supply which is operated by the public Health

Department. The water supplied to the Homes and Mission area is mainly covered by a free allowance of 3,380,000 gallons per annum: that to the Bazar area is paid for by rates levied by the Darjeeling Improvement Fund: and that to the Development area is paid for by charges levied by the Superintendent in accordance with the terms of leases. A few free hydrants are provided in the Bazar area with lengths of hose kept ready to deal with fires.

All houses in the Development area built on leased land are required to have water-borne sanitation and pay rates for water connections. A small scavenging staff is required in this area and is paid for by rate. The Mission and Homes area has water-borne sanitation for certain houses and its own arrangements for scavenging and dumping refuse within the area. The Darjeeling Improvement Fund Bazar has a number of water cleansed public conveniences and most of the houses in it have water connections and some water-borne sanitation. For sewage not entirely waterborne, disposal is by transmission to a septic tank ? mile below bazar. Bazar refuse is also dumped about I mile below the bazar. A water-rate is levied on all houses in the bazar whether they have waterconnection or not. A Sanitary Inspector with 25 sweepers is in charge of the bazar sanitation under the Darjeeling Improvement Fund and a District Board Overseer superintends the sewerage, latrine and septic tank installations. A separate conservancy rate is levied in the Bazar area.

In Kalimpong, at the 11th mile on the Rishi Road, is a mule camping ground and sheds where mules can be stabled. There are also private stables but stabling for mules and control of the animals is far from successful with the result that flies are very prevalent to the detriment of public health.

Building regulation is administered in the Development area with relatively satisfactory results by the Superintendent assisted by an advisory committee. In the past, there has not been the same success attending building control in the Bazar area where congestion and insanitary construction are in places conspicuous. An advisory committee under the Subdivisional Officer now deals with the regulation of building in the bazar.

Electricity is provided by a licensed company. House connections are provided in all three areas but street lighting only in the Bazar area where it is paid for by the levy of a rate. Street lighting has been extended to the Development area.

A municipality extending over the three areas has been established in 1945.

KURSHONG—Kurseong town is the head quarters of the subdivision of that name and is situated on the main road and railway from Siliguri to Darjeeling at a height of 4,800 feet above sea level. It is 20 miles by road from Darjeeling. According to the 1951 Census, it has a winter population of 11,719, or if neighbouring school areas are added, of nearly 12,000. It is a summer resort and in spring, summer and autumn the population is much higher, the number of visitors varying considerably from year to year. It is not so popular as Darjeeling but many like it who find Darjeeling too high, too cold or too expensive. There are hotels and boarding houses as well as many private houses whose owners occupy them when they can get away from the heat and discomfort of the plains. The Maharajadhiraja of Burdwan owns considerable landed property in the Kurseong town. Although Kurseong is lower than Darjeeling it has a heavier rainfall (165 inches annually) but does not suffer so much as Darjeeling from cloud and mist.

Kurseong is situated on a spur taking off from the long ridge running south from Senchal. It has no northward panorama of snows like Darjeeling as the Ghum ridge limits the view to the north allowing only the peaks of Kinchinjunga to be seen through a gap between Ghum and Senchal. The view northward however is far from being devoid of interest. The Nagri spur, starting from Jorpokri and stretching down to the Balasan, is particularly picturesque amid other hillsides covered with forest, tea gardens and factories. But to many, the real charm of Kurseong is the view to the south. On a clear day, standing on the Eagle's Orag or indeed on almost any point on the ridge running west from the town towards Constantia, the spectator commands a wonderful view of the plains of India, reaching to a distant horizon 100 miles away. At his feet, the hills fall away abruptly to ground about 400 feet or less above sea level and there cease altogether. Southward is nothing but a vast plain in striking contrast to the jumble of hill and valley behind and to the spurs jutting out on either side of the spectator.

South-east can be seen the Tista which comes from the snows of north Sikkim, flowing through dense forest at the base of the hills and widening into broader reaches as it nears Jalpaiguri. West of it is the Mahanadi which flows past Siliguri just discernible amid trees. Immediately below Kurseong and west of it, the Balasan emerges from the hills and after forking into two channels, joins the Mahanadi west of Siliguri to flow ultimately into the Ganges. Still further to the west can be seen the outlying hills of Panighata and Lahargarh and beyond them the Mechi river, the boundary between the district and Nepal. Beyond the Mechi and in the plains can be seen the Morung forests and other rivers flowing through Nepal territory.

Few buildings in Kursonng are constructed substantially and far too many are insanitary, ramshackle and untidy. The schools have the best buildings and there are some excellent private residences. Although the town is itself not imposing there are attractive walks in the immediate neighbourhood. Above Kurseong are the roads to Dow Hill where will be found the old military road to Darjeeling and other paths through the forest. One track leads down from the Forest school to the Card Road below Gidarpahar and from Gidarpahar a District Board bridle path leads down the ridge to Gayabari through tea gardens with remarkable views

on either side. Other bridle roads and paths lead down from Kurseong to the plains, the one taking off below Constantia to Pankhabari being the old military road used before the Cart Road was completed in its present alignment.

Kurseong is not only important as a tourist centre and as the administrative headquarters of the Subdivisional administration but it is, like Darjeeling, a centre of educational activity. There are on Dow Hill two Government Schools for children and a Government Forest School and there are many other schools on the slopes above the town. Kurseong has a club and a cinema hall. It is the headquarters of the Darjeeling-Himalayan Railway administration and the Assam Railway maintains rest quarters here for its employees.

The Anglican church of Christ Church Kurseong, was built in 1870 and consecrated by Bishop Milman six years later. There is also a chapel for the two schools at Dow Hill. The churches here St. John's Church built in 1891 and St. Paul's Church built in 1904.

LATPANCHOR—Situated in Kurseong subdivision on the east of Mahaldiram Range it is one of the four Cinchona Plantations of the Government. Contains a Forest Bungalow.

LEBONG—Cantonment of the West Bengal Sub-Area Command on the North-East of Darjeeling town. It has a power station. Labong in Lepoha means "the tongue like spur". It has a race course, which has the unique distinction of being the highest and the smallest race course in the world.

LEPCHAJAGAT—This is a place in Jore Bungalow police station. In Lepcha the name means "the toll bar on imports from Nepal".

MANGPU—Situated in Kurseong subdivision it is the biggest Cinchona Plantation of West Bengal. An account of the Mangpu Plantation will be found in the section of cinchona.

MANIBHANJAN—In Nepal it means "the dip between hills near the Mani or top". This is the bazar from which the journey to Tonglu, Sandakpur and Phalut is commenced.

MATIGARA—In Nepali it means the "mud house". If contains a bazar under the Darjeeling Improvement Fund which holds two weekly hats, perhaps the biggest in the Terai for the trade of rice, vegetables, sheep, goats and cattle.

NAXALBABI—It is a bazar under the Darjeeling Improvement Fund and contains a District Board Dak Bungalow. It holds two weekly hats which are next in importance to Matigara.

PANIGHATA—In Nepali the name means "water mill". It contains a bazar and a tea estate.

PANKHABARI—This is at the foothills of Kurseong subdivision and contains a Khasmahal Bungalow, a

Veterinary Dispensary and a Rural Treatment Centre. Pankhabari was once an important halting place before the Railways were built.

PHDONG—This is a Khashmahal 'blook in Kalimpong subdivision. It contains a Bungalow belonging to the Central Public Works Department and a Dispensary. In Tibetan the name means "the halting place at the Po or incense tree".

PHALUT—In Lepcha it is Faklut or the peeled summit of mountain. It contains a Bungalow maintained by the Darjeeling Improvement Fund. It is very nearly 12,000 feet and is the boundary point between West Bengal and Nepal. It stands between two peaks on the same ridge Sandakpur and Singalila.

RAMMAM—In Lepoha is means Ra Surging advance from Mong a lake with demon's name. It contains a Forest Bungalow and is a beautiful place.

RANGIROON—In Lepcha it means the turning of the great river, i.s., the place to which the great Tists flood reached Contains a Forest Bungalow.

RANGIT—In Nepali it is Rangnyit i.e., two extended waters, the Great and Little Rangit rivers.

RANGLI RANGLIOT—In Lepoha it means the place of the receding waters, i.s., from which the Great Tista flood receded. It contains a police station and a basar.

SENCHAL—In Lepcha it means the damp misty hill. It contains a Darjeeling Improvement Fund Bungalow and a catchment reservoir of the Darjeeling Municipality.

SILIGURI—The headquarters of the Siliguri subdivision and a big Railway junction of the Assam Railway, the Darjeeling Railway and the Railway going into East Bengal via Jalpaiguri. In 1950 it was declared a Municipality and contains important Railway offices.

As a nerve-centre of the North-Eastern sone of the country in respect of trade and communication, Siliguri has been rapidly expanding in various dimensions. Siliguri Planning Organisation located in the town is having an all-out effort to effect a planned growth to this region. It has also quite a number of different industries and has all the institutions that are usually located in a subdivisional town.

Covered by an area of 4'97 sq. miles Siliguri town is inhabited by 65,471 persons as per Census 1961. In 1961 the town had a total number of 464 factories and establishments employing about 4,814 workers. The principal industries of the town are rice and flour mills, bakeries, fruit preservation and canning, umbrella assembly, saw mills, plywood industry, furniture industry, automobile servicing industry, scap manufacture, sodium silicate manufacture, aluminium utensils

manufacture and tea industry. The whole area is rapidly developing into an industrial complex.

The growth of the town had started centring round the railway station area with the setting up of godowns and dwelling-cum-commercial establishments. This core of the town has poor accessibility by road and also suffers from bad drainage. The open space in the west and south has rapidly been filled up by large-scale industries like rice-mills, saw mills, and setting up of houses for industrial workers. The other areas are mainly residential with a few

office buildings interwoven in between the residential houses.

TAKDAH—This is a Khasmahal block and contains a Forest Range. There is a Bungalow belonging to the Forest Department and a bazar. The Former Takdah cantonment is now a residential area.

TINDHARIA—Tindharia is on the 19th mile on the road between Siliguri and Kurseong and contains the workshop of the Darjeeling Railway. It also contains a Hospital and a bazar.

## Appendix II

# A GLIMPSE OF HANDICRAFTS OF DARJEELING DISTRICT

#### by

#### A. N. Mukherjee

Deputy Director of Industries, (C. D. P.), W. B.

The present Note on Darjeeling Handicratts is only a suggestive one, based on a rapid enquiry by the Extension Officers (Industries) of the District done at my instance under the supervision of Sri D. N. Prodhan, Project Officer, Rural Industries Projects, Darjeeling and Sri A. Ghosal, District Industrial Officer, Darjeeling in April-May, 1968 and a few case studies by me in Kalimpong, Sukhiapori and Darjeeling in May, 1968. The Assisting officers were:

| (1) | Sri K B. Tamang, | Extension Officer (Industries)   |
|-----|------------------|--|
| (2) | N. G. Goswami    | Ditto  |
| (3) | . P. R. Dewan    | Ditto  |
| (4) | , B. Das Gurung  | Ditto  |
| (5) | D. P. Das        | Ditto  |
| (6) | . B. Bhitrikoty  | Ditto  |
| (7) | B. L. Chetri     | Ditto  |
| (8) | A K Chanda       | Ditto  |
| (9) | B. N. Pal        | Executive Officer, Kalimpong<br>Arts and Crafts Industrial<br>Co-operative Society |

- 2. The purpose of the Note is just to indicate the fabric of a few sample items being produced in the hills with the curiosity and the limitations of a person of the plains.
- 3. The timber like 'Dhar' (as are primarily obtained from Sikkim against license) and 'Khamaray' are used for producing different types of containers. One may see five 'Chunars' (belonging to Blacksmith community) of the village Kamjer in Pulbazar area producing 'Harpay' (butter-container), 'Thayky' (curd-container), 'Dhungro' (salt/millet container), 'Holong' (wooden drum), 'Gabaru' (Tibetan tea and milk pot) etc. for local consumption. The tools and machines used are 'Bashila', 'Bancharo', 'Khukuri', 'Shacho' and 'Banko'. The turning machine moves with the force of water-current.
- 4. There will be the six practicing Buddhist craftsmen in Sukhiapokri and Ghum area producing idols representing Buddhist Gods and evil spirits and their seats. Sri Khaiba Lama, Sri Dorjay Lama and Sri Phuri Chorpa are mastercraftsmen. The local names of products are 'Mukunda' (masks), 'Chhyosym' (alter), 'Duk' (dragon), 'Chokebi' (a small reading table), 'Chengi' (Bishnu), 'Sangay', 'Cherenji', 'Norgima', 'Jijendoma', 'Guru Rimburchay', 'Rochak

Gyachenei', 'Chhepamay' and 'Kūsungthu'. These are made of soil, hand made paper and wood. The sizes vary from 1'-11' in height. The Brahmins of Nepal bring the hand made paper. In case, it is not so available, the artisans prepare it from a mixture of 'Lokoti' fibre, jute fibre and clay. Soil, known as 'Kalimati' is brought from distant jungles and believed to be sacred. The other Gods and evil spirits that are reproduced are 'Chyongnak Dorjay', 'Dimu', 'Mikhu'. The craftsman prepares the ilol from the pasty mixture of paper, clay and fibre. There will be hollowness inside. It is dried and painted. The consumer will not use it for worship until a Lama writes the holy 'mantras' on a hand made paper and puts it inside with the bits of precious metals and stones and sacred soils and then scraf on the idol. There are mythological events connected with the paintings and idols. For instance: (i) The world was once full of miseries for the torture of serpents under the guidance of Basudeva Naga. Lord Buddha sent Chyongnak Dorjay to fight who was first frightened to see the Naga, Buddha then transformed him to be an eagle. The Naga then offered a delicious dinner to Dorjay, but, the latter took former to Buddha who forgave him with a warning. (ii) When Buddha was in deditation, many evil spirits like 'Dimu', gave him trouble Buddha then created the 'Duk' with flames, when the spirits fled away. The auspicious days for the Buddhists and idol worship are 'Sukhadawa' (Baisakhi Purnima, the day when Buddha was born), 'Genden Namohu' (the day falling in 10th month according to Buddhist calendar, when a disciple of Buddha presched Buddhism in Tibet) and 'Loshar' (New Year's day, when the Buddhists worship Guru Rimburchay Sangay and Chengi for the welfare of the family). Besides idol making, the craftman paints 'Khyapta' (paintings of different Gods). This is used when, according to the instructions of the Buddhist priests, the people worship the Khyapta to save the dead soul from miseries.

5. Dari woven in the "Lepcha Taan" is traditional in Kalimpong. The fabric is used as a complete dress piece of Lepcha male folk, known as "Dampra". The required length is 16 meters. "Tangip" (bag) and 'Namrek' (a belt used round the waist) are also produced along with the "Dampra". Married Tibetan ladies put on 'Pangden'. At the instance of the Kalimpong Arts and Crafts Industrial Co-operative Society, the Lepcha Dari is being used as ladies" hand bags, utility bags, writing pad cover, Album cover, table mat set etc. having good demand inside and outside the country. The types of designs reproduced

- are 'Dupka', 'Takur' 'Fenfenma' (Hill flowers) and Turing etc. A full-length of 5 meter warp with easier designs can be woven in 5 days; otherwise, complicated designs can be reproduced on the same length in about 6-7 days. The production process consists of the twisted cotton (2/2G yarn being placed on 'Nakdori' and 'Tanatan' and then set on the 'Lepcha Taan'. The worker starts working tied with the Taan. The 'Vitre Dhago' (west yarn) is twisted . and, rounded up in long bamboo stick. Butta Tipne Lathi' (sticks placed in double lair of warp) and 'Dhago Ganse Lathi' (Wooden shuttle) are then placed and operated properly for weaving the patterns. Lepcha girls are the traditional producers and the Tibetan, Lepcha and Nepali men and women are the tradional consumers. The Kalimpong Arts and Crafts Organisation has been working for the last 50 years for the development of the craft, where, the average wage varies from Rs. 30-100 per month.
- 6. Hand-embroidered and hand-painted "Thankas" are another important feature of Kalimpong Handicrafts. The Tibetan, Lepcha and Nepali women are the producers. The traditional designs are: 'Chhungkhor Kurya''—The procession of Lamas to the Gumpa; (ii) 'Azilhamu Chham' Tibetan Khamba dancers; (ili) 'Nhey Bho Lungha Ney'—a caravan of mules carrying Tibetan wool led by a male guard. The process consists first in streching the base cotton cloth on a wooden frame and tracing the pattern on it. Then the design is embroidered and the back-ground is painted in oil colour. The price of a finished material varies from Rs. 20-200. Traditionally, the 'Thanka' is used as a material for decorating walls in 'Gumpas' (temples) and residential houses of Tibetan and Lepcha people. In modern times, these are used as wall panels, firescreens (decorative curtain in front of the fireplace) and threefold screens (used as partition of the drawing/dining rooms). The Kalimpong Arts and Crafts Co-operative Society has been employing local girls in this trade for years together.
- 7. Kalimpong can also boast of its *metalwars* having religious and utility significance being produced by 'Kamis' and 'Sumars'. There will be the following practising craftsmen:

| 11th mile |
|-----------|
| 17        |
| 11        |
| 11        |
|           |
| 11        |
| - 013     |
| 10th mile |
| 11th mile |
|           |

The local names of articles produced out of gold, silver and copper are 'Batuko', 'Kumba', 'Chhikachuri', 'Chamech', 'Amthi', 'Thapche', 'Alung', 'Pipsing', 'Chura', 'Kantha' ('Nagori'/'Tilori'), 'Chaptisun', ('Godowari'/'Bunga'), 'Dungri', 'Bulaki' and 'Kalli', 'Maney', 'Kathemora', and 'Phomba'. To illustrate further, a 'Maney' ('prayer-wheel) is made of silver/copper and used by Buddhists by moving it continuously to remove sins; a 'Phomba' is used by

- the Buddhists for keeping holy water; a 'Kathemora' is used by the local people for metal case of 'Khukri'. The local prices of a 'Maney', 'Kothemora' and 'Phomba' vary between Rs. 150-600; Rs. 150-200 and Rs. 150-600 respectively. On many items of jewellery, the 'Duk' design is reproduced.
- 8. The curio shops in Darjeeling would present to the visitors and tourists a variety of hill handicraits notably based on stones and metals. Not necessarily, these are the products of Dareeling district alone. The hil people, and the Buddhists amongst them, are also the original consumers of many of such items. Any one may still be interested to meet a Tibetan lady of 83 in a house on Rupnarayan Sinha Road below Darjeeling Bazar rotating the 'Money', uttering 'Om Mane Padme Hum' and counting the beads simultaneously, while having her seat on the verandah with a small firekit by the side of her feet.
- 9. The following information could be obtained by meeting a few master-craftsmen in their own cottages in Bhutia Bustee and other corners of Darjeeling:
- (i) Sri Chakralal Sakya was a craftsman producing lamp, vase, ashtray from horn with brass/copper piece fittings and decorated wooden tray (Chukchi) and utility items from bamboo. Timber for tray was mostly local chap. He was using a Fret-saw. Copper and brass pieces were brought out from dices, on whom, there were Tibetan/Nepalese designs, which showed flowers and dragons approaching the lucky sign. On such items, the other localartisans were Sri Tschering Dorjee, Sri Nandalal Sakya and Sri Narbahadur Tamang. In Chakrabal's house, the common 'Chopa' (lamp and seven holywater containers) was there. Whereas, the lamp/vase cost Rs. 18 per piece, one decorated table cost Rs. 80. (ii) Sri Dawa Sherpa was an artisan producing maska from local timber (Champ, Chandan, Khanakpa) and papermachie. The wooden masks were generally of height of 4"-24". The different colours on the masks represented different figures like 'Gurutakpu', 'Isigumbu' 'Maninggumbu', and 'Tamding'; their price varied from Rs. 7-85 per piece and the production capacity was 2 in a day to one in 6 days, all depending on the height. The papermachie masks were between 4"-23", did cost Rs. 3 50 to Rs. 40 per piece and the daily production capacity was 10-12 to 1 in 3-4 days, depending on height. The artisan explained that the motif behind the figures was that, when Buddha died, such figures were necessary to devour evil spirits for ensuring peace. He learnt paper-machie work from Solokumbha in Nepal from Sri Konger Lama as an apprentice for 5 years and then from Sri Karmagacha Lama of Sumin Bustee in Gangtok. He also knew drawing 'Thankas'. (iii) Sri Chotelal Sakya produced metalware in the form of 'Maney', wall copper-plate, (using wood when needed), filigree work, boxes, casket, vase etc. The sale-price of wall plates was Rs. 36 per dozen, that of 4 'Maney' was Rs. 18. He also knew to produce the holy water jug 'Bhumba'. (iv) Sri Tirtharaj Sakya worked mainly on copper/brass wire for ornaments, ladies' bag handle, wall plates etc. He sold wall plates @ Rs. 65 and hair-pins @ Rs. 18. (v) Sri Fagu Lama purchased semi-finished (textile) toys from Poons to consume 12 dozen in 2 months

generally @ Rs. 1'75 per piece. After finishing he could sell them at wholesale rates of Rs. 7.50—Rs. 10 per piece. He had a training for 7 months in 1966 from the Regional Design Centre of the All India Handicrafts Board. The finishing materials were cotton and silk dress/pieces and bits of ornaments. The figures of women and children then resembles Bhutanese/Tibetan/ Lepcha/Nepalese, the ladies being called as 'Fumu', Aimi', 'Anam'. The items of a Tibetan warrior or a Nepalese dancing lady were of good demand. (vi) Sri Hastamen Baraily was previously in Solokumbha in Nepal, having settled in Darjeeling only in 1953. He was originally a 'Kami', i.s., doing work on iron only for agricultural implements, Khukri and domestic ntensils. But now he had turned to copper, brass and silver items. He produced (a) 'Lava'—a trumpet with 3 parts used by Lamas during ceremonial processions and festivals; the cost of a 6' long/12' long pair was Rs. 850/Rs. 600. (b) 'Gyaling'—a flute used by Lamas, costing Rs. 350 for a pair. (c) 'Bhumba'—a jug for holy water ('thu')—a 9" jug contained 51 tola silver. When it was of silver, the metal was supplied by the customer and he charged a wage of Rs. 2 per tola. (d) 'Phikur' and 'Thawak' to contain 'Chhyng' (as prepared from farmented rice/millet) - two forming a set - where these were made of silver, the metal was supplied by the customers and he charged a wage of Rs. 2 per tola. One set contained Rs. 35-40 tola silver. (e) 'Ting'—Pots—7 to form a set to contain water. When these were of silver, the metal was supplied by the customer. A pot needed 14-15 tolas of silver. (f) 'Jundung'—Kettle—if it was made of silver, the metal was supplied by the customer. The wages were then Rs. 1.50 per tola. A set cost Rs. 50. Sri Baraily used the tools of 'Martal', 'Lihi', 'Hatro', 'Doin Bhari', 'Talarani', 'Doloharani', 'Chino', all under Anvil/hammer/chisel groups. He received a State-prize in 1967. It is interesting to note that his wife pointed out many points of the craft during the discussions. (vii) Sri Bekhraj Sakya, 85, was a grand old talented master-oraftsman having settled in Darjeeling in 1902 leaving Lalitpur in Nepal. He had a knowledge of the ancient literature on basic crafts. He worked in various parts in Nepal and India for museums, temples, monasteries and art critics, was associated with Santiniketan Kalabhavan and was respected by many artists for his superb grasp on crafts influenced by traditional Nepalese and Tibetan motifs. He received National Award in Handicrafts in 1966. He knew nine basic crafts based primarily on clay, wood, metal, stone and bamboo. In his words, 'Kalako Guru Mato Ho' (i.e., clay is the basic thing for all crafts). He was a Sakya Buddhist craftsman belonging to Newar community. He explained to me the details of work of an 'Apa', 'Thakarmi', 'Sikarmi', 'Silakarmi' and 'Tamrakar' and the differences between 'Sijya' (work on wood), 'Thojya'/ 'Thajya' (cast-metal work/metal work). (viii) The Tibetan Self Help Centre at Darjeeling set up in October, 1959 will offer oppertunities to have a glance into various handicrafts being produced there based on wool, leather, wood and metal. There are wooden material containing Bhutanese and Tibetan designs embroidered boots with zip, leather three quarter boots, copper ashtray, brass soup stove (Gyako),

Holy Jug ('Jontong') or ('Thui Phom'), Embroidered picture with frame ('Padom Troima'), wooden carved lucky signs, wooden carved fire screens and tables ('Choktse Troina'), barley pot ('Nehse'), copper plates ('Sangtha'), copper kettles ('Sangdir') religious scrolls, woven shoulder begs and marshur caps. There are also carpets with designs of 'Duk' (dragon), 'Duk-Goh' ('dragon-head), Pema Chhung Chhung' (small lotus), Pema Thang Tei Tei Gumpo' (losus and bats), 'Pema Thang Lehnja Thachhak' (lotus and letters with border) 'Pema Medok' (lotus-flower), 'Medok' (flower), 'Nehtabo Thang Medok' (parrot and flower), 'Gyaja Thang Medok' (bird and flower), 'Pema Gyaja' (lotus and bird), 'Duk Thang Gyaja' (dragon and bird) 'Medok Thang Thaobhak Yung Dung Lhakgyu' (flowers with swastika-joined border). Of all these articles, the wooden carved fire screens of  $3'-6'' \times 4'-6''$  costs high @ Rs. 450 (painted)/Rs, 400 (plain). The metal items like ritual stand, prayer wheel, copperkettle, copper plate, jug. barley pot, brass candlestand, generally cost between Rs. 50 -100. Carpets measuring 6'×8' cost about Rs. 875.

- 10. In view of the promotion of such hillcrafts, the Department of Cottage and Small Scales Industries of State Government set up a Design Centre in Darjeeling (Hermitage Road) in 1964. There, the Artist designer and the craftsmen have been working in reproducing traditional and other designs on wooden case, decorated table, wood-oum-metal wallplates and casket of bamboo dolls (showing devil dance, dragon etc.) etc.
- 11. Down the hills in Kantivita (Phansidewa) area, there are Bewa artisans producing 'Dhokra' carpets made of Jute-yarn. The sale price is Rs. 20 per piece. It is used in temples and for domestic purposes. In Boroghoru-jote (Hatighisa) area, there are Karigar craftsman producing Khol, Santhali Madal and Madesia Madal (country musical instruments). The sale-price of a Madal is Rs. 20 per piece. Raw hide for the purpose is purchased from Naxalbari Bazar.
- 12. An indication of foreign demand for hill crafts can be guesed by the fact that, during 1966-67 alone, the Kalimpong Arts & Crafts earned foreign exchange to the extent of Rs. 10,000 and the Tibetan Refugee Self Help Centre earned Rs. 78,000. The important customers are Austria, Canada, France, Malayasia, West Germany, U.S.A., U.K., Japan, Switzerland etc. For internal consumption in Siliguri and Calcutta, the Darjeeling District Services-cum-Marketing Industrial Co-operative Society set up in 1965 has been helping the Units by supplying raw materials and disposing of goods to the extent possible.
- 18. The brief note would thus only suggest the need for a detailed probe into the hillorafts to bring about the social and cultural setting as well of the District Darjeeling and the adjoining countries as reflected through the craftsmanship. It will be very useful to retain the traditional flavour of the crafts to the consumers who should not be immediately allowed to be confused in the midst of the beautiful curios just to be possessed for raising a material standard.

## Appendix III

# A-NOTE ON INVESTIGATIONS AMONG THE LEPCHA

by

#### J. NEETHIVANAN,

Language Division, Office of the Registrar General, India

Here an attempt has been made to present in barest outline a Grammatical sketch of Lepoha classified as one of the significant speeches of the Himalayan Group of Languages in the Linguistic Survey of India-Shri J. Neethivanan, one of the scholars of this Division, who subsequently had unfortunately to discontinue his services from the Department for personal reasons, had already some experience of work on another language of the Himalayan Group viz., Kanauri of Himachal Pradesh has, however, been able to collect some useful data on Lepcha during his one month's stay in the areas, and has put forth his observation on the ourrent linguistic situation of the speakers vis-a-vis the surrounding languages of the area. We are thankful to Shri B. Ray the author of this District Census Handbook who agreed to include this note in this important publication. In our Project of Himalayan Language Group Studies, we propose to take up a deailed study of this language in due course.

> B. C. Nigam. Linguist to the Registrar General, India.

#### LEPOHA-ITS POSITION

As Prof. Sten Konow has rightly observed. Rong or Lepcha forms one of the links which connect Tibetan and the Himalayan dialects with the Tibeto-Burman languages of Assam and Further India 1. Hodgson classified this language as one belonging to the Non-Pronominalized Himalayan Group. person of the subject is not indicated in the verb and hence Lepcha was considered to be a typical dialect of the Non-Pronominalized type2. Very recently, Robert Shafer reclassified this language under Tengsa Naga language thereby making a drastic change of the earlier classification by Hodgson.

#### PEOPLE-LAND

Lepchas are said to be the oldest inhabitants of Sikkim. They are also found in Western Bhutan, Eastern Nepal and Darjeeling. But in many places they have been outnumbered by other settlers from Nepal and Sikkim, Today Lepoha is spoken mainly in the Kalimpong subdivision of Darjeeling district and in Darjeeling City proper. Kalimpong was annexed from Bhutan in 1865 and Darjeeling from the Raja of Sikkim in 18354. As such, it may be noticed that the present habitat of the Lepchas is in fact a meeting place of various cultures and languages.

and XXXI.

So a study of Lepoha language is much worth undertaking. It was with this view in mind that a field investigation in the Darjeeling district was carried out during the summer months of 1967 and what is presented in the following pages is only a result of this. It is hoped that these findings would be helpful to scholars in the Tibeto-Himalayan field of languages, to decide the position of Lepoha among those languages.

Kalimpong was the centre of our investigations and a sample survey was conducted in Darjeeling and Gangtok. It should be remembered that there are a lot of differences between the people living in the Western Himalayas and those living in Easter Himalayas. Most important among them is the spread of education in the Eastern region. Naturally people are more conscious about their own history and culture. Unlike the people of the Western region who look upon their language 'as only a dialect', people of the East are most optimistic of their language and its development. Lepchs has its own alphabet also and as such the chances of recording the history of the people in their own way are more bright than any other people.

#### SCHOLARS-OF THE PAST

Sir A, Campbell<sup>6</sup>, B. H. Hodgson<sup>6</sup> and H. H.

Linguistic Survey of India: Vol. III pt. I. p, 180.

<sup>&#</sup>x27;Ibid .... p. 181. \*Robert Shafer: Classification of some languages of the Himalayas'-Journal of the Bihar Research Society, Vol. 86, pt. (8-4) 1950.

\*Census 1951. District Handbook—Darjeeling. pp. XXX

<sup>\*</sup>Compbell A: Note on the Lepchas of Sikkim with a vocabulary of their language—Journal of the Asiatic Society of Bengal. Vol. IX. pt. I (1840).

<sup>\*</sup>Hodgson, B. H.: On the Aborigines of the Sub-Himslayss -Journal of the Asiatic Society of Bengal. Vol. XVI pt. II (1847).

Risley are some of the important personalities who have worked on Lepcha language and people. Colonel G. B. Mainwaring of Bengal Staff Corps brought out a grammar of this language in 1876. His preface and Introductory remarks to this book throw light on the history of the people.

Hodgson classified the entire Himalayan languages into two groups viz., Pronominalized and Non-Pronominalized. Lepcha falls within the later category and its exact position as drawn out by Prof. Konow is as follows:

Tibeto-Chinese Family

Tibeto-Burman Sub-Family

Tibeto-Himalayan Branch

Tibetan Pronominalized
Group Himalayan Group

Non-Pronominalized Himalayan Group

> Gurung Murmi Sunwar Mägarī Newari Rōng or Lepcha Kāmī Mānjhi Toţō

# FIGURES-SURVEY AND CENSUS

Of the entire population of Tibeto-Burman Sub-Family, only one fifth was covered by the Linguistic Survey of India. Among them 34,894 Lepchas were accounted. Of these nearly 25,000 were reported from Sikkim and the rest from Darjeeling. Talking of all the Tibeto-Himalayan languages and Nepali in Bengal it may be noted that these languages are confined to Darjeeling district and to some extent to According to the Census 1931, Jalpaiguri district. 54 persons out of 10,000 in Bengal spoke these languages. It was only in the then Rajshahi Division that as much as 24 persons out of 1,000 spoke these languages. In 1891, there were only 50 persons out of 10,000 speaking these languages. The prevalence of Tibeto-Himalayan and Nepali languages has slowly increased since then.

In every 10,000

26 spoke in 1881 45 " " 1901 49 " " 1911 50 " " 1921

It was in Darjeeling district that we find a steep rise.

In every 10,000

107 spoke in 1881 192 ,, ,, 1901 208 ,, ,, 1911 216 ,, ,, 1921

The total number of Tibeto-Burman population in the whole of Bengal in 1931 was 532,294 of which North Bengal alone accounted for 153,270. Of this, Darjeeling district accounted for (Chittagong Hill Tracts district of the Chittagong Division in East Bengal returned as much as 108,704). A further break-up shows that there were 56,714 persons of Pronominalized Himalayan Group while 72,651 persons spoke Non-Pronominalized languages. 42 per cent of the Darjeeling district population spoke Lepcha. Of these 58 per cent were accounted from Kalimpong subdivision and 48 per cent from Kurseong. While there were only 0'23 persons per 1,000 in Bengal, 120'26 persons per 1,000 in Sikkim returned their mother tongue as Rong or Lepoha. It is beyond any doubt that Sikkim is the homeland of Lepchas. It should also be noticed here that Bhotia of Sikkim which belongs to the Tibetan Group is the major language of Sikkim.

During 1951 Census 27,068 persons returned Lepcha as their mother tongue while only one speaker cared to call his mother tongue by name Rong. The Himalayan West Bengal Division accounted for 13,417 persons and Sikkim for 13,625. Darjeeling district alone returned 13,394 persons. Of these total speakers of 27,068, a record number of 22,864 persons returned another language as their subsidiary language which turned out to be Nepali (by 22,353 speakers). Hindi and Bengali took the rest which is by all means negligible. In Sikkim out of the 13,625, a vast number of people totalling 10,278 returned Nepali as their subsidiary language. It is really amazing to see that almost every Lepcha is a bilingual. With the spread of education by the Christian Missionaries the knowledge of English has also become very wide, besides Hindustani and the regional language, Bengali. A thorough study on this line might bring to light some more interesting information but we can safely estimate that at least 50 per cent of the Lepchas are trilinguals.

1961 Census, on the other hand, shows a reversal of trend. Of the total number of speakers of 23,706 only 8,529 returned another language as their subsidiary language. A large number of them, (7,699) returned Nepali as the second language as expected. People returning other languages as their subsidiary tongue number only 830. In any case, a broad-based survey on bilingualism in these areas would be more interesting and is likely to throw more light.

# INFLUENCE-FOREIGN SOURCE

It has been observed, so far, that the area where Lepcha is spoken is a meeting place of various cultures and is strategically very important serving as a gateway to Tibet on the Eastern region. It has also been noticed that Nepali, an Aryan language should have influenced

<sup>.</sup> Rieley, H. H.: Gazetteer of Sikkim, Calcutta, 1849.

<sup>&</sup>lt;sup>8</sup>Mainwaring, G. B. Col. : A Grammar of the Rong (Lepcha) Language, Calcutta, 1876.

<sup>\*</sup>Linguistic Survey of India: Vol. I. pt. I. pp. 389-410.

this Himalayan language to a large extent, that a Tibetan language Sikkim Bhotia should be the major language of the home of Lepchas, and that another Tibetan language, Bhotia of Bhutan is influencing from another side. It has also come to light that Bengali as the regional language and English as a language of education have also influenced this language, Lepcha.

It is remarkable to find that the Lepchas have preserved their language from all sorts of outside influences, in the face of so many languages surrounding them. To a large extent the language is the same to day as it was during the days of Hodgson and Mainwaring. Only one form of speech is found throughout the area. No positive evidence of the existence of important dialect variations could be gathered. The only thing that may be dying out is the practive of using their original orthography which is of course quite defective even though very easy to pick up.

#### ORTHOGRAPHY-ITS UTILITY

Sikkim Raja Chakdor Namgye (born 1686) is supposed to have designed the Lepcha alphabet. 10 There are separate letters for all the voiced stop aspirates even though the occurences of those stops are very rare in the actual speech. As these are no voiced aspirates, we do not find any symbols for them. The Raja must have clearly studied the distributional pattern of the sounds before evolving the scripts. He has noticed that only certain consonants occur in the word final position and so he has evolved certain compound letters with subscripts for the final consonants. He has failed only in vowels. For example, the words 'be' (carry on), 'bī' (snake) and 'bī' (bundle) are all written in the same way as 'bu' which is quite misleading. Since central vowels occur more frequently in the language, the confusion is all the more.

Adequate alterations with some sub-scripts could develop the indigeneous writing system of Lepohas to a great extent.

#### INFORMANTS-ACKNOWLEDGEMENT

As has been already stated, this investigation was carried out mainly in the Kalimpong area with the help of many teachers and other officials. In this connection this writer wishes to express his deep gratitude to Rev. P. S. Targain of Kalimpong who was from the beginning very helpful by way of discussing the linguistic problems, history of people and finding out suitable informants. He was also of the opinion that there was only one dialect of Lepcha locally known as Rong. He further added that the nomenclature need not be changed now as the term 'Lepcha' has come to stay and has become popular among others. He suggested that the language could be mentioned as Rong/Lepcha as has been done in the Linguistic Survey of India. This investigator found the same views prevalent among many other knowledgeable speakers also.

Mr. A. J. Bongong who was requested by Rev. Targain, gladly acted as the informant. Mr. Bongong.

who is in his sixties, was very co-operative and had been in Government Service for a long time. The keen interest shown by him is worth praising.

#### Conclusion

This investigation has proved some of the observations made by Prof. Kenow to be correct. He has pointed out the following interesting features.

- (1) The tendency to distinguish between such nouns as denote animate beings and such as are the names of inanimate things.
- (2) The agreement of numerals very closely with those in use in Kuki-Chin group.
- (3) The wide-spread use of prefix/a-/as in Kuki-Chin, and that of/ka-/in Naga and Bodo group.
- (4) Preservation of prefixes as independent syllables.
  - (5) The counting of higher number in twenties.
  - (6) Use of double negative as in Gurung and Murmi
  - (7) Non-pronominalization of verbs.

All these features are prevalent even to day and Hodgson was correct to say that Lepoha is a typical dialect of the Non-Pronominalized type. The recent reclassification done by Robert Shafer has been discussed in another work of this author on Kanauri 18, to be published by this office. As far as Lepoha is concerned, Shafer has put it under Naga languages. Unless and until all those Naga languages are studied thoroughly one will not be in a position to confirm his view. In the absence of any such work it would be unscientific at present to comment upon his remarks.

We might close this discussion with the following points:

- (1) There are no dialectal variations in this language and the language to day is the same as it was before when Col. Mainwaring prepared his grammar. As such, the analysis presented in the following pages does not differ from his work.
- (2) Shaffer's classification could not be verified at present for the circumstances explained above.
- (3) Tibeto-Burman characters are still preserved in this language, as the morphological section in the following pages will show.
- (4) Almost every Lepcha is a bilingual and he has preserved his language in spite of so many languages surrounding it and it should be called Lepcha as they themselves prefer this term to Rong.

<sup>1</sup>ºSee the introduction and conclusion.

#### (A) PHONOLOGY

### Phonemic Inventory

Vowals

All these vowels have their long units also. Exception is made regarding the back vowel o which occurs always with the length.

#### Phonetic Descriptions:

i.e. and a are the front vowels and i and o are the central vowels while the rest are the back vowels. i i and u are the high vowels; e e o and 5 are mid vowels; and a are the low vowels.

Some examples showing the contrasting distribution of these vowels:

(1) i contrasting with ī

li 'house'

bi 'snake'

(2) i contrasting with

'snake' bī be 'carry'

i contrasting with e

'strength' oīt

'stab' cet

e constrasting with e

vem 'song'

ven 'tremble'

o contrasting with u and o

'bov' 7**7**0

'juice' uŋ

fon 'green'

#### Consonant Phonemes:

Stops: p(p') b t (t') d t d k g

Affricates : c i

Fricatives: fvsszzh

Nasals: munn

Laterals: 11

Trill: r

Semivowel: y

It may be interesting to note that there are no aspirated stops with the exception of t' and p' which occur rarely. The frequency of these phonemes are much limited. Even though the traditional orthography

provides scripts for k' and c', we do not get them in the actual speech.

All these phonemes occur in the initial and medial positions of the words except | which occurs in the other two positions. p. t, t, k, g, c, m, n, n, n, l, land r occur in the final position also.

The following chart explains the distribution of the phonemes as well as their contrastive nature :

|    | on.           | _                | Media                         |                             | Fi           | nal              |
|----|---------------|------------------|-------------------------------|-----------------------------|--------------|------------------|
| em | e Initi       |                  |                               |                             |              |                  |
| p  | po            | 'bamboo'         | api                           | 'bark'                      | zup          | 'do'             |
| p' | p'ilnu        | 'go away'        | nimp' et                      |                             |              |                  |
| b  | bokī          | 'navel'          | aboŋ                          | 'm outh                     |              |                  |
| ť, | t on          | 'drink'          | atun                          | 'skin'                      | alīt         | 'heart'          |
| t  |               |                  | at'yak                        | 'head'                      |              |                  |
| ₫  | <u>d</u> emik | 'key'            | adā                           | 'bed stead                  |              |                  |
| ţ  | tit           | 'comb'           | kanţōŋ                        | 'foot'                      | lit 'ov      | erflow'          |
| ď  | dōm           | 'box'            | kandan                        | 'mustard'                   |              |                  |
| k  | kirgī         | 'chest'          | akī                           | 'arm'                       | amik         | 'eye'            |
| g  | get           | 'vulture'        | kirgī                         | 'chest'                     | bög          | 'dip'            |
| c  | oalam         | 'orange'         | acom                          | 'hair'                      | maric        | 'black<br>paper' |
| j  | jok           | 'wide'           | ajyom                         | 'easy'                      |              |                  |
| f  | fo            | 'bird'           | affo                          | 'tooth'                     |              |                  |
| v  | ٧ì            | 'blood'          | aven                          | 'bachelor'                  |              |                  |
| 8  | sini          | 'day'            | $m\overline{i}ss\overline{i}$ | 'body'                      |              |                  |
| ş  | şyoŋ          | 'spread'         | oosyen                        | 'crocodile                  |              |                  |
| Z  | zu            | 'boiled<br>rice' | kize                          | 'spinning<br>wh <b>eel'</b> |              |                  |
| 7  | zer           | 'gold'           | kuzi                          | 'dog'                       |              |                  |
| ì  | hī            | 'he'             | sohār                         | 'star'                      |              |                  |
| 1  | n mi          | 'fire'           | amik                          | 'eye'                       | abam         | 'bud'            |
| ]  | u nvet        | 'two'            |                               |                             | gyōn         | 'tease'          |
| 1  | դ դս          | 'fish'           | Iŋā                           | 'child'                     | poŋ          | 'stem'           |
|    | l lavv        | o 'moon'         | alīt                          | 'heart'                     | mil          | 'down'           |
|    | ]             |                  | talu                          | 'mat'                       | a <u>d</u> u |                  |
|    | r roŋ         | 'wait'           | aroņ                          |                             |              | 'shed'           |

|    | •             | kbu              |                               | body                        | ,•           |                  |

#### (B) MORPHOLOGY

Number

There are two numbers viz., singular and plural. The suffix generally used to denote plurality is 'son'

|       |         |             | 'fruita' |
|-------|---------|-------------|----------|
| pot   | 'fruit' | : pot soŋ   |          |
| moro  | 'man'   | : more son  | 'men'    |
| kusvu | 'dog'   | : kuşyu şoŋ | 'dogs'   |

In case of certain personal nouns, the suffix 'pon' is nsed.

| ayu | Sg.<br>'you' | : ayupoŋ  | Pl.<br>'you' |
|-----|--------------|-----------|--------------|
| are | 'this'       | : arepon  | 'shese'      |
| ore | 'that'       | ; ore por | 'those'      |

There is no dual form in this language. If necessary it is denoted by postpositioning the form 'nyet' which means 'two'.

ayu nyet 'you-two'

Sometimes the plural suffix is not used and the meaning is understood by the context.

e. g. 59 stet 'How many boy (s)'

#### Gender

There is a two-fold distinction viz. animate and inanimate. Different words meaning male or female are used to indicate the sex.

'tegri' is used for human masculine beings while 'ti yi' is used for feminine beings. The postposition 'bī' is used for non-human masculine beings and 'mot' for opposite sex.

hik bi 'cock'

#### Personal Pronouns

| Person    | Singular     | Plur             | ral                            |  |
|-----------|--------------|------------------|--------------------------------|--|
| I         | go           | каупрод          | (both inclusive and exclusive) |  |
| 11        | ho (Inf.)    | ayupoŋ           | ·                              |  |
|           | ayu (Hon.)   | ayu nyet         | (dual)                         |  |
| III Masc. | hi           | hayu<br>hayu nye | et (dual)                      |  |
| Fem.      | hī           | -do-             |                                |  |
| Neu.      | are (prox.)  | arepon           |                                |  |
| (Demons   | ore (remote) | orepon           |                                |  |

It may be noted that there are no separate forms for the dual number like some other pronominalized languages. The most important feature of the Munda influence among the Himalayan languages, i.e. the existence of two forms for the first person plural, one including and the other excluding the addressee, is also absent in Lepcha.

When these pronouns take accusative and genetive suffixes they undergo the following changes.

| Person         | Genetive               |       |   | Accusative                     |                       |
|----------------|------------------------|-------|---|--------------------------------|-----------------------|
|                | Singular               |       | Plural                                  | Singular                       | Plural                |
| 3              | kosisa                 |       | kayusa                                  | kasam                          | kayum                 |
| II             | ayusa                  | adosr | ayusa                                   | ayum                           | ayum                  |
| III            |                        |       |   |                                |                       |
| M.<br>F.<br>N. | hadosā<br>-do-<br>-do- |       | hayusa<br>-d <b>o-</b><br>-d <b>o</b> - | ha <u>d</u> om<br>-do-<br>-do- | huyum<br>-do-<br>-do- |

#### Demonstrative

As has been already given 'are' and 'ore' are the two demonstrative pronouns meaning 'this' and 'that' respectively. One more from 'pere', which is rarely used, means 'very far way' 'a' and 'o' are also used sometimes as abriviated forms.

#### Interrogatives :

Following is the list of interrogatives of Lepcha.

| åп      | what'  |  |
|---------|--------|--|
| tu      | 'who'  |  |
| sata    | 'when  |  |
| saba    | where  |  |
| sare    | 'which |  |
| sa tom  | 'how'  |  |
| sumatno | 'why'  |  |

The interrogative tu 'who' is conjugated in the same manner in which other personal pronouns are also conjugated.

| tu    | 'who'    |  |
|-------|----------|--|
| tu-m  |          |  |
| tu-no | by whom' |  |

#### Case suffixes

#### Accusative

Generally no suffix is used for the accusative case. From the context the object is understood.

Example

hi apot gat 'she wants fruit'

Otherwise, the suffix/-re/ is used.

Example

zure hinan zuk 'the rice was occoked by her'

#### Dative

/lem/ is the suffix.

alyu 1em 'te the cat'
gurun 1em 'to Gurung'

In case of pronouns, the accusative form is used.

Example

ho hadom bi fat 'you gave her'

#### Instrumental

The postposition dep 'with' is used as a form of associative instrumental case suffix.

hi kosi dep di 'he came with me'

The suffix sa is used as a form of agentive instrumental case suffix.

pan ting sa with the stick' lòsna with the stone

#### Ablative

There are two forms

1. /-no/ 'from' 'by'
2. /-nan/ 'by'

#### Example

hayu lino dyam 'they come from the house'

are gurunnan sī 'this was seen by Gurung'

Agentive Nominative:

The suffix /-no/ is used as the agentive nominative case suffix.

Example

adom gono bak him I-by beat 'he is beaten by me'

Genetive :

The suffix is /-sa/

Example

hadosa co
'his book'
ceriysa co
'Cherring's book'

Adjectives :

Adjectives are formed by adding the prefix /a-/ to the base forms.

Example

dum 'to be white'
adum 'white (adj.)
hru 'to be hot'
ahrum 'hot'

The prefix /a=/ is again dropped when the adjective is preceded by a noun.

a hrum 'hot'
un hrum 'hot water'

When a noun acts as an adjective the prefix /a-/ is dropped if it is followed by another noun.

amik 'eye'
mik lop 'eye lid'
mik myun 'eye brow'

Verbal Nouns:

The suffix /-bo/ is added to the verbal base to make the verbal nouns.

māt 'to do'
mātbo 'doer'
zīik 'to work'
zūkbo 'worker'

Numerals:

The higher numbers are counted in twenties as in other Himalayan languages.

ka 'twenty'
ka nyet 'forty'
twenty two

Ordinals are formed by adding the suffix /bu/

kat bu 'first'
nyet bu 'second'
sam bu 'third'

Multiplications are formed by prefixing /po-/

po kat 'once'
po nyet 'twice'
pa sam 'thrice'

Numeral adverbs are formed by adding the suffix /sa/ to the ordinals.

kat bu sa 'firstly'
nyet bu sa 'secondly'

Distributions are formed by infixing /-sa-/

katsakat 'one by one' nyetsanyet 'two by two'

Verbs:

There is no pronominalization of verbs according to the person and gender.

Example 'I am' gum go 'he is' hī gum 'vou are' avu gum 'I go' noŋ go 'he goes' hī noŋ 'you go' noŋ ayu

There is no distinction between present and past tenses. The same forms could be used for past tense also.

go non 'I went' hi non 'he went', etc.

/so/ is used for future tense.

go non so 'I shall go' hī non so 'he will go', etc.

/det/ is added to the present continuous tense.

go non  $\det$  'I am going' hi non  $\det$  'he was going'

/ba/ is used for past continuous tense.

go non det ba 'I was going'

go non det ba 'I was going' hi non det ba 'he was going'

/pu/ is added for the future continuous.

go non so pu 'I shall be going' hi non so pu 'he will be going'

/fat/ is also used for past tense.

bi fat 'I gave' si fat 'he saw' li fat 'told' In many occasions/fat/is not used and the base forms alone are used as 'bi' 'si' 'li' etc.

The final /-m/ of the base gum 'to be' is also used with verbal forms to denote the present tense.

baka>bakam 'beats'
ciŋa>ciŋam 'think'
dya>dyam 'come'
ula>ulam 'wants'

#### Adverbs :

The affix/is/is added to the verbal root.

zenia 'to be bad'
zenia 'worse'
tim 'to be strong'
timla 'strongly'
nok 'to be black'
nokla 'blackly'

Some are formed by reduplication of the noun form.

nam 'year'
nam nam 'yearly'
tōk 'drop'

tõk tõk

'drop by drop'

#### Conjunction:

/sa/is used in the meaning of 'and'

Example

hī sa go 'he and I'

Conjunctions are generally effected by way of using the conjunctive particles as in Dravidian languages.

hī non ban zuk
he having gone did
'he went and did it'

#### Causative :

/kon/is added to the verb base.

hadom dit kon him come-allow 'Let him come in'

• The infix/-y-/ is also sometimes used.

non 'to go'
nyom 'to cause to go'

#### Negative :

Double negatives are used in Lepoha. While/ma-/is prefixed,/-ne/is suffixed.

ubi manul ne
there not go not
'Do not go there'
go ubi manonne
'I do not go there'

In the negative imperative forms 'ne' becomes nun.

mali nun 'do not speak'

#### (O) SYNTEX

The usual order of the sentence is as the following:
Subject + Object + Predicate

#### Example

go hadom bak I him beat 'I beat him'

The subject is followed by the attributes. This is an important distinction that is made in Lepcha from Kanauri, a prominent member of pronominalized group. In Kanauri attributes always precede the nouns which they qualify. In Lepcha it is quite reverse.

#### Example

1. lon sam
stone three
'three stones'

2. moro agyap men many 'many men'

However, pronouns with genetive suffix and the demonstrative pronouns precede the nouns they qualify, whenever there is such an occasion.

#### Example

1. kosisa co 'my book'

2. cerinsa co 'Cherring's book'

3. are centere 'this table'

4. ore 50 that boy'

Articles follow the nouns they qualify, even though the occurence of an article is not always common.

#### Example

1. hī soton kat sot he tiger-one killed 'he killed one tiger'

2. zure hīnan zuk rice-the she-by cooked 'she cooked the rice'

The genetive case suffix need not always be used. By putting two nouns together without any case suffix, the meaning of possession is understood from the context.

#### Example

s-til 'egg' fo 'bird' foti 'bird's egg'

| ( 12  | 8 )            |                       |
|---|----------------|-----------------------|

# B-NOTE ON INVESTIGATIONS ON LIMBU SPEECH

by

## SM. KRISHNA CHOWDHURY

Investigations on Limbu, a speech of the Pronominalized sub-group of speeches of the Himalayan Group of the Tibeto-Burman Sub-family of languages were done in the District of Darjeeling by Registrar General. By this note it is intended to acquaint the reader with the linguistic situation of one of the structurally significant Himalayan speeches which under the increasing pressure of the surrounding Indo-Aryan Nepali speech have of late been showing signs of a switch over. Limbu ferences are for the most part limited to lexical items only, while the language use within the family to be Bilinguals of the co-ordinate Bilingual level and the investigator has reasons to forecast an eventual total switch over to Nepali within not too distant feature. The note here deals with broad, data collected by the investigator and in the final analysis of which she is still busy. Shris B. Ray District Census Handbook and we are thankful to him for giving us the opportunity of publishing this note from our unit.

B. C. Nigam, Linguist to the Registrar General, India

Mongoloid) people. The meaning or the derivation of the word 'Limbu' has been known as: 'Limbu(=bow), c.f. libong (=archer)'.

## The Position of the Limbu Language:

Grierson's Linguistic Survey of India locates the position of Limbu in the language world in the following terms. Limbu belongs to the Eastern Sub-Group of Pronominalized (froup of Himalayan languages/dialects of the Tibeto-Burman Family of languages. This classification of Limbu is due to B.H. Hodgson who divided Himalayan languages/ dialects into two groups namely complex or Pronominalized' and simple or Non-Pronominalized' which will be explained presently. The same classification was supported by Prof. Sten Konow and later on accepted by Grierson in his Linguistic Survey of India (L.S.i.). Other member dialects of the Himalayan group are Dhimal, Thami, Yakha, Khambu (with 16 dislects), Rai Vayu, Chepang, Kusunda, Bhramu and Thaksya. Since the Eastern group is confined to Eastern Nepal and its neighbourhood, figures are available for only a few of them and these refer only to settlers in Darjeeling and theresbouts. Census enumeration therefore gives incomplete figures of number of speakers. This difficulty is not present with respect to the Western group of Pronominalized languages. Pronominalized Himalayan dialects are much more complex than Non-Pronominalized Himalayan dialets. Eastern Nepal, the home of the Bastern group of complex Pronominalized languages comprises Khambuwan, or the country of the Khambus, and Limbuwan, or the country of the Limbus. Limbuwan is

The purpose of the present note is to provide a brief grammatical sketch of the Limbu dialect as it is spoken in Darjeeling district. A long series of languages (119 in number according to 1961 Census<sup>1</sup>) representing all the families of Indian languages are spoken in the district. Among them the numerically most important languages are Nepali (369,130), Bengali (115, 172) and Hindi (47,842) belonging to the Indo-Aryan Family, Tibetan (7,679) and Lepcha (8,171) of the Tibeto-Burman Family, Santali (1.993) and Munda (5.633) of the Austric Family, and Kurukh/Oraon (17,593) of the Dravidian Family. In comparison with these languages Limbu (260 speakers according to last Census ) is numerically insignificant today. (According to the Census of India, 1961, only 0.78 per cent of the total population of India are speakers of the Tibeto-Chinese languages 2). Nonetheless, as the present attempt will show, Limbuspeech representing a significant section of the well known Himalayan group of languages of the Great Tibeto-Chinese Family has interesting points of consideration in respect of the current linguistic situation of its speakers.

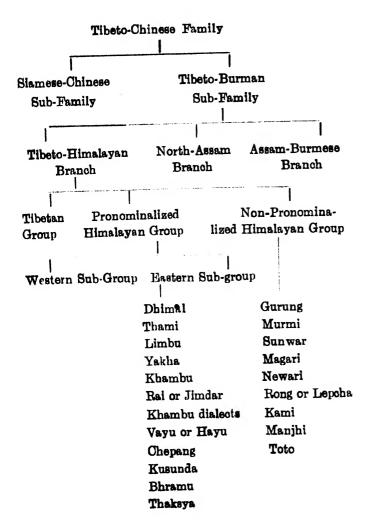

According to Limbu tradition, their original homeland, called the Limbuwan or the country of the Limbus was in Eastern Nepal from which Darjeeling district received settlers. The Limbus feel that they belong to the bigger world of the Kirāta (Indo-

<sup>&</sup>lt;sup>2</sup>Census of India 1961 (Vol. XVI) West Bengal & Sikkim. Pt. II-o(i)

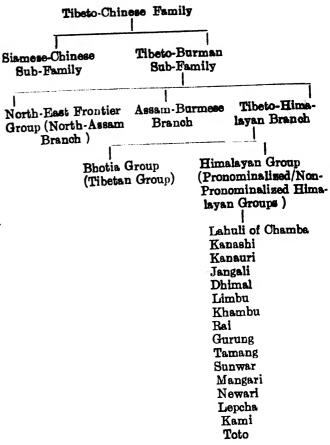

<sup>\*</sup>Census of India 1961, Vol. I. Pt. II-C(ii)-Language Tables.

nearer to Darjeeling district, which received an overflow of Limbus from Limbuwan. Dhimal, Bahing (a Khambu dialect) and Vayu have been described by Hodgson at considerable length. Limbu has a grammar written by Colonel Senior, but unfortunately it is no longer available. Dhimal and Thami are comparatively simple languages. Limbu is a dialect of much more complex character than Dhimal and Thami. And Yakha is in many respects closely related to Limbu. The remaining dialects are too unsatisfactorily known. In fact there are no returns of the speakers of the remaining dialects of the Eastern group of Pronominalized languages in the 1961 Census.

Classification of Himalayan Group of languages according to L. S. I. is as follows:

Classification of Himalayan Group of languages done in Census of India, 1961, Language Tables, is mainly based on the classification in L. S. I. The following table will represent this classification.

Gist of Grierson's principal observations on the characteristics of Limbu:

- 1. Pronominalization: the use of short forms of the personal pronouns as prefixes—the use of these prefixes is extensive and includes use before verbs, in order to distinguish between the subject and the object. This characteristic is of greater interest than the others. In this respect Limbu agrees with Bodo and still more with the Kuki-Chin languages. That is how "Limbu forms a link in the chain connecting the Tibetar and Himalayan dialects with the Tibeto-Burmar Languages of Assam and Burma."\*
- 2. When the subject of a verb is of the first person it is often indicated by suffixing '—ang', an abbreviate form of the pronoun 'anga' (=1).
- 3. Use of the double forms of the dual and the plural of the first personal pronoun.
- 4. The higher numbers are counted in tens as i Tibetan.

Grierson sums up his view of the position of Limbu withe observation quoted.

Our study of the Limbu dialect has some justification which is obvious from the above description.

In the 1961 Census 5,418 speakers returned Limbu as their mother tongue. The main concentration of them is in Sikkim where 4,955 speakers were enumerated. Only 335 (260 from Darjeeling district and 75 from Jalpaiguri district) and 128 speakers were returned from West Bengal and Assam respectively. Hence Darjeeling and in that district Pulbazar-Bijanbari area known to have some concentration of Limbu speakers proved natural choice for field investigation.

Proceeding to Darjeeling town the first Limbu gentleman to be made acquaintance of was Shri Mahananda Subba, Advocate. But Shri Subba had adopted Nepali language and declared himself not to be a Limbu speaker. This was seen later to be just an instance of a general trend among Limbu people, especially among the younger generations of them. However through Shri Subba's courtesy a Limbu informant named Shri Jashang Limbu was contacted. Shri Jashang Limbu aged about 45 years is an ex-service man, now employed as a plumber of Darjeeling Municipality. He is bilingual, speaking both Limbu and Nepali, Nonethe less he was said to be quite a reliable source of information on the Limbu language. He was the principal informant throughout both of my investigational tripsthe first in 1965 and the second in 1967.

The second place of field work, Bijanbari, a valley is 46 Km. from Darjeeling town. Shri C. T. Bhutia, B. D. O, Bijanbari and some members of his staff were very co-operative and helpful. Special mention may be made here of Smt. Maya Thapa, Smt. Shanta Subba and Smt. Afong Chettri. Shri Mohan Subba (aged 25 years, Secretary, Bijanbari Anchal Panchayat, was the first informant to be contacted at Bijanbari-Pulbazar locality. He had read upto class 1X. He was co-operative and courteous. But having fallen in with the common tendency to adopt Nepali as the general medium of communication except with old parents and relations his Limbu vocabulary was rather limited.

Then the following informants were available: Shri Amar Subba (25), a local teacher, non-Matriculate, some Limbu persons (of various ages) of Bijanbari-Pulbazar bustees. Most of them were butchers by profession and the rest were either labourers of teagardens or cultivators. Some persons of the Limbu bustee on the outskirts of Darjeeling town and one man of Ghoom were met. During the second tour of investigation besides the above mentioned places Sukhiapokri locality was visited.

Educated Limbu speakers are rare. This makes an especially difficult job of the collection of extra-linguistic materials. Fortunately towards the end of the second trip acquaintance was made of a bright Limbu youngman from Sikkim, Shri Sukraj Subba, a senior student of

Jalpaiguri Polytechnic. His valuable services were however available only for the few days of his sojourn at Darjeeling.\*

As mentioned earlier our field experience of the actual situation in respect of Limbus is that they tend to either adopt Nepali as their mother tongue—at least declare so during census enumeration-or continue to be in a state of high level of bilingualism by maintaining their verbal communication in Nepali outside their families and preserving Limbu as a medium of conversation within their homes. Further, even this phenomenon appears to be a transitional stage of the process of complete conversion of the younger or the more urbanized and sophisticated sections of the Limbus to Nepali. The figures of 1951 and 1961 Censuses provide evidence of this tendency. The increasing trend of Limbu speakers in Darjeeling district between 1901 and 1951 precipitously collapses to the surprisingly low 1961 figure of 260. (Similar trend is observable with respect to other languages such as Lepcha, Mangari, Newari, Rai and Tamang). And while the number of Limbu speakers in India drastically fell from 35,583 in 1951 to 5,418 in 1961, that of Nepali speakers rose from 421,688 to 1'021,102 between the same Censuses. As will be evident from the census figures given below. similar changes occurred in Sikkim between Limbu and Nepali speakers.

No. of Speakers in

| Year | Mother tongue | India     | West<br>Bengal | Sikkim | Darjee-<br>ling |  |  |
|------|---------------|-----------|----------------|--------|-----------------|--|--|
| 1951 | Limbu         | 85,583    | 20,092         | 15,491 | 20,092          |  |  |
| 1961 | Limbu         | 5,418     | 835            | 4,955  | 260             |  |  |
| 1951 | Nepali        | 421,688   | 174,020        | 88,542 | 88,958          |  |  |
| 1961 | Nepali        | 1,021,102 | 282,877        | 74,359 | 369,130         |  |  |

## Census Returns of Limbu Speakers in Darjeeling District:

| Year | No. of Speakers |
|------|-----------------|
| 1901 | 14,805          |
| 1911 | 18,804          |
| 1921 | 14,191          |
| 1981 | 16,288          |
| 1941 | 17,808          |
| 1951 | 20,092          |
| 1961 | 260             |

It may be found interesting to have a look at some Bilingualism figures obtained from census reports in respect of Darjeeling District.

The writer is morally beholden to these affectionate ladies for their personal care of her.

<sup>\*</sup>I am thankful to all my informants, and officials and other gentlemen and ladies who co-operated with or helped me in my field work.

## \* Bilingualism Chart: (Darjeeling District)

| Mother Total No. of speakers  1 2                     |  | Total no. of speakers speaking NEPALI as a subsidiary language to tha shown in col. I in |  |  |
|---|--|--|--|--|
| Lepcha<br>Mangari<br>Newari<br>Rai<br>Tamang<br>Limbu | 1951<br>13,894<br>19,874<br>14,818<br>64,784<br>49,780<br>20,092 | 1961<br>8,171<br>58<br>19<br>238<br>761<br>260   | 1951<br>12,075<br>17,428<br>13,412<br>58,875<br>44,929<br>17,838 | 1961<br>4,898<br>48<br>10<br>161<br>592<br>Subsidiary<br>languages<br>Bengali—(179)<br>Hindi—(1)<br>Nepali—Nil |

From the table above it may be noted that whereas nearly 89 per cent of Limbu speakers returned Nepali as their subsidiary language in the 1951 census, the same subsidiary language has not been returned by any one of the small number of Limbu speakers in the last Census. Although the figures are much too negligible for any comment yet it is conceivable that the small number of Limbus conversant with Nepali, considered it useful to name only languages other than Nepali as their subsidiary language.

However Nepali is considered as the prestige language in Darjeeling and is given some official recognition. It is adopted by non-Nepali speakers for the sake of getting advantages in employment, education and in other spheres of life. The relatively minor languages have thus been overwhelmed by Nepali. But these minor languages taken together are still numerically not insignificant, although they may be so in tuture should the present trend continue.

relation between Limbu and Nepali is reflected in the examples of Nepali loan words obtaining in Limbu. These loan words include, among other things, the objects found in the plains or having their origin in the plains. We shall give some illustratious of them in the list of material at the end of this note.

## PHONEMIC INVENTORY:

Limbu language consists of the following vowel and consonant phonemes:

#### Vowels:

#### Consonants:

| Consona          |            | labial | Den    | tal    | Alveolar | •      | Palatal | Vela           | ır | Glottal |
|------------------|------------|--------|--------|--------|----------|--------|---------|----------------|----|---------|
|                  | Voice-     | Voiced | Voice- | Voiced | Voiced   | Voice- | Voiced  | Voice-<br>less |    | Voiced  |
| Stop             | р          | b      | t      | d      |          | C      | j       | k              | g  |         |
| Aspirate<br>Stop | ed         |        | th     |        |          | oh     |         | kh             |    | h       |
| Fricativ         | 7 <b>6</b> |        | B      |        |          | ś      |         |                | ŋ  |         |
| Nasal            |            | m      |        |        | n        |        |         |                | ซ  |         |
| Lateral          |            |        |        |        | 1        |        |         |                |    |         |
| Trill            |            |        |        |        | r        |        |         |                |    |         |
| Semi-ve          | owel       | W      |        |        |          |        | y       |                |    |         |

#### Vowels:

There are seven vowels of which three are front and three, back, one is central vowel. The front vowels are distinguished by differences in height as high, mid and low. Similar is the case with the back vowels. The central vowel is low. Thus there are seven contrastive types of vowel phonemes according to height and position.

## Description:

The front unrounded short vowels, /i/, /e/, and /se/ are high, mid and low respectively. /a/ is a low central unrounded vowel. The back rounded short vowels, /u/, /o/ and /ɔ/ are high, mid and low respectively.

#### Distribution:

All vowels occur freely, except /m/ which does not

<sup>\*</sup>Census of India 1961, Vol. I. Pt. II-C (ii)-Language

Census of India Paper No. 1 of 1954—Language Tables. Census of India 1961 (Vol. XVI), West Bengal and Sikkim,

<sup>(</sup>Pt. II-C (ii). District Handbook (Darjeeling), Census 1951, West Bengal.

cocur in the final position. Frequency of occurrance of /se/ is very low. An illustrative table of the distribution of vowels is given below:

| Vowels       | Initial                | Medial                 | Final               |
|--------------|------------------------|------------------------|---------------------|
| / <b>i</b> / | /iŋma/<br>'to remove'  | /khini/<br>'you' (pl). | /ani/               |
| /e/          | /eŋmal/<br>'to break'  | /kesemba/              | /nine/              |
| /æ/          | /sepma/<br>'to fan'    | /tælok/<br>'field'     |                     |
| / <b>a</b> / | /attaŋ/<br>'where'     | /kham/<br>'earth'      | /mona/              |
| / <b>u/</b>  | /ukma/<br>'to scratch' | /cukpa/<br>'little'    | /pu/<br>'bird'      |
| /o/          | /ośikpa/<br>'serpant'  | /sokma/<br>'to show'   | /makho/<br>'garlio' |
| /ɔ/          | /okma/                 | /tokat/<br>'stick'     | /samlo/             |

#### Contrastive Pairs:

/i/÷/e/÷/æ/
/imma/ 'to sleep'÷/emma/ 'to bake'÷/æŋma/ 'to
/e/÷/æ/
/epma/ 'to laugh'÷/æpma/ 'to fan'
/æ/÷/a/
/æŋma/ 'to split'÷/aŋ/ 'also'
/u/÷/o/
/upma/ 'to call'÷/opma/ 'to bite'
/o/÷/ɔ/
/oŋma/ 'to split bamboo'÷/ɔŋma/ 'to peel skin'.

Examples of vowel sequences commonly used in Limbu are given below:

| /kujai/ | 'bad       |
|---------|------------|
| /coit/  | 'creation' |
| /kouli/ | 'verandah' |

| /khiu/    | gbee'          |
|-----------|----------------|
| /iepma/   | 'to stand'     |
| /iapamma/ | 'to pity'      |
| /ionse/   | net            |
| /iuppa/   | 'ailver'       |
| /iomba/   | 'big', 'large' |
| /thean/   | 'why'          |
| /keopa/   | 'light'        |
| /ain/     | 'today'        |
| /wa-a/    | 'I was'        |
| /lao/     | 'street'       |
| /nuet/    | 'liver'        |
| /oesma/   | 'other'        |

#### Consonants:

There are twenty two consonants in Limbu. According to places of articulation they can be classified as Bi-labial, Dental, Alveolar, Palatal, Velar and Glottal and, according to manner of articulation, Stop, Fricative, Nasal, Lateral and Trill. The Limbu stops again can be divided into aspirated and unaspirated consonants. /w/ and /y/ are semi-vowels.

## Description :

The voiced aspirated stope are /bh/, /dh/ and /gh/ of which /bh/ and /dh/ are found to occur in 'free variation' with the voiceless aspirated stops /ph/ and /th/ in a few instances. These phonemes may be described as marginal phonemes. It is to be noted that the voiced aspirated stops are used very infrequently. The description of other consonant phenemes is provided in the consonant chart (P. 136).

#### Distribution :

Consonants in the final position occur very rarely. Only /p/, /t/, /k/, /m/, /n/, /n/ and /n/ occur in the final position, but with a low frequency. /bh/, /dh/ and /gh/ are found in the medial position only. Distribution of the consonant phonemes according to their position is given in the following chart:

| Conso-<br>nants      | Initial   | Medial   | Final             |
|----------------------|---|--|-------------------|
| /p/<br>/b/<br>/ph/   | /poma/ 'to grow' /boma/ 'error' /pha/ 'bamboo'      | /sapla/ 'book' /thauben/ 'young boy' /takpha/ 'rank'       | /hop/ 'empty, no' |
| /t/<br>/t/<br>/d/    | /tiŋ/ 'nail'<br>/daŋwa/ 'master'                    | /attan/ 'where'<br>/tamduke/ 'broom'                       | /tet/ 'cloth'     |
| / <b>t</b> h/<br>/c/ | /thik/ 'one'<br>/cigek/ 'tight'                     | /thiathoma/ 'to spit'<br>/śikeoba/ 'ant'                   |                   |
| /j/<br>/ch/          | /jon/ 'summit' /chen/ 'large'                       | /tajeŋma/ 'to speek'<br>/chana/ 'roof'                     | () ( <b>5</b>     |

'fiftytwo'

## MORPHOLOGY

#### Number:

There are two numbers in Limbu, viz, singular and plural. The plural marker is generally /-ha/ suffix. Suffix /-si/ is sometimes used as a plural marker, e.g.

 $/k/ \div /kh/ - /kap/$ 

 $/s/ \div /\dot{s}/ - /sem/$ 

/m/ ÷ /n/ — /min/

 $/\eta/ \div /n/ - /ka\eta/$ 

 $/r/ \div /1/ - /rak/$ 

/nanet/

| Giogulas  | Plural   |          |
|---|--|----------|
| Singular /hinja/ 'boy' /koco/ 'dog' /menchma/ 'gire' /mona/ 'man' | /hinjaha/ 'boyd'<br>/kocoha/ 'dog<br>/girls/<br>/menchmaha/ 'girls/<br>/manasi/ 'men | 9'<br>8' |

#### Gender:

/-pa/ and /-ba/ are markers used for Masculine gender, and /-ma/ is used for Feminine gender, e.g.

| Masculine  | Feminine   |
|--|--|
| /nusapa/ 'Younger brother' /kapoba/ 'old man' /koco/ 'dog' /hinja/ 'boy' | /nusama/ 'Younger sister' /kamuma/ 'old woman' /kocoma/ 'bitch' /hinjama/ 'girl' |

#### Case-Suffixes:

÷ /khapu/

÷ /sema/

÷ /nine/

÷ /kan/

÷ /lak/

÷ /namget/

Accusative—/-an/ and /-n/:

ash'

'oil'

'east'

'spear'

'to scatter'

'(I) get hurt'

/-an/ occurs after a consonant while /-n/ occurs after a vowel in a word, e.g.

/kulap an/ 'to the wing'
/mona-n/ 'to a man'
/sinbun-an/ 'to a tree'
/menchma-n/ 'to a girl'

## Instrumental-/-nu/:

/toti-nu/ 'with/by the axe'
/ana-nu/ 'by me'

## Ablative--/-mo/ and /-lam/:

When /-mo/ is suffixed to a noun the use of an unreleased /p/ is found in between the noun and the suffix, e.g.

/monapmo/ 'from a man'

/humepmo/ 'from him' /manalam/ 'from a man'

Genetive: -/-in/, /-le/~/-len/, /-re/~/-ren/, /-ille/:

/-in/--/hinjain/ 'of the boy'

/-le/~/-len/--/pule/~/pulen/ 'of the bird'

/-re/~/-ren/-/monare/~/monaren/ 'of the man'

/-ille/--/himille/ 'of the house'

/-ille/ suffix is less frequently used.

Locative-/-u/ and /-o/:

/-u/--/himmu/ 'in the house'

/-o/--/panbheo/ 'in the village'

There is no distinction in number in case-suffixes.

#### Post-positions:

Noun stems are sometimes followed by post-positions, e.g.

/khammo condho/ 'on the ground' (lit. in the ground on)

/lunille pesan/ 'near the stone' (lit. of the stone near)

/cuwa sigan/ 'in the water' (lit. the water in)

#### Pronouns:

|    | Singular                | Plural                                |
|----|-------------------------|---------------------------------------|
| I  | /aŋa/~/iŋa/'I'          | $/anige/\sim/ani/$ ,                  |
|    |                         | /anchi/ 'we'                          |
| II | /khene/~/hene/'You'     | $/\mathrm{kheni}/\sim/\mathrm{heni}/$ |
|    |                         | /khenchi/~/henchi/ 'you'              |
| Ш  | $/khune/\sim/hune/'he'$ | /khunchi/~/hunchi/,                   |
|    | •                       | $/khenha/\sim/henha/$ 'they'          |

Pronominal case-suffixes are the same as those used in Nouns. It is interesting to note that the use of pronominal prefixes, genetival in character, for all the persons is a special characteristic of Limbu. Likewise, Limbu is characterised by the special feature of Pronominalization in the nominal (specially in kinship terms) and verbal forms. Hence, it belongs to the Pronominalized group of Himalayan languages.

Prefixes /a-/, /ke-/ /and /ku-/ /are used to indicate 'my', 'your' and 'his' respectively. These prefixes are used in compound words. Some illustrations are given below:

| /ahuk/   | 'my hand'          |
|----------|--------------------|
| /amba/   | 'my father'        |
| /amphu/  | 'my elder brother' |
| /kemik/  | 'your eye'         |
| /kemma/  | 'your mother'      |
| /kesors/ | 'your spear'       |
| /kulaŋ/  | 'his foot'         |
| /kutet/  | 'his cloth'        |
| /hman /  | 'his child'        |

Sometimes pronominal prefixes are used with the post-positions also, e.g.

/kebesan/

'near you' (lit. of your near)

/kujondho/

'on it' (lit. of it on)

/kuegan/

'behind him' (lit. of his behind)

#### Demonstratives :

Demonstrative pronouns are of two types; proximate and remote, e.g.

Singular

Plural

Proximate—/kon/ 'this'

/konha/ 'these'

Remote-/khen/ 'that'

/khenha/ 'those'

The plural marker is not generally used in demonstrative pronouns when they are followed by nouns which indicate plurality.

#### Example:

| kon sapla/    | 'this book'    |
|---------------|----------------|
| /kon saplaba/ | 'these books'  |
| /khen bim/    | 'that house'   |
| /khen himha'  | 'those houses' |

#### Interogative :

Some interogative words in Limbu are given below:

| /thema/  | 'what'  |
|----------|---------|
| /hallen/ | 'whose' |
| /hat/    | 'who'   |
| /atille/ | 'whose' |
| /attin/  | 'which' |
| /atti/   | 'where' |
| /attan/  | 'where' |

#### Particles :

Particles in Limbu are of two kinds:

- (1) affirmative and (2) negative
- (1) Affirmative particle /-in/ is a bound form which is suffixed to the demonstratives or nouns for the sake of emphasis or definiteness.

#### Example:

/kon-in hinjs/ the boy (lit. the particular boy)
/khen pitma-in/ the cow (lit. the cow-particular)

(2) Negative particle is /men/~/me/. This is used independently or as bound forms.

#### Example:

/mona men/ 'no man'

#### Adjective :

Adjectives in Limbu can be divided into two classes:

(1) Attributive Adjective

## (2) Predicative Adjective

(1) Syntactically, attributives are used before the nouns.

/kerek na/ 'all fish'
/taphemba mona/ 'bad man'
/nuba hinjama/ 'beautiful girl'
/iollik lup/ 'many stones'

(2) Predicative adjectives are a class of adjectives which take a verb form in order to complete meaning.

#### Example

/khen himmin cukpa cok/ 'The house is small'.
/khen hinjamen carik nuba wa/ 'The girl is very beautiful'.

#### Comparatives :

Comparative adjectives are formed by words which are prefixed to the nouns. The degree of comparison from positive to superlative is indicated by those words. /cubet/~/chenna/ is used for comparative degree and /kaknule/~/ kereknule/ is used for superlative degree. The following are the examples:

Positive Comparative Superlative
/nuba/ 'good' /cubet ~ chenna nuba/ /kak-kereknule nuba/
/thumba/ 'strong' /cubet ~ chenna /kak-kereknule thumba/

#### Numerals :

Numerals in Limbu are used as adjectives. They are commonly followed by nouns. When nouns precede numerals usually they do not take any plural marker as suffix. Numerals can take both (1) cardinal and (2) ordinal forms.

## (1) Cardinals:

/lothik/~/thik/ 'one'; /necohi/ 'two';
/sumsi/ 'three'; /lisi/ 'four'; /nasi/ 'five';
/tuksi/ 'six'; /nusi/ 'seven'; /ietochi/ 'eight';
/phansi/ 'nine'; /thibon/ 'ten'; /thik thik/ 'eleven';
/nebn/ 'twenty'; /sumbon/ 'thirty'; /ligip/ 'forty';
/nagip/ 'fifty'; /kipthik/ 'one hundred';

#### (2) Ordinals:

Ordinals are formed by suffixing /-sigek/ to the base form, such as

/thik sigek/ 'first'; /lisigek/ 'fourth' and so on.

Multiplicatives are formed by the suffix /-len/ added to the base form.

#### Example

/thikley/ 'once'; /sumley/ 'thrice.'
Zero is expressed by /hop/ meaning 'nil or nothing'.

For fractionals sufficient information is not available. However, /Kobhrey/ means 'half.' Thus;

/lothik an kobbren/ 'one and a half.

#### Varb:

The verbal forms in Limbu are very much complicated in character. The pronominal affixes which occur as person markers play the major role in Limbu verbal pattern. A complete verb form consists of the following elements: Verb root+affixed personmarker+tense and/or aspect marker. Prefixes and suffixes are used more extensively in verbs than in nouns. Verb roots are of two types namely transitive and intransitive. Tense makers are formed with affixes which indicate the temporal categories such as (1) Present (2) Past and (3) Future.

## Example

Verb form = verb root + affixed person marker + tense and/or aspect marker.

 $\sqrt{ko}$  -/'to have'/kegottu/= ke-+ko+ttu)(ko-> -go-morpho-phonemically)

(=You have)

Here ke-=II person (Sg.) prefix

-ka- = verb root

-ttu-=pr, tense marker.

#### Verbal Inflexions:

Transitive Verb: Jook-'do'

#### Present Tense

|               | Singular | Plural               |
|---------------|----------|----------------------|
| I             | /coguŋ/  | /cogumbe/            |
| $\mathbf{II}$ | /kecogu/ | $/\infty$ gamme/     |
| III           | /cogu/   | / <b>mecog</b> u $/$ |
|               |          |                      |

#### Past Tense

| I   | /oogun/  | /cogumbe/ |
|-----|----------|-----------|
| II  | /kecogu/ | /kecogum/ |
| TTT | / 00g11/ | /mecogu/  |

#### Future Tense

| I   | /coguŋro/  | /cogumbero/ |
|-----|------------|-------------|
| II  | /kecoguro/ | /kecogumro/ |
| TTT | /ooguro/   | /mecoguro/  |

#### Present Continuous

| I  | /cogunro potta/  | /cogumbero pochige/  |
|----|------------------|----------------------|
| II | /kecoguro kebot/ | /kecogumro kebocchi/ |
| Ш  | /coguro pot/     | /mecoguro mebot/     |

#### Past Continuous

| I   | /coguero pecchan/   | /egidoocq oredmugoo/ |
|-----|---------------------|----------------------|
| II  | /kecoguro kebocche/ | /kecogumro kebocchi/ |
| TTT | /commo monhe/       | /mecognito mebacche/ |

#### Future Continuous

In Future Continuous the forms will be the same as in present continuous tense. Future indicative words may be used or, alternatively, the context of the speech as a whole will indicate future tense.

#### Jko-'have': base /kottu-/

|    |           | - MARCE   WORKS |
|----|-----------|-----------------|
|    | Singular  | Plural          |
| I  | /k ottun/ | /kɔttumbe/      |
| II | /kegottu/ | /kegottum/      |
| Ш  | /kottu/   | /megottu/       |

When the object is plural the different plural markers are used as follows:

| Singular |             | Plural        |
|----------|-------------|---------------|
| I        | /kottunsin/ | /kottumsige/  |
| II       | /kegottusi/ | /kegottumsim/ |
| III      | /kottusi/   | /megattusi/   |

The use of these forms in the sentence-order is illustrated below:

| /ana saplaha kottunsin/     | 'I have books'           |
|-----------------------------|--------------------------|
|                             | 'We have horses'         |
| /khene koccha kegottusi/    | 'You (eg.) have dogs'    |
| /kheni tetha kegottumsim/   | 'You (pl.) have clothes' |
| /khune saha kottusi/        | 'He has children'        |
| /khunchi saplaha megottusi/ | 'They have books'        |

#### Past Tense

In the past tense the verb /wa-/ 'be' is used in the sense of 'possession' in place of the verb /kɔ-/ 'have'. The verbal forms /wɔe/ (when the object is singular) and /mewɔe/ (when the object is plural) are used for all the three persons in singular and plural numbers. The subject takes possessive suffix. Illustrations are given below:

|    | Sing <b>u</b> lar           | Plural              |
|----|-----------------------------|---------------------|
| I  | (Sg. Obj.) /aŋxin woe/      | /anigen woe/        |
|    | (Pl. Obj.) /aŋain mewɔe/    | /anigen mewce/      |
| II | (Sg. Obj.) /khene-in woe/   | /kneni-in woe/      |
|    | (Pl. Obj.) /khene-in mewoe/ | /kheni-in mewoe/    |
| Ш  | (Sg. Obj.) /hune-in woe/    | /khunchi-in woe/    |
| •  | (Pl. Obj.) /hune-in mewse/  | /khunchi-in mew ze/ |
|    |                             |                     |

# Intransitive Verb: Jpek-'go'

#### Present Tense

| Singular   | Plural    |
|------------|-----------|
| I /peka/   | /pegige/  |
| II /pege/  | /pegimme/ |
| III /pek/  | /mebek/   |
| Past Tense |           |
| I /pegan/  | /pegine/  |
| II /kebe/  | /kebegi/  |
| III /pe/   | /mebe/    |

#### Future Tense

| I  | /pekaro/ | /pegigero/ |
|----|----------|------------|
| II | /kebero/ | /kebegero/ |
| Ш  | /pero/   | /mebero/   |

#### Present Continuous

| I /pekaro potta/  | /pegigero pocchige/ |
|-------------------|---------------------|
| II /kebero kebat/ | /kebegiro keboochi/ |
| III /pekro pot/   | /mebekro mebat/     |

## Past Continuous

| /pegapro prochan/    | /pegigero pocchipe/ |
|----------------------|---------------------|
| II /kebero kebooche/ | /kebegiro keboochi/ |
| III /pero pocobe/    | /mebero mebocche/   |

## Future Continuous

In future continuous the forms will be the same as in Present continuous tense. Future indicative words may be used, or, alternatively, the context of the speech as a Whole will indicate future tense.

#### Jwa-'be'

#### Present Tense

|     | Singular | Plural  |
|-----|----------|---------|
| I   | /wa-a/   | /woige/ |
| II  | /kewa/   | /kewoi/ |
| III | /wa/     | /mewoe/ |

#### Past Tense

| I  | /woan/  | /woige/ |
|----|---------|---------|
| II | /kewoe/ | /kewoi/ |
| Ш  | /woe/   | /mewoe/ |

#### Future Tense

| I   | /wa-abaro/ | /woigebaro/ |
|-----|------------|-------------|
| II  | /kewabaro/ | /kewoibaro/ |
| III | /wabaro/   | /mawaharo/  |

#### Present & Past Continuous

| I /pokhan-an/   | /pokhine-an/ |
|-----------------|--------------|
| II /kebokhe-an/ | /kebokhi-an/ |
| III /pokhe-an/  | /mebokhe-an/ |

#### Adverbs :

Examples of Adverbs commonly used in Limbu are given below:

| /allo/         | 'now'            |
|----------------|------------------|
| /aphelie/      | 'when'           |
| /egaŋ/         | 'after'          |
| /togan/        | 'ago, early'     |
| /susers/       | 'late'           |
| /sapma/        | 'a little while' |
| /bara/         | 'fast'           |
| /alek/         | 'quickly'        |
| /idik thellik/ | 'long time'      |

## Senience or Word Order

A Sentence generally consists of a subject and a predicate. A subject is usually a noun or a pronoun with or without attributes. A predicate is formed with a verb which may be transitive or intransitive. Transitive verbs occur with object whereas intransitive verbs occur without object. Some examples of sentence-order in Limbu are as follows:

- (1) Subject + Object + Verb, e.g., sapla kottun/ lothik /a33 book have one I (=I have a book). kegottumsim/ iollik saplaha /kheni books have You (pl.) many (= You have many books). hekelo/ ounsikma. /khene feel cold You
- (2) Subject + Verb s.g. /ana peka/ 'I go'.

Word-sentences: In response to question asked in conversation the answer in a word or words satisfy the complete sense of a sentence in Limbu. e.g.

- kesukpi?/ limbu pama Q. /khene (=Can you speak Limbu?)
- A. Obe. (= Yes).
- Q. /kon-in atille cogu ?/ (=Who did this?)

(= You feel cold).

- A.  $/a\eta a/(=I)$
- /khen kujai-bi ?/ (= Is that true?)
- A. men. (No.)

To command or give order word-sentence is used.

#### Ewample

'Go' /pege/ 'Give' /pire/

#### English Translation:

## The Story of Shrijanga, the Kirāta King

Once upon a time there was a progressive-minded king named Shrijanga in the land of the Kirātas. His reign augured well. Until then there had been no Kirāta alphabet or script. Shrijanga felt sorry for this state of affairs. He summoned a conference of the chieftains. The assembly was called upon to invent Kirāta alphabet. But none succeeded in doing the same. The old script of king Morong was searched out, and proposed to be learnt.

King Shrijanga prayed for God's blessing for the sake of Kirata script he wanted. The omnipotent goddess of knowledge blessed Shrijanga, the king and oradined that inscriptions in Kirata script would be understandable to him. Having bestowed the gift upon Shrijanga the goddess of learning retired.

Thereafter the king took the script to his people and taught them to read and write the same. His minister Yongjonga by name was then first to learn how to read the Kirāta writing.

# A. CENSUS TABLES AND B. OFFICIAL STATISTICS

# A. CENSUS TABLES

## Explanatory Notes

This part contains 44 tables presenting the 1961 Census data for the district. Most of the tables present materials for each police station and some tables present data for each town. The figures for the district as a whole have been given first followed by the figures for a subdivision and the police stations under a subdivision. The police stations in a subdivision have been arranged according to the location code number assigned to a police station for the purpose of the 1961 Census.

The tables presented in this part do not however cover the whole range of census statistics partaining to the district. The tables on migration and certain other topics have not been included in this volume for want of space. Those will be found in

the West Bengal Census Table Volumes.

The following paragraphs will give a brief account of the tables included in this volume. A detailed note on each of the tables has been given in respective census publications containing 1961 Census Tables. Definitions adopted for certain terms often used in census parlance have been given in Appendix I to this note.

#### A-Series

#### General Population Tables

There are, in all, four General Population Tables and three Appendices in this series. But only two Tables i.e., A-I and A-III have been selected for presentation in the District Census Handbook.

#### Table A-I

This table presents area, density, number of villages inhabited and uninhabited separately, number of towns, occupied residential house and total population with sex break-up. These data have been shown down to police station and each town separately under each police station having such town.

The Director of Land Records and Surveys, West Bengal was unable to furnish the revised area figures of the tegritorial units for the 1961 Census. In absence of the figures furnished the State Survey Department, area figures for different territorial units had to be computed for the purpose of Census from the various available sources. Area figures mostly were taken from the last published Jurisdiction List for the manyar. The case of the area figures of the territory transferred from the Purnea District of Bihar is interesting.

Shri V. Viswanathan, I.C.S. who was appointed Special Commissioner for Bihar-West Bengal boundary, did not give in his report a full list of the villages which were transferred to West Bengal from the Purnea District of Bihar. Instead, he listed the villages abutting on either side of the new border. His original report, as published under Ministry of Home Affairs Notification No. S.R.O. 2473, dated the 25th October, 1956 (Gasettee of India, Extra Ordinary, Part II—Section 3 of the 25th October 1956) contained a statement showing area and population transferred to West Bengal as a result of the demarcation. According to this statement 913 villages with a total area of 759 Sq. miles were transferred to West Bengal. The statement was subsequently modified by notification No. S.O. 1728, dated the 11th July, 1960. According to the modified statement the area transferred to West Bengal was as follows:

| Name of Police Station                 |   |   |   |   |   | Area (in Sq. miles) as<br>per Bihar records |  |  |
|--|---|---|---|---|---|---|--|--|
| Thakurganj<br>Chopra<br>Islampur       | } | • |   |   | • | 336-40                                      |  |  |
| Kishanganj<br>Goalpokhar<br>Karandighi | } | • | • | • | • | 246-79                                      |  |  |
| Karandighi                             | • | • | • | • | • | 149-69                                      |  |  |
| Total                                  |   | • |   |   |   | 732-00                                      |  |  |

The Director of Land Records and Surveys, West Bengal, who was looked upon as the appropriate authority to furnish area figures for use in the State Tables of West Bengal, stated that he was not in a position to furnish the figures for the territory transferred from the Purnea District of Bihar till his own survey operation in the area was completed. In the meantime he could neither accept nor challenge the figure (732.88 Sq. miles as per Bihar records) quoted in Shri Viswanathan's modified report.

As figures according to the Survey Directorate of the State were not yet available, reliance had necessarily to be placed on other sources from which the police station area figures could be computed, even if provisionally, for the purposes of the census. But figures collected from different sources gave different results. The Director of Land Records and Surveys, West Bengal, obtained villagewise area figures of the transferred territory from the Director of Land Records, Bihar. The figures were added up in the Census Office and the following result obtained:

#### AREA TRAMPERRED PROM BURAR

| 1 | Thakurgani P.S. }                      | •       | ٠ |   |   | 204-47 | Sq. miles  |
|---|--|---------|---|---|---|--------|------------|
| 3 | Islampur P.S.                          | * • 500 |   | • | • | 133-66 | **         |
| 5 | Kishanganj P.S. )<br>Goalpokhar P.S. ) | •       | ٠ | • | • | 247-09 | **         |
| 6 | Karandighi P.S.                        | •       | ٠ | • | • | 151-77 | . ## 1     |
|   | Total .                                |         |   |   |   | 796-90 | Sq. miller |

According to a computation made at the office of the Registrar General from the records of the 1951

Census of Bihar, the area figures of the transferred territory were;

#### AREA TRANSFERRED FROM BUKAR

| 1 | Thakurgan   | P.S. | •            | • | • |   | 60-5  | Sq. miles |
|---|-------------|------|--------------|---|---|---|-------|-----------|
| Z | Chopra P.S. |      | •            | • | • | • | 139.7 | **        |
|   | Islampur P. | S    | ý. · · · · · |   | • | • | 131-4 | ••        |
| 4 | Kishanganj  | P.S. | 2. 6 24      | • | • | • | 186-7 | **        |
| 5 | Goalpokhar  | P.S. | •            | • | • | • | 73.0  |           |
| 6 | Karandighi  | P.S. | •            | • | • | • | 150-7 | **        |
|   | Total       |      |              |   |   |   | 742-0 | Sq. miles |

According to the figures compiled by the Superintendent of Census Operations, Bihar, for the purposes of his own tables for the 1961 Census, these area figures were as follows:

#### AREA TRANSFERRED FROM BIHAR

| 1 | Thakurgani P.S.                    |   |   |   |   |        | Sq. miles |
|---|------------------------------------|---|---|---|---|--------|-----------|
| 2 | Chopra P.S.                        |   |   |   |   | 146-11 |           |
| 3 | Islampur P.S                       |   |   |   |   | 133-26 | ,,        |
|   | Kishanganj P.S.                    | • |   |   |   | 180-51 |           |
| ř | Goalnokher P.S.                    | • |   | • | • | 66-30  | **        |
| ë | Goalpokhar P.S.<br>Karandighi P.S. | • | • | • | • | 150-24 | **        |
| 0 | Karandigm F.S.                     | • | • | • | • | 130.74 | **        |
|   |                                    |   |   |   |   | ***    |           |
|   | Total .                            | • | • |   |   | /33.30 | Sq. miles |

The matter was referred to the Registrar General for decision. He suggested that the figure worked out by the Superintendent of Census Operations, Bihar, might be adopted. Accordingly, these figures, rounded up to one place of decimal, have been used in computing the area figures of the new police stations comprised in the transferred territory. It is perhaps needless to emphasise that the figures are provisional and subject to revision on the result of the survey conducted by the Director of Land Records and Surveys, West Bengal.

Another contentious matter was introduced by that portion of the ceded territory which was transferred from Chopra Police Station of West Dinajpur District to Phansidewa Police Station of Darjeeling District under notification No. 1177 G.A. dated the 20th March, 1959. The notification did not describe the villages which were involved in the jurisdictional change and the river Mahananda, the northern bank of which now constituted the boundary between two police stations and, for that matter, between two districts, was found to cut through one or two revenue mauzas. It was observed, however, that this portion of the transferred territory roughly coincided with the 12 villages of the old Thakurganj Police Station of Purnea District which were transferred to West Bengal. The area figure of 56.96 Sq. miles, furnished for these villages by the Superintendent of Census Operations, Bihar, was therefore taken to be the area of this tract.

The area of a town administered by the Municipal Commissioners was obtained from the civic authority concerned. For non-municipal towns, the area figures were obtained by adding up the area figures of the constituent mangas. The density figures in the Table A-1 have been calculated on the computed area figures,

Occupied Residential House meant the occupied Census-house. All Census-houses used wholly or partly as dwellings including a parlour or sitting room, a kitchen, which were located in structures auxiliary to the main house were counted as occupied Census-houses, but cow-sheds, grain-gollas etc., though auxiliary to the main house; were excluded.

#### Table A-III

This table gives an account of the distribution of inhabited villages for the district and each police station in accordance with the size of population which has been broadly classified by seven groups i.e., less than 200, 200-499, 500-999, 1,000-1,999, 2,000-4,999, 5,000-9,999 and 10,000 and above.

#### B-Series

#### (i) General Economic Tables

The B-Series tables show the distribution of population by economic activity co-related with sex, age and educational level. The classification by economic activity has been made first by workers and non-workers and then the workers have been further classified into nine broad Industrial Categories.

In the 1941 and earlier Gensuses, religion was adopted as the basis on which primary sorting and tabulations were done. The population classified by religion and sex, thus obtained, was given in the village statistics. In the 1951 Census Economic Classification substituted the classification based on religion. For this purpose population was divided into eight Livelihood Classes and in each livelihood class the self-supporting persons and their dependents were included. At the 1961 Census the concept of dependency was abandoned for Economic Classification of population and the concept of work was adopted.

The workers in the nine Industrial Categories shown in the Primary Census Abstract conform to the industry divisions as given in the Standard Industrial Classification as follows:

#### Category

I Cultivator
II Agricultural Labourer
III In Mining, Quarrying,
Livestock, Foretry,
Fishing, Hunting and
Plantations, Orchards
and allied activities
IV At Household Industry

V In Manufacturing Other than Household Industry

VI In Construction
VII In Trade & Commerce
VIII In Transport, Storage
and Communications

n Division 4
Commerce Division 6
Storage Division 7

IX In Other Services 12 3. Divisions 5, 8 and 9

Definitions of Workers and Non-workers have been given in Appendix I,

#### Industry Division

Minor Groups 000, 001, 002, 003 and 004 from Division 0 Division 0 except Minor Groups 000 to 004 and Division 1 (unless carried on in household level)

Division 0 except Minor Groups 000 to 004, Divisions 1, 2 and 3 (it carried on in household

level)
Division 2 and 3
(unless carried on in house-hold level)

Table B-I is the basic economic table of 1961 Census. It shows the distribution of persons into nine broad Industrial Categories of workers and non-workers, with sex break-up under each category. This table also shows the distribution of the population into four broad age-groups under each category. The data have been presented for the district and each police station with rural-urban break-up. Table B-II which shows similar figures for the towns has been combined with Table B-I and entries for each town have been shown under the police station where it is situated.

#### Table B-III

This table has been prepared in two parts i.e., B-III Part A and B-III Part B, of which the former relates to urban areas and the latter to rural areas. In both the parts each of the nine categories of workers and non-workers have been cross-tabulated by literacy and educational levels with sex break-up. The figures have been presented down to police station and town.

#### Table B-IV

This table shows the distribution of workers engaged in household industry and non-household industry, trade, business, profession or service by sex, industrial divisions, major groups (Appendix II) and by status of employment i.e., "Employer", "Employee", "Single Worker" and "Family Worker" (Appendix I). In the case of workers engaged in household industry the status of their employment has been classified into two i.e., "Employee" and "Others".

The figures have been presented for the working population except cultivators and agricultural labourers of rural and urban areas separately down to police station.

#### Table B-V

This table gives the Occupational Classification (Appendix IV to this note) of persons who are working in non-agricultural sector. In this table data have been shown for rural and urban working population engaged in non-agricultural sector separately with sex break-up, by occupational group. The figures have been presented down to police station.

#### Table B-VI

This table presents the distribution of workers except those engaged in agricultural sector into occupational division and further they have been classified by four broad age-groups and age not stated, and by educational levels. This table shows the figures of urban areas only for the district as a whole.

This table presents workers engaged as cultivators, agricultural labourers and at household industry classified by the nature of their secandary work as cultivators, agricultural labourers and at household industry by sex. The figures have been shown for rural and urban working population separately down to police station. Figures have been presented by major groups of industries in the case of the district and in the case of police stations figures have been shown only against the divisions of the Standard Industrial Classification.

#### Table B-VII Part B

This table furnishes the distribution of workers engaged principally in non-agricultural and non-household industry in accordance with their secondary work at household industry only. These workers have further been classified by sex, industrial divisions and major groups. These figures have been presented down to police station.

#### Table B-VIII Part A

This table accounts for the distribution of unemployed persons of age 15 and above who are seeking employment for the first time and who were employed before but now out of employment by broad age-groups. They have further been classified by sex and educational levels. This part relates to only the urban population and has been shown for the total urban population of the district as a whole.

#### Table B-VIII Part B

This part of the table contains the same material as that contained in Part A. The difference is that this part shows the figures for the rural population only down to police station. Further classification of the educational levels beyond matriculation has not been shown for the rural unemployed persons and the classification by age-groups has also not been done.

#### Table B-IX

This table shows the distribution of all the non-working population by broad age-groups as in Table B-I. They have further been classified by sex and eight different types of activity of non-workers (for definition of different types of activity see the Appendix I). The figures have separately been shown for rural and urban population and down to police station.

#### (ii) Household Economic Tables

Tables B-X to B-XVIII account for the economic activity of a household as unit. The related figures have been compiled and tabulated from the data extracted from the entries of the Household Schedules on the basis of 20 per cent Sample. These tables have been prepared in the Mechanical Tabulation

Unit of the office of the Registrar General of India, New Delhi. The figures of different tables relate to the number of households engaged in cultivation or household industry or both, size of land or interest in land cultivated and/or the household industry conducted by the household and the number of family workers and/or hired workers engaged in either of the two activities separately or together.

#### C-Series

#### Social and Cultural Tables

#### Table C-I

This table gives the composition of the members in a household. Sample Households have been classified by size, composition by family and nonfamily members, and by economic activity. The households engaged in cultivation have been further classified by size of land holding. This table is of sociological interest indicating, as it does, the strength of the joint family system. The material of this table has been collected from the Household Schedules on the basis of 20 per cent Sample and the table has been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for total, rural and urban households for the district only.

#### Table C-II

This is a very important demographic table. This table gives an account of distribution of rural and urban population separately by sex, age-groups and marital status. The entire population in 0-9 years age-group has been treated as never married and as such no other classifications have been shown against them. This table will give the readers an idea about the trend of variations in the proportions in the various marital status conditions over the last ten years. The figures have been presented down to police station.

#### Table C-III Part A

This part of the Table C-III relates to the total population of both the rural and urban areas. This table shows the distribution of the population by sex, age-groups and educational levels. The figures have been presented down to district only.

#### Tables C-III Part B and Part C

These two parts contain the same data as contained in Part A. Only difference is this that Part B deals with the urban population, while Part C deals with rural population. Again in regard to educational levels more detailed educational classifications have been adopted in the case of urban area than those in rural area. In Part B figures have been presented for the total urban population of the district as a whole. Part C represents the population down to police station.

#### Table C-V

This table presents the distribution of population by sex and mother-tongues. There are as many as 69 mother-tongues spoken in this district. The figures have been shown for rural and urban areas separately down to police station.

#### Table C-VII

This table shows the distribution of population for rural and urban areas separately by sex and religions. The population has been classified into six main religions arranged alphabetically and the population belonging to other religions have been shown together under "Other Religions". There is another classification which describes "Religion not stated". The figures have been presented down to police station.

## Table C-VIII Part A

This table presents the distribution of the scheduled caste population by sex, industrial categories of workers and non-workers and by literacy. The figures for the rural and urban scheduled caste population have been shown separately down to police station. This table is considered important from the view point of the classification of scheduled caste population into various economic activities.

#### Table C-VIII Part B

This table contains the same distribution and presentation of data as in C-VIII Part A. This part relates to only scheduled tribes.

#### SCT-Series

Special Tables for Scheduled Castes and Tribes

#### Table SCT-I Part A

This table gives an account of the distribution of the scheduled caste population by sex and industrial categories of workers and non-workers. The entire scheduled caste population belong to as many as 55 castes arranged alphabetically. Persons who returned themselves as belonging to scheduled castes with out specifying the names of the castes have been shown under "Unclassifiable". There is another interesting classification of special occupations i.e., "Tanning and currying of hides and skins" and "Scavenging". The figures have been presented for rural and urban areas separately down to police station.

#### Table SCT-I Part B

This table contains the same distribution and presentation as in Part A. This table relates to scheduled tribes which are as many as 22 in numbers in this district and arranged alphabetically. There is no column for the special occupations in this part,

Book these parts are interesting as they give detailed information about individual castes and tribes.

## Tables SCT-III Part A(i) to Part B(ii)

These tables show the distribution of the scheduled caste or scheduled tribe population by name of caste or tribe, sex and educational leavels for rural and urban areas separately down to district only.

#### Tables SCT-V Part A & Part B

These tables show the distribution of the households belonging to scheduled castes and tribes engaged in cultivation showing their interest in land and size of land. The figures have been collected from the household schedule on the basis of 20 per cent Sample. These tables have also been prepared in the Mechanical Tabulation Unit of the office of the Registrar General of India, New Delhi. The figures have been presented for rural areas only for the district level. Part A of the table relates to the scheduled castes and Part B to the scheduled tribes.

#### Table SC-I

This table shows the distribution of the scheduled caste population by sex, by 3 main types of activities non-working and educational levels. Other types of activity have been clubbed together and shown

under "Others". The figures have been presented for rural and urban areas separately only for the district.

#### Table ST-I

This table gives an account of the distribution of the scheduled tribe population by name of tribe, mother-tongue, bilingualism and by sex. The figures have been presented only for the district.

#### Table ST-II

This table corresponds to SC-I in respect of the manner of distribution and presentation except in that distribution by educational levels has not been shown. It relates to scheduled tribes.

#### Industrial Establishments

This table accounts for the distribution of different industrial establishments returned in the Housing Census of October, 1960 as carried on in Census, house(s) by villages and towns under each police station separately. The nature of industry has been indicated by the minor groups of the Standard Industrial Classification (Appendix II). Number of such industrial establishments has been put within brackets against each minor group. The data have been collected from the Houselists prepared during the house-numbering operation.

#### Definitions

Consus House: A census house is a structure or part of a structure inhabited or vacant, or a dwelling, a shop, a shop, a shop-cumdwelling or a place or business workshop, school, etc., with a separate entrance.

If a building has a number of flats or blocks which have separate entrances of their own and are independent of each other giving on the road or a common staircase or a common courtyard leading to a main gate, they will be considered as separate census houses. If within an enclosed or open compound there are separate buildings then each such building will also be a separate census house. If all the structures within an enclosed compound are together treated as one building then each structure with a separate entrance should be treated as a separate census house.

Comsus Household: A household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so.

Literacy: A person who can neither read nor write or can merely read but cannot write in any language was treated as illiterate. A literate is a person who can both read and write with understanding. The test for reading is ability to read any simple letter either in print or in manuscript with felicity. The test for writing is ability to write a simple letter.

If the person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained the highest examination passed to denote the educational level attained by him was recorded.

Mother-tongue: Mother-tongue is language spoken in childhood by the person's mother to the person or mainly spoken in the household. If the mother died in infancy the language mostly spoken in the person's home in childhood was taken as mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother was written.

Worker: The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry, etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, pro-fession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which the household was visited for enumeration. Persons temporarily incapacitated from work at the time of Census enumeration due to illness or other causes are also treated as Workers. An under-trial prisoner in prison during the Census enumeration is also treated as worker if he did some productive work before he was apprehended. Convicts in a prison or long term inmates of hospitals or mental institutions, are not however treated as Workers. Work includes not only actual work but effective supervision and direction of work. Persons under training as apprentices with or without stipend or wages will be regarded as working. An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working. Posons like beggars, pensioners, agricultural or non-agricultural, royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working. A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as

Status of Employment: (i) An Employer is a person who has to employ other persons in order to perform the work. That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business. But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed

by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

- (ii) An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other worksrs on behalf of their own employers. Such persons are only employees; as explained above, and should not be regarded as employers.
- (iii) A Single Worker is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a Single Worker will include a persons who works in joint partnership with one or several persons hiring no employees, and also a member of a producers' co-operative. Each one of the partners or members of such producers' Co-operatives should be recorded as "Single Worker".
- (iv) A Family Worker is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work every day during the working season. Such an industry should be on a scale larger than what has been covered in 'Household Industry' whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker thay not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Household Industry: A Household Industry is defined as an industry conducted by the Head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house.

A Household Industry should relate to production, processing, servicing, prepairing or making and selling of goods. If does not include professions such as pleader or doctor or barber or waterman or astrologer.

Non-workers: All persons who are not workers are non-workers. They should fall under any one of the following categories:

- Full time student or child attending school who does no other works.
- 2. A person engaged in unpaid home duties (like housewife or other adult female).
- Any dependent, including an infant or child not attending school or a person permanently disabled from work because of illness or old age.
- 4. A retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other persons of independent means for securing which he does not have to work and who does no other work.
- Beggars, vegrants or independent women without indication of source of income and others of unspecified source of existence.
- A convict in jail or an inmate of a penal, mental or charitable institution.
- A person who has not been employed before but is seeking employment for the first time.
- 8. A person employed before but now out of employment and seeking employment.

#### ADDRESS TO

## STANDARD INDUSTRIAL CLASSIFICATION

| 1              | Description  |  |
|----------------|--|--|

## STANDARD INDUSTRIAL CEASSIFICATION ------

| 0.5 |   |  |
|-----|---|--|
|     | n 2 & 3—Manufacturing—cents.  |  |
| 17  | Tegtilo-Missellaneas  |  |
| 4   | Manufacture of carpet and all other similar type of textile products  |  |
|     | Manufacture of hosiery and other knitted fabrics and garments   |  |
|     | Embroidery and making of crepe lace and fringes  Making of textile garments including raincoats and headgear  |  |
|     | Manufacture of made up textile goods except wearing apparel such as curtains, pillow cases, bedding   |  |
|     | materials, mattress, textile bags   |  |
|     | Manufacture of waterproof textile products such as oil cloth, tarpaulin   |  |
|     | Manufacture and recovery of all types of fibres for purposes of padding, wadding and upholstery filling   |  |
|     | Manufacture of coir and coir products   |  |
|     | Processing and manufacture of textile products not covered above  |  |
|     |   |  |
|     | Manufacture of Wood and Wooden Products   |  |
|     | Sawing and platting of wood   |  |
|     | Manufacture of wooden furniture and fixtures  Manufacture of structural wooden goods (including treated timber) such as beams, posts, doors, windows  |  |
|     | Manufacture of wooden industrial goods other than transport equipment such as bobbin and similar  |  |
|     | equipment and fixtures  |  |
|     | Manufacture of other wooden products such as utensils, toys artwares  |  |
|     | Manufacture of veneer and plywood   |  |
|     | Manufacture of boxes and packing cases other than plywood   |  |
|     | Manufacture of materials from cork, bamboo, cane, leaves and other allied products  |  |
|     | Manufacture of other wood and allied products not covered above   |  |
|     | Paper and Paper Products  |  |
|     | Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into  |  |
|     | any kind of paper and paper board in mill   |  |
|     | Manufacture of pulp from wood, rags, waste-paper and other fibres and the conversion of such pulp into  |  |
|     | any kind of paper and paper board handmade  |  |
|     | Manufacture of products, such as paper bags, boxes, cards, envelopes and moulded pulp goods from  |  |
|     | paper, paper board and pulp   |  |
|     |   |  |
|     | Printing and Publishing   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals   |  |
|     | Printing and Publishing  Printing and publishing of newspapers and periodicals  Printing and publishing of books  All other types of printing including lithography, engraving, etching, block making and other work con-   |  |
|     | Printing and Publishing  Printing and publishing of newspapers and periodicals  Printing and publishing of books  All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry   |  |
|     | Printing and Publishing  Printing and publishing of newspapers and periodicals  Printing and publishing of books  All other types of printing including lithography, engraving, etching, block making and other work con-   |  |
|     | Printing and Publishing  Printing and publishing of newspapers and periodicals  Printing and publishing of books  All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry   |  |
|     | Printing and Publishing  Printing and publishing of newspapers and periodicals  Printing and publishing of books  All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry  All types of binding, stitching, sizing and other allied work connected with binding industry  |  |
|     | Printing and Publishing  Printing and publishing of newspapers and periodicals  Printing and publishing of books  All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry  All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather  Manufacture of shoes and other leather footwear   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparet (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery,   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, anddlery, whip and other articles Repair of shoes and other leather footwear  |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear  Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petrelsum and Coal Products  Manufacture of types and tubes Manufacture of rubber footwear  Manufacture of rubber goods used for industrial purpose   |  |
|     | Printing and Publishing Printing and publishing of hooks All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear  Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products  Manufacture of rubber footwear  Manufacture of rubber footwear  Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat   |  |
|     | Printing and Publishing Printing and publishing of hooks All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petroleum and Coal Preducts  Manufacture of types and tubes Manufacture of rubber footwear Manufacture of rubber footwear Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries   |  |
|     | Printing and Publishing Printing and publishing of hooks All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear  Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products  Manufacture of rubber footwear  Manufacture of rubber footwear  Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat   |  |
|     | Printing and Publishing Printing and publishing of hooks All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing inclustry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear  Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, eigarette and key cases, purses, saddlery, whip and other articles  Repair of shoes and other leather footwear  Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products  Manufacture of tyres and tubes Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries  Production of coaltar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing including lithography, engraving, etching, block making and other work connected with printing inclustry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather  Manufacture of clothing and wearing apparel (except footwear) made of leather and fur  Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles  Repair of shoes and other leather footwear  Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products  Manufacture of tyres and tubes  Manufacture of rubber footwear  Manufacture of rubber footwear  Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat  Productions of petroleum, kerosene and other petroleum products in petroleum refineries  Production of coaltar and coke in coke oven  Manufacture of other coal and coaltar products not covered elsewhere   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block raaking and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear Rubber, Petroleum and Coal Products Manufacture of types and tubes Manufacture of rubber footwear Manufacture of rubber footwear Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries Production of coaltar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified  |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block raaking and other work connected with printing inclustry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suiteases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products Manufacture of types and tubes Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries Production of coaltar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products  Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified Manufacture of dyes, paints, colours and varnishes   |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Lather and Lether Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear Repair of all other leather products except footwear Manufacture of tyres and tubes Manufacture of rubber footwear Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber reincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries Production of coaltar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products Manufacture of fertilizers Manufacture of fertilizers Manufacture of fertilizers  |  |
|     | Printing and publishing Printing and publishing of hooks All other types of printing including lithography, engraving, etching, block raaking and other work connected with printing including lithography, engraving, etching, block raaking and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear Rubber, Petroleum and Coal Products Manufacture of types and tubes Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincost Productions of petroleum, kerosene and other petroleum products in petroleum refineries Production of coaltar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products Manufacture of dyes, paints, colours and varnishes Manufacture of dyes, paints, colours and varnishes Manufacture of ammunition, explosives and fire works Manufacture of matches  |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of shoes and other leather footwear Manufacture of leather products (except footwear) made of leather and fur Manufacture of eather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of shoes and other leather footwear Repair of shoes and other leather products except footwear Manufacture of rubber footwear Manufacture of tyres and tubes Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries Productions of poslatar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products  Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified Manufacture of fertilizers Manufacture of matches Manufacture of matches Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other tollet prepara- |  |
|     | Printing and publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block raaking and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry  Leather and Leather Products  Currying, tanning and finishing of hides and skins and preparation of finished leather Manufacture of shoes and other leather footwear Manufacture of clothing and wearing apparel (except footwear) made of leather and fur Manufacture of leather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of all other leather products except footwear  Rubber, Petroleum and Coal Products Manufacture of trubber footwear Manufacture of trubber footwear Manufacture of rubber goods used for industrial purpose Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincost Productions of petroleum, kerosene and other petroleum products in petroleum refineries Production of coaltar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products Manufacture of obesic industrial chemicals such as acids, alkalis and their salts not elsewhere specified Manufacture of dyes, paints, colours and varnishes Manufacture of matiches Manufacture of manufiction, explosives and fire works Manufacture of matiches                            |  |
|     | Printing and Publishing Printing and publishing of newspapers and periodicals Printing and publishing of books All other types of printing including lithography, engraving, etching, block making and other work connected with printing industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of binding, stitching, sizing and other allied work connected with binding industry All types of shoes and other leather footwear Manufacture of leather products (except footwear) made of leather and fur Manufacture of eather products (except those covered by code Nos. 311, 312), such as leather upholstery, suitcases, pocket books, cigarette and key cases, purses, saddlery, whip and other articles Repair of shoes and other leather footwear Repair of shoes and other leather footwear Repair of shoes and other leather products except footwear Manufacture of rubber footwear Manufacture of tyres and tubes Manufacture of all kinds of other rubber products from natural or synthetic rubber including rubber raincoat Productions of petroleum, kerosene and other petroleum products in petroleum refineries Productions of poslatar and coke in coke oven Manufacture of other coal and coaltar products not covered elsewhere  Chemicals and Chemical Products  Manufacture of basic industrial chemicals such as acids, alkalis and their salts not elsewhere specified Manufacture of fertilizers Manufacture of matches Manufacture of matches Manufacture of medicines, pharmaceutical preparations, perfumes, cosmetics and other tollet prepara- |  |
